INTRODUCTION

The New Jersey Department of Environmental Protection ("Department") is responsible for administering the New Jersey Pollutant Discharge Elimination System ("NJPDES") program that regulates the discharge of pollutants to the surface and ground waters of the State. The Department's authority is derived from the New Jersey Water Pollution Control Act, N.J.S.A. 58:10A-1 et seq. ("State Act"), pursuant to which New Jersey qualified for and has primary responsibility under the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) for the administration of the NJPDES permitting program.

The NJPDES program rules are set forth at N.J.A.C. 7:14A. All persons who wish to discharge wastewater in the state are required to obtain a NJPDES discharge permit from the Department. Pursuant to Section 9 of the State Act, the Department is authorized to "establish and charge reasonable annual administrative fees, which fees shall be based upon, and shall not exceed, the estimated cost of processing, monitoring and administering the NJPDES permits." Fees are assessed to cover the Department's costs to issue and manage NJPDES permits. The NJPDES budget and fee schedule covers activities including the review of NJPDES permit applications, the development of specific permit terms and conditions including wasteload allocations, water quality based effluent limitations, stream monitoring and modeling, conducting compliance and 24-hour sampling inspections, ground water compliance sampling, supervising the installation of ground water monitoring wells, evaluating and approving ground water remediation alternatives, evaluating compliance with the terms and conditions of each NJPDES permit, and providing for the general administrative costs of the NJPDES program including regulatory support, data processing, and budgeting. N.J.S.A. 58:10A-10 provides the Department with the authority to seek civil administrative penalties for failure to pay assessed NJPDES permit fees.

FY 2004 NJPDES BUDGET PROPOSAL

The NJPDES program encompasses the developing, issuing, monitoring, administering and enforcement of NJPDES permits. The Department has historically used State appropriations, and Clean Water Enforcement Act (CWEA) penalties, to fund those activities which have been deemed outside the scope of the NJPDES fee program. However, since July 1, 1995, all Department fee programs are "on budget". This results in the NJPDES and Clean Water Enforcement programs receiving state appropriations each budget cycle. Fees and penalties collected are deposited directly to the General Fund within the Department of Treasury.

The Department has presented the total cost for the Water Pollution Control Program as it pertains to NJPDES permitted facilities in the work plans and budget presented in Appendix B and C, respectively. The total costs for program activities are \$19.3 million, an increase of \$1.0 million from the previous budget year. The portion of the NJPDES permit program which could be funded through NJPDES permit fees in FY2004 is \$16.3 million, including the Stormwater Permitting Program. For nine consecutive years through FY2002 the Department held the total NJPDES fee assessments, excluding Stormwater Permitting, at \$11.2 million or less. In light of continuing State budget constraints this is no longer possible. Starting in FY2003, the Department began to recover a greater percentage of its billable NJPDES program costs through fee revenues. In FY2003 the amount assessed was increased to \$13.6 million (87% of the \$15.6 million budget). This year the Department will be assessing \$12.1 million of the total budget as fees for the non-stormwater permitting portion of the program. Additionally, the fees to be assessed for the Stormwater Permitting Program are projected to be \$3.5 million, which includes partial year fees for the new federally mandated Municipal Stormwater Permitting Program. This amounts to a total assessment of \$15.6 million (96 % of the \$16.3 million budget). The NJPDES fees for FY2004 cover the period July 1, 2003 to June 30, 2004. The Department has also included a comprehensive updating of the minimum fee schedule which was last overhauled in 1995 (see page 5).

FY2004 WATER POLLUTION CONTROL ACT- BUDGET SUMMARY

	ENFORCEMENT SERVICES BUDGET (CWEA)	NJPDES SERVICES BUDGET	TOTAL WATER POLLUTION CONTROL PROGRAM
TOTAL WORK-YEARS	31.37	173.16	204.53
TOTAL PERSONNEL COSTS	\$2,784,597	\$15,370,760	\$18,155,357
TOTAL OPERATING COSTS	\$168,516	\$947,824	\$1,116,340
TOTAL PROGRAM COSTS	\$2,953,112	\$16,318,584	\$19,271,696

The FY2004 Water Pollution Control Program Budget will provide funding for a total of 204.5 work years. This represents an increase of 1 work year from the previous budget cycle, or a 0.5% increase. The NJPDES portion of the Water Pollution Control Program budget is expected to cover the costs of 173 professional and support staff positions assigned to the NJPDES program. This included 117.76 work years assigned to the Division of Water Quality, 35.90 assigned to the Water Compliance and Enforcement Element and 19.50 to other DEP units. An additional 31 work years will be funded from the Enforcement Water Pollution Control Appropriation. These 31 positions are assigned to the NJPDES Program for performance of additional NJPDES related functions and activities that historically have been deemed outside the scope of the NJPDES Fee Program. The Department has presented detailed workplans for the various program categories in Appendix B. The expected outputs for FY2004 are based upon current staffing. Program activities and accomplishments are presented on page 13.

COMPARISON OF NJPDES STAFFING LEVELS

BUDGET CATEGORY	FY2001	FY2002	FY2003	FY2004
MUNICIPAL	45.05	45.75	46.22	48.15
INDUSTRIAL	36.98	37.05	36.50	36.42
GROUNDWATER/STORMWATER	43.13	50.61	48.12	49.72
S.I.U.	2.75	2.79	2.93	2.97
Enforcement-NJPDES funded	37.69	38.33	38.33	35.90
NJPDES PROGRAM	165.60	174.53	172.10	173.16
Enforcement-CWEA funded	29.3	31.35	31.39	31.37
TOTAL	194.90	205.88	203.49	204.53

The current average salary cost for each position in the NJPDES program is \$54,466. The average salary cost for FY2004 has been determined based upon the actual salary costs as of January 1, 2004 and includes annual merit increases and promotions. The fringe benefit rate of 29.15 percent has been established by the Department of Treasury in its current OMB Circular Letter. The indirect rate of 26.19 percent, of salary plus fringe, has been established by the Department of Environmental Protection for FY2004.

The Total Budget increased from \$18.3 million in FY2003 to \$19.3 million in FY2004 mainly due to increased program staffing largely attributable to the new federally mandated Municipal Stormwater Permitting Program. The Department has included \$1.1 million for non-salary costs. This is \$0.1 million less than the previous year. Routine operational costs for office supplies, printing, copiers, telephones, postage, vehicle rental and maintenance, legal advertising and professional services total \$0.72 million. Other major operational costs are for the following:

Division of Law and Public Safety and Office of Administrative Law - A total of \$351,002 has been included in the NJPDES/Enforcement-Water Pollution Control program budget to cover the legal assistance provided by the Division of Law and Public Safety and the Office of Administrative Law. Activities to be funded include permit adjudication, general legal assistance for rule making, and enforcement action adjudication. The Clean Water Enforcement Act provides a cost recovery mechanism for unsuccessful challenges to the Department's enforcement actions. The Department must also cover the costs incurred by the Office of Administrative Law (OAL) for any permit or enforcement cases which are sent to the OAL for processing. Although many cases are settled without a hearing, the OAL still incurs costs to process these cases.

Office of Telecommunication and Information Systems (OTIS) - A total of \$57,676 has been included for OTIS in the NJPDES/Enforcement Water Pollution Control program budget for FY2004 for the cost of computer system operational support.

FY2004 NJPDES FEE ASSESSMENT METHODOLOGY

The Department first established a fee assessment program in 1981. Individual permit fees were based on the facility's potential environmental impact, the billing rate for the category of discharge, and the minimum fee for the category of discharge. The billing rate for each category of discharge is determined annually by subtracting the total minimum fees paid by the permittees in the category of discharge from the total budget for the category of discharge, and then dividing that value by the sum of the calculated environmental impact potentials for all of the dischargers within the category.

This year's fee schedule is assessed in accordance with the current rules. A copy of the current fee regulations is included in Appendix A. This year the percentage of the NJPDES program budget (including the Stormwater Permitting Program) derived from the assessment of minimum fees is 91% of salary costs or 52% of the total program costs, which also includes fringe, indirect and operating costs. The remaining percentage of the NJPDES program costs will continue to be assessed in a manner proportionate to the relative environmental impact potential of the permittee's discharge, pursuant to the fee assessment formula at N.J.A.C. 7:14A-3.1(c) through (g). If a NJPDES permit identifies more than one discharge category, a fee is assessed for each category.

