

Details of Sites Participating in Stewardship

(sectioned by county; sorted by Site Name)

The New Jersey Department of Environmental Protection provides stewardship information in order to acknowledge and therefore encourage voluntary actions that result in a positive benefit to the environment.

Results as of 04/02/2019

Total number of Sites: 1,580

Atlantic County

Number of Sites: 128

ABG FARMS

Site ID: ABG FARMS
578337 532 COLUMBIA RD,
 HAMMONTON, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/21/16	The farmer uses the IPM program to reduce hazardous materials. Also, cultivators are used to control weeds.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/21/16	The farmer uses a drip irrigation system to save water on his 100 acres.

ABSECON CITY BD OF ED EMMA C ATTALES SCHOOL

Site ID: ABSECON CITY BD OF ED EMMA C ATTALES SCHOOL
 49840 800 IRELAN AVE, & WEBB RD
 ABSECON, NJ 08201

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/27/16	The facility is using LED lighting throughout it.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	7/27/16	The facility is using Solar Panels as well.

ABSECON CITY DPW MAINTENANCE YARD

Site ID: ABSECON CITY DPW MAINTENANCE YARD
 45656 PITNEY RD,
 ABSECON, NJ 08201

Stewardship Activities	Date Acknowledged	Comments
Diesel Retrofit Program.	3/20/08	some Public Works trucks use 5% biodiesel
ENERGY STAR Product Certification	3/20/08	all motors purchased are Energy Star compliant
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	3/20/08	

ABSECON CITY MUNICIPAL COMPLEX

Site ID: ABSECON CITY MUNICIPAL COMPLEX
 15588 500 MILL RD,
 ABSECON, NJ 08201

Stewardship Activities	Date Acknowledged	Comments
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/6/18</p>	<p>The Township replaced all halogen bulbs with energy efficient bulbs and motions sensors in the public works and municipal buildings.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/31/15</p>	<p>Township replaced all halogen bulbs with energy efficient bulbs and motion sensors to save energy in the public works building and municipal buildings.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/21/12</p>	<p>Facility replaced fluorescent bulbs with halogen bulbs. In addition, motion detectors were installed for the lighting systems in the municipal administration building that only turn the lights on if motion is detected in the room.</p>

ADVENTURE TRAILS COACH USA

Site ID: ADVENTURE TRAILS COACH USA
 17220 711 NEW RD,
 PLEASANTVILLE, NJ 08232

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/8/13</p>	<p>Facility has two parts cleaners for use in cleaning soiled automotive parts. Instead of using a solvent-based cleaning solution, they use a non-solvent based cleaning solution, specifically, ArmaKleen MM-DIP, Product # 6316.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/8/13</p>	<p>This facility acts as a bus maintenance yard, and it includes a bus washing station to clean the exterior of the buses. The bus wash station re-uses the same water repeatedly, instead of using fresh water each time. It operates often, aprox 5-6 hrs/day. The wash-water is mixed with some type of cleaning solution to help keep the recycled wash-water smelling fresh and effectively clean the buses. After being used to wash a vehicle, the dirty wash-water drains through grates in the floor and into a 300 gal UST for storage and re-use. The water continues to be re-used in this way for aprox 6 months, at which time the tank is pumped out, replaced with fresh water, and the 6 month wash cycle begins again.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/8/13</p>	<p>Light posts in the (large) parking lot are on an automated timer system, and will automatically turn on/off as daylight permits, in an effort to conserve energy. Fac is operational 24/7daily, so these lights will operate every night. My onsite visit occurred during daylight hours, and the lights were observed to be properly off at that time.</p>

ANTHONY MELORA FARM

Site ID: ANTHONY MELORA FARM
44956 401 W 15TH ST,
HAMMONTON, NJ 080370000

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/21/14	The farmer uses mechanical control to kill weeds. The farm has a building designed to control pesticides spills.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/21/14	The farm has drip irrigation system to save water.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/21/14	The farmer uses fluorescent lighting.

ARTHUR R HENRY INC

Site ID: ARTHUR R HENRY INC
356186 3031 OCEAN HEIGHTS AVE ,
EGG HARBOR TWP, NJ 08234

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/15/18	Solar Panels

ASHTYN LEIGH FARMS

Site ID: ASHTYN LEIGH FARMS
 468434 5082 LANDIS AVE,
 BUENA VISTA TWP, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/14/18	To reduce hazardous material use, grass and weeds are cut mechanically and the farmer rotates crops and monitors the fields for pests.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/14/18	To save water, the farmers have 6-8 acres of drip irrigation system.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/14/18	The business recycles empty pesticide containers. The farmer uses electronic communication with customers.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/14/18	The business has high efficiency LED(s) and fluorescent lighting.

ATLANTIC BLUEBERRY CO

Site ID: ATLANTIC BLUEBERRY CO
 47240 7201 WEYMOUTH RD, & RT 559
 HAMILTON TWP, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/7/16</p>	<p>The business has 190 acres in drip irrigation to save water.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/7/16</p>	<p>The pesticide empty containers are recycled by Helena and the State program, High efficiency lighting is used on the farm to save energy. The IPM program is used to reduce pesticides on the farm where they employ an IPM coordinator to implement the reduction of pesticides in the field. Some examples are: mulching the field rows with composted leaves, monitoring insects and disease with traps, and planting disease resistant varieties.</p>

ATLANTIC CAPE COMMUNITY COLLEGE MAYS LANDING CAMPUS

Site ID: ATLANTIC CAPE COMMUNITY COLLEGE MAYS LANDING CAMPUS
 40715 5100 BLACKHORSE PK, AKA RT 322
 MAYS LANDING, NJ 08330

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/25/16	The facility uses rain barrels to catch water for greenhouse plants.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/25/16	the staff use golf carts to get around campus instead of gas powered vehicles
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/25/16	The STEM building is trying for a LEED Silver certification. It has a green roof, built with sustainable building materials, and LED lighting.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	4/25/16	They partnered with the Dept of Fish and Wildlife to plant beach plums on campus to improve the look of the campus.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	4/25/16	The solar panels onsite power 40% of campuses needs

ATLANTIC CITY

Site ID: ATLANTIC CITY
 57454 1301 BACHARACH BLVD,
 ATLANTIC CITY, NJ 08401

Stewardship Activities	Date Acknowledged	Comments
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/2/14	Use of Compressed Natural Gas for Vehicle Fleet as an alternative fuel to standard gas
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	4/2/14	Coordination with AC Schools for litter beach cleanups on 3 different events last year
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	4/2/14	Solar Panels for energy use in Public Works garage.

ATLANTIC CITY COUNTRY CLUB

Site ID: ATLANTIC CITY COUNTRY CLUB
12553 1 LEO FRASER DR, & SHORE RD
NORTHFIELD, NJ 08225

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	10/22/14	Received Audubon Certification due to changes to course design and layout implemented to encourage and improve migratory bird habitat & to improve water quality of runoff.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	7/1/11	After many changes to the Golf Course layout and design, the GC applied for and recieved Audubon Certification, with changes to course design and layout implemented to encourage and improve migratory bird habitat & water quality runoff improvements.

ATLANTIC CITY MEDICAL CENTER RADIOLOGY

Site ID: ATLANTIC CITY MEDICAL CENTER RADIOLOGY
14533 1925 PACIFIC AVE,
ATLANTIC CITY, NJ 08201

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/14/16	In 2015, AtlantiCare's lab purchased a new pathology tissue processor which generates less hazardous waste and uses less hazardous materials (alcohol and formalin) than the traditional method. The lab recently performed a study to see how much hazardous materials was reduced and determined the quantity to be a reduction of 20%.

ATLANTIC CITY MUA

Site ID: ATLANTIC CITY MUA
12549 1151 N MAIN ST,
PLEASANTVILLE, NJ 08232

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/10/12	As noted in the June 2009 Stewardship Review, as part of their standard operating procedures, whenever possible ACMUA uses more reservoir water in place of pumped ground water which lowers electric consumption due to reduced use of groundwater pumps.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/10/12	Purchased 2 hybrid vehicles as first noted in the June 2009 Stewardship Review. Vehicles are still in use.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/24/10	As noted in the June 2009 Stewardship checklist, whenever possible, ACMUA uses more reservoir water in place of pumped ground water which lowers electric consumption due to reduced use of groundwater pumps.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/24/10	Purchased and are using 2 hybrid vehicles, as noted in the June 2009 Stewardship checklist.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/19/09	ACMUA is using more reservoir water in place of pumped water which lowers electric consumption due to reduced use of groundwater pumps.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/19/09	purchased 2 additional hybrid vehicles.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/24/08	Purchased 2 hybrid vehicles

ATLANTIC CNTY DPW NORTHFIELD

Site ID: ATLANTIC CNTY DPW NORTHFIELD
 12557 NEW RD & DOLPHIN AVE, AKA RT 9
 NORTHFIELD, NJ 08225

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	6/5/18	Streets are swept more than what is required by permit.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	6/5/18	Dog waste baggies are kept at parks for resident use.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/7/08	Since 2003 purchasing "clean fuel vehicles" such as biodiesel. 1/3 of all the Special Transportation bus fleet is now "Clean Fuel". Currently has Toyota Hybrids and 2 Ford Escape Hybrids in their Fleet management.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/7/08	Installation of Building management systems /energy retrofits. All HVAC specs need to meet "Smart Start" since 2000. In 2004 replaced old ice machines with new ones that utilize 10 watts of energy.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	1/7/08	Executive Order 01-07 signed by AC Executive Dennis Levinson commits Atlantic County Gov to accelerate its use of clean fuels, alt energy and conservation measures

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/7/08</p>	<p>All paper products and detergents meet the Green Seal Certification as environmental friendly. Replacement of all copiers and computers with "Energy Star" products.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/7/08</p>	<p>Since 2006, Biodiesel has been used in the fuel center.</p>

ATLANTIC CNTY UTIL AUTH

Site ID: ATLANTIC CNTY UTIL AUTH
143132 1801 ABSECON BLVD, AKA RT 30
ATLANTIC CITY, NJ 08401

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>10/15/18</p>	<p>Effluent reuse at WWTP. Waterless urinals in use.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>10/15/18</p>	<p>Newer aerators and oxygen monitors have reduced electricity use for aeration.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>10/15/18</p>	<p>CNG, hybrid, and electric vehicles. EV charging stations.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/15/18</p>	<p>Green roof on building at entrance to WWTP.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>10/15/18</p>	<p>Facility tours, newsletter, Earth Day Festival</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>10/15/18</p>	
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/15/18</p>	<p>Solar panels and wind farm.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/22/14</p>	<p>Effluent reuse, waterless urinals</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/22/14</p>	<p>New aerators and oxygen monitors have reduced electricity use for aeration.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/22/14</p>	<p>CNG, hybrid, & electric vehicles. EV charging stations. http://www.acua.com/green-initiatives/alternative-fuel-vehicles/electric-hybrid/</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/22/14</p>	<p>1. Green roof installed on building at entrance to WWTP. 2. Green vehicle wash building constructed at Environmental Park. http://www.acua.com/green-initiatives/</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/22/14</p>	<p>Facility tours, community events, speakers bureau</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/22/14</p>	<p>Available upon request</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>9/22/14</p>	<p>Solar panels, wind farm, geothermally heating & cooling. Landfill gas to energy. http://www.acua.com/green-initiatives/</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>12/5/12</p>	<p>Effluent reuse, waterless urinals</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/5/12</p>	<p>New aerators and oxygen monitors have reduced electric use for aeration.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/5/12</p>	<p>Biodiesel fleet, electric vehicle and charging stations, hybrid vehicles. More information is available here: http://www.acua.com/acua/uploadedFiles/Home/ACUA_Information/Files/Fact_Sheets/biodiesel.pdf</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/5/12</p>	<p>Green roof installed on ACUA owned building at 1701 Absecon Boulevard. More info is available here: http://www.acua.com/acua/uploadedFiles/Home/ACUA_Information/Files/Fact_Sheets/green%20roof%20fact%20sheet%20with%20links.pdf</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/5/12</p>	<p>Facility tours, community events, speakers bureau.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/5/12</p>	<p>Available upon request</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/5/12</p>	<p>Solar panels and wind farm, geothermal heated and cooled administrative building http://www.acua.com/acua/content.aspx?id=474</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/30/11</p>	<p>Effluent reuse, waterless urinals</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/30/11</p>	<p>More efficient centrifuges and aerators installed approx. 5 years ago that require less natural gas to be used for incineration. New aerators and oxygen monitors have reduced electric use for aeration.</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/30/11</p>	<p>Biodiesel Fleet at ACUA - The ACUA uses a biodiesel blend to power its fleet of garbage and recycling trucks. The B5 blend used by the ACUA is made from natural soybean oil. http://www.acua.com/acua/uploadedFiles/Home/ACUA_Information/Files/Fact_Sheets/biodiesel.pdf Electric Vehicle and Charging Station - The ACUA has installed 3 electric car charging stations (one at the Atlantic City site) and has purchased an electric powered vehicle. http://www.acua.com/acua/uploadedFiles/Home/ACUA_Information/Files/Fact_Sheets/electric%20vehicle%20combined%20fact%20sheet_Layout%201.pdf ACUA Hybrid Vehicles - In December 2004, the Atlantic County Utilities Authority (ACUA) purchased four Ford Hybrid Escapes. Since that time, the ACUA has purchased two additional Ford Escape Hybrids and five Silverado Hybrid trucks, bringing the fleet total to 11 hybrid vehicles. http://www.acua.com/acua/uploadedFiles/Home/ACUA_Information/Files/Fact_Sheets/hybridsFactSheet6o7.pdf</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/30/11</p>	<p>Green roof installed on ACUA building at 1701 Absecon Blvd. http://www.acua.com/acua/uploadedFiles/Home/ACUA_Information/Files/Fact_Sheets/green%20roof%20fact%20sheet%20with%20links.pdf</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/30/11</p>	<p>Multiple programs including tours, community events, and speakers bureau.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/30/11</p>	<p>available upon request.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/30/11</p>	<p>solar installation, wind farm, biodiesel vehicles, hybrid vehicles</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/19/09</p>	<p>See SCI 080001 from 3/4/08 and http://www.acua.com/acua/content.aspx?id=560</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/19/09</p>	<p>See SCI 080001 from 3/4/08 and http://www.acua.com/acua/content.aspx?id=64</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/19/09</p>	<p>See SCI 080001 from 3/4/08</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/19/09</p>	<p>See SCI 080001 from 3/4/08 and http://www.acua.com/acua/content.aspx?id=486</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/4/08</p>	<p>effluent reuse, installation of waterless urinals.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/4/08</p>	<p>Multiple programs including tours, community events, and speakers bureau. www.acua.com/about/outreach.cfm</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/4/08</p>	<p>yes</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/4/08</p>	<p>solar installation, wind farm, biodiesel vehicles, hybrid vehicles. www.acua.com/files/aboutacua07.pdf</p>

ATLANTIC CNTY UTIL AUTH CITY ISLAND WWTP

Site ID: ATLANTIC CNTY UTIL AUTH CITY ISLAND WWTP
 14611 1701 ABSECON BLVD,
 ATLANTIC CITY, NJ 08401

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/12/13	ACUA recently completed (Spring 2013) installation of variable frequency drives (VFDs) for pumps at the Linwood and Absecon Pumping Stations.

ATLANTIC CNTY UTIL AUTH SLF & TRANSFER STATION

Site ID: ATLANTIC CNTY UTIL AUTH SLF & TRANSFER STATION
 15742 6700 DELILAH RD, & DOUGHERTY RD
 EGG HARBOR TWP, NJ 08234

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/24/18	ACUA's vehicle wash is open to the public & is powered by 100% renewable energy, with 85% of the water used being recycled. Used motor oil is used to heat the facility.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/24/18	Placement of bluebird houses and wood duck nesting boxes.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	9/24/18	The facility hosts facility tours, Earth Day event, rain barrel workshops, master composter training and newsletters.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/24/18	ACUA collects methane from the landfill and combusts it to produce enough electricity to power the entire environmental park. The administrative building is heated and cooled by a geothermal system.

AUGUST C WUILLERMIN FARMS INC

Site ID: AUGUST C WUILLERMIN FARMS INC
 41969 893 9TH ST,
 HAMMONTON, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/24/15	The farmer uses a drip irrigation system over 170 acres to save water.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/24/15	The farmer recycles the pesticide empty container with Helena Chemical, reducing the amount of general waste.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/24/15	The farmer uses solar panels to increase the farm's energy efficiency.

BALLAMOR GOLF CLUB

Site ID: BALLAMOR GOLF CLUB
91678 6071 ENGLISH CREEK AVE,
EGG HARBOR TWP, NJ 08221

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	11/12/15	Solar Panels
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	7/30/12	Site has installed solar panels for irrigation system energy use as well as solar panels for clubhouse energy use.

BALLYS ATLANTIC CITY

Site ID: BALLYS ATLANTIC CITY
12787 1901 BOARDWALK, & PARK PL
ATLANTIC CITY, NJ 08401

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/28/16	The facility uses low flow showerheads and toilets.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/28/16	The facility reprocesses used soap.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/28/16</p>	<p>The facility Installed LED lighting and replaced the back of house T12 tubes with T8s.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/9/13</p>	<p>Installation of low flow showerheads and toilets.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/9/13</p>	<p>Used soap bars are collected and sent out for reprocessing and charitable distribution.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/9/13</p>	<p>Installation of LED lighting and motion sensor light switches.</p>

BAYVIEW GARDEN NURSERIES

Site ID: BAYVIEW GARDEN NURSERIES
 176747 2717 ZION RD,
 NORTHFIELD, NJ 08225

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/9/14	The farmer controls weeds mechanically to reduce hazardous material.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/9/14	The farmer has drip irrigation to save water.

B&B FARMS

Site ID: B&B FARMS
 523855 250 S MANNHEIM AVE,
 GALLOWAY TWP, NJ 08215

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/28/14	The farm cuts weeds mechanically, to reduce herbicide used.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/28/14	Mr. Brown recycles the pesticide empty containers. He helped to create the pesticide empty container recycle program when he was working in USDA.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/28/14	He has a skylight in the storage building.

