INTRODUCTION

The New Jersey Department of Environmental Protection ("Department") is responsible for administering the New Jersey Pollutant Discharge Elimination System ("NJPDES") program that regulates the discharge of pollutants to the surface and ground waters of the State. The Department's authority is derived from the New Jersey Water Pollution Control Act, N.J.S.A. 58:10A-1 et seq. ("State Act"), pursuant to which New Jersey qualifies for and has primary responsibility under the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) for the administration of the NJPDES permitting program.

The NJPDES program rules are set forth at N.J.A.C. 7:14A. All persons who wish to discharge wastewater in the State are required to obtain a NJPDES discharge permit from the Department. Pursuant to Section 9 of the State Act, the Department is authorized to "establish and charge reasonable annual administrative fees, which fees shall be based upon, and shall not exceed, the estimated cost of processing, monitoring and administering the NJPDES permits." Fees are assessed to cover the Department's costs to issue and manage NJPDES permits. The NJPDES budget and fee schedule covers activities including the review of NJPDES permit applications, the development of specific permit terms and conditions, evaluating compliance with the terms and conditions of each NJPDES permit, conducting compliance inspections and providing for the general administrative costs of the NJPDES program including regulatory support, data processing, and budgeting. N.J.S.A. 58:10A-10 provides the Department with the authority to seek civil administrative penalties for failure to pay assessed NJPDES permit fees.

FY 2010 NJPDES BUDGET PROPOSAL

The NJPDES Program encompasses both permitting and enforcement activities. Permitting activities include developing, issuing, monitoring and administering NJPDES permits. Enforcement activities include inspections and, when appropriate, follow up activities to gain permit compliance. The total Water Pollution Control (WPC) budget consists of the NJPDES and Enforcement Services budgets that are funded by State appropriations given at the start of the State fiscal year. The Department assesses permit fees to cover 100% of the NJPDES Services budget and all fees collected are deposited directly into the General Fund within the Department of the Treasury. Similarly, all penalties collected are also deposited into the General Fund.

The total costs for the WPC as it pertains to NJPDES permitted facilities in the work plan and budget are presented in Appendix B and C respectively. For fiscal year (FY) 2010, the total costs for program activities are \$23.9 million, a decrease of \$2.0 million from the previous budget year. The portion of the NJPDES program that needs to be funded through NJPDES permit fees in FY2010 is \$20.8 million. The Department assessed \$12.8 million of the total budget as fees for the Surface Water portion of the program; \$0.4 million for the Significant Indirect User portion; \$1.8 million for the Ground Water (including Landfills) portion; \$0.2 million for the Residuals portion and \$5.6 million for the Stormwater portion. This amounts to a total assessment of \$20.8 million (100 percent of the \$20.8 million budget). The NJPDES fees for FY2010 cover the period July 1, 2009 to June 30, 2010. There are no changes to the minimum fee schedule this year.

FY2010 WATER POLLUTION CONTROL ACT- BUDGET SUMMARY

	ENFORCEMENT SERVICES BUDGET (CWEA)	NJPDES SERVICES BUDGET	TOTAL WATER POLLUTION CONTROL PROGRAM
TOTAL WORK-YEARS	23.58	156.31	179.89
TOTAL PERSONNEL COSTS	\$2,792,392	\$18,510,552	\$21,302,944

TOTAL PROGRAM COSTS	\$3,082,302	\$20,829,384	\$23,911,686

The FY2010 Water Pollution Control Program Budget will provide funding for a total of 179.89 work years (a decrease of 12.52 work years from the previous budget cycle). The NJPDES portion of the Water Pollution Control Program budget is expected to cover the costs of 156.31 positions assigned to the NJPDES program (a decrease of 9.16 work years from the previous budget cycle). This includes 113.95 work years assigned to the Division of Water Quality, 24.36 assigned to the Water Compliance and Enforcement Element and 18 to other DEP units. An additional 23.58 work years will be funded from the Enforcement Water Pollution Control Appropriation. These 23.58 work years are assigned to the NJPDES Program for performance of additional NJPDES related functions and activities that historically have been deemed outside the scope of the NJPDES Fee Program. The Department has included detailed workplans for the various program categories in Appendix B. The expected outputs for FY2010 are based upon current staffing.

Enforcement-CWEA funded	24.41	26.77	26.94	23.58
TOTAL	215.91	204.22	192.41	179.89

The current average salary cost for each position in the NJPDES program is \$72,361. The average salary cost for FY2010 has been determined based upon the anticipated salary costs as of January 1, 2010. The fringe benefit rate of 36.05 percent has been established by the Department of Treasury in its current OMB Circular Letter. The indirect rate of 20.29 percent, of salary plus fringe, has been established by the Department of Environmental Protection for FY2010.