ADJUSTMENTS/CORRECTIONS TO MINIMUM FEE SCHEDULE

Minimum fees are calculated as specified in N.J.A.C. 7:14A-3.1(a)9iii. The following adjustments and/or corrections have been made to the minimum fee schedule in accordance with N.J.A.C. 7:14A-3.1(b)1v to account for changes to the specific category of discharge:

Municipal Stormwater Permit Program – This is a new permit category. As a result of USEPA's Phase II rules published in December 1999, the Department has developed the Municipal Stormwater Regulation Program. This program addresses pollutants entering our waters from certain storm drainage systems owned or operated by local, county, state, interstate, or federal government agencies. The Department is presently issuing NJPDES permit authorizations to municipalities throughout the state, large public complexes, and State, county and interstate transportation entities for discharges from "municipal" separate storm sewers.

The Department has issued four general permits to implement this program. Tier A municipalities are generally located within the more densely populated regions of the state or along the coast. Tier B municipalities are generally located in more rural areas and in non-coastal regions. Public complexes include large public colleges, prisons and hospital complexes. Highway systems include streets,

roads, bridges, tunnels, maintenance facilities, service areas, and rest areas operated by counties or by entities such as the NJ Department of Transportation, NJ Expressway Authority, and the South Jersey Transportation Authority. The four general permits are primarily intended to authorize and control new and existing stormwater discharges to surface water and groundwater from “small municipal separate storm sewer systems” (small MS4s). These permits also authorize certain non-stormwater discharges (e.g., potable water sources, uncontaminated groundwater, and irrigation water) from small MS4s. These four general permits were issued in draft on January 2, 2003 and issued as final on February 2, 2004. The related program regulations were proposed in the the New Jersey Register on January 6, 2003 and were adopted effective February 2, 2004.

The Tier A municipal stormwater general permit is divided into seven population ranges for fee purposes. In projecting the level of effort necessary for the development, issuance, case management, outreach, compliance determination, and administration of these permits, it was determined that the level of effort increased with the population of the municipalities. Similarly, the Public Complex stormwater general permit was divided into four ranges also based upon population. For the Highway Agency stormwater general permit the level of effort was divided into four ranges based upon highway road mileage.

The types of activities and tasks projected and budgeted for under these general permits are as follows:

- Develop, Maintain and Renew Master General Permits
- Issue Individual Requests for Authorization (RFAs)
- Outreach – Case Management, Site Visits, Compliance Assistance, Seminars, Workshops
- Outreach – Mailings and Newsletters
- Individual Facility Contacts
- Permit Management/Review Reports
- Enforcement Staff training
- Program Coordination
- Compliance Activity by Enforcement
- Data Management

The total hours allocated by the Department for case management (including permit development and issuance), compliance activity and data management for the tiered permits in this category are listed in the following table. Based upon the average Department total personnel cost of \$54.60 per hour (including fringe benefits and indirect costs), the annualized cost of administration per facility is calculated and rounded to the nearest \$50 increment.

Minimum Fees for the Municipal Stormwater Permit Program

Average Hourly Rate								\$34.17	
Fringe Rate								25.85%	
Indirect Rate								26.96%	
Total Personnel Cost = AHR + (AHR * FR) + [(AHR + (AHR * FR)) * IR]								\$54.60	
TYPE OF PERMIT	Case Management (Five Year)	Case Management (Per Year)	Compliance Activity (Per Year)	Data Management (Per Year)	Total Staff Hours (Per Year)	Management (Per Year)	Total Hours	Calculated Minimum Fee	Rounded Minimum Fee
DST-Tier B General	31.978	6.396	2.048	0.930	9.374	0.129	9.503	\$518.87	\$500.00

DST-Highway General Permit (mileage range 0-9)	34.934	6.987	2.048	0.930	9.965	0.129	10.094	\$551.15	\$550.00
DST-Highway General Permit (mileage range 10-199)	210.700	42.140	2.048	0.930	45.118	0.129	45.247	\$2,470.55	\$2,450.00
DST-Highway General Permit (mileage range 200-399)	364.052	72.810	19.898	0.930	93.639	0.129	93.768	\$5,119.80	\$5,100.00
DST-Highway General Permit (mileage range 400 +)	694.729	138.946	39.848	0.930	179.724	0.129	179.853	\$9,820.14	\$9,800.00

The minimum fees for the municipal stormwater permit program will be assessed at one-third the full fee in the FY2004 billing cycle since the individual permit authorizations will only be issued for part of the fiscal year. The full fee will be assessed commencing in FY2005.

Updated NJPDES Minimum Fees – The NJPDES Minimum Fee Schedule was last totally recalculated in 1995. The purpose of the update then was to implement a minimum fee schedule which is more closely based upon the estimated cost associated with permit issuance, compliance inspections, and data management of each permit. The minimum fees are calculated by multiplying the total annualized hours associated with the category of permit by the Total Personnel Cost (including fringe benefits and indirect costs). Several new categories of minimum fees have been added over the years to address the development of new general and individual permits which were not adequately covered by the existing minimum fees. An examination of the current minimum fees revealed that it is necessary to normalize the minimum fee schedule to a common base year to adjust the existing minimum fees for salary inflation since the fees were originally adopted. When the minimum fees were recalculated in 1995, the Total Personnel Cost was \$36.28 per hour. When some minimum fees were added in 1999, the Total Personnel Cost was \$49.72 per hour. The current Total Personnel Cost used to adjust the minimum fee schedule is \$54.60 per hour.

The calculations for the adjusted minimum fees (not including the Municipal Stormwater Permit Program fees) are summarized in the table below.

Adjusted Minimum Fees for the NJPDES Permit Program

	1995	1999	2003
Average Hourly Rate (AHR)	\$22.26	\$31.77	\$34.17
Fringe Rate (FR)	24.25%	22.75%	25.85%
Indirect Rate (IR)	31.18%	27.49%	26.96%
Total Personnel Cost = AHR + (AHR * FR) + [(AHR + (AHR * FR)) * IR]	\$36.28	\$49.72	\$54.60

TYPE OF PERMIT	Total Hours	Calculated Minimum Fee	Rounded Minimum Fee	Calculated Minimum Fee	Rounded Minimum Fee	Calculated Minimum Fee	Rounded Minimum Fee	Increase vs. Existing

The minimum fee schedule for FY2004 is summarized in the following table:

Permit Fee Category	Min Fee Code	Minimum Fee FY 2004
Major DSW Domestic Treatment Works (DTW) - Individual Permit	MMJ	\$9,650
Minor DSW Domestic Treatment Works (DTW) - Individual Permit	MMI	\$3,600
Combined Sewer Overflow - Individual Permit Component or General Permit	CSO	\$8,150
Major Industrial DSW - Individual Permit	IMJ	\$8,600
Minor Industrial DSW - Individual Permit	IMI	\$3,600
General Permit - Industrial DSW, DGW, or both (unless otherwise listed)	IGN	\$2,000
Industrial Stormwater - Individual Permit	IST	\$3,550
Stormwater - Basic Industrial General Permit (5G2)	SBG	\$750
Municipal Stormwater – Tier A General Permit (R9) Range 1k	SA1	\$200
Municipal Stormwater – Tier A General Permit (R9) Range 5k	SA2	\$350
Municipal Stormwater – Tier A General Permit (R9) Range 10k	SA3	\$667
Municipal Stormwater – Tier A General Permit (R9) Range 15k	SA4	\$1,000
Municipal Stormwater – Tier A General Permit (R9) Range 20k	SA5	\$1,350
Municipal Stormwater – Tier A General Permit (R9) Range 25k	SA6	\$1,750
Municipal Stormwater – Tier A General Permit (R9) Range 25k+	SA7	\$3,000
Municipal Stormwater – Tier B General Permit (R10)	STB	\$167
Municipal Stormwater – Public Complex General Permit (R11) Range 3k	SP1	\$300
Municipal Stormwater – Public Complex General Permit (R11) Range 6k	SP2	\$500
Municipal Stormwater – Public Complex General Permit (R11) Range 9k	SP3	\$867
Municipal Stormwater – Public Complex General Permit (R11) Range 9k+	SP4	\$1,200
Municipal Stormwater – Highway Agency General Permit (R12) Range 9	SH1	\$183
Municipal Stormwater – Highway Agency General Permit (R12) Range 199	SH2	\$817
Municipal Stormwater – Highway Agency General Permit (R12) Range 399	SH3	\$1,700
Municipal Stormwater – Highway Agency General Permit (R12) Range 400+	SH4	\$3,267
DGW – Initial Individual Permit ²	GWN	\$5,950
DGW – Renewed or Continued Individual Permits ²	GWE	\$2,400
DGW - General Permit (I1, I2 and LSI)	GGN	\$750
DGW - General Permit (T1)	GT1	\$350
DGW - Operating Landfill Individual Permit	LND	\$5,950
Residuals Use or Disposal Operations (unless otherwise listed)	RES	\$10,100
Residuals - Food Processors / WTPs ³ Individual Permit	RFP	\$3,800
Residuals - Category Z Individual Permit ⁴	RTZ	\$1,800
Residuals - General Permit (ZG and 4G)	RTG	\$450
Residuals - Category 04 Individual Permit ⁵	RPH	\$700
Residuals – Land Application General Permit (unless otherwise listed)	RSG	\$750
Significant Indirect User (SIU) (Pretreatment)	SIU	\$5,450