BELLVIEW FARMS

Site ID: BELLVIEW FARMS
127635 202 WEYMOUTH RD,
BUENA BORO, NJ 08310

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/23/15	This establishment mechanically controls weeds, leading to a reduction of using herbicides to control weed population.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/23/15	This establishment is equipped with drip irrigation system for crop irrigation. At least 40 acres of grapes are equipped with drip irrigation.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/23/15	The business uses high efficiency lighting. Heating and Air Conditioning are high efficiency. All have energy star labels.

BEST EASTERN EXTERMINATING CORP

Site ID: BEST EASTERN EXTERMINATING CORP
121276 6737 BLACK HORSE PK,
EGG HARBOR TWP, NJ 08234

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/10/15	Responsible commercial applicator and business owner Donald Sellers described his integrated pest management, or IPM, program. In an effort to reduce chemical input, Mr. Sellers will implement IPM techniques at all jobs. These include scouting, to see if indeed there is a pest problem; alternatives to chemical control, such as mechanical and sanitation alternatives; maintaining a threshold, to limit overall input of pesticides; and using chemical treatment only when deemed necessary. These practices attempt to limit the input of pesticides into the environment, reducing the risk of harm from exposure to pesticide products for people and the environment. The reduction of pesticide use also reduces containers, which have to be treated as contaminated with pesticide product, and reduction of rinsate, which must be properly disposed of.

BLUEBERRY BILL FARMS INC

Site ID: BLUEBERRY BILL FARMS INC
 127725 950 11TH ST,
 HAMMONTON TOWN, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/30/13	The farmer recycles the pesticides empty containers. The pesticide containers are sent to state sponsored recycling program. This farm uses Integrated Pest Management (IPM) methods to reduce the amount of pesticides used in this facility.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/30/13	This farm uses drip irrigation in 100 acres of the facility for water reduction.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/30/13	This farm uses all fluorescent lighting T5 inside the facility. The farmworker labor camp uses programmable thermostats. The farmer uses appliances with Energy Star to reduce energy.

BOBS GARDEN CENTER

Site ID: BOBS GARDEN CENTER

 HAMMONTON, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/13/16	The farm has instituted a Rutgers Integrated Pest Management (IPM) program to reduce pesticides used. The program uses other means of control and monitoring rather than making only broadcast preventative pesticide applications.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/13/16	180 acres have a drip irrigation system to save water.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/13/16	Empty pesticide containers are recycled by Helena and the State program.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/13/16	A high efficiency lighting system is used on this farm to save energy.

BRIGANTINE CITY HALL

Site ID: BRIGANTINE CITY HALL
 44487 1417 ATLANTIC BRIGANTINE BLVD,
 BRIGANTINE, NJ 08203

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/25/13	Energy audits conducted at all Municipal Bldgs, and changes made including new energy efficient lights, motion sensors for light shutdown
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	10/25/13	Brigantine City has completed a sand dune project that has resulted in the planting of over 200K plants/indigenous species on the island dunes
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	10/25/13	Formation of a "Green Team" as an initial step for certification as a "Sustainable Jersey" municipality.

BUENA BORO

Site ID: BUENA BORO
44949 616 CENTRAL AVE,
MINOTOLA, NJ 08341

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/1/15	Buena Borough has installed low wattage, high efficiency light bulbs with motion sensors at the Dept of public works office and the road department.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/1/15	All leaves collected from residents are given to an organic farmer for free to use as compost. The Borough gets rid of its leaves for the residents and keeps them out of storm drains, and the farmer gets free compost fuel for his crops.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/14/13	Buena Borough has installed low wattage, high efficiency light bulbs with motion sensors at the Department of Public Works office and the Road Department.

BUENA BORO RGNL BD OF ED HIGH SCHOOL

Site ID: BUENA BORO RGNL BD OF ED HIGH SCHOOL
 12743 125 WEYMOUTH MALAGA RD,
 BUENA VISTA TWP, NJ 08310

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/29/16	The facility uses LED ligths in one of the schools
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/29/16	The facility recycles their paper.

BUENA VISTA FARM

Site ID: BUENA VISTA FARM
 127681 435 UNION RD,
 BUENA VISTA TWP, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/13/18	To reduce hazardous material use, grass and weeds are cut mechanically. To reduce fertilizer and pesticide use, the farmer rotates crops and uses cover crops and green manure in the field.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/13/18	To save water, the farmers have a few acres of a drip irrigation system.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/13/18	Empty pesticide containers, plastic mulch and drip irrigation taps are all recycled. The farmer also uses electronic communication with their customers.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/13/18	The business has high efficiency LED(s) and fluorescent lighting and a high efficiency heater and air conditioner.

BUENA VISTA TWP

Site ID: BUENA VISTA TWP
129045 890 HARDING HWY,
BUENA VISTA TWP, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/6/17	Buena Vista replaced all street lights with LED lighting to conserve energy in conjunction with the NJ Board of Public Utilities and Department of Clean Energy. Buena Vista also purchased environmentally friendly paper and cleaning supplies.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/6/17	Buena Vista installed nature trails at Collins Lake and Quigley Park.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/6/17	Buena Vista received a Sustainable NJ Silver certification. Buena Vista purchased recycling containers for all households and calculated a 6% reduction in garbage.

BUG BOMBERS

Site ID: BUG BOMBERS
498830 76 MARSHALL DR,
EGG HARBOR TWP, NJ 08234

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/10/15	In an effort to reduce waste and conserve materials, the business has switched to all electronic records ("paperless office"). Because a record of application is required every time a pesticide product is applied, this significantly reduces the business' paper use.

BUTTERHOFS SHADY BROOK FARM

Site ID: BUTTERHOFS SHADY BROOK FARM
 390833 5800 WHITEHORSE PK, AKA RT 30
 MULLICA TWP, NJ 08215

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/28/14	The farmer cuts weeds mechanically, reducing the need for herbicide applications.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/28/14	The farmer recycles empty pesticide containers with Helena Chemical, under the State Department of Agriculture's program. This reduces the farms' output of plastic waste.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/28/14	The business uses high efficiency lighting to conserve energy consumption.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/28/14	The business has solar panels, a renewable energy source.

CAROLINES BLUEBERRIES CORP

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/15/14	This farm recycles all pesticide containers. The farmer uses mechanic control to kill weeds. Most of the time herbicides are not used in this farm.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/15/14	The farmer has 140 acres with drip irrigation system to save water.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/15/14	The pesticide containers are sent to state sponsored recycling program.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/15/14	In the business LEDs high efficiency lighting are used to save energy. The farmer has high efficiency air conditioned and heater system to save energy.

CASABON FARMS

Site ID: CASABON FARMS

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/17/14	They use IPM monitoring plan to check the fields for pest problems before applying any pesticides.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/17/14	The business has 1 acre in drip irrigation.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	12/17/14	The business recycles their empty containers with the Helena Chemical recycling program. Also, the plastic from the greenhouse covers is recycled in a special recycling program. Nursery pots are recycled. Email is the primary correspondence for business transactopms. less paper product needed. Most business is conducted via email and phone calls.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/17/14	The business uses florescent lighting, and high efficiency air conditioners.

COIAS GARDEN MARKET & GREENHOUSES

Site ID: COIAS GARDEN MARKET & GREENHOUSES

If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	10/24/17	They perform 2 roadside cleanups through Clean Communities and the Environmental Commission. They have an established green team starting initiatives for the eventual sustainable NJ application.

EGG HARBOR YACHT CO

Site ID: EGG HARBOR YACHT CO
14610 801 PHILADELPHIA AVE,
EGG HARBOR CITY, NJ 08215

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/9/15	The facility now manufactures all boats using a closed mold process. The spraying and roller coating of styrene based resin is now kept to a minimum. All boat hulls, decks, and small parts manufacturing consists of using a closed molding process. Everything is encapsulated into giant bags. The resin is pumped into one end of the bag while a vacuum is drawn on the other end. This process results the optimum resin/fiberglass ratio. By using this method, hazardous material usage is greatly reduced. The usage of resins containing HAPS/VOCs is greatly reduced. Waste disposal is no longer a hazardous waste. When finished, the bags and associated piping can be put out in the general trash.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	4/9/15	Using the above-mentioned cold mold process for boat manufacturing, the usage of styrene containing resins is greatly reduced resulting in substantial material conservation. There is no excess usage of resin applied as when roller coating or spraying. Now, a precise amount of resin is used to maintain a desired thickness. Raw material waste is kept to a minimum.

FERRUCCIS LAWN & GARDEN SUPPLY

Site ID: FERRUCCIS LAWN & GARDEN SUPPLY
 181938 HARDING HWY, AKA RT 40
 LANDISVILLE, NJ 08326

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/26/16	Mr. Ferrucci uses several integrated pest management (IPM) practices, which include scouting for bag worms and rotating the crops planted each year. These practices reduce the amount of pesticides that need to be applied by reducing the frequency of their application.

FOLSOM BORO

Site ID: FOLSOM BORO
 149721 1700 12TH ST,
 FOLSOM BORO, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/7/12	Folsom installed two new, 90% efficiency rating, 150,000 btu heaters in the municipal building. In addition, it replaced the old lights with new incandescent energy efficient low wattage bulbs with motion sensors in the municipal building.

FORMISANO FARMS

Site ID: FORMISANO FARMS
 122942 313 PLYMOUTH ST,
 BUENA, NJ 08310

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/12/14	The spray building was designed to collect pesticide spills. Weed control is done mechanically and manually to decrease pesticide use.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/12/14	The farmer recycles the empty pesticides containers with Helena Company.

FROG ROCK INN

Site ID: FROG ROCK INN

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/14/16	Mr. Strigh stated they treat when needed and do not perform broadcast preventative applications. They only treat the greens. Applications are not performed on the tees, roughs, fairways, or approaches which significantly reduces the total amount of pesticides applied. Pests are managed through Integrated Pest Management (IPM) practices, such as monitoring the water applied and mechanical means of removal. The business only fertilizers twice per year further reducing the chemicals applied on site.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/14/16	Mr. Strigh participates in the New Jersey Department of Agriculture's voluntary plastic pesticide container recycling program.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/14/16	The facility has converted all yardage signs into bird houses increasing local songbird habitat.

GALLOWAY NATIONAL GOLF COURSE

Site ID: GALLOWAY NATIONAL GOLF COURSE
 38258 270 S NEW YORK RD, AKA RT 9
 GALLOWAY TWP, NJ 08205

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/12/17	installation of energy efficient heating and cooling systems with 90% efficiencies were installed in municipal buildings as well as replacement of all incandescent lighting with T8 fluorescents.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	1/12/17	the Twp constructed a rain garden at the municipal building parking lot in an area prone to flooding.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	1/12/17	Partnered with Edwin B Forsythe Natl Wildlife Refuge and Mullica River Watershed ambassadors to host 2 wildlife drive cleanups. The twp has a Green task force, giving away reusable shopping bags at public events, does clean up and stormwater education at school's retention and detention basins, and purchased and donated stormwater themed books for use at the local library and local school libraries.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/1/13</p>	<p>Installation of new energy efficient heating and cooling systems with efficiencies over 90% as well as replacement of all incandescent lighting with new T-8 fluorescents</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>8/1/13</p>	<p>Galloway Township constructed a rain garden at the municipal building parking lot in an area prone to flooding. The spot was selected for both its high visibility and to correct the drainage problem. The rain garden, which contains a combination of wetlands and highland/drought resistant native plantings, absorbs the excess stormwater runoff and filters the stormwater as it drains through the soil. The design, engineering, and construction of the garden was done by two Stockton Professors, Patrick Hossay and Tait Cherinje and their students. Galloway Township and Stockton College have done several Rain Garden tours and discussions for public education and awareness.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>8/1/13</p>	<p>Kids Go Green in Galloway, a program for elementary and middle schools. Also tabled at a Mr. Bs Backyard Classroom Nature Fest, talking to over 1500 students, Partners with Edward B Forsythe Wildlife Refuge and Mullica River Watershed Ambassadors for outreach programs. Constructed Rain Garden for Public Education/Awareness</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/27/11</p>	<p>All incandescent lighting for Exit signs at all pump stations have been changed to LED lighting</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>9/27/11</p>	<p>Only recycled office paper and green cleaning products are purchased</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>12/15/08</p>	<p>Only recycled office paper and green cleaning products are purchased</p>

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/18/16	This facility has substituted incandescent bulbs for fluroescents, thereby conserving energy. In addition, this facility is one hosting site for the State Department of Agriculture's Plastic Pesticide Container Recycling Program. Under this program, licensed commercial and private pesticide applicators can bring their rinsed, empty containers to Helena. Helena will recycle them with the State Department of Agriculture. The applicators receive one unit of Core recertification credit for presenting and recycling their empty, rinsed-clean plastic pesticide containers at this site. Thus, by hosting this activity, Helena Chemical participates in the reduction of plastic waste generated by the industry.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	10/18/16	This facility is one of the hosting site for the State Department of Agriculture's Plastic Pesticide Container Recycling Program. Under this program, licensed commercial and private pesticide applicators can bring their rinsed, empty containers to Helena. Helena will recycle them with the State Department of Agriculture. The applicators receive one unit of Core recertification credit for presenting for recycling their empty, rinsed-clean plastic pesticide containers at this site. Thus, by hosting this activity, Helena Chemical participates in the reduction of plastic waste generated by the industry.

HENSEL FARMS

Site ID: HENSEL FARMS
 175995 TUCKAHOE RD, BOX 361
 MILMAY, NJ 08340

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	11/19/14	The farmer uses cultivators to kill weeds, in place of pesticides.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	11/19/14	The business has 140 acres in drip irrigation system to save water.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/19/14	The farmer recycles the pesticides empty containers with Helena Program.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	11/19/14	The farmer has a building designed to collect pesticide spills, uses high efficiency lighting LED and high efficiency appliances in the worker's campsite.

HIDDEN CREEK GOLF CLUB

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/2/12	Purchased new, more efficient sprinkler heads for irrigation system and implemented a hand watering SOP by purchasing over \$10,000 in hoses.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/2/12	Installed Solar Panels that now provide electricity for maintenance bldg, clubhouse and water pumps

HOLIDAY HAVEN CAMPGROUND

Site ID: HOLIDAY HAVEN CAMPGROUND

20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	10/16/14	The site has solar panels that provide 96%+ of required electrical power to operate the park. There are 169 units.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	4/25/13	Facility has installed solar panels that provide ~96% of the electrical power needed to operate the park.

IGI LABORATORIES INC

Site ID: IGI LABORATORIES INC
 30158 105 LINCOLN AVE, & WHEAT RD
 BUENA VISTA TWP, NJ 08310

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/21/16</p>	<p>Water meters have been installed on ports located in all four manufacturing suites. These ports are used frequently throughout the day for various aqueous processing operations. The meters are calibrated on a semi-annual basis and are accurate to ±1%. This accuracy allows for very precise measurements and ultimately eliminates usage of excess water, which would otherwise be discarded.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/21/16</p>	<p>Teligent is continuously reviewing and gathering information on a batch by batch basis, everything from total run time, line stoppages, bulk accountability and reject trending. This information gives the company a direct reflection of productivity and efficiency, and allows them to optimize each process to the extent of machine capabilities. A secondary impact of the efficiency tracking and process optimization is reduction of total run time. When reducing run time, you are able to decrease your overall labor cost and furthermore reduce your overall utility costs.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>4/21/16</p>	<p>Teligent is continuously reviewing and gathering information on a batch by batch basis, everything from total run time, line stoppages, bulk accountability and reject trending. This information gives the company a direct reflection of productivity and efficiency, and allows them to optimize each process to the extent of machine capabilities. The largest impact of the efficiency tracking and process optimization is the reduction of process waste, which directly minimizes the amount of both hazardous and non-hazardous waste generated on a batch to batch basis.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/21/16</p>	<p>Teligent has provided electronic fueling stations for two employees who have purchased electric cars. These two employees travel from Philadelphia and Northern Jersey, in excess of over 200 miles total on a daily basis.</p>

JAMES LEVARI FARM

Site ID: JAMES LEVARI FARM
 343630 1165 HARDING HWY,
 BUENA, NJ 08310

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/23/18	To reduce hazardous material use, the fields are monitored for pests and grass and weeds are cut mechanically.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/23/18	To save water, the business has a drip irrigation system in the production area.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/23/18	To save energy, fluorescents lighting is used in the business.

JOE DONIO FARMS

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/5/18	Environmentally friendly cleaning products are used in the packing house. To help reduce pesticide usage, the Rutgers IPM is used to scout and mechanically control weeds.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/5/18	There are 3 acres of drip irrigation.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/5/18</p>	<p>LED lighting is used in all their facilities.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/6/13</p>	<p>This farm uses drip irrigation on 4 acres of the facility for water reduction.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/6/13</p>	<p>This farm recycles all pesticide containers. The pesticide containers are sent to state sponsored recycling program.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/6/13</p>	<p>The farm uses integrated pest management (IPM). Beneficial insects are used to control pests.</p>

KAMMERMANS MARINE INC

Stewardship Activities	Date Acknowledged	Comments
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	8/18/15	Kammerman's Atlantic City Marina received a certification as a "Certified Clean Marina" on October 25, 2007 through the New Jersey Department of Environmental Protection's "New Jersey Clean Marina Program". According to Department records Kammerman's Marina maintains its status as a "New Jersey Clean Marina". Further information regarding the certification can be obtained at: http://www.njcleanmarina.org/certified.htm
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	4/4/11	Yes. Kammerman's Atlantic City Marina received a certification as a "Certified Clean Marina" on October 25, 2007 through the New Jersey Department of Environmental Protection's "New Jersey Clean Marina Program". Further information regarding the certification can be obtained at: http://www.njcleanmarina.org/certified.htm

LAWN DOCTOR OF NORTHFIELD

Site ID: LAWN DOCTOR OF NORTHFIELD
29642 6604 DELILAH RD, STE 2
EGG HARBOR TWP, NJ 08234

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/14/15	Lawn Doctor's application equipment is "ground-metered", a feature unique to the company. This means that the equipment is not calibrated to speed of the user or to time, but to the number of tire rotations the machine completes. This ensures that the granular pesticide material will always be applied in the correct amounts, eliminating excess potential chemical (pesticide) application due to differences in operator speeds. Further, Lawn Doctor offers an "all-natural, pesticide free" program as part of its services. Integrated Pest Management (IPM) practices are used with customers engaging in that program, such as proper fertilizing, have a pest threshold tolerance, etc. This eliminates pesticide/chemical applications, reducing the risk of potential exposure for customers, applicators, and the environment.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/14/15	The company participates in the voluntary pesticide container recycling program. Pesticide containers are appropriately cleaned, transported to Helena Chemical, and voluntarily recycled, keeping them out of general waste. Because this is a landscaping business, this reduces the number of empty herbicide containers being put into landfills.

