THE NEW JERSEY BROWNFIELDS INTER AGENCY WORK GROUP

Presents:

“MEET THE FUNDERS & TECHNICAL RESOURCES: FORGING LINKS BETWEEN CSO PERMITS AND REDEVELOPMENT GOALS”

A workshop with State and Federal partners to discuss how your redevelopment and community goals can support your CSO permit requirements.

Friday December 4th | Montclair University | Center for Environmental & Life Sciences | Room 120

AGENDA

12:45 – 12:50  Welcome

12:50- 1:10  Introductions

Attendees will introduce themselves and briefly share what topics and projects they work on. All State and federal partners will highlight the technical and funding assistance they offer for CSOs and redevelopment.

1:10 – 1:35  Advancing Multiple Municipal Objectives through the Long Term Control Plan

Speakers will present how the Long Term Control Plan is an opportunity to advance multiple goals of your municipality and how to incorporate the current efforts underway in your municipality into the development of your Long Term Control Plan.

1:35- 2:05  Success Stories from Camden and Jersey City

Camden SMART: Incremental steps towards CSO reduction and community investments

Speakers will discuss how the City of Camden is taking incremental steps towards reducing CSOs, reducing localize flooding, community greening, open space creation, and economic development.

Canal Crossing, Jersey City

Speakers will discuss how sewer separation, stormwater upgrades, and green infrastructure were incorporated into the Canal Crossing redevelopment plan.

2:05-2:30  Funding & Technical Resources: EIT, HUD, NJDEP CSO unit, HDSRF, EPA

Representatives from these entities will speak to the specific technical and funding assistance they offer related to CSOs and redevelopment.

2:30- 3:00  State and Federal Resource Networking

State and Federal Resources will be available for individual and small group discussions on how their specific resources are applicable to your municipality.