² For a domestic or industrial facility issued an individual NJPDES Discharge to Groundwater permit, the minimum fee is \$5,950 for the first 5 years of the initial permit, and \$2,400 if the permit is renewed or administratively continued. All other domestic or industrial facilities issued an individual NJPDES Discharge to Groundwater permit shall be assessed a minimum fee of \$2,400.

³ WTPs refer to potable water treatment plants.

⁴ Refers to a Residuals Transfer Facilities individual permit.

⁵ Refers to a Residuals - Reed Beds individual permit.

FY2004 PERMIT FEE SCHEDULE & ENVIRONMENTAL IMPACT CALCULATIONS

For FY2004, the total amount to be assessed through permit fees is \$15.6 million, including the Stormwater Permitting Program. Fees are assessed based on the minimum fee for each facility and the facility's potential impact on the environment. The environmental impact fee component is calculated in accordance with the NJPDES regulations in N.J.A.C. 7:14A-3.1 (see Appendix A). The total pollutant load for a surface water discharge represents the total relative impact of the regulated pollutants discharged. The minimum fee is added to the fee calculated based on the environmental impact potential of the discharge. An analysis of the rate calculations is provided in Appendix D.

Municipal Surface Water Permit Fees - The FY2004 NJPDES budget for this permit category is \$5,201,917. The total amount of fees to be assessed for municipal surface water permits is \$5,200,000. Minimum fees from 228 municipal facilities will generate \$1,503,600 (29%) of the total billings. This year's environmental impact portion of the fee is based on the loadings of BOD/COD/CBOD reported during the period January 1, 2002 through December 31, 2002.

Industrial Surface Water Permit Fees - The NJPDES industrial program budget for FY2004 is \$4,336,654. The total amount of industrial permit fees assessed in the category is \$4,350,000. Minimum fees from 436 industrial facilities will provide \$1,632,600 (38%) of the total billings. This year's fees are based on the loadings for all limited pollutants reported during the period January 1, 2002 through December 31, 2002 and the risk factor associated with each parameter. As in years past, where a facility's discharge is limited for BOD, COD and/or TOC, the Department is using the discharger's BOD loading for the pollutant loading calculation, rather than the oxygen demand parameter discharged in greatest quantity, provided the facility is meeting its whole effluent toxicity limits.

Significant Indirect Users (SIU's) - The NJPDES SIU program budget is \$422,579. The total amount of fees to be assessed is \$420,000. Minimum fees from 73 facilities will provide a total of \$397,850 (95%) of the total billings. The environmental impact calculation for SIU permits is based on the total weighted loading of all limited pollutants discharged during the period January 1, 2002 through December 31, 2002 and the risk factors for SIUs. These risk factors are presented in Table I of N.J.A.C. 7:14A-3.1 as the category of risks entitled, "Indirect Users".

Residuals - The Department will assess fees totaling \$211,450 to 55 facilities which handle, distribute and land apply sludge. These facilities are charged applicable minimum fees and are not subject to an environmental impact calculation.

Nonpoint Pollution Control Permit Fees - The NJPDES Nonpoint Pollution Control program budget is \$6,357,434. The program issues permits for Operational Ground Water Discharges and for the Stormwater Permitting Program.

Operational Ground Water Permit Fees - The total amount of fees to be assessed for ground water discharge permits is \$1,970,000. Minimum fees from 828 DGW permits and 22 landfill permits will provide \$1,294,450 (66%) of the total billings. Fees for operating landfills regulated by the Division of Water Quality are based upon the cubic yards of waste received during the period 1985 through 2002 and the acres filled as of 1985. Fees for operating discharges are based on reported flow during the period January 1, 2002 to December 31, 2002.

Stormwater Permitting Program Fees - Fees for Industrial Stormwater General and Individual Permits are set in the NJPDES Rules (N.J.A.C. 7:14A-3.1 - Table III). Fees for the Construction Stormwater

General Permit are set in the NJPDES Rules (N.J.A.C. 7:14A-3.1(j)) at \$300 one time charge for all permittees (revised February 2, 2004, see 36 N.J.R. 813). Fees for the Construction Stormwater General Permit (with the exception of Construction Permit authorizations issued to the N.J. Department of Transportation which are paid to the Department) are used entirely by the Soil Conservation Districts (SCD) and the Department of Agriculture which provides support for SCD operations, and are therefore itemized separately. The amount of stormwater fees to be assessed from 2457 stormwater permits is \$2,837,500. The new Municipal Stormwater Permit Program will assess \$666,977 from 650 permits in FY2004 (see page 108). The total amount of stormwater fees to be assessed is \$3,504,477. These facilities are not subject to an environmental impact calculation.

Proposed fee schedules for the various discharge categories begin on page 47. Any questions concerning individual fee assessments should be directed to the NJPDES Fee Management Unit at (609) 984-4428.

PROPOSED FY2004 NJPDES FEE SCHEDULES AND RATES

Discharge Category	Assessment	Rate
Municipal Surface Water Permits	\$5,200,000	99.9148
Industrial Surface Water Permits	\$4,350,000	3.3176
Pretreatment (SIU's Permits)	\$420,000	1.0340
Municipal/Industrial Ground Water Permits	\$1,570,000	2130.9242
Land Applications of Residuals	\$211,450	0
Operating Landfills	\$400,000	5.6923
NON-STORMWATER NJPDES BILLING	\$12,151,500	
Stormwater Permits	\$3,504,427	0
TOTAL NJPDES BILLING	\$15,655,927	

ACTUAL EXPENDITURES AND FEE COLLECTIONS

The actual costs for FY2002 and FY2003 are based upon program specific activity codes. Each employee completes a bi-weekly time sheet whereby the employee's time is coded to a program activity code or benefit time. Direct program specific codes were summed and general administrative, personnel, and program-wide activity costs were allocated based on the percentage of program specific permitting coding. The appropriate fringe benefit rate and indirect cost rate established by the Department of Treasury and the Department of Environmental Protection were added to the total salary cost to obtain total personnel costs.

The fringe benefit and indirect cost rates assessed to the NJPDES program are as follows. Please note, the Indirect Cost rate is applied to Salary plus fringe benefits.

	FY2002	FY2003
Fringe Benefits	25.85	25.85
Indirect Cost	26.96	26.96

Operating costs for both FY2002 and FY2003 were charged against the NJPDES Account. Operating expenditures have been calculated for each category of discharge based upon the percentage of direct NJPDES program coding.

The Department's fee programs have undergone a significant transition over the past eight years. Specifically, since July 1995 the majority of the DEP's dedicated fee and enforcement programs have been placed "On Budget". What this means is that DEP's programs are appropriated funds through the annual state budget process and all fee and penalty revenues are deposited directly into the general treasury.

FY2003 Actual Expenditures and Fee Collections

For State Budget purposes, the Water Pollution Control Program includes the Clean Water Enforcement Program, the NJPDES Program, the Stormwater Permitting Program, and the Treatment Works Approval Program. The total cost (not including fringe benefit and indirect costs) to administer the Water Pollution Control Program by the Department during the period July 1, 2002 to June 30, 2003 (FY2003) was \$14,616,498. The program expenditures for FY2003 are presented below.