LINWOOD CITY

Site ID: LINWOOD CITY
 42637 400 POPLAR AVE,
 LINWOOD, NJ 08221

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/4/17	Use ionized water for all cleaning in place of chemical agents.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/4/17	Replaced all of their light bulbs with energy efficient, T8 bulbs, and replaced the air conditioning system at public works.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	12/4/17	Sweep all streets in the City, which is more than what is required. The Environmental Commission hosts a Patcong Creek cleanup every year with volunteers.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	12/4/17	The Environmental Commission, in collaboration with the Nature Conservancy, completed the Jacques Cousteau shoreline project to re-establish marshes along the shoreline of the Patcong Creek.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	12/4/17	Sustainable NJ community, has a Green Team and received bronze certification.

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/5/14</p>	<p>Use of ionized water for all cleaning in place of chemical agents</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/5/14</p>	<p>Replacement of all lighting with more efficient T-8 bulbs</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/5/14</p>	<p>Sustainable Community, NJ Certified , Has an established Green Team in place.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/19/08</p>	<p>"Patcong Creek Canoe and Kayak Cleanup and Picnic" is planned for Sunday, June 1, 2008. Community effort along with ACUA, Egg Harbor Township, NJDEP Americorps Watershed Ambassadors, Deepwater Marina of Egg harbor Twp., Somers Point Marina, Great Egg Harbor Watershed Assoc., and other local commercial sponsors</p>

LOMBARDI FARMS INC

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/14/18	To reduce hazardous materials, grass and weeds are cut mechanically and the fields are monitoring prior to any pesticide application.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/14/18	To save water, a drip irrigation system is used in the field.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	5/14/18	The business has LED lighting and skylights.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/11/14	The business cuts grass mechanically, an integrated pest management (IPM) practice that reduces the need for herbicide/ pesticide applications.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/11/14	Four acres of crop are watered using a drip irrigation system, reducing the total amount of water necessary to sufficiently irrigate the crop.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/11/14</p>	<p>The business runs with natural light, and it has a building with skylight, conserving the amount of energy consumed.</p>

LONGPORT BORO BD OF ED

Site ID: LONGPORT BORO BD OF ED
50544 2305 ATLANTIC AVE,
LONGPORT, NJ 08403

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/13/17</p>	<p>Longport has adopted an ordinance to have homeowners install a rain gage on their sprinkler systems. This will ensure they only water when necessary and within ordinance criteria (every other day, and not after storms, etc.).</p>

LOSASSO FARMS

Site ID: LOSASSO FARMS
 127710 3606 NESCO RD,
 MULLICA TWP, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/27/14	The farmer uses integrated pest Management (IPM). Rutgers handles the program to reduce the pesticide applications, especially the applications of insecticide and fungicide. Also, the farmer cuts weeds with the mower to reduce herbicide applications.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/27/14	The 21 acres have drip irrigation system. The irrigation system has an overhead drip system with high efficiency pump to save water and energy.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/27/14	In the farm is used high efficiency fluorescent lighting T8 to save energy.

MAIMONE FARMS

Site ID: MAIMONE FARMS
494861 564 1ST RD,
HAMMONTON, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/14/16	This business recycles pesticide empty containers with the Helena empty container recycling program.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/14/16	This establishment has installed drip irrigation equipment for a more efficient use of water. The equipment is used to irrigate 6 acres of blueberries.

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/1/16	Traffic light bulbs are changed to LEDs.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/1/16	All old fluorescent light bulbs have been replaced by halogen ones in city hall and public works building. Motion sensors have been added for energy reduction.

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>4/1/16</p>	<p>Recycling is enforced to building contractors in town requiring recycling of carpets, metals, and cardboard, not to be dumped into dumpsters.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/1/16</p>	<p>Outreach in school presentations to encourage recycling as well as educate about stormwater.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/6/13</p>	<p>Changing out Traffic light bulbs with new energy efficient LEDs</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/6/13</p>	<p>replacing old fluorescent bulbs with new halogen bulbs in City Hall and Public Works building. Also motion sensors for energy use reduction.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/6/13</p>	<p>Enforced recycling to building contractors in town, requiring carpets to be recycled, metals as well as cardboard, not to be dumped into onsite dumpsters. Inspections are done to enforce the requirements</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/6/13</p>	<p>outreach to school system to encourage recycling</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>3/12/08</p>	<p>extensive, well enforced recycling program in place in the city, with community education and outreach</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/12/08</p>	<p>school program that promotes recycling</p>

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/21/15	The farmer works with Rutgers University to implement an Integrated Pest Management (IPM) program, monitoring pests in the fields and using mechanical weed control. This reduces the amount of chemical insecticide and herbicide applied by the farm.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/21/15	To conserve the amount of water necessary for blueberry irrigation, the farmer uses a drip irrigation system for 68 acres.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/21/15	Empty pesticide containers are recycled with Helena Chemical, reducing total waste.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	5/21/15	The farmer uses high efficiency LED lighting to conserve energy.

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/10/14	The Base continues to maintain a 4 day work week schedule the facility's overall energy usage (HVAC & lighting needs) has been reduced. Also signs have been posted in common areas and are placed on all light switches as a reminder for everyone, not just employees, to "turn off lights prior to exiting" a room. In addition, a reminder email is sent to all employees to shut off their lights and power down their computers. These activities became effective in January 2008.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	6/10/14	The base continues to be on a 4-day work week thus reducing vehicle emissions. *This activity became effective in January 2008.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/15/09	See details entered for 8/28/2009 inspection report.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	9/15/09	See details entered for 8/28/2009 inspection report.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/28/08	Based on the same 4 day work schedule the facility's overall energy usage (HVAC & lighting needs) has been reduced. Signs have been posted in common areas and are placed on all light switches as a reminder for everyone, not just employees, to "turn off lights prior to exiting" a room. In addition, a reminder email is sent to all employees to shut off their lights and power down their computers. *These activities became effective in January 2008.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	8/28/08	The base went to a 4-day work week reducing vehicle emissions. *This activity became effective in January 2008.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	11/19/14	The farmer uses cultivators to kill weeds in place of chemicals.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	11/19/14	The business has 80 acres in drip irrigation system to save water.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	11/19/14	The farmer uses high efficiency lighting LED and high efficiency appliances.

PENN JERSEY BUILDING MATERIALS

Site ID: PENN JERSEY BUILDING MATERIALS
 12691 2817 FIRE RD @ RR TRACKS,
 EGG HARBOR TWP, NJ 08232

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/8/09	1) Facility has implemented pallet recycling program. 2) Steel from previously used machinery returned to manufacturer for recycling. 3) Any rebar from previously used concrete is sent to recycling facility.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	5/8/09	Penn Jersey planted approximately 100 trees around facility site.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	5/8/09	1) Company switched to four-ten hour days during Winter months. 2) Employees have option of working four-ten hour days throughout the year.

PLANTATION BAY RESORT & COUNTRY CLUB

Site ID: PLANTATION BAY RESORT & COUNTRY CLUB
42907 901 MAYS LANDING SOMERS POINT RD ,
SOMERS POINT, NJ 08244

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/21/16	In order to protect the habitat, they institute a "no spray" pesticide buffer zone around these areas, including the pond. In addition, the course participates in an IPM (Integrated Pest Management) program in conjunction with Rutgers University. They pour a soap and water mixture on designated plots, bringing bugs to the surface and scouting for them. When counting these bugs, they decide whether or not an insecticide application needs to take place. If the bug count does not meet a threshold, they do not make an application. Prevention of broadcast/preventative treatments reduce the total amount of pesticides applied. The golf course also actively attempts to reduce fertilizer consumption by spoon feeding it into spreaders and carefully measuring the amount used.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/21/16	The golf course uses "moisture meters" on its irrigation system, measuring the water content of the soil before irrigating the course. Broadcast or scheduled waterings are not performed without first measuring; If it is deemed unnecessary, irrigation is not performed. This has led to an estimated 20-30% reduction in the course's water consumption.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/21/16	The country club uses LED, energy efficient lighting, reducing total energy consumption.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	6/21/16	This course has been recognized by the Audubon Society for its environmental practices. These include planting milkweed as pollinator habitat. The course has worked with the Boy Scouts of America to create and maintain additional habitat for birds and bees. They also use native plants in an effort to create habitat.

PLEASANTDALE FARMS INC

Site ID: PLEASANTDALE FARMS INC
123047 530 PLEASANT MILLS RD,
HAMMONTON, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	4/6/16	<p>To reduce total pesticide (hazardous material) applied, the farm employs integrated pest management (IPM) techniques. IPM programs include mechanical control of pests and monitoring, rather than doing a preventative, broadcast pesticide application. This reduces the total amount of pesticide applied.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	4/6/16	<p>The business has an agricultural chemical handling facility, which is utilized for decontamination of agricultural equipment and as a mixing area. This way, any potential spills are directed to the catch basin, minimizing risk of contamination of ground water that would occur if mixing took place outside.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	6/6/13	<p>The facility has a pesticide handling building to collect pesticides residues and prevent release of pesticide spills to the environment.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	6/6/13	<p>85% of the farm, approximately 297 acres, has a drip irrigation system installed to reduce water used in the field.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	6/6/13	<p>This farm uses energy efficient T5 fluorescent lighting in the facility.</p>

PLEASANT VALLEY CAMPGROUND

Site ID: PLEASANT VALLEY CAMPGROUND
 37925 RT 50 & S RIVER RD,
 ESTELL MANOR, NJ 083300000

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/15/15	Approximately 4 years ago, toilets, shower heads and faucets in public areas were replaced with low-flow models.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/15/15	Ongoing process to replace lighting in public areas with LED lights.

PLEASANTVILLE CITY MUNICIPAL BUILDING

Site ID: PLEASANTVILLE CITY MUNICIPAL BUILDING
 147601 18 1ST ST,
 PLEASANTVILLE, NJ 08232

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/31/13	Changes to more energy efficient heating systems, replacement of incandescent with fluorescent
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	7/31/13	Participates in Mayors for Green Futures
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	7/31/13	City provides outreach to school system by distributing education pamphlets that focus on environmental issues.

PLEASANTVILLE INDUSTRIAL PARK

Site ID: PLEASANTVILLE INDUSTRIAL PARK
 44315 900 W LEEDS AVE, 900 920 W LEEDS AVE
 PLEASANTVILLE, NJ 08232

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/30/16	Mr. Benson stated rather than perform all preventative treatments, the business employs Integrated Pest Management (IPM) techniques. These include scouting for pests and setting thresholds for pests such as bagworms. This means that until a certain threshold pest level is met, the business will not perform a pesticide application. Rather, the pests will be removed manually. The business also does ladybug releases, one of which took place on tulip trees in Trenton. The ladybugs act as predators reducing pest levels without the application of a pesticides. The business also engages in what Mr. Benson referred to as "reforesting", or regenerating plant material on site to cover bald spots rather than importing plant material or using synthetic nitrogen sources. These practices reduce the amount of pesticides and fertilizers applied.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/30/16	Mr. Benson stated the business uses rain sensors on their irrigation systems, preventing unnecessary watering during rain events and reducing total water consumption.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	8/30/16	Mr. Benson stated the business plants more perennials than annuals in an attempt to encourage pollinator habitat, a practice he referred to as creating "sustainable landscapes". The business also tries to select flowers conducive to pollinators.

POMONA GOLF & COUNTRY CLUB

Site ID: POMONA GOLF & COUNTRY CLUB
 61231 400 MOSS MILL RD,
 POMONA, NJ 08240

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/29/16	Mr. Writchie does not broadcast apply fertilizer; fertilizer is applied as needed by spoon ("spoon feeding"). The course also applies iron chelate. This helps to keep the grass green while reducing the total fertilizer (nitrogen) input.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/29/16	In order to reduce the golf course's total water consumption, Mr. Writchie stated he uses the minimum possible amount of water. When the weather is hot, he uses a syringe to water the course turf, rather than utilizing broadcast irrigation. This reduces water consumption. In addition, he monitors the weather and does not water/irrigate the course when rainfall is predicted.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/29/16	Mr. Writchie keeps application records electronically, reducing paper used. Pesticide containers are voluntarily recycled, further reducing the golf course's waste.

PORT REPUBLIC CITY

Site ID: PORT REPUBLIC CITY
158567 143 MAIN ST,
PORT REPUBLIC, NJ 08241

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/9/17	The Municipal building is heated and cooled geothermally
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	3/9/17	The Township's "Environmental Park" is an established natural area where very minimal maintenance is performed to keep the vegetation natural and ensure species' habitats are kept in tact.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	8/22/13	Citizens and Town of Port Republic participating with the Pinelands Commission to eradicate the Pine Beetle by elimination of certain types of trees/source for Pine Beetles.

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/25/13</p>	<p>The farmer recycles the pesticides empty containers. The pesticide containers are sent to state sponsored recycling program.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/25/13</p>	<p>This farm uses all fluorescent lighting T5 inside the facility. Uses programmable thermostats in buildings provided for farm workers. Uses Energy star refrigerator and stove. The farmer installed an energy efficient heating, ventilation and air conditioning, in his business.</p>

RID PEST CONTROL INC

Site ID: RID PEST CONTROL INC
 119166 6715 DELILAH RD,
 EGG HARBOR TWP, NJ 08232

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/24/15	This site participates in IPM (Integrated Pest Management) practices. This means alternatives to pesticides are considered, including the possibility of not using chemical pesticides (hazardous materials) at all. This business uses pest thresholds, setting a minimum bar, before which alternative methods are used to exclude pests. This includes outreach to customers about what thresholds are and how pests can be excluded without chemical pesticides. IPM practices reduce total chemical input, thus reducing risk to human health and the environment.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/24/15	Further, employees participate in the county recycling program for used pesticide containers. This is a voluntary program where employees take used, emptied, and cleaned pesticide containers to the Atlantic County Utilities Authority annually for recycling, as opposing to disposing of them in general waste.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	8/24/15	This business engages in pollinator (bees, bats, butterflies, other pollinating insect) protection. They send their employees to training in identification and recognition of pollinators and their habitat. If they are in the field and recognize pollinators, they will not spray pesticides. Rather, they will contact the appropriate beekeeper association and notify their customers why they cannot spray. This is to reduce risk to the health of and death of local pollinators.

RON FISHER FARMS

Site ID: RON FISHER FARMS
123866 276 WHITEHORSE PK, AKA RT 30
HAMMONTON, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/19/14	Weeds are eliminated using cultivators in 6 greenhouses and using biological insect control, reducing the need for herbicide applications.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/19/14	The farmer has 20 acres in drip irrigation system to save water.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/19/14	The business uses high efficiency lighting and natural light, conserving energy.

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/9/18	To reduce hazardous materials, the business cuts grass and weeds mechanically, monitors the fields before any pesticide application and performs tests to determine if fertilizer is needed. Empty pesticide containers are recycled. To eliminate pests, crops are rotated every year, compost is used to reduce fertilizer and protect the soil.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/9/18	Customer communication is primarily paperless.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/9/18	The business uses LED(s) and fluorescent lighting, and heaters and air conditioners used in the labor housing and in the office are high efficiency.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/9/18	The business has solar panels.