The Total Budget decreased from \$25.9 million in FY2009 to \$23.9 million in FY2010 mainly due to salary reductions as a result of a reduction in work years. The Department has included \$2.61 million for non-salary costs. This is an decrease of \$0.04 million from the previous year. Routine operational costs for office supplies, printing, copiers, telephones, postage, vehicle rental and maintenance, legal advertising and professional services total \$1.99 million. Other major operational costs include the following:

Division of Law and Public Safety and Office of Administrative Law - A total of \$564,987 has been included in the NJPDES/Enforcement-Water Pollution Control program budget to cover the legal assistance provided by the Division of Law and Public Safety and the Office of Administrative Law. Activities to be funded include those related to permit adjudication, general legal assistance for rule making, and enforcement action adjudication. The Clean Water Enforcement Act provides a cost recovery mechanism for unsuccessful challenges to the Department's enforcement actions. The Department must also cover the costs incurred by the Office of Administrative Law (OAL) for any permit or enforcement cases which are sent to the OAL for processing. Although many cases are settled without a hearing, the OAL still incurs costs to process these cases.

Office of Information Technology (OIT) - A total of \$53,131 has been included for OIT in the NJPDES/Enforcement Water Pollution Control program budget for FY2010 to cover the cost of computer system operational support.

FY2010 NJPDES FEE ASSESSMENT METHODOLOGY

The Department first established a fee assessment program in 1981. Individual permit fees were based on the facility's potential environmental impact, the billing rate for the category of discharge, and the minimum fee for the category of discharge. The billing rate for each category of discharge is determined annually by subtracting the total minimum fees paid by the permittees in the category of discharge from the total budget for the category of discharge, and then dividing that value by the sum of the calculated environmental impact potentials for all of the dischargers within the category.

For discharges to groundwater and from landfills the method for determining the environmental value used in the annual fee formula was amended in January 2009. The amendments were designed to create less volatility in fees from year to year and, to calculate a fee based more on the weighted risk of the discharge and discharge control factors involved. Because this is the first year implementing these amendments, fees have been adjusted (up or down) to reflect more accurately their potential to affect the environment. Please see the paragraph entitled, "Amendments to calculating discharge to groundwater fees" under "NJPDES Permit Program Significant Activities & Accomplishments" for more details.

The fee schedule is assessed in accordance with current rules. A copy of the current fee regulations is included in Appendix A. This year the percentage of the NJPDES program budget derived from the assessment of minimum fees is 52% of the total program costs, which also includes fringe, indirect and operating costs. The remaining percentage of the NJPDES program costs will continue to be assessed in a manner proportionate to the relative environmental impact potential of the permittee's discharge, pursuant to the fee assessment formula at N.J.A.C. 7:14A-3.1(c) through (g). If a NJPDES permit identifies more than one discharge category, a fee is assessed for each category.

ADJUSTMENTS/CORRECTIONS TO MINIMUM FEE SCHEDULE

Minimum fees are calculated as specified in N.J.A.C. 7:14A-3.1(a)9iii. No changes to the minimum fees are proposed this year.

FY2010 PERMIT FEE SCHEDULE & ENVIRONMENTAL IMPACT CALCULATIONS

For FY2010, the total amount to be assessed through NJPDES permit fees is \$20.8 million. Fees are assessed based on the minimum fee for each facility and the facility's potential impact on the environment. The environmental impact fee component is calculated in accordance with the NJPDES regulations in N.J.A.C. 7:14A-3.1 (see Appendix A). The minimum fee is added to the fee calculated based on the environmental impact potential of the discharge. An analysis of the rate calculations is provided in Appendix D.

Municipal Surface Water Permit Fees - The total amount of fees to be assessed for municipal surface water permits is \$7,014,155. Minimum fees from 220 municipal facilities will generate \$1,697,650 (24%) of the total billings. This year's environmental impact portion of the fee is based on the loadings of BOD, COD or CBOD reported during the period January 1, 2008 through December 31, 2008.

Industrial Surface Water Permit Fees - The total amount of fees to be assessed for industrial surface water permits is \$5,757,472. Minimum fees from 346 industrial facilities will provide \$1,366,650 (24%) of the total billings. This year's fees are based on the loadings for all limited pollutants reported during the period January 1, 2008 through December 31, 2008 and the risk factor associated with each parameter. As in years past, where a facility's discharge is limited for BOD, COD and/or TOC, the Department is using the discharger's BOD loading for the pollutant loading calculation, rather than the oxygen demand parameter discharged in greatest quantity, provided the facility is meeting its whole effluent toxicity limits.

Significant Indirect Users (SIU's) - The total amount of fees to be assessed for significant indirect user permits is \$448,516. Minimum fees from 73 facilities will provide a total of \$419,750 (93%) of the total billings. The environmental impact calculation for SIU permits is based on the total weighted loading of all limited pollutants discharged during the period January 1, 2008 through December 31, 2008 and the risk categories for SIUs. These risk categories are specified in Table I of N.J.A.C. 7:14A-3.1 entitled, "Indirect Users".

Residuals - The Department will assess fees totaling \$162,950 to 54 facilities which handle, distribute and land apply sludge. These facilities are charged applicable minimum fees and are not subject to an environmental impact calculation.