FY2003 Budget for the WATER POLLUTION CONTROL PROGRAM

Resources	
Appropriations:	\$13,250,000
Credits:	\$1,330,926
Transfers:	\$57,774
Carry Forward:	\$0
Reverted:	(\$17,600)
TOTAL RESOURCES:	\$14,621,100
Expenditures	
Salary Costs:	\$13,203,727
Operating:	\$1,412,771
TOTAL EXPENDITURES:	\$14,616,498
Off Budget Costs	
Fringe Benefit Costs:	\$3,188,700
Indirect Costs:	\$4,293,177
TOTAL OFF BUDGET COSTS:	\$7,481,877
TOTAL PROGRAM COSTS:	\$22,098,375

Fees for the NJPDES Program totaling \$11,863,100 and fees for the Stormwater Permitting Program totaling \$1,705,500 were assessed by the Department on May 20, 2003. The total fees received by the Department as of January 23, 2004 against the FY2003 fee assessment was \$10,052,805 for the NJPDES Program and \$1,410,700 for the Stormwater Permitting Program. The Department is continuing its efforts to collect the remaining overdue balance.

NJPDES FEE COLLECTION FY2003

Billing Category	Initial Billing	Billing Adjustment	Credit from FY2002	Adjusted Billing	Paid YTD	Percent Paid
Municipal SW	\$ 5,000,000	\$ (6,735)	\$ -	\$ 4,993,265	\$ 4,441,210	88.94%
Industrial SW	\$ 4,600,000	\$ (61,710)	\$ -	\$ 4,538,290	\$ 3,688,892	81.28%
Land Application	\$ 153,100	\$ (1,250)	\$ -	\$ 151,850	\$ 137,250	90.39%
Municipal/Industrial GW	\$ 1,300,000	\$ (43,442)	\$ -	\$ 1,256,558	\$ 1,095,022	87.14%
SIU	\$ 460,000	\$ (7,324)	\$ -	\$ 452,676	\$ 381,886	84.36%
Landfills	\$ 350,000	\$ (2,361)	\$ -	\$ 347,639	\$ 308,545	88.75%
Total Non-Stormwater	\$ 11,863,100	\$ (122,822)	\$ -	\$ 11,740,278	\$ 10,052,805	85.63%

TOTAL NJPDES	\$ 13,568,600	\$ (94,122)	\$ -	\$ 13,474,478	\$ 11,463,505	85.08%

as of 1/23/2004

FY2002 Actual Expenditures and Fee Collections

For State Budget purposes, the Water Pollution Control Program includes the Clean Water Enforcement Program, the NJPDES Permitting Program, the Stormwater Permitting Program, and the Treatment Works Approval Program. The total cost (not including fringe benefit and indirect costs) to administer the Water Pollution Control Program by the Department during the period July 1, 2001 to June 30, 2002 (FY2002) was \$14,492,461. The program expenditures for FY2002 are presented below.

FY2002 Budget for the WATER POLLUTION CONTROL PROGRAM

Resources	
Appropriations:	\$14,023,000
Credits:	\$1,464,984
Transfers:	\$298,184
Carry Forward:	\$1,558
Reverted:	(\$1,242,803)
TOTAL RESOURCES:	\$14,544,923
Expenditures	
Salary Costs:	\$13,094,504
Operating:	\$1,397,957
TOTAL EXPENDITURES:	\$14,492,461
Off Budget Costs	
Fringe Benefit Costs:	\$3,384,929
Indirect Costs:	\$4,442,855
TOTAL OFF BUDGET COSTS:	\$7,827,784
TOTAL PROGRAM COSTS:	\$22,320,245

Delinquent Fee Collections

The Department has been pursuing an initiative to collect the remaining overdue fee balances from prior years. The initial effort was directed at delinquent fees from fiscal years 1993 to 1999 and has thus far received \$1.68 million of previously unpaid fees. \$0.79 million in unpaid fees is still being pursued. Current efforts are focused on the FY2000 and later delinquent fees. The Department of Treasury fee collection database (VCL) was compared to the NJPDES fee records to identify permittees with potentially overdue fee balances. Letters were sent to affected permittees advising them of their potential delinquency and requesting they review their records to verify whether the listed fees were previously paid, and if not, to submit the delinquent fees. Adjustments for recalculations, previous unposted payments, duplicate or erroneous bills, and uncollectable bills are accounted for. Following is a summary of the collection status for this effort:

NJPDES DELINQUENT FEE COLLECTION EFFORT

Collection Status As of 12/31/2003	a	b	c	d	e	f	g
Billing Year	Expected Billing as per VCL	Billing Adjustment	Adjusted Billing	Paid in 2003	Total Paid to Date	Balance Outstanding	Percent Paid
	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	
FY2002	\$ 12,650,750	\$ (193,692)	\$ 12,457,058	\$ 441,540	\$ 12,238,704	\$ 218,354	98.2%
FY2001	\$ 12,491,850	\$ (148,123)	\$ 12,343,727	\$ 258,896	\$ 11,407,252	\$ 936,475	92.4%
FY2000	\$ 12,586,800	\$ (190,955)	\$ 12,395,845	\$ 252,371	\$ 11,905,809	\$ 490,036	96.0%
Cummulative Total				\$ 952,807		\$ 1,644,865	

The Department is continuing its efforts to collect fees from delinquent facilities. Actions taken by the Department may include issuance of Administrative Orders with Civil Penalties by the Department's Water Compliance and Enforcement Element. The Department will conduct a similar collection effort to collect the overdue balances from subsequent fiscal year billings. Additional options for collection of delinquent fees are under consideration.

NJPDES PERMIT PROGRAM

Through the NJPDES permitting program, the Division of Water Quality (Division) regulates all operational discharges to the surface and ground waters of the State and for residuals generated from treatment systems. This Program also regulates industrial wastewater discharges from Significant Indirect Users ("SIU") to Domestic Treatment Works. The permit process involves pre-application conferences, application tracking, administrative and technical review of the permit applications, preparation of a detailed fact sheet on the facility and the permitted discharge activities, the development of technology and water quality based effluent limitations for conventional, non-conventional and toxic pollutants, monitoring requirements, site inspections, permit coordination, the review of public comments and agency responses, public hearings, permit issuance, and responses to requests for stay of permit conditions and adjudicatory hearings. In addition, the Division provides general information and assistance to all interested parties, reviews the toxicity testing results,

utilizes computer models to calculate water quality based effluent limits, reviews sludge quality reports, and oversees local pretreatment programs. Furthermore, the Division participates in adjudicatory hearings and provides technical support on enforcement matters.

The 1987 amendments to the federal Clean Water Act required the Department to include water quality based effluent limitations for priority toxic pollutants as well as whole effluent toxicity requirements, where necessary to achieve surface water quality standards. To calculate water quality based effluent limitations, the Department must perform substantial technical reviews of effluent quality data, in-stream water quality conditions, and water quality modeling. Furthermore, analysis concerning anti-degradation and anti-backsliding must also be considered, where applicable, in permit development.

As part of the NJPDES program, the Division also implements the Stormwater Permitting Program which is a federally mandated program that was initiated in 1993. A portion of the Stormwater Permitting Program (i.e., the Construction Stormwater General Permit) is administered through the State Soil Conservation Committee, New Jersey Department of Agriculture, and the 16 local Soil Conservation Districts.

The Department has developed and adopted a series of general permits to implement certain major aspects of the Stormwater Permitting Program. The Department also issues individual stormwater NJPDES permits. Where stormwater discharges are included in addition to wastewater, process water, and other non-stormwater discharges, individual NJPDES permits for Discharge to Surface Water are handled by either the Bureau of Point Source Permitting Region 1 or Region 2, and are processed jointly with the Bureau of Nonpoint Pollution Control.

NJPDES PERMIT PROGRAM SIGNIFICANT ACTIVITIES & ACCOMPLISHMENTS

Municipal Stormwater Regulation Program and Underground Injection Control

On January 6, 2003, the Division proposed changes to the NJPDES rules in order to implement the new Municipal Stormwater Regulation Program in response to US Environmental Protection Agency requirements (Phase 2) for municipal stormwater discharge permits. These changes were adopted effective February 2, 2004. This program will regulate all municipalities and counties as well as many state and federal agencies in the State. The program integrates the NJPDES program with other aspects of stormwater management regulated under the Stormwater Management Act. In addition, the amendments address the 1999 changes to the Federal Underground Injection Control (UIC) regulations and revise other UIC requirements relating to the issuance of permits. The rule also expands the NJPDES permit requirements for stormwater discharges associated with construction activity, changing the threshold acreage for requiring a permit from 5 acres of disturbance to 1 acre and adding best management practices to control construction-related pollutants.