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/17/15	Mr. Lovett informed me that the previous manager upgraded approximately 30 fluorescent magnetic ballasts on-site; this allowed the facility to switch from T12 bulbs to T8 bulbs which consume approximately 35% less electricity. The facility also upgraded 20 incandescent light bulbs from their warehouses to compact fluorescent bulbs which are estimated to be 60%-70% more energy efficient.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	11/21/17	They do not use herbicides on any public property landscaping.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/21/17	They take their leaves exclusively to a blueberry farmer for reuse at the blueberry farm.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/21/17</p>	<p>They installed motion sensors on lighting in the municipal building.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/21/17</p>	<p>The Environmental Commission and Green Advisory Committee have constructed 2 rain gardens in the City, one at the Senior Center and one in Kennedy Park. They inform the public on various initiatives like recycling, anti-littering and water conservation. They also encourage native planting and environmentally friendly lawn care techniques.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/12/14</p>	<p>Yard waste taken to Atlantic Blueberry for reuse by blueberry farms</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/12/14</p>	<p>Extensive education program to schools, "Dump No Waste, Drains to Oceans" t-shirt purchase, 2 rain gardens have been constructed in the City. The city has an Established Green Team and has applied for a NJ Sustainable certification.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/26/15</p>	<p>Installed wildlife fencing in areas along the expressway that are known wildlife habitat to prevent turtles and small animals from getting onto road. They have also added oil water separators behind some of their highly loaded storm drains along the highway.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>2/26/15</p>	<p>They planted wildflowers in the rain gardens along several miles of median along the expressway. This conserves energy by reducing mowing emissions.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/26/15</p>	<p>Representatives from SJTA visit 3rd and 4th grade students in 4 different neighboring schools and do presentations on the water cycle, water conservation, recycling, and tree plantings</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>2/26/15</p>	<p>SJTA has purchased SOS, a salt additive that permits the use of salt at lower temperatures, but diminishes the effects of corrosion and reduces leaching</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/20/13</p>	<p>installed wildlife fence in areas along the AC expressway that are known wildlife preservation areas to prevent turtles and small animals from getting onto the road</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>12/20/13</p>	<p>They have planted wildflowers in rain gardens along several miles in the median on the AC expressway. This conserves energy and reduces emissions from lawn mowers by not having to mow during the growing season.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/20/13</p>	<p>they visit 3rd and 4th grade students in 4 different neighboring schools and do a presentation on the water cycle, water conservation, recycling, and tree plantings</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/6/12</p>	<p>Initiated a wild flower program, planting over 30 acres of wild flowers along the swale areas to act as a natural filtration system to help filter the silt and debris and also beautify the area.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/6/12</p>	<p>Conducts environmental outreach programs with local elementary schools, 3rd and 4th graders, meeting at schools, with info on Stormwater and Earth Day, distribution of handouts such as wild flower seeds, reusable auto trash bags, educational material. Also plant trees each year at schools.</p>

 HAMMONTON, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>12/17/14</p>	<p>This establishment uses the Rutgers IPM program to determine what pests are present in their grape fields, to ensure that correct Identification leads to only necessary use of pesticides, ultimately reducing the use of pesticides on the 9 acres of grapes. Some IPM practices used include the use of high fluorescent lighting to trap the insects with soapy water traps.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>12/17/14</p>	<p>This establishment has 9 acres of grapes that have drip irrigation. This allows the establishment to use less water, for a more efficient irrigation practice.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/17/14</p>	<p>This establishment uses Grape Skins left over from the previous harvest as a form of natural fertilizer. This establishment recycles the pesticide empty containers.</p>

STOCKTON UNIVERSITY

Site ID: STOCKTON UNIVERSITY

 GALLOWAY TWP, NJ 08240

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/18/16</p>	<p>water conservation features installed in all the LEED certified buildings</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/18/16</p>	<p>Stockton uses electric maintenance vehicles in its fleet and Toyota Priuses</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/18/16</p>	<p>Science building 1 has LEED certification in the plans for Silver status. The parking area next to the soccer fields now has a plastic grid embedded in the soil to maintain soil stability and encourage some vegetative growth and water recharge instead of the installation of an impervious surface.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/18/16</p>	<p>All cleaning products used on campus are 100% Green Seal cleaning products, environmentally safe and certified.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>5/18/16</p>	<p>F-Wing extension and renovation are LEED certified. Campus Center is Gold certified.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/18/16</p>	<p>Stockton has Aquifer Thermal Energy System (ATES) a closed loop geothermal heating and cooling system for most of campus housing 5. They also use solar power to power the housing as well.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/13/15</p>	<p>Have installed energy efficient washers and dryers throughout entire campus. A third party, Mac Grey, monitors all usage and savings</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/13/15</p>	<p>The facility has participated in Recyclemania, which is a national competition to quantify waste and recycled waste.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/13/15</p>	<p>Stockton has a fleet of 10 electric powered vehicles (Chrysler GEM (Global Electric Motorcars)) which are used by maintenance and other onsite personnel.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/13/15</p>	<p>Green design features include solar shading to minimize heat gain, occupancy sensors for lighting, water conservation fixtures, 90% use of sustainable harvested wood, a 27 kilowatt rooftop solar panel array which produces 10% of the buildings energy use.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/13/15</p>	<p>They have a Forest Stewardship program with students and school support. They recently rebuilt the Cedar Swamp bridge with an old growth tree that was cut down by vandals. The bridge encourages controlled visitation to an on campus wetlands habitat.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>2/13/15</p>	<p>The facility recently converted the bulk waste containers to a more commonly used tipper container, which improved trash and recycling volumes, reduced injuries and reduced leachate from rainwater collection in open containers. The facility also replaced 15 water fountains campus wide with bottle filling stations with bottle counters. The facility states that within two (2) years it has diverted nearly 500k bottles from landfills.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/13/15</p>	<p>The facility has been approached to share their methods for their turf-field maintenance program with local high schools using environmentally friendly fertilizers.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/13/15</p>	<p>Stockton College has an environmental policy titled VI 81 Pollution Prevention Policy which states that the college is committed to practicing and promoting environmental stewardship while conducting its day to day activities. In addition, the facility is a signatory on the American Colleges and Universities Presidential Climate Commitment and is working on the development of a Climate Action Plan to reduce their carbon footprint</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>2/13/15</p>	<p>All cleaning products used on campus are 100% Green Seal cleaning products, which are environmentally safe and certified.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>2/13/15</p>	<p>The newly constructed campus center and the F-Wing extension is LEED certified.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/13/15</p>	<p>The entire parking area behind the dorms is covered with solar panels which provide energy that is distributed by Marina Energy. In 30 years, Stockton will own the panels to provide energy for Stockton. There is also an ATEs system installed and in use in campus buildings. ATEs is a completely looped geothermal system that seasonally pumps water in and out of the associated aquifer to bring the water back to its natural temperature in the ground, when not in use controlling the temperature in the building. Received approval from DEP and credit in water allocation permit. Solar panels are also in use at the Arts and Sciences building and the Sports building complex.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>2/13/15</p>	<p>The facility has a consulting firm, Sightlines LLC, that specializes in accounting emissions of carbon dioxide. Carbon emissions in 2013 were 28,184 metric tons of CO₂e</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/7/13</p>	<p>The facility has changed 256 toilet units to 1.6 GPF units and has quantified water reduction in the first two months at over 1.0 million gallons saved.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>11/7/13</p>	<p>The facility has participated in Recyclemania, which is a national competition to quantify waste and recycled waste.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/7/13</p>	<p>The facility has just obtained a CNG trash truck for their trash and recycling needs. The truck will reduce emissions by 80%. The facility has implemented federally sanctioned bike and ride share programs. They also recently launched a car share program through Zip Car to reduce parking congestion.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/7/13</p>	<p>In addition to the Campus Center noted in #11 the facility opened a 66,000 SF Science Center utilizing green design principles.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/7/13</p>	<p>The facility has given back to the environment nearly 35 acres of previously maintained land through a 'no mow' program. Also, the facility recently had a Forest Stewardship Plan approved by the Pinelands Commission, which is a comprehensive plan to manage and maintain the forest under their control.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>11/7/13</p>	<p>The facility recently converted the bulk waste containers to a more commonly used tipper container, which improved trash and recycling volumes, reduced injuries and reduced leachate from rainwater collection in open containers. The facility also replaced 15 water fountains campus wide with bottle filling stations with bottle counters. The facility states that within two (2) years it has diverted nearly 500k bottles from landfills.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/7/13</p>	<p>The facility has been approached to share their methods for their turf-field maintenance program with local high schools using environmentally friendly fertilizers.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/7/13</p>	<p>Stockton College has an environmental policy titled VI 81 Pollution Prevention Policy which states that the college is committed to practicing and promoting environmental stewardship while conducting its day to day activities. In addition, the facility is a signatory on the American Colleges and Universities Presidential Climate Commitment and is working on the development of a Climate Action Plan to reduce their carbon footprint.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>11/7/13</p>	<p>The facility does not have a formal policy, but it does purchase green products, such as 'Green Seal' chemicals for all of their custodial operations. In addition, all of their copy paper is from recycled paper stock, they purchase recycled printer cartridges and they recycle retired computers.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>11/7/13</p>	<p>The facility just received certification of LEED Gold for the 156,000 SF Campus Center. All of their new construction implement sustainable and energy efficient requirements.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/7/13</p>	<p>The facility owns/operates one of the largest geothermal HVAC systems. It has developed a state-of-the-art Aquifer Thermal Energy System (ATES) that controls the temperature in its buildings by using groundwater pumped through a closed loop system. The facility recently completed a three-part ARRA grant funded project to install photovoltaics, install a state-of-the-art solar thermal hot water system and install remote control thermostats for one of its housing developments. The facility has several utility procurements deals in place to service nearly 2.1 MW of electric power through Marina Energy and Blue Sky Power.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>11/7/13</p>	<p>The facility has a consulting firm, Sightlines LLC, that specializes in accounting emissions of carbon dioxide. Carbon emissions in 2013 were 28,184 metric tons of CO₂e.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/22/11</p>	<p>Water conservation fixtures in the LEED certified F-Wing extension were installed. They employ energy efficient laundry facilities.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/22/11</p>	<p>Stockton has a fleet of 10 electric powered vehicles (Chrysler GEM (Global Electric Motorcars)) which are used by maintenance and other onsite personnel.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/22/11</p>	<p>Green design features include solar shading to minimize heat gain, occupancy sensors for lighting, water conservation fixtures, 90% use of sustainable harvested wood, a 27 kilowatt rooftop solar panel array which produces 10% of the buildings energy use.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/22/11</p>	<p>They have a Forest Stewardship program with students and school support. They recently rebuilt the Cedar Swamp bridge with an old growth tree that was cut down by vandals. The bridge encourages controlled visitation to an on campus wetlands habitat.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/22/11</p>	<p>All cleaning products used on campus are 100% Green Seal cleaning products, which are environmentally safe and certified.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>3/22/11</p>	<p>The newly constructed campus center and the F-Wing extension is LEED certified</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/22/11</p>	<p>The entire parking area behind the dorms is covered with solar panels which provide energy that is distributed by Marina Energy. In 30 years, Stockton will own the panels to provide energy for Stockton. There is also an ATEs system installed and in use in campus buildings. ATEs is a completely looped geothermal system that seasonally pumps water in and out of the associated aquifer to bring the water back to its natural temperature in the ground, when not in use controlling the temperature in the building. Received approval from DEP and credit in water allocation permit. Solar panels are also in use at the Arts and Sciences building and the Sports building complex.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/21/09</p>	<p>Water conservation fixtures installed in the LEED certified F-Wing Extension at Stockton College</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/21/09</p>	<p>Stockton has purchased 9 electric maintenance vehicles, and 2 Toyota Prius's for their fleet.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/21/09</p>	<p>Specific green design features in support of the LEED rating of the F-Wing Expansion project include solar shading to minimize heat gain, occupancy sensors for lighting, water conservation fixtures, 90 percent sustainably harvested wood, and a 27 kilowatt rooftop solar panel array, which produces 10 percent of the building's energy requirements.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/21/09</p>	<p>All cleaning products used on campus are 100% Green Seal cleaning products, environmentally safe and certified.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>1/21/09</p>	<p>F-Wing Extension and Renovation is LEED certified. Stockton College Campus Center is a LEED registered project.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/21/09</p>	<p>Stockton has installed an ATES (Aquifer Thermal Energy System) which is an incorporation of a geothermal climate control system where all of the water that is pumped out of the aquifer, runs through the buildings, changes the buildings' temperature and is pumped back into the aquifer at either a warmer or cooler temperature than it was when it was pumped out. It is later reused at its changed temperature for the next season. There is little to no loss of water, all of the water that is pumped out of the aquifer is pumped back in. Geothermal energy is used to heat most of the campus and housing V and solar energy is used.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/19/08</p>	<p>Stockton employed Macgray, a company that installs energy efficient washer and dryer facilities and monitoring systems to go with them. Stockton has installed all new front loading, high efficiency washers and cleaned all their dryer vents, they can now monitor their water usage with a computer monitoring system, encourage less use of detergent (because front loaders use less), they are all card operated, which cuts out the coin collector and his gas emissions, and they have increased their energy efficiency by reducing drying time with cleaner vents.</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/19/08</p>	<p>Solar panels are in use on top of the Arts and Sciences building and the Sports building complaex.</p>

 HAMMONTON, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/14/16</p>	<p>The farm uses hand pulling, mechanical weeding, and beneficial insects to control weeds.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/14/16</p>	<p>Approximately 98 acres use drip irrigation system to save water.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/14/16</p>	<p>The pesticide empty containers are recycled with Helena and the state program.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/14/16</p>	<p>The business uses high efficiency lighting LEDs and high efficiency appliances to save energy</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/14/16</p>	<p>The business uses solar panels.</p>

TEAM TERMITE & PEST CONTROL CORP

Site ID: 218859 TEAM TERMITE & PEST CONTROL CORP
 15 PRESSE ST,
 HAMMONTON, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/4/16	The business engages in integrated pest management (IPM) practices. Mr. Comunale instructs his customers about the importance of thorough cleaning to prevent pests. He also bleaches and cleans hard to reach areas before application of a pesticide. He will use "have-a-heart" (non-chemical) traps in place of a pesticide application where possible, and when applications are necessary, he will use the lowest-toxicity chemical first. These IPM practices reduce the total amount of pesticide applied - reduction of a hazardous material.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/4/16	The office has low flow toilet fixtures - conserving water.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/4/16	The office building uses energy efficient appliance and LED light bulbs - conserving energy consumption.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/4/16	The business' office building uses solar panels - conserving energy.

TESTWELL CRAIG TESTING LABS INC

 BRIGANTINE CITY, NJ 08203

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/23/16	Mr. Dale monitors for pests, allowing him to treat only when necessary. The golf course does not perform preventative treatments on fairways, allowing them to reduce the total pesticides applied.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/23/16	Mr. Dale monitors weather conditions for irrigation purposes. The golf course does not irrigate on a schedule, but rather, when needed. This includes monitoring "weather underground", a website that gives specific local conditions; Mr. Dale stated there is a weather station right by the course that he uses for monitoring. This conserves the total amount of water consumed by the golf course.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/23/16	Mr. Dale stopped printing hard copy pesticide labels; Instead, he keeps all pesticide labels electronically. These are required by regulation, and can be extensive; thus, keeping them electronically greatly reduces the amount of paper used by the facility.

THE RICHARD STOCKTON COLLEGE OF NJ

Site ID: THE RICHARD STOCKTON COLLEGE OF NJ

 ATLANTIC CITY, NJ 08401

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	11/19/09	Three waterless urinals installed

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>11/19/09</p>	<p>Waste food and oil products provided to pig farmers instead of disposal at landfill</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/19/09</p>	<p>Purchase of hybrid vehicles</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/19/09</p>	<p>Light upgrades to more efficient lighting fixture in office areas, casino space, parking garages, and aesthetic lighting on building. Energy efficient motors (Variable Frequency Drives and Direct Digital Controls) installed on ventilation systems in parking garage, kitchens, casinos.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>11/19/09</p>	<p>Steam turbine installation at the Showboat Atlantic City property generates electricity as a byproduct of the normal steam production at the facility</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/19/09</p>	<p>Environmental Policy initiated in 2008</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>11/19/09</p>	<p>1,400 employees receive a subsidy from Harrah's to use public transportation.</p>

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>11/19/09</p>	<p>Purchase of bio-renewable green cleaning supplies Purchase paper cups instead of styrofoam cups</p>

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/19/18	To reduce the use of pesticides and fertilizers, weeds and grass are controlled mechanically, an IPM program is utilized along with biological control, crops are rotated, and cover crops are used.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/19/18	Vannini Farms has 50-60 acres of drip irrigation system.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/19/18	Pesticide containers are recycled with the pesticide supplier.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/19/18	The business has installed LED lighting in their new buildings.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/8/16	The farm uses an integrated pest management (IPM) program to reduce the total amount of pesticides applied. This includes scouting for pests rather than performing broadcast applications before pest presence is confirmed.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/8/16	The farm uses a drip irrigation system to save water.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/8/16	High efficiency lighting is used on their farm to save energy.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/4/13	The facility has a specific pesticide building to store and collect pesticides, reducing and preventing pesticide spills to the ground.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/4/13	The farm has approximately 231 acres in drip irrigation system to reduces water used in the field.

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/4/13</p>	<p>This farm switched to natural gas which is a cleaner burning fuel for the environment.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/4/13</p>	<p>This facility has a pesticide container recycling program.</p>

1 STOP CLEANING CENTER

Site ID: 1 STOP CLEANING CENTER
 12112 2040 EDWIN AVE,
 FORT LEE, NJ 07024

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/7/08	Company has ceased utilizing perchloroethylene (perc) for the purposes of performing dry cleaning onsite. Company now utilizes a petroleum hydrocarbon based material, in addition to a product called Dry-Solv, which can now be managed as non-hazardous waste. In addition, company will be purchasing a dry cleaning unit that utilizes the petroleum hydrocarbon solution. However these new machines only need 10% of the cleaning solution, as currently used in the dry cleaning machines.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/7/08	Company reuses hangers as often as possible. Old metal hangers are sent to scrap metal recycling facilities. Plastic hangers are sent to recyclers whom shred the material, and use it to manufacture other products. Company is reducing amount of clear plastic garment bags, used to cover clean clothes, by offering customers reusable nylon bags that are assigned to customers (at no charge). Garment bags are tracked via bar codes sewn into the bags. If a clear garment bag is used, Fort Lee 1-Stop purchases bags that are manufactured out of starch, and start to biodegrade within weeks of being exposed to the environment.

4 OVER INC

Site ID: 4 OVER INC
 468283 4 EMPIRE BLVD,
 MOONACHIE, NJ 07074

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/18/17	In the facility at 4 Empire Bld, Moonachie - the production area has sensors on their lights that will shut off when no one is in the area. So on the weekends, the lights are shut off in the entire production area. Production is 24 hours a day, 5 days a week from Monday to Friday and maybe one or two Saturdays a year.

AERCO INTERNATIONAL INC

Site ID: AERCO INTERNATIONAL INC
24221 159 PARIS AVE,
NORTHVALE, NJ 07647

Stewardship Activities	Date Acknowledged	Comments
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	5/1/08	AERCO is a member of U.S. Green Building Council (Attachment C). Ms. Provenzano stated that two (2) AERCO Engineers will soon be certified LEED Accredited Professionals. http://www.aerco.com/about/industry.shtml#usgbc
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	5/1/08	AERCO has a one page Environmental Policy that is part of its monthly environmental newsletter "The Green Scene" (Attachment B). AERCO also has formed an environmental group called the "Green Council". The "Green Council" is composed of five employees. The Green Council is responsible for instituting environmental stewardship policies at AERCO.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	5/1/08	Aerco's Green Council has instituted an environmental purchasing policy. Examples include buying recycled and/or recyclable printer paper & cardboard.