Nonpoint Pollution Control Permit Fees - The NJPDES Nonpoint Pollution Control program budget is \$7,609,241. The program issues permits for Operational Ground Water Discharges, Discharges from Landfills and for the Stormwater Permitting Program.

Operational Ground Water Permit Fees - The total amount of fees to be assessed for ground water discharge and operating landfill permits is \$1,839,541. Minimum fees from 970 DGW permits and 22 landfill permits will provide \$1,559,850 (85%) of the total billings. In accordance with rule amendments adopted in January 2009, fees for operational groundwater permits are determined upon the facilities pollutant potential (for example, hazardous vs. non hazardous waste) and discharge control factors (for example, lined vs. non lined lagoons). The operational groundwater and landfill permits are now assessed together resulting in one rate to be used for both types of permits. Please see the paragraph entitled, "Amendments to calculating discharge to groundwater fees" under "NJPDES Permit Program Significant Activities & Accomplishments" for more details.

Stormwater Permitting Program Fees - The total amount of stormwater fees to be assessed from 3503 stormwater permits is \$5,606,750. These facilities are not subject to an environmental impact calculation. Fees for Stormwater General and Individual Permits are set in the NJPDES Rules (N.J.A.C. 7:14A-3.1 - Table III).

Proposed fee schedules for each permitted facility under the various discharge categories are included in Appendix E. Any questions concerning fee assessments for individual facilities should be directed to the NJPDES Fee Management Unit within the Division of Water Quality at (609) 984-4428.

Delinquent Fee Collections

The Department continues to pursue remaining overdue fee balances from prior years. Current efforts are focused on the FY2002 and later delinquent fees. The Department sent second and third notices to all permittees with potentially overdue fees up through and including fiscal year 2009. The third notices were sent by certified mail advising the affected permittees of their delinquency and notifying them to pay the delinquent fees. Additionally, some of the delinquent facilities have been referred to a collection agency. Adjustments for calculation errors, overpayments, previously unposted payments, duplicate or erroneous bills, and uncollectable bills are accounted for. Following is a summary of the collection status for this effort:

NJPDES PERMIT PROGRAM

Through the NJPDES permitting program, the Division of Water Quality (Division) regulates all operational discharges to the surface and ground waters of the State and for residual generated from treatment systems. This Program also regulates industrial wastewater discharges from Significant Indirect Users ("SIU") to Domestic Treatment Works. The permit process involves pre-application conferences, application tracking, administrative and technical review of the permit applications, preparation of a detailed fact sheet on the facility and the permitted discharge activities, the development of technology and water quality based effluent limitations for conventional, non-conventional and toxic pollutants (including whole effluent toxicity), applicable anti-degradation and anti-backsliding analyses, monitoring requirements, site inspections, permit coordination, public hearings, review of public comments and agency responses, permit issuance, and responses to requests for stay of permit conditions and adjudicatory hearings. In addition, the Division provides general information and assistance to all interested parties, reviews the toxicity testing results, utilizes computer models to calculate water quality based effluent limits, reviews sludge quality reports, oversees local pretreatment programs, oversees the installation of groundwater monitoring wells, and develops facility specific groundwater protection plans. Furthermore, the Division provides technical support on enforcement matters.

As part of the NJPDES program, the Division also implements the federally mandated Stormwater Permitting Program. The Stormwater Permitting Program is administered by the Division's Bureau of Nonpoint Pollution Control (BNPC) with the assistance of the State Soil Conservation Committee, New Jersey Department of Agriculture, and the 15 local Soil Conservation Districts.

The Division has developed and adopted a series of general permits to implement certain major aspects of the Stormwater Permitting Program. The Division also issues individual stormwater NJPDES permits. Where stormwater discharges are included in addition to wastewater, process water, and other non-stormwater discharges, individual NJPDES permits for Discharge to Surface Water are handled by the Bureau of Surface Water Permitting and are processed jointly with the BNPC.

NJPDES PERMIT PROGRAM SIGNIFICANT ACTIVITIES & ACCOMPLISHMENTS

Division of Water Quality Reorganization

On March 16, 2009 the Division underwent a consolidation and reorganization. The Watershed Permitting Element was renamed the Water Pollution Management Element (WPME). The former Bureaus of Point Source Permitting - Regions 1 and 2 were consolidated to form a new Bureau of Surface Water Permitting. Also as a result of consolidation the Bureau of Permit Management became the Office of Permit Management and is now part of the WPME. Within the Municipal Finance Construction Element (MFCE), the Bureau of Program Development and Technical Services was eliminated, with the Office of Program Development becoming part of the Bureau of Administration and Management, and the Office of Technical Services reporting to the Assistant Director, MFCE. The administrative review of Treatment Works Approvals was consolidated within the MFCE. The Division Director's position remains vacant.

