

# TRIAZINES

## CHEMICAL AND COMMON NAMES (All are triazine herbicides)

**Atrazine** (AATREX)

**Cyanazine** (BLADEX)

**Hexazinone** (VELPAR)

**Metribuzin** (LEXONE, SENCOR)

**Prometon** (PRAMITOL)

**Simazine** (PRINCEP)

## SYMPTOMS OF POISONING

Symptoms of triazine poisoning may include one or many of the following:

- abdominal pain
- diarrhea
- vomiting
- skin rash or dermatitis
- irritation of mucous membranes

Effects to the eyes may include:

- mild or severe irritation
- redness
- extensive tearing

## SHORT-TERM HEALTH HAZARDS

- The triazine pesticides listed above are slightly to moderately poisonous compounds.
- All these chemicals can be absorbed through the skin, especially through cuts and scratches, so direct contact should be avoided.
- Triazines are mild skin irritants and can be highly irritating to the eyes.

## LONG-TERM HEALTH HAZARDS

- The Federal Environmental Protection Agency considers triazines as possible human carcinogens. An exception is metribuzin (LEXONE), which is not classified as a carcinogen.
- Simazine (PRINCEP) and cyanazine (BLADEX) have been shown to cause reproduction problems in laboratory animals. Further studies are required on specific compounds.
- Small amounts of triazines may accumulate in the body.

## PERSONAL PROTECTIVE EQUIPMENT AND PRACTICES

Do not allow any of these pesticides to get on your skin or in your eyes. Do not breath dust or spray mist. Follow all precautions and protective clothing requirements listed in the Precautionary Statements section on the pesticide label.

## RE-ENTRY TIMES

Check postings at your place of work for the exact re-entry times regarding your assigned field. Re-entry times are also listed on pesticide labels under "Re-Entry Statements for Farm Workers."

EMERGENCY ASSISTANCE

**The employer** is responsible for providing emergency assistance to a worker believed to have been poisoned or injured by a pesticide used on the farm.

The employer must make emergency transportation to an emergency medical facility available by:

- taking the worker to the medical facility
- calling an emergency vehicle (ambulance)
- making sure the worker has a ride to the medical facility with someone else.

Employers must also provide to the worker or medical personnel, upon request, information on:

- product name, EPA registration number and active ingredients for any product(s) to which the worker may have been exposed
- emergency information from the product labeling
- description of the way the pesticide was being used
- circumstances of the worker's exposure to the pesticide.

CROPS TYPICALLY RECEIVING TRIAZINE APPLICATIONS

Fruits: Apples (orchard weed control)  
 Peaches (orchard weed control)  
 Blueberries (orchard weed control)

Grains: Sweet corn  
 Field corn

Vegetables: Soybeans Tomatoes  
 Asparagus Potatoes