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	2/15/08	Fragrance waste materials are recycled instead of being disposed of as waste.
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	2/15/08	Greywater is being recycled.
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	2/15/08	Old skids are recycled. Metal products and old warehouse racks are sold a scrap.
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	2/15/08	Site installed energy efficient lighting throughout entire facility in 2004.
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	2/15/08	Corporate program and policy to encourage employee recycling both at home and at work.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/15/08</p>	<p>Signed by Mr. Laslow Moharita, Plant Manager.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/15/08</p>	<p>Facility is ISO 14,000 Certified.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>2/15/08</p>	<p>Purchasing contract with Staples requires that products purchased must be composed of at least 30 % recycled materials.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/15/08</p>	<p>Facility installed a Solar Electric system on the roof in 2007. This system has resulted in a 40% saving.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>2/15/08</p>	<p>This is part of all contractual agreements. Aramis has the right to on site inspections of the Vendor's facilities.</p>

ARCHITECTURAL WINDOW MANUFACTURING CORP

Site ID: ARCHITECTURAL WINDOW MANUFACTURING CORP
 11283 359 VETERANS BLVD, 309 VETERANS BLVD
 RUTHERFORD, NJ 07070

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	2/9/15	Facility recycles all unused wood pallets. In 2014, facility recycled 117,000 pounds of wooden pallets.

BAGARI CLEANERS

Site ID: BAGARI CLEANERS
 11342 88 GODWIN AVE,
 RIDGEWOOD, NJ 07450

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/21/12	Bagari Cleaners accepts and re-uses plastic garment bags and hangers returned by customers. Bagari Cleaners also encourages frequent customers purchase re-usable cloth garment bags.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/21/12	Bagari Cleaners has retrofitted the lighting system throughout the space to a more energy efficient system within the last 2 years.

BECTON DICKINSON & COMPANY

Site ID: BECTON DICKINSON & COMPANY
12064 1 BECTON DR,
FRANKLIN LAKES, NJ 07417

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	9/20/11	Facility was able to provide an environmental policy. Stewardship recognition is recommended at this time. There were no violations during this RCRA LQG (Large Quantity Generator) audit.

BERGEN CNTY BD OF ED VOC TECH SCHOOL

Site ID: BERGEN CNTY BD OF ED VOC TECH SCHOOL
11975 200 HACKENSACK AVE,
HACKENSACK, NJ 07601

Stewardship Activities	Date Acknowledged	Comments
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	12/18/09	School uses strictly green-certified cleaning products as contracted under "Sustainable Earth" company.

BERGEN CNTY COMMUNITY COLLEGE

Site ID: BERGEN CNTY COMMUNITY COLLEGE
14173 400 PARAMUS RD,
PARAMUS, NJ 07652

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/17/08	The college has replaced solvent based chalk cleaner with citrus based cleaner.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	4/17/08	The college hosts a hazardous waste recycling day twice a year. Household hazardous waste and batteries are collected and recycled.

BERGEN CNTY UTIL AUTH WTP & SLF

Site ID: BERGEN CNTY UTIL AUTH WTP & SLF
14271 MEHRHOF RD, @ FT OF
LITTLE FERRY, NJ 07643

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/18/09	Reduced amount of hazardous materials disposed of due to change in analytical method used in laboratory. Substituted a non-hazardous aqueous based cleaner at plant and pump stations. The vehicle shop switched from a solvent based parts washer/cleaner to an aqueous based washer.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/18/09</p>	<p>Effluent is used as non-contact cooling water for blower/aerator engines. Also used for plant maintenance (i.e. flushing out lines, washdown water)</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/18/09</p>	<p>Biofuels used in all engines and boilers. Cogen system utilizes up to 80% biogas to generate electricity for plant operations.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/18/09</p>	<p>Gasoline Minimization Program - GPS system on fleet vehicles has resulted in a 12% decrease in fuel consumption to date.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>9/18/09</p>	<p>BCUA developed and maintains the Nature Preserve and Passive Park which provides open space and access to the public for bird watching and environmental education.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/18/09</p>	<p>Cogen system installed in 2008 utilizes biogas to generate energy for plant operations. Full description on website at www.bcu.org</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/18/09</p>	<p>BCUA provides presentations to students (pre-K to college) and also provides funding and oversight of the Environmental Awareness Challenge Grant Program for Schools.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>9/18/09</p>	<p>Employees have the option of working four 10 hour days.</p>

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>9/18/09</p>	<p>BCUA has a new product request form that is used to screen all new products and companies for environmental responsibility before purchase is approved.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>9/18/09</p>	<p>Solar powered pond aerators</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>9/18/09</p>	<p>BCUA has multiple programs and workshops that offer assistance and training to businesses in the community.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>12/22/08</p>	<p>Reduced amount of hazardous materials disposed of due to change in analytical method used in laboratory. Substituted a non-hazardous aqueous based cleaner at plant and pump stations. The vehicle shop switched from a solvent based parts washer/cleaner to an aqueous based washer.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>12/22/08</p>	<p>Effluent is used as non-contact cooling water for blower/aerator engines. Also used for plant maintenance (i.e. flushing out lines, washdown water)</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/22/08</p>	<p>Biofuels used in all engines and boilers. Cogen system utilizes up to 80% biogas to generate electricity for plant operations.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/22/08</p>	<p>Gasoline Minimization Program - GPS system on fleet vehicles has resulted in a 12% decrease in fuel consumption to date.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/22/08</p>	<p>BCUA developed and maintains the Nature Preserve and Passive Park which provides open space and access to the public for bird watching and environmental education.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>12/22/08</p>	<p>BCUA acts as a lead agency that brings the hazardous waste vender and the schools together through the BCUA School Lab Hazardous Waste Removal & Grant Programs. Cogen system installed in 2008 utilizes biogas to generate energy for plant operations.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/22/08</p>	<p>BCUA provides presentations to students (pre-K to college) and also provides funding and oversight of the Environmental Awareness Challenge Grant Program for Schools.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>12/22/08</p>	<p>Employees have the option of working four 10 hour days.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>12/22/08</p>	<p>BCUA has a new product request form that is used to screen all new products and companies for environmental responsibility before purchase is approved.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/22/08</p>	<p>Solar powered pond aerators</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>12/22/08</p>	<p>BCUA has multiple programs and workshops that offer assistance and training to businesses in the community.</p>

BUILDING P1 @ ZUCKERBERG IND PK

Site ID: BUILDING P1 @ ZUCKERBERG IND PK
 13143 280 N MIDLAND AVE, BLDG P1
 SADDLE BROOK TWP, NJ 07662

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/10/11	BCI has installed energy efficient lighting through PSE&G.

CAHANNA CLEANERS

Site ID: CAHANNA CLEANERS
 12395 222 CLOSTER DOCK RD, 220 222 CLOSTER DOCK RD
 CLOSTER, NJ 07624

Stewardship Activities	Date Acknowledged	Comments
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	11/25/09	Cahanna has purchased Eco-Green Garment bags through their supplier - Minda Supply Co.. According to the manufacturer, the bags are biodegradable, compostable and recyclable.

C&C METAL PRODUCTS

Site ID: C&C METAL PRODUCTS
14951 456 NORDHOFF PL,
ENGLEWOOD, NJ 07631

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	7/18/08	<p>Normally, the Company used to use city water to cool down the air compressor at their facility. The city water would then just be flushed to the sewer system. Recently, within the last year, the Company installed a water cooler for the air compressor, so instead of using city water and just having it flushed down the sewer system, now with the water cooler, the water that is used to cool the air compressor is just recycled back into the water cooler and not being sent to the sewer system which is reducing the amount of water that is used at the facility.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	7/18/08	<p>The Company re-uses the zinc scrap from the electric zinc die-casting machines and places this zinc into zinc melting pots. The zinc melting pots melt down the scrap zinc, which the Company can re-use. The Company recycles roughly 80,000 lbs./yr. of zinc through the above operations.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	7/18/08	<p>The Company owners had realized that they could save money and improve the environment from not purchasing Styrofoam peanuts used for shipping out their products (which they used to do). The Company owners asked the employees to bring in their old newspapers prior to being recycled. The employees bring in their old newspapers and the old newspapers are then used as the packing material for the Company products, thus reducing the use of ordering Styrofoam peanuts as packing material which would take years to decompose if disposed of in a landfill.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	7/18/08	<p>The site has implemented an employee trip reduction program within the last year or two to encourage their employees to either car-pool or use mass transportation to come into work. At least 15% of the employees at the facility car-pool into work. At least 30% of the employees at the facility take mass transportation to work. So 45% of the Company employees are part of the employee trip reduction program at the facility.</p>

C&D AUTO BODY INC @ BIELER PROP

Site ID: C&D AUTO BODY INC @ BIELER PROP
 11232 176 SADDLE RIVER AVE,
 SOUTH HACKENSACK, NJ 07026

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/4/11	C&D has introduced waterborne paints for applications including base coats and top coats when the vehicle that is being painted was factory painted with waterborne paints. This has reduced the amount of lacquer thinner used for cleaning paint guns and the use of solvent based paints used.

CHEMAID LABORATORIES INC

Site ID: CHEMAID LABORATORIES INC
 11269 100 MAYHILL ST,
 SADDLE BROOK TWP, NJ 07663

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/7/14	Company installed within the last 3 years motion sensors for the faucets and toilets in 2 to 3 out of their 5 bathrooms to help control the amount of water used when flushing toilets and washing hands. 3 out of 5 bathrooms have motion sensors for toilets for flushing. 2 out of 5 bathrooms have motion sensors for sinks. Company also in 2013 installed a new closed loop cooling system for their water cooled mixing vessels. The Company used to use city water to cool down their jacketed mixing vessels, but now the Company no longer has to use city water to cool down their jacketed mixing vessels and now has a closed loop cooling system that re-uses the cooling water. This new closed loop cooling system saves on many gallons of city water being used by the Company.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/7/14	In 2012, the Company installed a new more efficient air compressor with a VFD Veritable Frequency Drive Motor. The Company also since 2008 has added more efficient VFD (Variable Frequency Drive Motors) on all the motors for their mixing tanks as well as their packaging/filling lines. Variable frequency drive (VFD) motors often are used by Companies to save money by reducing energy consumption in pumps, fans, compressors, or any other motor loads that may be found operation at their facility.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/7/14</p>	<p>The facility use to store their finished product (shampoos, lotions, perfumes) in 55 gallon Fiber Drums (containers made of Fiber Board), in their warehouse before the drums were shipped off to their customers. The Company had roughly 2000 Fiber Drums on site that they were using to store and send these finished products to their customers. After about 6 re-usages of these Fiber Drums, the fiber board would get soft and brittle. The Company would have to call Recycle Inc. Company of South Plainfield to come out to their facility to pick up the Fiber Drums and dispose of the drums. The facility started in 2005 to order plastic 55 gallon drums instead of the fiber drums to store and ship their final products. By 2008, the Company had replaced the usage of all their 2000 fiber drums with plastic drums which do not fall apart and that the Company can re-use again. So far, none of these 55-gallon plastic drums have had to be replaced. The Company continues this practice up to today (July 2014) and now even brings in 200 to 400 gallon totes as well as the plastic drums to store finished product in and still does not use or purchase the old Fiber Drums to store finish product in.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/7/14</p>	<p>The Company has changed out their old T-12 Fluorescent Lights to more energy efficient T-8 and T-5 Lights. Warehouse Lighting - Changed out in 2011 - 60 lights (T-12 Fluorescent Lighting Fixtures) were changed out to newer more efficient T-8 and T-5 Lighting Fixtures). Production Area - Changed out in 2012 - 100 lights (T-12 Fluorescent Lighting Fixtures) were changed out to newer more efficient T-8 and T-5 Lighting Fixtures). Company representative states that the Company changed out roughly 200 old T-12 fixtures to newer more efficient T-8 and T-5 fixtures. Company has also installed motion sensors in single occupancy offices in their building so their are 9 offices that have motion sensors that turn on and off the lights to the office when the individual in the office leaves or enters the office. These motion sensors were placed in these 9 offices during calendar year 2013.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/2/08</p>	<p>The facility use to store their finished product (shampoos, lotions, perfumes) in 55 gallon Fiber Drums (containers made of Fiber Board), in their warehouse before the drums were shipped off to their customers. The Company had roughly 2000 Fiber Drums on site that they were using to store and send these finished products to their customers. After about 6 re-usages of these Fiber Drums, the fiber board would get soft and brittle. The Company would have to call Recycle Inc. Company of South Plainfield to come out to their facility to pick up the Fiber Drums and dispose of the drums. The facility started in 2005 to order plastic 55 gallon drums instead of the fiber drums to store and ship their final products. Within the last 3 years, the Company has replaced the usage of 2000 fiber drums with 42 plastic drums which do not fall apart and that the Company can re-use again and again and again. So far, none of these forty- two 55-gallon plastic drums have had to be replaced.</p>

CLEAN ALL CLEANERS

Site ID: CLEAN ALL CLEANERS
 16078 289 HUYLER ST,
 SOUTH HACKENSACK, NJ 07606

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/9/13	One (1) cleaning machine uses a halogen-free cleaning system using 1-(butoxymethoxy)butane as the washing solvent.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/9/13	Clean All offers to customers re-usable plastic hangers. Customers have the choice to return the hangers back to Clean All or reused them at home
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	10/9/13	Clean All was awarded 3.5 stars from the Green Cleaners Council http://www.greencleanerscouncil.com/directory/NJ.html

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/28/08	The Borough collects electronic waste from its residents.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/28/08	The Borough purchased a hybrid vehicle for the Building Department.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	2/28/08	The Borough has been designated a Tree City for the past 8 years. The Borough has also permanently protected 5 acres through the Department's Green Acres funding.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	2/28/08	Public hearings have begun for the re-examination of the master plan to include a green element.

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/12/15</p>	<p>All cleaning products and supplies at the CNBC site were converted to ecofriendly products.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/12/15</p>	<p>Utilizing the following implemented procedures has reduced water use: -Automatic flushers installed at sinks, urinals and toilets. As part of a weekly PM schedule these flushers are checked and recalibrated with regard to proper operation. -Lawn irrigation has been split into 2 parts with a program implemented on a timer system that waters every other day versus once daily. Rain sensors have been integrated into this system to mitigate the risk of water waste by overriding and shutting the system down when not needed. - Operation of the courtyard fountains in the atrium has been modified reducing the run time per day.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/12/15</p>	<p>- NBC Universal employees instructed via mass email to "Turn Off" off their PC's, monitors, TV's, and accent lighting when they are leaving for the day/night. In addition, activated company wide "Sleep Mode" and energy saving shutdowns. - Daily inspections of the facility to ensure all lights are off. - There are some departments that consolidated workspace locations. This is performed by having two users utilize one workstation thus reducing the necessity for related utilities without sacrificing production.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/12/15</p>	<p>hybrid and flex-fuel vehicles in our fleet</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/12/15</p>	<p>Interior construction projects utilize a majority of green products such as: carpet tile, adhesives primers and paints. Office and open workstation lighting utilize a lower wattage high efficient lamp reducing energy costs and subsequently GreenHouse Gases. - Project: Unalite Lamp and Ballast Cangeout: Duration 2008- 2009 Project description: Replacement 4, 977 lamps and /or ballasts with higher energy efficient components reducing energy consumption without impacting light temperature or color rendering. Reduction in KWH: 200,000 per year. -Project: CO2 Sensor Integration to control H & V fan operation- Project Description: Project description: Integrate 15 to 20 CO2 sensors per floor at 900 Sylvan Avenue into existing Andover BMS system to allow for shutdown of H&V fans supplying outside air when CO2 levels are within allowable limits as well as when building is not in full operation. Currently the H&V fans run at 100% open 24/7, 365 days per year. -Removed Quartz lighting in Studio "B" and replaced all fixtures with LED lighting. One time expenditure of 75k and it is currently yielding an annual savings of 45k in electrical and HVAC. -All inefficient Plasma TV screens were replaced with LCD screens. -Motion sensors in all new offices and any new construction. -All NBC Universal employees instructed via mass email to "Turn Off" off their PC's, monitors, TV's, and accent lighting when they are leaving for the day/night. In addition, activated company wide "Sleep Mode" and energy saving shutdowns. -Daily inspections of the facility to ensure all lights are off. Other notables: -Re-set temperature set points in areas outside of Studio Occupancy \$75k -Replacing all bulbs from incandescent to fluorescent (saving based on current change out) \$40k -Installing room sensors in restrooms, conference rooms, ceiling sensors (Currently 80% of these rooms have sensor control, survey being conducted to quantify remaining to be converted) \$35k -Converted all emergency EXIT signs to LED Additional Energy Reduction: -LED Lighting Integration- Within one of the main studios the lighting was changed from 98,000 watt Tungsten to 10,000 watt LED resulting in not only the direct energy use but also a reduction in the energy utilized to address the off load of these fixtures from 17.83 kw/ph to 1.82 kw/ph. -Automatic light sensors- All interior offices and conference room have installed motion detectors light switching allowing for automatic shut off when the areas are not in use. -Plate and Frame- As part of the original building fit out a plate frame was incorporated into the design allowing for 'free cooling' operation when the exterior environmental conditions are met both through temperature and humidity. This operation would allow for the chiller plant (4- 500 ton chillers) to be taken offline maximizing the efficiency and use of outside air resulting in an annual electrical energy savings of 75k-100k. -Lighting timers are installed at all distribution panels for both open and enclosed space lighting. These timers enable for reduced run time based upon departmental standing working areas enabling fields of lighting to be taken down. -Temperature banding- The band of temperature range has been reduced through use of the BMS (Building Management System- Andover) to maximize efficiency of the AHU's (Air Handling Units) and VAV's (Variable Air Volume) throughout the facility.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/12/15</p>	<p>CNBC as well as all other NBC Universal businesses adhere to company's Corporate Environmental program and Policy http://corporate.comcast.com/csr2013/reduce-environmental-impact-2</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/12/15</p>	<p>NBC Universal - CNBC uses a proprietary web tool called Gensuites to manage EHS data throughout the company. Gensuites applications allow compliance process owners at every GE facility/operation to access a standardized platform to record, track and follow up on all EHS matters every day. Gensuites is the key enabler to allow company operations to take complex EHS regulations and turn them into actionable items that all NBC Universal employees can execute every day.</p>