NJPDES Permit Universe Status

The total universe of NJPDES issued permits as of August 31, 2009 is 5,637 permits. This is up from 5,584 permits as of September 30, 2008, a 0.95% increase. Of these 5,637 permits, 5,199 (92%) are current, while 438 are beyond their renewal date. The Division is continuing its efforts to further reduce the number of facilities operating with such expired but administratively extended permits.

Electronic Submission

Electronic registration and compliance certification was made available to owners of dental facilities generating amalgam waste in late 2008. This constituted the Division's first electronic submission platform to apply for a registration under the NJPDES permitting program. To date, approximately 1,360 owners have registered and certified electronically.

Electronic submission became available on October 1, 2009 to those who wish to obtain authorization under the Construction Activity Stormwater General Permit. An applicant may apply for and immediately receive authorization electronically. The Division expects approximately 1,500 submissions in FY 2010.

Additionally, the Division plans to start making electronic submission available in 2010 for some permit required reports.

Amendments to calculating discharge to groundwater fees

The method for determining the environmental value used in the annual fee formula for discharges to groundwater and from landfills was amended in January 2009. These amendments were public noticed on March 17, 2008 (see 40 N.J.R. 1478) and public hearings were held on April 21 and May 8, 2008.

Additionally, a table comparing fees under the existing formula and amended formula was published on the Department's Division of Water Quality website. All persons were invited to comment on the proposed amendments during that time. The Department addressed all comments received (see 41 N.J.R. 142) and the amendments were adopted on January 5, 2009.

The amendments were designed to create a fee formula resulting in fees less volatile and less sensitive to slight changes to facility rating characteristics. They were designed more upon the weighted risk of the discharge (e.g., hazardous wastewater vs. sanitary wastewater). As an initial result, some fees increased and some decreased. This is the first time the Department is implementing the revised fee formula and some changes, either up or down, were expected. Thereafter, fees are expected to be more stable from year to year.

Clean Water NJ Campaign

The US Environmental Protection Agency, through the Stormwater Phase II Municipal Permit Program Rules requires all regulated entities in the country, which in New Jersey is every municipality, county, and most state, interstate and federal agencies, to conduct a public education program for all of the citizens of the State. The most efficient and cost-effective way to educate all of the residents of the state is via Public Service Announcements.

The media market in New Jersey is divided between two of the most expensive media markets in the country. It was determined that having 566 municipalities and approximately 100 other entities provide this education effort would be enormously expensive. Therefore, it was decided that in order to maximize the efficiency and economic scale, the Department would conduct most of this program. All of the 666 regulated entities are required to pay annual permit fees under the NJPDES permit. Part of that fee is specifically allocated to fund the \$500,000 Stormwater Education Program known as "Clean Water NJ Campaign" (Campaign). Implementation of the program by the Department reduces the burden on the municipalities and reduces the overall cost of compliance.

To date, the Campaign placed statewide commercials in most of New Jersey's radio stations, as well as television commercials on WMBC-TV in Newton, WMGM-TV in Atlantic City, WNJU-TV in Linden, and WWOR-TV in New York in 2005 through 2009. Commercials were also run on many statewide cable television networks, Cablevision, Time –Warner and Comcast in 2006 through 2009. The Campaign has produced six radio commercials, two television commercials and one animated television commercial for children for this effort.

The Campaign developed a fifth poster on the problems with litter in addition to the original 4 poster series. Each has corresponding tip cards that depict common everyday activities and the link to stormwater. Banners have also been developed to correspond with the posters to help with outreach at local events statewide such as at the Lakewood Blue Claws, Trenton Thunder, Pequest Hatchery and the Adventure Aquarium.

The Campaign has also collaborated with DEP's Division of Parks and Forestry to display 5 curb signs with the Clean Water NJ posters in the Liberty State Park Terminal.

Hot Asphalt Mix Producers General Permit (NJ013272)

This general permit authorizes stormwater discharges to surface and ground water for facilities engaged in the activity of manufacturing hot mix asphalt defined by SIC 2951 and NAICS 324121.

The Bureau of Nonpoint Pollution Control renewed this permit with the following areas of change:

- SPPP requirements in Part IV, Section B.1; Drainage requirements in Part IV, Section B.2-4; Design criteria for an infiltration basin revised to a 2 year, 24 hour storm. The infiltration basin must drain within 72 hours and be designed in accordance with the Department's BMP Manual.

Existing infiltration basins may continue to be used if the permittee can demonstrate that the infiltration basin meets the design criteria (see Part IV, Section D.);

- Addition of a Benchmark for Total Suspended Solids of 100 mg/L (monthly average) for discharges to surface water. Exceeding the benchmark may cause the benchmark to become an effluent limitation (see Part IV, Section C.3.); and
- Addition of Mandatory Best Management Practices that every permittee must implement if applicable.

Lined Surface Impoundment General Permit (NJ0142051)

This general permit authorizes the discharge of wastewater to lined surface impoundments. The Lined Surface Impoundment General Permit was developed to encourage the elimination of ground water discharges from unlined surface impoundments, basins or infiltration/percolation lagoons, and does not require discharge or ground water monitoring.

