

### Guide to LTCP Components

The Combined Sewer Overflow (CSO) Long Term Control Plans (LTCPs), as submitted by New Jersey Pollutant Discharge Elimination System (NJPDES) CSO permittees, are comprised of multiple components and have been broken down into separate appendices or as appendices within the reports. Below is a guide to the submitted LTCPs as provided at: <https://www.nj.gov/dep/dwq/cso-ltcsupmittals.htm>. The NJDEP is actively reviewing the LTCP submissions (i.e., Selection and Implementation of Alternatives) as indicated by “Pending Review”. Please note that some of the components have already been submitted to the NJDEP in accordance with the requirements of the NJPDES CSO permits. Public input on the LTCPs will be accepted up until January 31, 2021. Input should be addressed to the [CSO Team Leaders](#).