<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/12/15</p>	<p>http://corporate.comcast.com/csr2013/reduce-environmental-impact-2</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/12/15</p>	<p>The site has nearly one-third of its employees who reside in New York City or the surrounding area. The Sourcing department has contracted with Pegasus Transport Inc and implemented a full van shuttle to and from NY to Englewood Cliffs. This transportation feature is at NO Charge to the employee and needless to say, was received positively by all of the commuters. In fact, with this no cost service feature, more employees than the Human Resources initially anticipated opted to utilize the services of the vans thus more shuttle and times were added. See attached link www.pegasusshuttle.com. A summary of the employee trip reduction is as follows: -83 Pegasus vans travel daily to and from New York and New Jersey. -Roughly 170- 200 NBC Universal employees utilize the service of the Pegasus Vans predicated on the day. -This eliminates on average 185 vehicles on the road and thus assumes X amount of emissions per day/ yr reduction -EHS and facilities developed a more uniform route for loading and off-loading of NBCU CNBC passengers at two locations within the Englewood Cliffs campus setting. - Many employees are authorized to work at home and do so on either Mondays or Fridays or both. These are typically managerial personnel who have administrative functions and do not necessarily have to be on-site all week. As such, this eliminates their drives to and from work and extra car fuel creating more emissions. This option also allows for flexibility if indeed the employee needs to be on-site either day. As a side caveat to the employee trip reduction -work from home benefit, this alternative has in many cases created a more productive employee by the employee's own admission.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/3/10</p>	<p>All cleaning products and supplies at the CNBC site were converted to ecofriendly products.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/3/10</p>	<p>Utilizing the following implemented procedures has reduced water use: -Automatic flushers installed at sinks, urinals and toilets. As part of a weekly PM schedule these flushers are checked and recalibrated with regard to proper operation. -Lawn irrigation has been split into 2 parts with a program implemented on a timer system that waters every other day versus once daily. Rain sensors have been integrated into this system to mitigate the risk of water waste by overriding and shutting the system down when not needed. - Operation of the courtyard fountains in the atrium has been modified reducing the run time per day.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/3/10</p>	<p>- NBC Universal employees instructed via mass email to "Turn Off" off their PC's, monitors, TV's, and accent lighting when they are leaving for the day/night. In addition, activated company wide "Sleep Mode" and energy saving shutdowns. - Daily inspections of the facility to ensure all lights are off. - There are some departments that are now consolidating workspace locations. This is performed by having two users utilize one workstation thus reducing the necessity for related utilities without sacrificing production.</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/3/10</p>	<p>The site is a Cable Television News facility and its primary role is to obtain the news and report it accordingly to the consumer. As such, the site has 18 photographers who currently are provided each with a leased 8 cylinder Ford Explorer to shoot and ascertain the news as part of their daily work functions. The site converted to leased Ford Transit 4 cylinders vans for photographers crew vehicles which will reduce emissions and fuel consumption (23mpg as opposed to 12mpg with the Explorer).</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/3/10</p>	<p>Interior construction projects utilize a majority of green products such as: carpet tile, adhesives primers and paints. Office and open workstation lighting utilize a lower wattage high efficient lamp reducing energy costs and subsequently GreenHouse Gases. - Project: Unalite Lamp and Ballast Cangeout: Duration 2008- 2009 Project description: Replacement 4, 977 lamps and /or ballasts with higher energy efficient components reducing energy consumption without impacting light temperature or color rendering. Reduction in KWH: 200,000 per year. -Project: CO2 Sensor Integration to control H & V fan operation- Project Description: Project description: Integrate 15 to 20 CO2 sensors per floor at 900 Sylvan Avenue into existing Andover BMS system to allow for shutdown of H&V fans supplying outside air when CO2 levels are within allowable limits as well as when building is not in full operation. Currently the H&V fans run at 100% open 24/7, 365 days per year. -Removed Quartz lighting in Studio "B" and replaced all fixtures with LED lighting. One time expenditure of 75k and it is currently yielding an annual savings of 45k in electrical and HVAC. -All inefficient Plasma TV screens were replaced with LCD screens. -Motion sensors in all new offices and any new construction. -All NBC Universal employees instructed via mass email to "Turn Off" off their PC's, monitors, TV's, and accent lighting when they are leaving for the day/night. In addition, activated company wide "Sleep Mode" and energy saving shutdowns. -Daily inspections of the facility to ensure all lights are off. Other notables: -Re-set temperature set points in areas outside of Studio Occupancy \$75k -Replacing all bulbs from incandescent to florescent (saving based on current change out) \$40k -Installing room sensors in restrooms, conference rooms, ceiling sensors (Currently 80% of these rooms have sensor control, survey being conducted to quantify remaining to be converted) \$35k -Converted all emergency EXIT signs to LED Additional Energy Reduction: - LED Lighting Integration- Within one of the main studios the lighting was changed from 98,000 watt Tungsten to 10,000 watt LED resulting in not only the direct energy use but also a reduction in the energy utilized to address the off load of these fixtures from 17.83 kw/ph to 1.82 kw/ph. -Automatic light sensors- All interior offices and conference room have installed motion detectors light switching allowing for automatic shut off when the areas are not in use. - Plate and Frame- As part of the original building fit out a plate frame was incorporated into the design allowing for 'free cooling' operation when the exterior environmental conditions are met both through temperature and humidity. This operation would allow for the chiller plant (4- 500 ton chillers) to be taken offline maximizing the efficiency and use of outside air resulting in an annual electrical energy savings of 75k-100k. -Lighting timers are installed at all distribution panels for both open and enclosed space lighting. These timers enable for reduced run time based upon departmental standing working areas enabling fields of lighting to be taken down. - Temperature banding- The band of temperature range has been reduced through use of the BMS (Building Management System- Andover) to maximize efficiency of the AHU's (Air Handling Units) and VAV's (Variable Air Volume) throughout the facility.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/3/10</p>	<p>CNBC as well as all other NBC Universal businesses adhere to company's parent owner GE's Corporate Environmental program and Policy called GE 20.3. http://www.ge.com/citizenship/our-priorities/environment/overview-ehs-team-programs.html</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/3/10</p>	<p>GE NBC Universal - CNBC uses a proprietary web tool called Gensuites to manage EHS data throughout the company. Gensuites applications allow compliance process owners at every GE facility/ operation to access a standardized platform to record, track and follow up on all EHS matters every day. Gensuites is the key enabler to allow company operations to take complex EHS regulations and turn them into actionable items that all NBC Universal employees can execute every day. To ensure consistent global standards, GE has developed "EHS Frameworks" consisting of 27 elements (21 Health & Safety and 6 Environmental shown below) including more than 650 questions and guide notes to serve as a web-based multi-language tool that combines "how-to" information with methods of evaluation. These tools have been incorporated into GE NBC Universal's web-based EHS management system. Each quarter, an EHS scorecard is reviewed, verified, and submitted to the SVP EHS NBC Universal; subsequently, these metrics are sent to GE Corporate Environmental Programs (CEP). In addition, all quarterly reports are electronically sent to the CNBC VP of Technical Operations. This data showcases the individual business performance on key metrics, including injuries, lost time rates, wastewater exceedances and penalties. There is a review process in each business year called Session E that is coordinated and overseen by Corporate Environmental Programs to provide consistency and accountability. CNBC uses several assurance mechanisms to confirm compliance in meeting GE NBC Universal expectations. GE does this through a robust EHS management system and several other practices including: Ongoing self-assessments to identify and promptly fix compliance issues. Findings are entered into the site's Gensuites Audit Tracking System (ATS) database that tracks them to closure and alerts management of ones not promptly addressed. A requirement that 100 % of regulatory compliance findings be closed within 30 days. Gensuites applications that allow locations to closely track all permit and inspection requirements. Regular business-level audits on a biannual cycle to provide oversight and confirmation of compliance with law and implementation of GE NBCU's best practices and programs. In April, 2009, the Englewood Cliffs site was audited by 3rd party consultants for Environmental and Health & Safety Framework scorecard compliance. Review of audit findings and process in annual EHS Operating Reviews. Third-party audits every other year to qualify specific environmental management systems for certification for safety excellence certification and programs.</p> <p>E (Environmental) Framework Elements 1. Air 4. Waste Shipping 2. Water 5. General Control 3. Waste 6. General Environmental</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>2/3/10</p>	<p>Attached is the link to GE's Corporate Citizen Report (Annual Env. Report). http://www.ge.com/citizenship/our-priorities/environment/</p>

<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>2/3/10</p>	<p>The site has nearly one-third of its employees who reside in New York City or the surrounding area. The Sourcing department has contracted with Pegasus Transport Inc and implemented a full van shuttle to and from NY to Englewood Cliffs. This transportation feature is at NO Charge to the employee and needless to say, was received positively by all of the commuters. In fact, with this no cost service feature, more employees than the Human Resources initially anticipated opted to utilize the services of the vans thus more shuttle and times were added. See attached link www.pegasusshuttle.com. A summary of the employee trip reduction is as follows: -83 Pegasus vans travel daily to and from New York and New Jersey. -Roughly 170- 200 NBC Universal employees utilize the service of the Pegasus Vans predicated on the day. -This eliminates on average 185 vehicles on the road and thus assumes X amount of emissions per day/ yr reduction -EHS and facilities developed a more uniform route for loading and off-loading of NBCU CNBC passengers at two locations within the Englewood Cliffs campus setting. - Many employees are authorized to work at home and do so on either Mondays or Fridays or both. These are typically managerial personnel who have administrative functions and do not necessarily have to be on-site all week. As such, this eliminates their drives to and from work and extra car fuel creating more emissions. This option also allows for flexibility if indeed the employee needs to be on-site either day. As a side caveat to the employee trip reduction -work from home benefit, this alternative has in many cases created a more productive employee by the employee's own admission.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>2/3/10</p>	<p>Sourcing Department is constantly seeking Environmentally friendly "green" products and alternative suppliers who adhere to green initiatives. Prime examples of these are: -Change-out from styrofoam cups to cardboard cups throughout the entire facility. This would include all of the break rooms where coffee and tea are readily made in the vending machines as well as in the kitchen commissary (this was despite the cost of the cardboard was three times the amount of the styrofoam). -Sourcing now procures and uses entirely all low VOC, fast curing, and low smelling paints. This allows painting to be performed if necessary as well during the day. -Sourcing requires snow removal landscaper to use only low concentrated salt when applying it to the walkways and parking lot areas after the snow is removed.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>2/3/10</p>	<p>GE sets expectations for its suppliers regarding environment, health, safety and employment practices and conducts on-site inspections of many suppliers, mostly in emerging markets. In addition to requiring suppliers to address deficiencies identified in on-site assessments, GE is working to provide training to suppliers and identify capacity-building projects in places where GE has a significant supplier base. The parent company also did a thorough program review and is currently piloting program refinements designed to encourage GE's suppliers to adopt their own management approach to ethical business issues. -Review program successes and challenges, evolving trends for supply chain review programs, and feedback from external stakeholders to identify potential program refinements. -Gain experience in assessing GE's supplier base with respect to freedom of association, discrimination and harassment. GE rolled out its expanded program effective January 1, 2008. GE's goal was to raise supplier awareness and ensure basic management systems with respect to freedom of association-discrimination and harassment are in place. Implementation included training all GE sourcing personnel regarding the company's supplier expectations for these topics as well as specialized training for personnel who conduct on-site assessments. All on-site supplier assessments and reassessments in 2008 included reviews of these topics. At the CNBC Global Headquarters, Brad Peterman who has over twenty five years in the NBC Universal organization as it relates to sourcing activities is well-versed in the supply chain and approval process</p>

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/16/08	Recently implemented "Lean Manufacturing" which addresses machine operation during down times resulting in equipment shutdowns.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/16/08	Conducting more conference calls between their different sites instead of commuting to one site.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	9/16/08	Partnering with Meadowlands Conservation Trust on the beautification and maintenance of the Skeet Kill Creek Marsh Park.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	9/16/08

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/27/17	Installation of regenerative thermal and catalytic oxidizers to significantly minimize VOCs (volatile organic compounds) and hazardous air pollutants. Extensive R&D activities and continuous research to produce low VOC products therefore affecting the environment less.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/27/17	Energy conservation through installation and utilization of energy efficient lighting and use of motion sensors in a number of preselected locations.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	9/27/17	

Site ID: DECOR INC
 12256 60 CEDAR LN,
 ENGLEWOOD, NJ 07631

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/11/08</p>	<p>Decor Inc. has gone over to 92% water based coatings on their spray machines. In the last 7 years, the Company has gone from using 100% ceramic paints in their spraying operations (more VOC's) to 8% ceramic paints in their spraying operations. The Company is trying to reach 100% water-based coatings, but certain customers requirements in their paint formulations are preventing the Company from doing this. The Company is experimenting though with these paint formulations and is trying to switch over the last 7% ceramic-based paints to water based paints. Note: By Decor Inc. switching from ceramic based paints to water based paints, the Company does not need to operate their glass drying ovens at high temperatures (such as 1170 degree F for ceramic-based paints) and therefor saves on their natural gas usage because the Company only needs to operate the drying ovens at 285 to 360 degree F for the water-based paints. Paint that is not used by the facility is sent back to their paint supplier (General Polymer located in Central Rhode Island). The paint is re-formulated by General Polymer and then shipped back to Decor Inc. to be re-used . Decor ships 2000 gallons of paint back to General Polymer to be re-formulated and then the paint is shipped back to Decor to be re-used by them. This ends up being a 10-week supply of paint that the Company can re-use in their spray machines. Decor Inc. also re-claims the recycled waste oil that is used in their air compressors and sends the re-claimed waste to a Waste Recycler (Clean Harbor). The Company saves one 55-gallon drum/yr. of waste oil from being sent to a landfill to be disposed of. Decor Inc. also re-claims their paint thinner and sends the re-claimed paint thinner to "Clean Harbor" to be re-formulated and then re-used by Decor Inc. The Company saves two 55-gallon drums of paint thinner per year from being sent to a landfill to be disposed of.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>7/11/08</p>	<p>The Company used to use 250 lbs./yr. of a petroleum oil type product to clean their paint spraying machines to remove the excess paint. The Company now uses shortening (animal fat) to clean the machine thus reducing the use of the petroleum oil based- type product.</p>

3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	8/14/09	Copy of company's environmental, health, and safety policy retained in company's hard file.

EARTH COLOR CO

Stewardship Activities	Date Acknowledged	Comments
Green Power Partnership.	10/30/13	Earth Thebault is a member of the Green Power Partnership and is 100% Green Power Users. http://www.epa.gov/greenpower/toplists/partner100.htm
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/30/13	The Company has installed water saving fixtures on the sinks and urinals in their bathrooms at the facility (automatic flushers for the urinals and motion activated sensors on the sinks). The Company also has installed 1.5 gallon toilets at their facility (replacing the old 5 gallon toilets that used to be at the facility).
13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.	10/30/13	Earth Thebault has undergone an environmental profiling of the entire paper & print supply chain and has develop a comprehensive algorithm for quantifying the impact along with developing a patent pending calculator available to clients. Earth Thebault also calculates and reports to clients the long term impact of the materials & workflow choices.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	10/30/13	Recent Environmental Awards - 2012 Ancient Forest Friendly™ Award for Best In Class, 2012 WhatTheyThink Environmental Innovation Award for "Sustainability and Your Community", 2011 WhatTheyThink Environmental Innovation Award for "Beyond Sustainability" and 2011 EPA Green Power Leadership Club.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	10/30/13	Environmental Policy - Earth Thebault's operates under a comprehensive written Environmental Policy that states Earth Thebault's commitment to environmental performance and underpins Earth Thebault's sustainability programs. The policy is signed by the Director of Sustainability, executed under the direction of the Sustainability Department and is strongly supported by senior and executive management.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	10/30/13	Earth Thebault utilizes an Environmental Management System (EMS) as outlined in the written Environmental Policy. The environmental performance of Earth Thebault's processes and practices is tracked and evaluated on an annual basis. Earth Thebault's EMS entails the employment of a comprehensive umbrella program called DEPCOR (Design, Procure, Consume & Recycle) putting structure to integrating sustainable design, engineering, procurement, consumption and recycling. The program evaluates the life-cycle assessment of products & materials that Earth Thebault uses and produces - sort of the cradle-to-cradle concept.