The Division issued four draft general permits on January 6, 2003 to implement the Municipal Stormwater Regulation Program. The four permits issued as final on February 2, 2004 are:

■ Tier A Municipal Stormwater General Permit

The Tier A Permit (NJ0141852) is primarily for 465 municipalities assigned to "Tier A" under the NJPDES rule changes. Tier A municipalities are generally located within the more densely populated regions of the state or along or near the coast.

■ Tier B Municipal Stormwater General Permit

The Tier B Permit (NJ0141861) is primarily for 101 municipalities assigned to "Tier B" under the NJPDES rule changes. Tier B municipalities are generally located in more rural areas and in non-coastal regions.

■ **Public Complex Stormwater General Permit**

The Public Complex Permit (NJ0141879) is primarily for county, State, interstate, and Federal agencies that operate "public complexes" (e.g., colleges or universities, hospitals, prisons, office complexes, or military bases) as described in the NJPDES rule changes.

■ **Highway Agency Stormwater General Permit**

The Highway Agency Stormwater General Permit (NJ0141887) is primarily for county, State, interstate, and Federal agencies that operate "highways and other thoroughfares" as described in the NJPDES rule changes.

Since January 2003, many presentations and seminars were conducted for representatives of governmental entities who will require permit authorization and other interested parties. Three seminars, to which all municipalities were invited, were presented in the north, central and southern areas of the state in May and June of 2003. One seminar each for highway agencies and public complexes was given in August 2003. In addition, four presentations were made through the League of Municipalities.

Five General Permits Renewed

The Division issued renewals for the NJPDES Sanitary Subsurface Disposal Ground Water General Permit in April 2003, the NJPDES Potable Water Treatment Plant Filter Backwash Water Discharge to Ground Water General Permit in August 2003, the general permit for stormwater discharges from Concrete Products Manufacturing facilities in September 2003, the Groundwater Petroleum Products Clean-up General Permit in October 2003, and the NJPDES general permit for facilities involved in the land application of food processing by-products in December 2003. General permits reduce permit processing time because a standard set of conditions, specific to a discharge type or activity, are developed (rather than issuing individual permits for each discharge or activity). This permitting approach is well suited for regulating similar facilities or activities that have the same monitoring requirements. In addition, it makes permit requirements consistent across the regulated community.

The following is a brief description of the renewed general permits:

■ **Sanitary Subsurface Disposal Ground Water General Permit**

The Sanitary Subsurface Disposal Ground Water General Permit (category T1) (NJ0130281) was renewed by the Division to authorize discharges of sanitary wastewater to ground water from facilities using subsurface sewage disposal systems (septic systems) whose aggregate design flow is in excess of 2,000 gallons per day per single property. Within 90 days of authorization, the permit requires the development of an inspection schedule, including a monthly visual inspection; a phone list and priority actions to be taken in case of an emergency; and personnel training. Any failures or problems found must be dealt with immediately. Locations of all septic tanks and disposal fields must be detailed on a site plan prepared within one year of authorization. The permit requires that the tank(s) be pumped once every five years. Under the renewed general permit, 505 facilities statewide received renewal authorizations.

■ **Potable Water Treatment Plant Filter Backwash Water Ground Water General Permit**

The Division renewed the Potable Water Treatment Plant Filter Backwash Water Discharge to Ground Water General Permit (category I2) (NJ0108642) for water treatment plants (WTP) which discharge filter backwash/clarifier water to ground water via basins. The permit requires monitoring to determine the quantity and quality of the filter backwash water and to assess its potential impact on ground water quality. Two monitoring programs are included, one each for lined and unlined basins. All permittees are required to report according to the Sludge Quality Assurance Regulations. Within 120 days of authorization all permitted facilities are required to submit a site plan showing the location of all basins and areas of residual storage. Within 180 days of authorization, permittees are

required to prepare a Maintenance, Inspection and Emergency Operations Manual. This manual must include: a list of pollutants generated and discharged; a schedule of maintenance and inspections; a schedule for periodic removal of residuals; an emergency plan; employee training; and all records of maintenance and inspections. Thirty-two WTP facilities are authorized under this general permit.

■ **Concrete Products Manufacturing Industry Stormwater General Permit**

The Division reissued the Concrete Products Manufacturing Industry General Permit (category CPM) (NJ0108456) to authorize new and existing stormwater discharges to surface and/or ground waters from facilities engaged in the manufacture of concrete brick or block, other concrete products, or ready mixed concrete. The permit specifically regulates the discharge of stormwater and discharges of concrete washout wastewater and/or concrete washout wastewater comingled with stormwater. Washout wastewater discharge to groundwater is not authorized. The Department has included in this general permit industry standards for controlling pollutants and preventing them from entering surface or ground waters. These industry standards include: the development of a Drainage Control Plan which includes diverting non-industrial stormwater from mixing with industrial stormwater, insuring that all regulated industrial stormwater discharges through permitted outfalls, and paving all areas where industrial activity is occurring to minimize discharges of pollutants to groundwater (6 months to implement); development of a recycling program including all waste materials generated during concrete production (6 months to prepare, 24 months to implement); and, the preparation and implementation of a Stormwater Pollution Prevention Plan which includes best management activities and monitoring options (6 months to prepare, 24 months to implement). Seventy nine facilities have had their permit authorizations renewed and approximately 35 previously unpermitted facilities are in the process of being authorized.

■ **Groundwater Petroleum Product Clean-up General Permit**

The Division renewed the Groundwater Petroleum Product Clean-up Master General Permit (category B4B) (NJ0102709) on October 30, 2003. This permit covers groundwater clean-ups at contaminated sites, primarily at gas stations and other areas subject to petroleum product contamination. In addition to re-issuing the Master General Permit, the Division subsequently renewed all individual authorizations – approximately 80 permit actions. These actions were accomplished prior to the expiration date of the original Master General Permit.

■ **Residuals- Land Application of Food Processing By-products General Permit**

The general permit for the Land Application of Food Processing By-products (category EG) (NJ0105767) was renewed on December 18, 2003. This general permit is for the management of residuals which are generated from the treatment of wastewater at food processing operations. The 12 existing individual authorizations under this general permit were automatically renewed as part of this process. The general permit provides a mechanism for the land application of food processing residuals and vegetative wastes whose application to lands would benefit crop growth and soil productivity. Besides residuals generated as a result of food processing wastewater treatment, this general permit also covers such materials as tomato skins and seeds, pepper cores, potato peels, cabbage, onion skins, celery pieces, cranberry hulls, cranberry tailings, rice hulls, carrot stems, and coffee grounds.

Municipal and Industrial Surface Water Permitting

The Division has continued in its goals of reducing backlogs for major permits, both industrial and municipal. The backlog for majors has continued in its steady downward trend, beginning with a high of 35% in January 2002 to most recently nearly reaching the 20% goal. The Division will maintain focus on renewal of major permits and anticipates the backlog to be less than 15% for the next fiscal year. As part of the above actions, the Division has successfully renewed a number of older permits, which have been expired in excess of 10 years.

NJPDES Program for Submission of Electronic Monitoring Report Forms

Electronic Data Interchange (EDI) was initiated by the Division of Water Quality beginning in July 2003. Following a series of meetings and work sessions with stakeholders that began in March 2001, a design was developed. The electronic Monitoring Report Form (MRF) is designed to utilize a Microsoft Excel '97 based template. The Division pilot tested the New Jersey Pollutant Discharge Elimination System (NJPDES) EDI application in the Fall of 2002 and permittees are now able to submit all of their MRFs electronically via the Internet. The NJPDES EDI application is available through the NJDEP On-Line web portal at: <https://www.njdeponline.com>. Once the Division receives an EDI application form and approves it, permittees have the ability to access and download their MRFs on-line. Currently 111 permittees are signed up to use EDI to submit their monitoring data. Approximately 279 forms are submitted in a typical month. This accounts for 10% of the data submitted and has been growing as new participants sign up for the convenience, accuracy and savings offered by EDI.