The Bureau of Nonpoint Pollution Control renewed this permit unchanged.

Potable Water Treatment Plant General Permit (NJ0108642)

This general permit covers potable water treatment plants (WTP) discharging filter backwash and clarifier water to outdoor basins. The discharge results from the process of bringing raw water supplies to drinking quality standards, which often requires the removal of low concentrations of iron, manganese, organic matter, and trace amounts of other metals. When filters are backwashed or when clarifiers are cleaned, the wastewater generated is usually discharged to an outdoor infiltration-percolation basin which ultimately discharges to groundwater.

The Bureau of Nonpoint Pollution Control renewed this permit unchanged.

Municipal Stormwater Permits

The Bureau of Nonpoint Pollution Control renewed four New Jersey Pollutant Discharge Elimination System (NJPDES) General Permits (Tier A Municipal Permit, NJ0141852; Tier B Municipal Permit, NJ0141861; Public Complex Permit, NJ0141879; and Highway Agency Permit, NJ0141887).

These permits were renewed with the following changes:

- Establishment of a point system for the Local Public Education Program to allow municipalities more flexibility in how they comply with the Statewide Basic requirement;
- Removal of the 7 day requirement from the Yard Waste Collection Program and Ordinance;
- Requiring the adoption and enforcement of a Fertilizer Management Ordinance when required by an adopted TMDL;
- Requiring the adoption and enforcement of an ordinance requiring private entities to retrofit catch basins when they repave parking lots or private streets;
- Revision of the Catch Basin Cleaning BMP so that permittees may be better able to comply with the minimum standard;
- Removal of the Road Erosion Control BMP; and
- Formatting changes to further develop, simplify and refine certain aspects of the general permit.

ENFORCEMENT ACTIVITIES

The Water Compliance and Enforcement Element monitors compliance with and enforces as necessary permits issued under the New Jersey Pollutant Discharge Elimination System (NJPDDES). In addition to the self monitoring reports submitted by the permittee, periodic on-site compliance evaluation inspections are carried out by enforcement staff as a means to evaluate the facilities compliance with all conditions of the permit. In addition, the compliance sampling inspections serve as a means of checking the validity of the self-monitoring data.

The Department publishes an annual report on the implementation and enforcement actions taken by the Department and delegated local agencies during the preceding year pursuant to the Clean Water Enforcement Act. The annual report is available on the Departments website at <http://www.nj.gov/dep/enforcement/report-cwea.html>.

The tables below summarize the results of the Department's inspections and the penalties collected during FY2009.

APPENDIX A

NJPDES REGULATIONS

N.J.A.C. 7:14A-3.1

SUBCHAPTER 3. DETERMINATION OF PERMIT FEES

7:14A-3.1 FEE SCHEDULE FOR NJPDES PERMITTEES AND APPLICANTS

- (a) Except as provided in (j) and (l) below, the general conditions and applicability of the fee schedule for NJPDES permittees and applicants are as follows:
1. Except as provided by (k) below, the Department shall collect an annual fee for the billing year July 1 to June 30 from all persons that are issued a NJPDES permit or authorization to discharge under a NJPDES general permit or submit a NJPDES permit application or request for authorization.
 2. The Department shall not assess any fee to public schools or religious or charitable institutions.
 3. All NJPDES permittees/applicants that are issued a draft or final NJPDES permit, or that are issued an authorization to discharge under a final NJPDES general permit, shall submit payment within 30 days of assessment of the fee by the Department.
 - i. Upon receipt of a completed application or request for authorization, the Department shall assess the minimum fee as set forth in Table III below.
 - ii. Upon issuance of the final permit or of an authorization to discharge under a final NJPDES general permit, the annual fee shall be calculated and pro-rated for the period of the fee year remaining. The minimum fee already paid shall then be subtracted from the pro-rated assessment. In no case, however, will such payment of a pro-rated fee result in a fee that is less than the minimum fee for the category of discharge. The permittee may request a fee recalculation as provided at (a)6 below, once the first required monitoring report has been completed.
 4. Payment of all fees shall be made by check or money order, payable to “Treasurer, State of New Jersey” and submitted to:

New Jersey Department of the Treasury

Division of Revenue

PO Box 417

Trenton, New Jersey 08625-0417

5. If the permittee/applicant fails to submit payment to the Department of the Treasury within 30 days of assessment of the fee, the Department may, in its discretion, take one or more of the following actions:
 - i. Return the NJPDES permit application or request for authorization to the applicant;
 - ii. Deny issuance of a final permit or authorization under a final general permit;
 - iii. Revoke a final permit (including revocation of a permittee's authorization to discharge under a general permit); and/or
 - iv. Assess penalties pursuant to N.J.S.A. 58:10A-10 and N.J.A.C. 7:14-8.
6. If the permittee objects to the assessment, the Department shall recalculate a permit fee upon receipt of a request from the permittee in writing within 30 days of assessment of the fee. The Department shall not recalculate a fee where the permittee has failed to submit information in compliance with its NJPDES permit.
 - i. A permittee may only contest a fee imposed pursuant to (k) below based on the following:
 - (1) The Department has no factual basis to sustain the charges assessed in the fee;
 - (2) The activities for which the fee was imposed did not occur;
 - (3) The charges are false or duplicative; or
 - (4) The charges were not properly incurred because they were not associated with the Department's oversight or remediation of the case.
 - ii. A permittee may not contest a fee imposed pursuant to (k) below if the challenge is based on the following:
 - (1) An employee's hourly salary rate;
 - (2) The Department's salary additive rate, indirect rate, or fringe benefit rate; or
 - (3) Management decisions of the Department, including decisions regarding who to assign to a case, how to oversee the case or how to allocate resources for case review.
 - iii. A permittee objecting to a fee imposed pursuant to (k) below shall

include the following in a request for a fee review:

- (1) A copy of the bill;
 - (2) Payment of all uncontested charges, if not previously paid;
 - (3) A list of specific fee charges contested;
 - (4) The factual questions at issue in each of the contested charges;
 - (5) The name, mailing address and telephone number of the person making the request;
 - (6) Information supporting the request or other written documents relied upon to support the request.
7. The Department, in calculating Environmental Impact, shall use information reported by the permittee on MRFs for the 12 month period for which data is available on the Department's computer. The selected 12 month monitoring period will be documented in the Annual NJPDES Fee Schedule Report. Where this information is not available, the Department shall use permit limitations, information submitted in permit applications, technical reports prepared by the Department or submitted by the permittee, or other permits issued by the Department.
8. Except as provided by (k) below, the Department, upon the revocation of a NJPDES permit, or revocation of a NJPDES/SIU permit in accordance with N.J.A.C. 7:14A-21.9, shall upon written request of the permittee prorate the fee for the number of days that the facility was in operation or was discharging under a valid NJPDES/SIU permit during the billing year and return to the permittee the amount that is in excess of the minimum annual fee for the specific category of discharge.
9. Except as provided by (k) below, the annual fee for all discharges is calculated by applying the formula:

Fee = (Environmental Impact x Rate) + Minimum Fee, where:

- i. Environmental Impact is the Department's assessment of potential risk of discharge to the environment as derived under (c) through (g) below.
- ii. Rate is the dollar cost for each weighted unit of Environmental Impact. Rate is calculated as follows:

Rate = (Budget-Sum of Minimum Fees)/Total Environmental Impact

- (1) Budget is the total budget for the category of Discharge.
 - (2) The Sum of Minimum Fees is the total amount of minimum fees to be paid by all dischargers in the category of discharge.
 - (3) Total Environmental Impact is the sum of environmental impact for all dischargers in the category.
 - (4) The budget and the total environmental impact shall be adjusted to reflect those facilities, if any, assessed a maximum permit fee.
- iii. The minimum fee is a base cost to which the product of the Environmental Impact and the Rate identified under (a)9i and ii above is added. The minimum fee for any permit category is calculated by using the following formula and rounding to the nearest \$50.00 increment:

$$\text{Minimum Fee} = \frac{\text{Hours} \times \text{Cost Per Hour}}{5}, \text{ where:}$$

Hours = Total hours allocated by the Department on the administration, including permit issuance, inspection and data management, of the permit per facility over a five year period in each category.

Cost Per Hour = Total personnel cost per hour, including fringe benefits and indirect costs.

The minimum fees are set forth in Table III below. For any new or revised category of discharge, the Department shall calculate a minimum fee and shall list it in the Annual NJPDES Fee Schedule Report for public comment under (b) below.

10. The maximum fee to be assessed for any category of discharge shall be 10 percent of the budget for the category of discharge.
 11. If a factual dispute involving a fee imposed pursuant to (k) below cannot be resolved informally, a permittee may request an adjudicatory hearing on the matter pursuant to N.J.A.C. 7:14A-17.2.
- (b) The Department shall prepare an Annual NJPDES Fee Schedule Report and provide for a public hearing on the Report.
1. The Annual NJPDES Fee Schedule Report shall include the following:
 - i. A detailed financial statement of the actual administrative cost of the NJPDES program by account title;

- ii. A detailed financial statement of the actual revenue collected, including any surplus which can be credited or any deficit to be assessed in determining the fee schedule;
 - iii. A detailed financial statement of the anticipated cost of the NJPDES program, including:
 - (1) A breakdown of the program by account title;
 - (2) An estimate of the amount of fees that will be collected; and
 - (3) The current year's fee schedule.
 - iv. A report of the NJPDES program activities, including:
 - (1) A list of permits issued;
 - (2) A list of facilities inspected;
 - (3) A list of administrative orders and administrative consent orders issued by the Department (by type of order and discharge involved); and
 - (4) A summary of variance request activities under Section 316 of the Federal Water Pollution Control Act (33 U.S.C. §§1251 et seq.).
 - v. A list of all minimum fees calculated in accordance with (a)9iii above, and the basis for any new or revised minimum fee.
2. The Department shall provide for a hearing on the Annual NJPDES Fee Schedule Report. The Department shall provide public notice of the hearing at least 30 days prior to the date of the hearing:
 - i. In the New Jersey Register and one newspaper of general circulation; and
 - ii. By mailing a notice of availability of the Fee Report to each NJPDES applicant/permittee the Department identifies as subject to a NJPDES annual fee. The complete Fee Report will be posted on the Department's website at <http://www.nj.gov/dep/dwq/njpdessfees.html>. The Department will provide, free of charge, a paper copy of the complete Fee Report to each applicant/permittee, or any other interested person, upon request.
 3. The Department shall publish a Notice of Adoption of the Annual NJPDES Fee Schedule Report, which shall include a summary of the public comments and Department responses. Upon publication of this