<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>10/30/13</p>	<p>Earth Thebault tracks the impact of the environmental strategies utilizing the Global Reporting Initiative (GRI) G3 Guidelines. The results are reported annually mid-year in the Sustainability Report. The report is published in print and posted on the web. As part of the Responsible Care Management System, Ashland does risk characterization studies of its products. This risk characterization includes the Environmental fate of the product. See attached link. http://online1.Ashlandcorp.com/enUS/responsiblecare/Documents/Risk%20Characterization%20Management%20Process.pdf</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>10/30/13</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>10/30/13</p>	<p>Earth Thebault has implemented an Environmental Purchasing Policy resulting in the purchase of products & office supplies that are recognize as environmentally responsible. Earth Thebault actively works with its vendors to minimize the environmental impact of the entire supply chain. Earth Thebault also actively works to educate its clients on their options for environmental choices & quantifying the actual environmental impact reductions.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/30/13</p>	<p>Earth Thebault runs all operations on 100% renewable energy in the form of wind generated Renewable Energy Certificates (RECs). In 2007, Earth Thebault committed to purchase 25 million kW h of Green-e Energy Certified wind generated RECs from Community Energy, offsetting 100% of electricity usage. Earth Thebault then purchased in 2008 - 32 million kW h, in 2009 32,996,000 kW h, and in 2010 & 2011 - 31 million kW h. Earth Thebault was awarded NJ GreenPower Purchaser of the Year in 2008 and EPA Green Power Purchaser of the Year in 2009 (http://www.epa.gov/greenpower/documents/2009awards.pdf).</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>10/30/13</p>	<p>Earth Thebault accounts for its Greenhouse Gas Emissions (GGEs) and reports its impact annually. See Annual Environmental Report.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>10/30/13</p>	<p>Earth Thebault requires that Supply Chain partners subscribe to environmentally sound business practices. To this end, Earth Thebault has a vendor & supply chain green development strategy - to educate suppliers & vendors on environmentally friendly business practices, proper sustainable forestry standards, and work with suppliers & vendors to ensure that they are progressing towards and beyond compliance.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>10/30/13</p>	<p>Earth Thebault has a Client Education program by proactively working with clients to help provide a better understanding of how to utilize environmentally sustainable strategies while reaching cost effective solutions. The Client Education program has served to enhance the willingness of clients to increasingly choose certified and/or recycled raw materials over non-certified/virgin fiber when printing with Earth Thebault.</p>
<p>Climate Leaders.</p>	<p>4/6/11</p>	<p>Active Member of Climate Leaders.</p>
<p>Green Power Parnership.</p>	<p>4/6/11</p>	<p>Active Member of Green Power Partnership.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/6/11</p>	<p>The Company has installed water saving fixtures on the sinks and urinals in their bathrooms at the facility (automatic flushers for the urinals and motion activated sensors on the sinks). The Company also has installed 1.5 gallon toilets at their facility (replacing the old 5 gallon toilets that used to be at the facility).</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/6/11</p>	<p>Earth Color has undertaken actions to reduce total material usage and/or disposal. The Company recycles the following: Semisolid & Liquid Waste (Including Inks & Coatings) Metals = Aluminum Plates that are used on the Printing Presses Toner = Large Digital Printing Machine Toner Cartridges End of Life Electronics = Telephones and Cell Phones The Company captures and recycles 99% of their manufacturing waste.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>4/6/11</p>	<p>The Company's entire print and paper supply chain is under constant Life Cycle Assessment for environmental and social engineering. Earth Color has developed a patent pending business process along with a comprehensive algorithm and software calculator to determine the environmental impact savings from their Live Cycle Assessment (LCA) developed workflows. The LCA software calculator can be found on the Company's website earthcolor.com in the sustainability section. The LCA calculator is available to the general public. The Company has won numerous national awards for their LCA Initiatives.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/6/11</p>	<p>The Company has two fleet vehicles for their site. One of the fleet vehicles at the Moonachie Facility is a 2006 Toyota Prius (purchased in 2007 by the Company), which is a hybrid vehicle. The Toyota Prius is used by Sales Representatives for the Company to use to drive to their vendors to show samples of their products to their vendors instead of the Sales Representatives driving their own personal cars.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/6/11</p>	<p>The Company does have an Environmental Policy that is signed by the Director of Sustainability and is executed under the direction of the Sustainability Department and is strongly supported by senior and executive management. The Environmental Policy is called: "EarthColor Environmental Sustainability and Corporate Responsibility Policy" Earth Color takes a triple bottom line approach to managing their Company through monitoring their performance in financial, environmental sustainability and social responsibility terms. Earth Color looks to every opportunity to educate their clients, suppliers, and the community at large, along with themselves as the value of sustainable business practices. Earth Colors mission is to lead the industry in developing and maintaining "Green Standards" that protect the earths natural resources. They document and monitor their environmental footprint through a matrix of data tracking carbon production and energy usage along with air borne emissions, solid waste production and recycled product usage.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/6/11</p>	<p>The Company operates under an EMS System as outlined in their written Environmental Policy. The EMS is tracked and evaluated on an annual basis through the GRI Global Reporting Initiative. Earth Thebault entails the employment of a comprehensive umbrella program called DEPCOR (Design, Procure, Consume & Recycle), putting structure to integrating sustainable design, engineering, procurement, consumption and recycling. The program evaluates the life-cycle assessment of products and materials that Earth Thebault uses.</p>

<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>4/6/11</p>	<p>Yes, See Below: The Company is an active member of Climate Leaders as well as Green Power Partnership.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/6/11</p>	<p>Earth Color has implemented an Environmental Purchasing Policy resulting in the purchase of products and office supplies that are recognized as environmentally responsible. Earth Color actively works with its vendors to minimize the environmental impact of the entire supply chain. Earth Color also actively works to educate its clients on their options for environmental choices and quantifying the actual environmental impact reductions.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/6/11</p>	<p>Yes, The Site buys 100% of their power from Community Energy. All 27.1 Kilowatt Hours is purchased from Community Energy. (Community Energy = wind power).</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/6/11</p>	<p>The Company does report all their carbon emissions from each of their sites (including the Moonachie site), under the EPA Climate Leaders protocol which uses a 3 tier protocol set up by the EPA Climate Leaders Program for reporting carbon emissions from Direct, In-direct and Mobile Sources. The Company monitors their environmental footprint specifically by tracking and controlling: 1. Energy consumption in kilowatt hours of electricity 2. Decatherms of natural gas 3. Carbon CO2 footprint 4. Water Consumption 5. Tonnage of paper used vs waste produced 6. Percentage of recycled paper purchased 7. Tons of paper recycled 8. Sustainable Forested Paper Usage 9. Usage of low VOC & Petroleum in our inks and coatings 10. Percentage of Aluminum Plates recycled 11. Release of VOC's & Other Greenhouse Gas 12. Solid Waste production, disposal and recycling 13. Wood Pallet Recycling 14. Compliance to EPA and NJ DEP regulations Earth Color is committed to achieving the industry's lowest carbon footprint per page of printed material produced as well as the Company is committed to offset a portion of their carbon footprint to further reduce their climate impact.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/6/11</p>	<p>Earth Color requires that their Supply Chain partners subscribe to environmentally sound business practices. For some vendors subscribing to environmentally sound business practices is voluntary, for most vendors it is mandatory to subscribe to environmentally sound business practices. To this end, Earth Color has a vendor and supply chain green development strategy - to educate suppliers and vendors on environmentally friendly business practices, proper sustainable forestry standards, and work with suppliers and vendors to ensure that they are progressing towards and beyond compliance. Most of Earth Color's vendors have signed contracts with the Earth Color (except for sustainable forestry initiatives), however these contracts are confidential between the vendor and Earth Color.</p>
<p>Climate Leaders.</p>	<p>5/7/09</p>	<p>Company is a member of "Climate Leaders" - Company actively tries to reduce their Greenhouse Gas Emissions.</p>
<p>Green Power Partnership.</p>	<p>5/7/09</p>	<p>Company also is a member of "Green Power Partnership" - Company pledges to purchase Green Power - (ex: wind, solar or bio power).</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>5/7/09</p>	<p>Company is an active member of two EPA Voluntary Programs. Company is a member of "Climate Leaders" - Company actively tries to reduce their Greenhouse Gas Emissions. Company also is a member of "Green Power Partnership" - Company pledges to purchase Green Power - (ex: wind, solar or bio power).</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/7/09</p>	<p>Yes, The Company buys 100% of their power from Community Energy. All 27.1 Kilowatt Hours is purchased from Community Energy. (Community Energy = wind power).</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/12/08</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>11/12/08</p>	<p>Purchasing policy for "elementally chlorine free" printing paper.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/12/08</p>	<p>Installed a windmill on roof for energy generation to operate the printing presses</p>

EASTERN CHRISTIAN MIDDLE SCHOOL

Site ID: EASTERN CHRISTIAN MIDDLE SCHOOL
23846 518 SICOMAC AVE,
WYCKOFF, NJ 07481

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/19/09	The school has initiated a school wide composting project to teach and reinforce recycling concepts and provide compost for the school's garden.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	11/19/09	A school garden has been built as part of a school beautification/ environmental enhance project.

ELCO SOLVENTS CORP

Site ID: ELCO SOLVENTS CORP
14956 30 AMOR AVE,
CARLSTADT, NJ 07072

Stewardship Activities	Date Acknowledged	Comments
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	4/9/08	The company has received a certificate from the National Association of Chemical Distributors for responsible chemical distribution.

ELECTRO MINIATURES CORP

Site ID: ELECTRO MINIATURES CORP
11623 68 W COMMERCIAL AVE,
MOONACHIE, NJ 07074

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/17/13	EMC has retrofitted the lighting system throughout the building to a more energy efficient system within the last 2 years. The retrofit was perform through the NJ's Clean Energy program.

EMERSON BORO

Site ID: EMERSON BORO
143909 MUNICIPAL PL,
EMERSON, NJ 076301166

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	1/14/09	The Borough collects and recycles electronic waste from its residents.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/14/09	The Borough of Emerson has partnered with Mini and has leased two electric vehicles.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/14/09</p>	<p>The Borough of Emerson is part of PSEG's Direct Install Program which replaces all lighting in all municipal buildings with energy efficient bulbs. As part of this program, the Borough conducted an energy audit.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/14/09</p>	<p>The Borough of Emerson has remained a Tree City designation.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/5/08</p>	<p>Borough of Emerson collected electronic waste from the residents.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/5/08</p>	<p>The Borough of Emerson has been designated a tree city since 2005. http://www.arboday.org/programs/treeCityUSA/map.cfm</p>

ENGLEWOOD HOSPITAL & MEDICAL CENTER

Site ID: ENGLEWOOD HOSPITAL & MEDICAL CENTER
14269 350 ENGLE ST,
ENGLEWOOD, NJ 07631

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/24/08	Hospital purchases fuel burning equipment with the Energy Star Label. Also, hospital has a modulator on its chiller to minimize the amount of energy used to keep the hospital cool.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/24/08	Hospital has changed their lighting from incandescent to fluorescent, uses motion sensors, and uses LED lights in all exit signs to conserve electricity. Hospital has installed steam traps to capture steam and prevent venting unused steam to atmosphere.

FIRST AVIATION SERVICES @ TETERBORO AIRPORT

Site ID: FIRST AVIATION SERVICES @ TETERBORO AIRPORT
391676 104 CHARLES A LINDBERGH DR,
MOONACHIE, NJ 07074

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	10/11/13	Facility has installed solar panels on two of the hangar buildings. All electricity generated is tracked and sent back to the grid.

FISHER SCIENTIFIC CO INC

Site ID: FISHER SCIENTIFIC CO INC
14979 1 REAGENT LN,
FAIR LAWN, NJ 074100000

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/29/14</p>	<p>Lean manufacturing models are present at this facility. One of the successful models that was implemented is the reduction of hazardous waste during the distillation process at the Company. The Company use to send out the waste product from their distillation system at the facility as Hazardous Waste in the past, but recently (within the last couple of years), the Company now sends the waste out to a chemical recycling firm called "AHART". For 2012, the amount of "hazardous waste" product from the distillation system that was not sent out as Hazardous Waste and was therefore "recycled" by AHART was 8.800 gallons or roughly 160 drums. For 2013, the amount of "hazardous waste" product from the distillation system that was not sent out as Hazardous Waste and was therefore "recycled" by AHART was 7.260 gallons or roughly 132 drums.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/29/14</p>	<p>In 2012 and 2014, the Facility changed out the toilets and faucets in 2 out of their 3 bathrooms at the site to low flow toilets and motion sensor controlled faucets. The Facility also treats the incoming city water. In the past, half of this city water was rejected and disposed of to the sanitary system. The facility has implemented a system to reclaim this previously discarded water by putting it back into the front of the treatment system. There has been a savings of approximately 70,000 gallons per month.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/29/14</p>	<p>Starting in 2010, the facility has been switching out their old pumps and motors on their Distillation System and tanks to more efficient VFD motors. About 40% of the pumps/motors have been replaced on the Distillation System with these drives. VFD or Variable Frequency Drives offer significant energy savings in addition to space-saving designs and programmable features.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/29/14</p>	<p>Fisher Scientific has redesigned their packaging, known as the Eco Safe Pak, consisting of corrugated cardboard. Packaging formerly consisted of Styrofoam. The redesigned packaging has expanded to other product lines.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/29/14</p>	<p>Facility started to change over from T-8 to T-5 Light bulbs starting with Calendar year 2009/2010. The Company has changed over roughly 35 to 40% of the Light bulbs at the Fairlawn Facility to T-5 Light bulbs. T-5 Light bulbs are roughly 9% more efficient than T8 Light bulbs.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/29/14</p>	<p>Facility does have a Corporate Environmental Policy that all Divisions of Thermo Fisher Scientific as well as all employees of subsidiaries of Thermo Fisher Scientific must follow. Elements of the Policy are: 1) Environmental, Health and Safety compliance and sustainability as a priority to Fisher Scientific/Thermo Fisher Scientific Management. 2) Failure to comply with Environmental, Health and Safety Laws and the repercussions to such as far as both the Business Units of the Company as well as to the Employees of the Company. The Environmental Health and Safety Policy is signed by CEO of Company = Marc Casper</p>

<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/29/14</p>	<p>During the calendar year, employees at the facility are given the opportunity to work from home on Fridays which reduces 1 round-trip ride to the office once a week. Also during the calendar year, employees are given the opportunity to work at which ever office site is closer to their home base. Fisher Scientific/Thermo Fisher Scientific has two facilities in NJ....one in Bridgewater NJ and the other in Fairlawn. If an individual lives out in PA and decides the commute that day to Fairlawn is way too long, he or she could work at the Bridgewater site which is closer to their home instead of driving to the Fairlawn facility. About 15% of the employees at the Fairlawn Location are taking part in the programs stated above.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>5/29/14</p>	<p>Facility is accounting for all greenhouse gases at the site as well as for all their facility's both in the US and overseas. Company reports the greenhouse gas information for both Direct (Sources producing Greenhouse gases) as well as Indirect greenhouse gas emissions (from transportation of products). The Greenhouse gas emissions are reported each year in the Corporate Sustainability Annual Report. (This Annual Corporate Sustainability Report is not made visible to the public).</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/1/13</p>	<p>Lean manufacturing models are present at this facility. Continued reduction of hazardous waste during their distillation process.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/1/13</p>	<p>Facility is constantly redeveloping their packaging to be lighter and utilize less product. As a result, less cardboard has been used.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>1/19/11</p>	<p>Lean manufacturing models are present at this facility. One of the successful models that was implemented is the reduction of hazardous waste during their distillation process.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/19/11</p>	<p>Fisher continues to use their reduced packaging design, known as the EcoSaf Pak, consisting of corrugated cardboard. The redesigned packaging has expanded to other product lines.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/31/09</p>	<p>Lean manufacturing models are present at this facility. One of the successful models that was implemented is the reduction of hazardous waste during their distillation process.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/31/09</p>	<p>Fisher has redesigned their packaging, known as the EcoSaf Pak, consisting of corrugated cardboard. Packaging formerly consisted of styrofoam. The redesigned packaging has expanded to other product lines and has doubled since the last inspection.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/9/08</p>	<p>Fisher utilizes the Practical Process Improvement (PPI) model and lean manufacturing models for reducing hazardous waste. Examples at the site include reducing hazardous waste during their distillation process.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/9/08</p>	<p>Fisher has established an in-house recycling program within their company to exchange chemicals, drums and other lab materials through their intranet. Also, by utilizing the Practical Process Improvement (PPI) model, Fisher has developed and patented the EcoSaf Pak. The EcoSaf pak is made of corrugated cardboard and has taken foam packaging out of their shipping.</p>

FORT LEE BORO DPW

Site ID: FORT LEE BORO DPW
49507 309 MAIN ST,
FORT LEE, NJ 07024

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/7/11	Borough has solar panels on the following buildings: DPW garage, Community Center and Police Department.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/10/08	The Borough of Fort Lee has installed solar panels on three municipal buildings.

GRAYTOR PRINTING CO INC

Site ID: GRAYTOR PRINTING CO INC
11754 149 PARK AVE,
LYNDHURST, NJ 07071

Stewardship Activities	Date Acknowledged	Comments
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	3/10/09	Graytor Printing Company is certified by the Forestry Stewardship Council for purchasing printing paper from paper companies that sell timber or forest products that have practiced forestry consistent with FSC standards.

GREEN APPLE CLEANERS

Site ID: GREEN APPLE CLEANERS
11820 42 ESSEX ST,
LODI, NJ 07644

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/9/10	In 2007 Green Apple switched from a hydrocarbon based dry cleaning process to a carbon dioxide (CO2) dry cleaning process. The CO2 dry cleaning process does not generate hazardous waste. The CO2 is recycled within a closed loop system.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/9/10	Green Apple sells and encourages the use of reusable garment bags by customers. Green Apple has a hanger return refund policy. Hangers return are re-used or sent for recycling. A customer that re-uses the hangers are credited \$1.00 to their account. See link http://www.greenapplecleaners.com/?about3 Green Apple no longer mails billing statements to customers. Bills are sent electronically and customers are encouraged to pay online via credit. Green Apple has an old clothing recycle program. Customers can bring old clothing and Green Apple will wash and donate the clothing to the needy.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/9/10	Green Apple's sales staff exclusively use low emission SMART cars. Green Apple's fleet of delivery trucks are fuel efficient diesel powered Sprinters. These vehicles produce low emissions & low-noise operation. See link http://www.greenapplecleaners.com/?about3
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	3/9/10	Green Apple has purchased Eco-Green Garment bags through their supplier. According to the manufacturer, the bags are biodegradable, compostable and recyclable. Green Apple purchases and uses biodegradable detergents and plastic garbage bin liners. See link http://www.greenapplecleaners.com/?about3

HACKENSACK UNIVERSITY MEDICAL CENTER

Site ID: HACKENSACK UNIVERSITY MEDICAL CENTER
14976 30 PROSPECT AVE,
HACKENSACK, NJ 07601

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	4/1/09	Mercury elimination - such as blood pressure cuffs, fluorescent bulbs - use green, ethylene oxide.
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	4/1/09	LEED Certification - pending over 1 year for the Women's & Children's Hospital. And any new building projects will follow the same standard - as Green Guide for Healthcare. Hackensack is following the checklist.
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	4/1/09	The Diedre Imus Center
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	4/1/09	Hackensack was one of the first hospitals to go green with all their cleaning products. They are green sealed, primary and disinfectant.
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	4/1/09	Hackensack is outsourcing cleaning to two of their buildings. The 2 companies must use the same products and be environmentally friendly.
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	4/1/09	The Diedre Imus Environmental Center for Pediatric Oncology has headquarters at Hackensack, which is under Hackensack. www.dienviro.com The Diedre Imus Center mentors to State Legislators and other healthcare organizations and schools.