Information Available on DWQ Web Site

The Division of Water Quality continues to maintain a number of helpful documents on it's website which were previously distributed to permittees with their Monitoring Report Forms (MRF). These may be accessed at: www.nj.gov/dep/dwq/bpm.htm.

Additionally, various NJPDES permit forms and checklists may be accessed at: www.nj.gov/dep/dwq/forms.htm.

Other permitting and technical information may be viewed and/or downloaded at: www.nj.gov/dep/dwq/permitng.htm. Recently added to the web site is a link to download data on sewage sludge production for 2002. This information lists the modes of sewage sludge management used by domestic treatment plants and is organized by municipality and county.

The Division receives many public requests for information from the NJPDES database. Some of the more popular and most requested information has been posted on the web site for download and updates and expanded information is made available on a periodic basis. The direct link for accessing this information is www.nj.gov/dep/dwq/database.htm. The Division web site also includes a crosslink to a series of reports that are available through the Department's Open Public Records Act web site. These semi-custom reports are generated through a link to the NJEMS database system. In addition to lists of permits selectable by a variety of categories, this interactive link allows for the retrieval and download of NJPDES DMR and WCR data. The DMR and WCR data is available for user selected periods beginning in July 2000. The report displays the raw data as reported by the permittees to the Department.

ENFORCEMENT ACTIVITIES

The Water Compliance and Enforcement Element monitors compliance with and enforces as necessary permits issued under the New Jersey Pollutant Discharge Elimination System (NJPDES). In addition to the self monitoring reports submitted by the permittee, periodic on-site compliance evaluation inspections are carried out by enforcement staff as a means to evaluate the facilities compliance with all conditions of the permit. In addition, the compliance sampling inspections serve as a means of checking the validity of the self-monitoring data and the previously conducted compliance inspection.

The Department publishes an annual report on the implementation and enforcement actions taken by the Department and delegated local agencies during the preceding year pursuant to the Clean Water Enforcement Act.

Below are the tables summarizing the results of the Department's inspections, the enforcement actions issued and the penalties collected during FY2003.

FY 2003 INSPECTION ACTIVITY

Program	Total Inspections	Regular Inspections	Follow-up Inspections
Surface Water	690	683	7
CSO/Collection System	182	182	N/A
Ground Water	228	225	3
GW-UIC's	562	560	2
Pretreatment	57	54	3
General Stormwater	455	441	14

FY 2003 PENALTY ASSESSMENT RECORD

Program	Amount Assessed	* Amount Collected
Surface Water	\$1,807,935	\$582,398
Ground Water	\$81,000	\$168,196
GW-UIC's	\$78,500	\$99,922
Pretreatment	\$588,930	\$582,930
General Stormwater	\$206,288	\$207,272

* The difference between the amount of penalties imposed and the amount of penalties collected is the result of penalties being contested through the Administrative Hearing process, the disposition of these cases not being resolved as of this date, and penalties collected from previous year's assessments.

APPENDIX A

NJPDES REGULATIONS

N.J.A.C. 7:14A-3.1

Subchapter 3. Determination of Permit Fees

7:14A-3.1 Fee schedule for NJPDES permittees and applicants

(a) Except as provided in (j) and (l) below, the general conditions and applicability of the fee schedule for NJPDES permittees and applicants are as follows:

1. Except as provided by (k) below, the Department shall collect an annual fee for the billing year July 1 to June 30 from all persons that are issued a NJPDES permit or authorization to discharge under a NJPDES general permit or submit a NJPDES permit application or request for authorization.
2. The Department shall not assess any fee to public schools or religious or charitable institutions.
3. All NJPDES permittees/applicants that are issued a draft or final NJPDES permit, or that are issued an authorization to discharge under a final NJPDES general permit, shall submit payment within 30 days of assessment of the fee by the Department.
 - i. Upon receipt of a completed application or request for authorization, the Department shall assess the minimum fee as set forth in (h) below.
 - ii. Upon issuance of the final permit or of an authorization to discharge under a final NJPDES general permit, the annual fee shall be calculated and pro-rated for the period of the fee year remaining. The minimum fee already paid shall then be subtracted from the pro-rated assessment. In no case, however, will such payment of a pro-rated fee result in a fee that is less than the minimum fee for the category of discharge. The permittee may request a fee recalculation as provided at (a)6 below, once the first required monitoring report has been completed.
4. Payment of all fees shall be made by check or money order, payable to “Treasurer, State of New Jersey” and submitted to:

New Jersey Department of the Treasury
Division of Revenue
PO Box 417
Trenton, New Jersey 08625- 0417

5. If the permittee/applicant fails to submit payment to the Department of the Treasury within 30 days of assessment of the fee, the Department may, in its discretion, take one or more of the following actions:
 - i. Return the NJPDES permit application or request for authorization to the applicant;
 - ii. Deny issuance of a final permit or authorization under a final general permit;
 - iii. Revoke a final permit (including revocation of a permittee's authorization to discharge under a general permit); and/or
 - iv. Assess penalties pursuant to N.J.S.A. 58:10A-10 and N.J.A.C. 7:14-8.
6. If the permittee objects to the assessment, the Department shall recalculate a permit fee upon receipt of a request from the permittee in writing within 30 days of assessment of the fee. The Department shall not recalculate a fee where the permittee has failed to submit information in compliance with its NJPDES permit.

- i. A permittee may only contest a fee imposed pursuant to (k) below based on the following:
 - (1) The Department has no factual basis to sustain the charges assessed in the fee;
 - (2) The activities for which the fee was imposed did not occur;
 - (3) The charges are false or duplicative; or
 - (4) The charges were not properly incurred because they were not associated with the Department's oversight or remediation of the case.
 - ii. A permittee may not contest a fee imposed pursuant to (k) below if the challenge is based on the following:
 - (1) An employee's hourly salary rate;
 - (2) The Department's salary additive rate, indirect rate, or fringe benefit rate; or
 - (3) Management decisions of the Department, including decisions regarding who to assign to a case, how to oversee the case or how to allocate resources for case review.
 - iii. A permittee objecting to a fee imposed pursuant to (k) below shall include the following in a request for a fee review:
 - (1) A copy of the bill;
 - (2) Payment of all uncontested charges, if not previously paid;
 - (3) A list of specific fee charges contested;
 - (4) The factual questions at issue in each of the contested charges;
 - (5) The name, mailing address and telephone number of the person making the request;
 - (6) Information supporting the request or other written documents relied upon to support the request.
7. The Department, in calculating Environmental Impact, shall use information reported by the permittee on Discharge Monitoring Reports (DMRs) and/or Monitoring Report Forms (MRFs) for the 12 month period for which data is available on the Department's computer. The selected 12 month monitoring period will be documented in the Annual NJPDES Fee Schedule Report. Where this information is not available, the Department shall use permit limitations, information submitted in permit applications, technical reports prepared by the Department or submitted by the permittee, or other permits issued by the Department.
 8. Except as provided by (k) below, the Department, upon the revocation of a NJPDES permit, or revocation of a NJPDES/SIU permit in accordance with N.J.A.C. 7:14A-21.9, shall upon written request of the permittee prorate the fee for the number of days that the facility was in operation or was discharging under a valid NJPDES/SIU permit during the billing year and return to the permittee the amount that is in excess of the minimum annual fee for the specific category of discharge.
 9. Except as provided by (k) below, the annual fee for all discharges is calculated by applying the formula:

Fee = (Environmental Impact x Rate) + Minimum Fee, where:

- i. Environmental Impact is the Department's assessment of potential risk of discharge to the environment as derived under (c) through (g) below.
- ii. Rate is the dollar cost for each weighted unit of Environmental Impact. Rate is calculated as follows:

$$\text{Rate} = (\text{Budget} - \text{Sum of Minimum Fees}) / \text{Total Environmental Impact}$$

- (1) Budget is the total budget for the category of Discharge.
 - (2) The Sum of Minimum Fees is the total amount of minimum fees to be paid by all dischargers in the category of discharge.
 - (3) Total Environmental Impact is the sum of environmental impact for all dischargers in the category.
 - (4) The budget and the total environmental impact shall be adjusted to reflect those facilities, if any, assessed a maximum permit fee.
- iii. The minimum fee is a base cost to which the product of the Environmental Impact and the Rate identified under (a)9i and ii above is added. The minimum fee for any permit category is calculated by using the following formula and rounding to the nearest \$50.00 increment:

$$\text{Minimum Fee} = \frac{\text{Hours} \times \text{Cost Per Hour}}{5}, \text{ where:}$$

Hours = Total hours allocated by the Department on the administration, including permit issuance, inspection and data management, of the permit per facility over a five year period in each category.

