

PAINT SPRAY BOOTH PERMIT TERMINATION FORM (rev March 2022)

I have been informed that an air pollution permit is no longer required by the Department as established in N.J.A.C. 7:27-8.2 {Eleventh Amendment, operative June 12, 1998} since **my coating application WILL NEVER EXCEED ½ gallon per hour at any time and my spray booth DOES NOT contain a heating device with a rating of 1,000,000 BTU/hr or greater.**

As such, I am requesting termination of the following surface coating permit(s)/certificate(s).

I understand that if at any time my coating rate does exceed the applicability threshold of ½ gallon in any one hour, or the heating device does equal or exceed 1 million BTU/hr, it is my responsibility to apply for the necessary air permit(s) and certificate(s).

I further understand that even though I may not be required to hold an air pollution permit for the spray booth as described above, I am still required to operate my facility in compliance with the rules for a "Mobile Equipment Coating Repair and/or Refinishing Facility" (e.g. Auto Body Repair Shops) found in N.J.A.C. 7:27-16.12. This is required by the Department as established in N.J.A.C. 7:27-16.12a (Seventeenth Amendment, operative April 25, 2004).

Lastly, I understand that if I exceed the above thresholds and fail to apply for the necessary air permits/certificate(s), or if I fail to operate in compliance with N.J.A.C. 7:27-16.12, that I will be subject to an enforcement action, which may include civil and criminal penalties, including the possibility of fines and/or imprisonment, for submitting false, inaccurate or incomplete information.

I certify under penalty of law that I believe the information provided in this document is true, accurate and complete.