Notice of Adoption in the New Jersey Register, any adopted new or revised minimum fee(s) identified in the Notice of Adoption shall be incorporated into Table III as an administrative change.

- (c) The annual fee for discharges to surface water is calculated by using the following Environmental Impact in the annual fee formula:
1. The Environmental Impact of a discharge to Surface Water from an industrial treatment works (ITW) regulated under an individual NJPDES permit is derived by applying the formula:

Environmental Impact = (Total Pollutant Load + Heat Load) where:
 - i. Total Pollutant Load is the sum of each limited pollutant's average loading (in kilograms per day) for the selected 12-month period, as determined in accordance with N.J.A.C. 7:14A-3.1(a)7, multiplied by its associated risk factor as listed in Table I below.
 - (1) Net loadings will be used if a net limit has been established in the NJPDES permit. If a permittee reports a pollutant load less than zero, a zero will be used to calculate the Total Pollutant Load.
 - (2) Any pollutant listed in Table I will be deleted from the Total Pollutant Load, if reported as non-detectable in all samples for the monitoring period. When any of the pollutants listed in Table I is detected at least once in the monitoring period, the Department shall calculate the Total Pollutant Load using one-half the reported minimum detection limit for pollutant concentrations.
 - ii. Heat Load is the average mBTU's (million British Thermal Units) per hour of the effluent discharged. Where Heat Load is not reported in mBTU's per hour, the Department shall estimate the Heat Load using the calculated difference between the influent and effluent temperature (in degrees celsius) multiplied by the amount (in million gallons per day) of effluent discharged and a unit conversion factor of 0.6255. The Department shall use an average influent temperature of 5.57 degrees celsius during the period November to April and 18.87 degrees celsius during the period May to October.
 2. The Department shall assess an additional fee to NJPDES permittees who request a variance under Section 316 of the Federal Water Pollution Control Act (33 U.S.C. §§1251 et seq.). The annual fee shall be assessed on the basis of the administrative cost that is incurred by the Department and the cost of the technical review performed by a consultant hired by the Department.
 3. The Environmental Impact of a discharge to surface water from a

domestic treatment works (DTW) regulated under an individual NJPDES permit is derived by applying the formula:

Environmental Impact = Average kilograms per day of oxygen demand discharged, as measured by Biochemical Oxygen Demand (BOD5), Carbonaceous Biochemical Oxygen Demand (CBOD5) or other oxygen demand parameter selected by the Department, as determined in accordance with (a)7 above.

4. The Environmental Impact value for any type of discharge to surface water regulated under a general permit shall be zero.

(d) Except as provided by (k) below, the annual fee for discharges to groundwater, except for residuals covered in (e) below, is calculated by using the following Environmental Impact in the annual fee formula:

1. The Environmental Impact of a Discharge to Groundwater regulated by an individual NJPDES permit is derived by applying the formula:

Environmental Impact = (Pollution Potential Factor) x (Discharge Control Factor) where:

- i. For landfills and facilities discharging only sanitary sewage wastewater, the Pollution Potential Factor is the sum of the applicable Pollution Rating Factor set forth at (d)1iii below and the applicable Pollution Loading Factor set forth at (d)1iv below.
- ii. For facilities other than those identified in (d)1i above, the Pollution Potential Factors are set forth at (d)1v below.
- iii. The Pollution Rating Factor is a value that is a measure of the relative risk associated with the pollutant sources listed below. The Pollution Rating Factor is assigned as follows:

<u>Pollutant Source Description</u>	<u>Pollution Rating Factor</u>
Sanitary sewage wastewater	1
Sanitary landfills	20
Hazardous waste facilities including hazardous waste landfills	50

- iv. The Pollution Loading Factor is a value based on flow (Q) for a sanitary discharge, where Q is the NJPDES permitted flow limit or the facility design flow in the absence of a NJPDES permitted flow limit, or by the mass of solid waste annually deposited at a landfill. The Pollution Loading Factor is assigned as follows:

<u>Pollutant Source Description</u>	<u>Pollution Loading Factor</u>
Landfill Solid Waste	Annual Mass + 1 (where Annual Mass = Mass of solid waste annually deposited (in tons) / 400), with the result rounded to the nearest whole integer
Sanitary Waste Discharge where Q < 1.0 MGD	Q in MGD x 2000, with the result rounded to the nearest whole integer
Sanitary Waste Discharge where Q = > 1.0 MGD but < 3.0 MGD	2000
Sanitary Waste Discharge where Q = > 3.0 MGD but < 5.0 MGD	3000
Sanitary Waste Discharge where Q = > 5.0 MGD	4000

- v. The Pollution Potential Factor for facilities other than those identified in (d)1i above, is assigned as follows:

<u>Pollutant Source Description</u>	<u>Pollution Potential Factor</u>
Stormwater runoff	100
Non-contact cooling water	200
Potable water plant filter backwash	200
Food processing wastewater	250

Discharge from quarry operations including, sand and gravel operations 250

Industrial process wastewater (not otherwise specified) 300

- vi. The Discharge Control Factor is a measure of the potential of a discharge to affect groundwater and is based on whether a pollutant source passes through to a DSW or POTW, is designed to be discharged to the ground, or is a landfill. The Discharge Control Factor is assigned as follows:

<u>Discharge Control Scenario for Pollutant Source</u>	<u>Discharge Control Factor</u>
Permitted, but not being discharged (does not apply to landfills)	0
Pass-through wastewater to DSW or POTW, lined (surface impoundment with a liner having hydraulic conductivity of at least $<10^{-7}$ cm/sec)	1
Pass-through wastewater to DSW or POTW, unlined and/or partially lined (surface impoundment or infiltration/percolation lagoon that is unlined or partially lined)	10
Designed for discharge to the ground (sanitary wastewater with at least secondary treatment)	20
Designed for discharge to the ground (all other wastewater other than sanitary wastewater with at least secondary treatment)	25
Landfills, completely lined ($<10^{-7}$ cm/sec)	30
Landfills, unlined and/or partially lined	40

2. The Environmental Impact value of any type of discharge to ground water regulated under a general permit shall be zero.

(e) The Environmental Impact value for facilities which land apply, handle or distribute residuals listed in Table III below shall be zero.

(f) (Reserved)

(g) The annual fee for discharges by a significant indirect user to a domestic treatment works is calculated by using the following Environmental Impact in the annual fee formula:

1. The Environmental Impact of a discharge by a significant indirect user (SIU) to a domestic treatment works (DTW) is derived by applying the formula:

$$\text{Environmental Impact} = (\text{Total Pollutant Load})$$

- i. Total Pollutant Load is the sum of each limited pollutant's average loading (in kilograms per day) for the selected 12-month period, as determined in accordance with N.J.A.C. 7:14A-3.1(a)7, multiplied by its associated risk factor as listed in Table I below.

- (1) Any pollutant listed in Table I will be deleted from the Total Pollutant Load, if reported as non-detectable in all samples for the monitoring period. When any of the pollutants listed in Table I is detected at least once in the monitoring period, the Department shall calculate the Total Pollutant Load using one-half the reported minimum detection limit for pollutant concentrations.

(h) The fees for exemptions for certain types of residual use or disposal operations shall be assessed as follows:

1. Permit exemptions or Letters of Land Application Management Approvals authorizing the land application of sludge-derived products at specific sites in accordance with a Department-approved distribution program shall be assessed a fee of \$250.00 for the duration of the permit exemption or Letter of Land Application Management Approval. The Department will not consider a request for a permit exemption or Letter of Land Application Management Approval complete unless the request is accompanied by the fee; and
2. General distribution permit exemptions providing Department approval of a sludge derived product distribution program which is not directly regulated for residuals handling through an individual NJPDES permit shall be assessed a fee of \$2,700 for the duration of the exemption. The Department will not consider a request for a permit exemption complete unless the request is accompanied by the fee.

(i) (Reserved)

(j) For NJPDES Permit No. NJ0088323 (referred to as the category 5G3 "construction activity" stormwater general permit), there is no annual or minimum fee. The fee for projects that disturb less than 5.0 acres is \$450.00.

The fee for projects that disturb 5.0 acres or more is \$650.00. Except as set forth in (j)1 or 2 below, the fee shall be paid to the New Jersey Department of the Treasury, and submitted to the address set forth on the request for authorization form when the request for authorization is submitted to the Department.

1. For a project that the New Jersey Department of Transportation (NJDOT) is constructing or proposes to construct for which a stormwater discharge is regulated under this general permit, the fee of \$450.00 or \$600.00, as applicable, shall be paid to the Department.

 2. For a project that a Federal governmental entity is constructing or proposes to construct for which a stormwater discharge is regulated under this general permit, a fee in the amount set forth in the Soil Erosion and Sediment Control Act (N.J.S.A 4:24-39 et seq.) fee schedule for the appropriate County Soil Conservation District shall be made payable to the "Treasurer, State of New Jersey." The fee will be allocated to address the Department's administrative and enforcement responsibilities, the Department of Agriculture's administrative costs, and the appropriate Soil Conservation District's review and inspection activities.