Cost Per Hour = Total personnel cost per hour, including fringe benefits and indirect costs.

The minimum fees are set forth in Table III below. For any new or revised category of discharge, the Department shall calculate a minimum fee and shall list it in the Annual NJPDES Fee Schedule Report for public comment under (b) below.

10. The maximum fee to be assessed for any category of discharge shall be 10 percent of the budget for the category of discharge.
11. If a factual dispute involving a fee imposed pursuant to (k) below cannot be resolved informally, a permittee may request an adjudicatory hearing on the matter pursuant to N.J.A.C. 7:14A-17.2.

(b) The Department shall prepare an Annual NJPDES Fee Schedule Report and provide for a public hearing on the Report.

1. The Annual NJPDES Fee Schedule Report shall include the following:
 - i. A detailed financial statement of the actual administrative cost of the NJPDES program by account title;
 - ii. A detailed financial statement of the actual revenue collected, including any surplus which can be credited or any deficit to be assessed in determining the fee schedule.
 - iii. A detailed financial statement of the anticipated cost of the NJPDES program, including:

- (1) A breakdown of the program by account title;
- (2) An estimate of the amount of fees that will be collected; and
- (3) The current year's fee schedule.

iv. A report of the NJPDES program activities, including:

- (1) A list of permits issued;
- (2) A list of facilities inspected;
- (3) A list of administrative orders and administrative consent orders issued by the Department (by type of order and discharge involved); and
- (4) A summary of variance request activities under Section 316 of the Federal Water Pollution Control Act (33 U.S.C. §§1251 et seq.).

v. A list of all minimum fees calculated in accordance with (a)9iii above, and the basis for any new or revised minimum fee.

2. The Department shall provide for a hearing on the Annual NJPDES Fee Schedule Report. The Department shall provide public notice of the hearing at least 30 days prior to the date of the hearing:

- i. In the New Jersey Register and one newspaper of general circulation; and
- ii. By mailing a copy of the Report to each NJPDES applicant/permittee the Department identifies as subject to a NJPDES annual fee.

3. The Department shall publish a Notice of Adoption of the Annual NJPDES Fee Schedule Report, which shall include a summary of the public comments and Department responses. Upon publication of this Notice of Adoption in the New Jersey Register, any adopted new or revised minimum fee(s) identified in the Notice of Adoption shall be incorporated into Table III as an administrative change.

(c) The annual fee for discharges to surface water is calculated by using the following Environmental Impact in the annual fee formula:

1. The Environmental Impact of a discharge to Surface Water from an industrial treatment works (ITW) regulated under an individual NJPDES permit is derived by applying the formula:

Environmental Impact = (Total Pollutant Load + Heat Load) where:

i. Total Pollutant Load is the sum of all limited pollutants (in kilograms per day) multiplied by their associated risk factors as listed in Table I below.

- (1) Net loadings will be used if a net limit has been established in the NJPDES permit. If a permittee reports a pollutant load less than zero, a zero will be used to calculate the Total Pollutant Load.
- (2) Any pollutant listed in Table I will be deleted from the Total Pollutant Load, if reported as non-detectable in all samples for the monitoring period. When any of the pollutants listed in Table I is detected at least once in the monitoring period, the Department shall calculate the Total Pollutant Load using one-half the reported minimum detection limit for pollutant concentrations.

ii. Heat Load is the average mBTU's (million British Thermal Units) per hour of the effluent discharged. Where Heat Load is not reported in mBTU's per hour, the Department shall estimate the Heat Load using the calculated difference between the influent and effluent temperature (in degrees celsius) multiplied by the amount (in million gallons per day) of effluent discharged and a unit conversion factor of 0.6255. The Department shall use an

average influent temperature of 5.57 degrees celsius during the period November to April and 18.87 degrees celsius during the period May to October.

2. The Department shall assess an additional fee to NJPDES permittees who request a variance under Section 316 of the Federal Water Pollution Control Act (33 U.S.C. §§1251 et seq.). The annual fee shall be assessed on the basis of the administrative cost that is incurred by the Department and the cost of the technical review performed by a consultant hired by the Department.
3. The Environmental Impact of a discharge to surface water from a domestic treatment works (DTW) regulated under an individual NJPDES permit is derived by applying the formula:

Environmental Impact = Average kilograms per day of oxygen demand discharged, as measured by Biochemical Oxygen Demand (BOD₅), Carbonaceous Biochemical Oxygen Demand (CBOD₅) or other oxygen demand parameter selected by the Department, as determined in accordance with (a)7 above.

4. The Environmental Impact value for any type of discharge to surface water regulated under a general permit shall be zero.

(d) Except as provided by (k) below, the annual fee for discharges to groundwater, except for residuals and landfills covered in (e) and (f) below, is calculated by using the following Environmental Impact in the annual fee formula:

1. The Environmental Impact of a Discharge to Groundwater regulated by an individual NJPDES permit is derived by applying the formula:

Environmental Impact = (Risk x Quantity x Groundwater Rating Factor) where:

- i. Risk is the sum of the rating numbers, based on the degree of hazard, assigned by the Department to each type of waste stored, treated or discharged. The rating numbers are assigned as follows:

<u>Rating</u>	<u>Risk</u>
1	Non-contact cooling water, treated groundwater filter backwash, sanitary wastewater with at least secondary treatment
2	Other treated and untreated sanitary wastewater, food processing waste, stormwater runoff including runoff from non-hazardous waste storage areas, sanitary sludge, discharge from quarry operations including sand and gravel operations
5	Non-hazardous industrial process waste
15	Metal plating waste, hazardous industrial process waste, landfill leachate, or groundwater, wastewater, stormwater runoff or sludge containing hazardous constituents

- ii. Quantity is the average daily volume in millions of gallons discharged by the permittee for the monitoring period selected by the Department in (a)7 above. Where quantity is unavailable or is unknown, the Department shall assign a default quantity of 0.002 million gallons per day for discharges from domestic treatment works and a default quantity of 0.001 million gallons per day for other discharges.
- iii. Groundwater Rating Factor is one tenth of the sum of the Groundwater Monitoring Status Factor, the Aquifer Factor, Groundwater Use Factor and Permeability Rating where:
- (1) Ground Water Monitoring Status Factor is the rating number, assigned to the facility based on the level of monitoring and/or remediation required at the facility, as set forth in the NJPDES permit, administrative order, administrative consent order or directive letter as follows:

RATING	STATUS
1	Permittee is not required to conduct ground water monitoring under the NJPDES permit
2	Permittee is conducting post-closure or post remediation monitoring
2	Permittee is required to conduct detection monitoring
5	Ground water remediation and/or hydraulic source control is being performed at the site.
5	Alternative concentration limits have been established
10	Compliance monitoring is required as ground water contamination has been identified in detection monitoring phase and/or ground water remediation is required

- (2) Aquifer Factor is the rating number, based on ground water yield potential, assigned to each formation listed in Table II below. Where a facility is located on an unlisted formation, the Department shall determine the aquifer factor. Where

the facility is located on more than one formation the highest rating number will be assigned.

- (3) Ground water use is the rating number assigned to the municipality where the permitted facility is located based on the percentage of the municipality that relies on public or private wells for drinking water and the volume of ground water withdrawn in million gallons per day (MGD). The Department, in the Annual NJPDES Fee Schedule Report, prepared pursuant to (b) above, shall set forth the individual ratings assigned to each municipality. Where a municipality's percent use and volume result in different ratings, the highest Ground Water Use rating number derived below shall apply. Ground Water Use rating numbers are assigned as follows:

RATING	GROUND WATER USE	PERCENT USE	VOLUME IN MGD
5	A	>50%	>3
3	B	10% - 50%	1 - 3
1	C	<10%	<1

- (4) Permeability Rating is the rating number, based on hydraulic conductivity in centimeters per second, of the geological formation immediately beneath the regulated unit or if present, the facility liner material for facilities in detection monitoring. For all other facilities, the permeability rating is based on the hydraulic conductivity of the geological material contaminated. Facilities assigned a Groundwater Monitoring Status factor of 10, that have demonstrated control of the plume of groundwater contamination shall be assigned a permeability rating of 10. Where permeability is unavailable or is unknown, the Department shall assume a permeability rating of 20. The rating numbers are assigned as follows:

<u>Rating</u>	<u>Permeability</u>
10	$<10^{-7}$
11	10^{-6}
12	10^{-5}
14	10^{-4}
18	10^{-3}
20	10^{-2}
22	$>10^{-2}$

2. The Environmental Impact value of any type of discharge to ground water regulated under a general permit shall be zero.

(e) The Environmental Impact value for facilities which land apply, handle or distribute residuals listed in (h)3 below shall be zero.

(f) Except as provided by (k) below, the annual fee for discharges to ground water from sanitary landfills and sites containing wrecked or discarded equipment is calculated by using the following Environmental Impact in the annual fee formula:

1. The Environmental Impact of a Discharge to Ground Water from sanitary landfills and sites containing wrecked or discarded equipment is derived by applying the formula:

Environmental Impact = (W1 + W2) x (Closure Status Factor + Ground Water Rating Factor)
where:

- i. W1 is the total number of acres filled as of January 1, 1985 multiplied by the sum of the rating numbers, based on the degree of hazard, assigned by the Department to each waste type (as set forth in N.J.A.C. 7:26-2.13) permitted for disposal before January 1, 1985. The rating numbers are assigned as follows:

RATING	WASTE TYPE
1	Types 13, 23
2	Types 10, 12, 27, 72, 73, 74
4	Types 18, 25
8	Types 26, 70 and wrecked or discarded equipment
16	Types 17, 28, 76, 77

- ii. W2 is the total cumulative amount of each waste type received (in cubic yards) since January 1, 1985 divided by 4,840 (the square yards in an acre) and multiplied by the rating number assigned to each waste type as set forth in (f)1i above.
- iii. Closure Status Factor is the rating number, based on the operating status of the landfill, assigned by the Department to each facility. The rating numbers are assigned as follows:

Rating	Closure Status
1.0	Operating landfill and sites containing wrecked or discarded equipment
0.5	Landfill terminated after January 1, 1982 without a Department approved closure plan
0.2	Landfill terminated prior to January 1, 1982
0.1	Landfill terminated and properly closed in accordance with a Department approved closure plan

iv. Ground Water Rating Factor is the number derived under (d)1iii above.

(g) The annual fee for discharges by a significant indirect user to a domestic treatment works is calculated by using the following Environmental Impact in the annual fee formula:

1. The Environmental Impact of a discharge by a significant indirect user (SIU) to a domestic treatment works (DTW) is derived by applying the formula:

Environmental Impact = (Total Pollutant Load)

- i. Total Pollutant Load is the sum of all limited pollutants (in kilograms per day) multiplied by their associated risk factors as listed in Table I below.

- (1) Any pollutant listed in Table I will be deleted from the Total Pollutant Load, if reported as non-detectable in all samples for the monitoring period. When any of the pollutants listed in Table I is detected at least once in the monitoring period, the Department shall calculate the Total Pollutant Load using one-half the reported minimum detection limit for pollutant concentrations.

(h) The fees for exemptions for certain types of residual use or disposal operations shall be assessed as follows:

1. Permit exemptions or Letters of Land Application Management Approvals authorizing the land application of sludge-derived products at specific sites in accordance with a Department-approved distribution program shall be assessed a fee of \$250.00 for the duration of the permit exemption or Letter of Land Application Management Approval. The Department will not consider a request for a permit exemption or Letter of Land Application Management Approval complete unless the request is accompanied by the fee; and
2. General distribution permit exemptions providing Department approval of a sludge derived product distribution program which is not directly regulated for residuals handling through an individual NJPDES permit shall be assessed a fee of \$2,700 for the duration of the exemption. The Department will not consider a request for a permit exemption complete unless the request is accompanied by the fee.

(i) (Reserved)

(j) For NJPDES Permit No. NJ0088323 (referred to as the category 5G3 “construction activity” stormwater general permit), there is no annual or minimum fee. Instead, a fee of \$300.00 shall be paid by check or money order, payable to “Treasurer, State of New Jersey,” and submitted to the soil conservation district along with each request for authorization submitted under that permit, except as provided in (j)1 below. The soil conservation district shall forward all such checks and money orders to the State Soil Conservation Committee in the Department of Agriculture, which shall cause such checks and money orders to be deposited to the credit of the State. The soil conservation district shall not certify any request for authorization that is not accompanied by this fee.

1. For a project that the New Jersey Department of Transportation (NJDOT) is constructing or proposes to construct for which a stormwater discharge is regulated under this general permit, the fee of \$300.00 shall be paid to the Department.

(k) The fee for discharges to groundwater required for conducting remediation, as defined by N.J.A.C. 7:26E, of contaminated sites, and for any NJPDES discharge to groundwater permits issued by the Site Remediation Program, is calculated and billed through requirements specified in N.J.A.C. 7:26C-9.3.

(l) The Department shall assess, where applicable, the fee for laboratory certification pursuant to the schedule set forth at N.J.A.C. 7:18.

(m) Any fee under this section that is subject to N.J.A.C. 7:1L shall be payable in installments in accordance with N.J.A.C. 7:1L.

**Table III
Minimum Fees**

Permit Fee Category ¹	Min Fee Code	Minimum Fee
1. Major DSW Domestic Treatment Works (DTW) – Individual Permit	MMJ	\$6,400
2. Minor DSW Domestic Treatment Works (DTW) – Individual Permit	MMI	\$2,400
3. Combined Sewer Overflow – Individual Permit Component or General Permit	CSO	\$5,400
4. Major Industrial DSW – Individual Permit	IMJ	\$5,700
5. Minor Industrial DSW – Individual Permit	IMI	\$2,400
6. General Permit – Industrial DSW, DGW, or both (unless otherwise listed)	IGN	\$1,300
7. Industrial Stormwater - Individual Permit	IST	\$2,350
8. Stormwater - Basic Industrial General Permit (5G2)	SBG	\$500.00
9. DGW – Initial Individual Permit ²	GWN	\$3,950
10. DGW – Renewed or Continued Individual Permits ²	GWE	\$1,600
11. DGW - General Permit (I1 and I2)	GGN	\$500.00
12. DGW - General Permit (T1)	GT1	\$300.00
13. DGW - Operating Landfill Individual Permit	LND	\$3,950
14. Residuals Use or Disposal Operations (unless otherwise listed)	RES	\$6,700
15. Residuals - Food Processors / WTPs ³ Individual Permit	RFP	\$2,550
16. Residuals - Category Z Individual Permit ⁴	RTZ	\$1,600
17. Residuals - General Permit (ZG and 4G)	RTG	\$400.00
18. Residuals - Category 04 Individual Permit ⁵	RPH	\$650.00
19. Residuals – Land Application General Permit (unless otherwise listed)	RSG	\$500.00
20. Significant Indirect User (SIU) (Pretreatment)	SIU	\$3,600
21. Landfills operating or terminated after January 1, 1982 without an approved closure plan	⁶	\$2,500
22. Terminated Landfills properly closed or closed prior to January 1, 1982	⁶	\$500.00
23. Emergency Permit issued pursuant to N.J.A.C. 7:14A-6.14		⁷

¹ For names corresponding to the general permit category see N.J.A.C. 7:14A-6.13(c).

² For a domestic or industrial facility issued an individual NJPDES Discharge to Groundwater permit, the minimum fee is \$3,950 for the first 5 years of that permit, and \$1,600 if the permit is renewed or administratively continued. All other domestic or industrial facilities issued an individual NJPDES Discharge to Groundwater permit shall be assessed a minimum fee of \$1, 600.

³ WTPs refer to potable water treatment plants.

⁴ Refers to a Residuals Transfer Facilities individual permit.

⁵ Refers to a Residuals - Reed Beds individual permit.

⁶ This permit is issued and administered by the Division of Solid and Hazardous Waste.

⁷ Fee based on category for type of discharge.

APPENDIX B

NJPDES PROGRAM WORKPLANS

FY 2004 CATEGORY WORKPLANS - MUNICIPAL PROGRAM

BUREAU	WORK TASK	WORK YEARS AVAILABLE	BUDGETED AMOUNT
Director's Office	Program Administration	0.54	\$29,630
	Program Support	2.16	\$117,593