HALLAK CLEANERS

Site ID: HALLAK CLEANERS
 11900 172 JOHNSON AVE,
 HACKENSACK, NJ 07601

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/23/10	One (1) cleaning machine uses a silicone based cleaner - Cyclopentasiloxane supplied by GreenEarth Cleaning.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/23/10	Hallak Cleaners offers to customers re-usable plastic hangers. Customers have the choice to return the hangers back to Hallak Cleaners or reused them at home. As an incentive to return the hangers, Hallak Cleaners is donating ten cents to Making Headway Foundation for every hanger returned. Reduced production paperwork by over 75% with digital data management.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/23/10	Converted 13,000 sq. ft. facility to high efficiency fluorescent lamps. Installed motion sensing on-off switches in administrative offices.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/23/10	Hallak Cleaners was awarded 4 stars from the Green Cleaners Council http://www.greencleanerscouncil.com/directory/NJ.html

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/23/14</p>	<p>Superintendent has a hybrid vehicle.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/23/14</p>	<p>As a result of their energy audit, Borough upgraded their lighting to more energy efficient fixtures and the HVAC system.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>9/23/14</p>	<p>Borough is a long time recipient of the Tree City designation and Borough has a cooperative agreement for a wildlife goose dropping removal sweeper for the Borough parks.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/23/14</p>	<p>Borough has designated Polify Park as a pesticide free park, only organic options are used.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/7/11</p>	<p>Borough has purchased a hybrid vehicle.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/7/11</p>	<p>Energy audit conducted and implemented. Lights and boiler were replaced with more energy efficient units. Part of the Direct Install program.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>9/7/11</p>	<p>Designated a Tree City for 14 + years.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/7/11</p>	<p>Conducting a pilot program which eliminates pesticide use at Polify Memorial Park.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/7/11</p>	<p>Ongoing partnership with Bergen County Utilities Authority to conduct recycling programs to kindergarden classes.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/4/09</p>	<p>Borough has passed a resolution to accept and properly dispose of electronic waste from their residents.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/4/09</p>	<p>Borough of Hasbrouck Heights recently purchased a new hybrid vehicle for the Department of Public Works.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/4/09</p>	<p>The Borough of Hasbrouck Heights has been designated a Tree City for at least 14 years.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/4/09</p>	<p>Partnership with BCUA to conduct local public education programs to the school about recycling.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/27/08</p>	<p>Borough has passed a resolution to accept and properly dispose of electronic waste from their residents.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/27/08</p>	<p>The Borough of Hasbrouck Heights has been designated a Tree City for at least 13 years.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/27/08</p>	<p>Partnership with BCUA to conduct local public education programs to the school about recycling.</p>

HESS CORP BOGOTA TERMINAL

Site ID: HESS CORP BOGOTA TERMINAL
15754 172 238 W FORT LEE RD,
BOGOTA, NJ 07603

Stewardship Activities	Date Acknowledged	Comments
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	6/7/10	Hess has a corporate Annual Environmental Report. The link for the Annual Environmental Report is listed below. http://www.hess.com/reports/sustainability/US/2009/default.pdf

HESS CORP EDGEWATER TERMINAL EAST

Site ID: HESS CORP EDGEWATER TERMINAL EAST
 15755 615 RIVER RD,
 EDGEWATER, NJ 07070

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/4/12	Within the last 3 yrs., the Amerada Hess Edgewater Terminal has installed more efficient tank pumps and pump controls at their site that use less electricity than the original pumps that were installed at the site..
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	5/4/12	Amerada Hess has a Corporate Policy that each site (including the terminal at Edgewater), adheres to. This Corporate Policy has an Environmental, Health and Safety Policy associated with it. The Policy is signed by the Chief Corporate Officer - John Hess. The Policy can be found under the following Website: www.hess.com - go to "Sustainability" - Look under the EHS Section and Look under Policy Statement.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	5/4/12	The Edgewater Terminal (as well as other Hess Terminals) is operated under an EMS System that is Procedure Based. Under the "Track System" there are procedures on: 1) Spill Prevention 2) EMS Procedures 3) Operational Procedures
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	5/4/12	Hess Corporation does submit an Annual Environmental Report which pulls data from each site. The Annual Report for 2010 can be found under www.hess.com - Look under "Sustainability" - Environmental Health and Safety - and then look for Annual Report on EH&S and Social Responsibility. The Annual Report (starting at Page 58), - lists the following Sections Management Approach Freshwater Use Marcellus Shale Upstream & Downstream Operations Biodiversity Material Use IUCN Red List Waste Air Emissions & Criteria Pollutants Discharges (On-Shore and Off-Shore Discharges) Ozone Depleting Substances Freshwater Wastewater Petroleum Refinery Initiative Consent Decree Spills. The Environmental Report does list violations that Hess Facilities have received in 2010 and can be found under "Environmental Expenditures" and "Regulatory Compliance" The 2011 Annual Report will be in the computer system sometime in June of 2012.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	5/4/12	Amerada Hess Corporation reports all Greenhouse Gases (including the Greenhouse gases from all its terminals which are exempt from needing to be reported) - the Greenhouse Gas Information from all of Amerada Hess Sites can be found under: www.hess.com - under the Annual Environmental "Sustainability" Report - Look under Page 50 (2010 Report) under the "Climate Change and Energy" Section. Look under the Climate Change Strategy, Greenhouse Gas Performance, Energy Utilization and Efficiency, and Energy Use Sections.
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	6/7/10	Hess has implemented one (1) Environmental Stewardship activity at the site. Hess has a corporate Annual Environmental Report. The link for the Annual Environmental Report is listed below. http://www.hess.com/sustainability/environment/default.aspx

HK METAL CRAFT MFG CORP

Site ID: HK METAL CRAFT MFG CORP
17316 35 INDUSTRIAL RD,
LODI, NJ 07644

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/13/09	Site stopped operation of washing metal parts in large washing machines which used to generate hazardous waste. Now parts are sent off site to be washed.

HOLY NAME MEDICAL CENTER

Site ID: HOLY NAME MEDICAL CENTER
14977 718 TEANECK RD,
TEANECK, NJ 07666

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/12/14	Between the new floor being installed at the Hospital (the more eco friendly Forbo Marmoleum, as well as the Hospital using Peroxide instead of solvent based floor wax and floor stripper, the Hospital has cut down on the amount of floor solvents used by 53%. The Hospital also uses microfiber technology cloths to clean the windows at the Hospital and no longer uses any solvent based window cleaners.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/12/14</p>	<p>The Hospital roughly 10 years ago removed all water cooled refrigeration systems, ice machines and liquid ring vacuum pumps that used to use city water at the hospital. The Company too this day still does not order or use any water cooled refrigeration systems, ice machines and liquid ring vacuum pumps that use city water at the Hospital. The Hospital has replaced two older 700 ton steam absorption chillers with newer water efficient centrifugal chillers. Two more efficient 300 ton centrifugal chillers were installed in May of 2010. Two 700 ton centrifugal chillers were installed in August of 2010. This change has allowed the hospital to shut down two cells of their water tower, thus also saving electrical energy. So far the combined total savings of electricity from these new centrifugal chillers has been 1,306,680 kilowatts for the 700 ton chillers and 737,147 kilowatts for the 300 ton chillers from 2009 to 2013. The hospital has installed low flush toilets and motion sensor faucets in their public rest rooms to help conserve water usage. The hospital also has installed more recently low flow shower heads in all the patient rooms. Also the newer VAV (Variable Air Volume), Boxes that were installed on the Air Handling Systems at the hospital over the last 4 to 5 years has reduced the amount of load on the water chillers at the facility reducing the amount of water used at the hospital.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/12/14</p>	<p>OR Surgical Wraps - The surgical equipment used in the OR's are wrapped in a strong multi-layer, 100% polypropylene plastic wrap which offers high-level protection against fluids and particles and is strong and resistant to tears. According to the Hospital, these wraps can not be recycled by normal recycling Companies (the normal everyday recycling Company does not except these surgical wraps).....so the Hospital uses a Division of Stericycle to pick up these surgical wraps and recycle them. These surgical wraps are placed into a 5 cubic yard container and the container containing the surgical wraps is picked up monthly or when the container is full.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/12/14</p>	<p>Lighting: Between 2004 and 2014, the Hospital has changed out 80 to 90% of its 4 - Lamp, T-12, 40 - watt fluorescent lights with 2 Lamp, T-8, 34 watt fluorescent lights. The new lights also include silver reflectors for better illumination. Also, the Hallways, Conference Rooms, Chemo and Dialysis Area at the Hospital have had their lights changed over to Focal Point LED Lights. The Hospital has also changed over their 60 watt bulbs to 13 watt compact fluorescent bulbs. The Hospital has also changed all the lights in the parking garage at the hospital in 2009 from High Energy Sodium HPS Lights to LED Lights saving roughly 1,170,142 kilowatts of energy between 2009 and 2013. Flooring: The Hospital starting in 2013 is changing their vinyl composite tile flooring over to Forbo Marmoleum - a nature-friendly floor covering. Marmoleum has earned an honorable mention for its long lifespan. Installing this new nature friendly Forbo Marmolium eliminates the use of buffing and waxing machines and the products associated with buffing and waxing machines. There is no longer a need to use stripping agents on this new flooring. Air Handling Systems: The Hospital has installed new Air Handling Systems that are now controlled by an Automation System designed by Johnson Controls (installed between 2009 and 2013). The Automation System automatically shuts down the HVAC units in areas of the hospital that are not being occupied. The rooms of the hospitals have sensors and when the rooms are not being used, the HVAC system for that section of the hospital shuts down conserving electricity. There are VFD (Variable Frequency Drives) on all the motors for the air handling systems at the site as well as VAV's (Variable Air Volume) boxes (which were installed in October of 2013), which cut down on the amount of cooling air that is supplied to a room once the temperature in the room is satisfied. Hospital also installed a new steam optimization system on their HVAC Systems in 2009 which have saved on natural gas usage between 2009 to 2013 of 226,140 therms. Also the filter replacements in the HVAC Systems since 2009 have netted an electrical saving of 220,441 kilowatts as of 10-31-13. Motion Sensors Each office room, bathrooms (in public areas) have motion sensors (called occupancy sensors which were installed between November 2009 and May of 2010) that will turn off the lights when room is not being used/occupied. Energy savings from installing these sensors = 517,718 kilowatts between 2009 and 2013. Boiler Controls The Hospital installed new controls to operate their Boilers. These new controls have saved roughly 20,780 kilowatts and 53,606 therms of Natural Gas Usage on the Boilers since 2009 to 2013. Window Replacement Hospital installed in 2009 new windows in the School of Nursing Bldg at the Hospital. Old Windows were replaced by new double pane windows (completed by 10-31-13). Hospital has saved roughly 53,047 therms of natural gas usage in this building due to installation of new windows.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>8/12/14</p>	<p>The Hospital is accounting for all Greenhouse Gases at their site. The Hospital uses a Company called Stericycle Sharps Management Services who calculates out all the Greenhouse Gas Emissions from the Hospital (both Direct and Indirect Emissions). For 2012, the Total Greenhouse Gas emissions from the site = 3,279 lbs. The 2013 Greenhouse Gas Emissions from the site will not be available until October of 2014.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/20/13</p>	<p>Holy Name continues to purchase renewable energy (7.45%) from Sterling Planet. Captured Methane (1.63%), Hydro-electric (0.08%), Solar Energy (3.07%), Solid Waste (1.64%) and Wood/Bio-mass (0.19%).</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/28/09</p>	<p>The following has reduced water usage at the hospital 1) The Hospital over the last couple of years has removed all water cooled refrigeration systems, ice machines and liquid ring vacuum pumps that used city water. 2) The Hospital has replaced two 7 hundred ton steam absorption chillers with two more water efficient 7 hundred ton centrifugal chillers. This change has allowed the hospital to shut down two cells of their water tower, thus also saving electrical energy. 3) The hospital also captures the waste water from their reverse osmoses machines and uses the water for their water towers thus saving the usage of city water. 4) The hospital has installed automatic flush toilets and sensor faucets in their public rest rooms to help conserve water usage.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/28/09</p>	<p>The Hospital has installed new HVAC systems that are now controlled by an Automation System designed by Johnson Controls. The Automation System automatically shuts down the HVAC units in areas of the hospital that are not being occupied. The rooms of the hospitals have sensors and when the rooms are not being used, the HVAC system for that section of the hospital shuts down conserving electricity. The Hospital has also changed out most of its fluorescent light-bulbs with energy efficient fluorescent light bulbs that use less mercury.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/28/09</p>	<p>The Company purchases 7.45% renewable energy from Sterling Planet. 1.63% - Captured Methane 0.84% - Hydro Electric Energy 0.08% - Solar Energy 3.07% - Solid Waste 1.64% - Wind 0.19% - Wood/Bio Mass</p>

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	5/21/08	The dealership gets all of its electricity from roof mounted solar panels.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/21/08	The dealership gets all of its electricity from roof mounted solar panels.

IMTECH GRAPHICS INC

Site ID: IMTECH GRAPHICS INC

CARLSTADT, NJ 07072

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/8/15	Process Free System removes the need for wet chistry and generation of waste. Kodak Sonora XP Process, Free Plates since March 2014. Certificate was observed on this inspection.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	6/8/15	Received ISO 14001 in April 2012 ID #1043012
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	6/8/15	Paper purchase is certified as meeting the Forest Stewardship Council issued June 2012 -FSC Certificate was observed on this inspection.

7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	6/2/08	Dutch Cleaners has purchased Eco-Green Garment bags through their supplier - Minda Supply Co. (Attachment A). According to the manufacturer, the bags are biodegradable, compostable and recyclable.

J JOSEPHSON INC @ EMPIRE OFFICE CENTER

Site ID: J JOSEPHSON INC @ EMPIRE OFFICE CENTER
 15985 35 EMPIRE BLVD, & HORIZON BLVD
 SOUTH HACKENSACK, NJ 07606

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	4/6/16	Working with vendor to recycle the hazardous waste, inks at facility. Specifically, the facility recycled 40 % of their weekly barrels of product.
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	4/6/16	Facility reduced water usage by installation and repair of condensate collectors, boiler upgrades, and changes to print cylinders. Water usage has declined 30 %, when measured on a gallons per production yard metric.
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	4/6/16	Upgrades to the Regenerative Thermal Oxidizer (RTO) operations have resulted in a 56 % decrease in natural gas usage in 2015 compared to previous years, despite an increase in production.
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	4/6/16	Facility has incorporated additional recycling efforts at the plant. As such, the facility has reduced the amount of dumpster pick up by 80-90 % per year.
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	4/6/16	Facility replaced all the light bulbs in the facility to the efficient T8 bulbs in 2012.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/6/16</p>	<p>Facility has an Environmental Policy that is communicated to managers and staff.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/6/16</p>	<p>Facility has an Environmental Management System as they participate in a trade group association which conducts environmental audits of members.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>4/6/16</p>	<p>Facility maintains data and milestones on environmental improvements.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/6/16</p>	<p>Facility is purchasing recycled solvent in lieu of virgin solvent for operations. As of September 2015, facility has increased recycled solvent purchases to 45 % of all solvents from previous zero %.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/10/14</p>	<p>Working with a vendor to recycle the hazardous waste, inks, at the facility. Specifically, the facility recycled 40% of their weekly barrels of product.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/10/14</p>	<p>Facility has incorporated additional recycling efforts at the plant. As such, the facility has reduced the amount of dumpster pickups by 80-90% per year.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/10/14</p>	<p>Facility replaced all the light bulbs in the facility to the efficient T8 bulbs in 2012.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/21/14</p>	<p>Working with a vendor to recycle the hazardous waste, inks, at the facility. Specifically, the facility recycled 40% of their weekly barrels of product.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/21/14</p>	<p>Facility replaced all the light bulbs in the facility to the efficient T8 bulbs in 2012.</p>

KIMS COURTESY CLEANERS

Site ID: KIMS COURTESY CLEANERS
14450 262 CLOSTER DOCK RD,
CLOSTER, NJ 07626

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/6/08	In previous years, company has taken measures to reduce heavy metal content of their raw materials. Also eliminated use of halogenated solvent cleaning.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	2/6/08	
8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?	2/6/08	This move prompted by final customer demands

KULITE SEMICONDUCTOR PRODUCTS INC

Site ID: KULITE SEMICONDUCTOR PRODUCTS INC

 LEONIA, NJ 07605

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/27/11	The facility was able to eliminate the following chemicals from their cleaning process in 2012 and replace it with a safer chemical: 1 - phosphoric acid 2 - ammonia gaseous 3 - di-cloro silane 4 - HCL (gas) The replacement is Sulfur Hexafluoride (SF6) according to the MSDS sheet.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	12/27/11	The facility was able to provide documentation showing an environmental policy.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	12/27/11	The facility is following an employee trip reduction program where several of their employees are car pooling in and out of work.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	11/21/08	Kulite has reduced the use of trichloroethylene from 30-gal./month to 1-gal./month.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	11/21/08	Facility has carpool program. Monetary incentive to get employees to carpool.

LEDOUX & CO INC

Site ID: LEDOUX & CO INC
11222 359 ALFRED AVE,
TEANECK, NJ 07666

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/4/09	Site recirculates heat generated from ovens in fire assay to heat the lab area in the colder months.

LPS INDUSTRIES INC

Site ID: LPS INDUSTRIES INC
18837 10 CAESAR PL,
MOONACHIE, NJ 07074

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/13/14	Company has a small still that they use to recycle solvents.. The Company takes the waste solvent that comes from their process equipment at the facility and places these waste solvents into a small still via a 5 gallon bucket. The still condenses the liquid solvent out of the waste solvent and the "sludge" product is shipped off-site. The clear waste liquid is then used as solvent to clean the machines. By recycling the waste solvent this reduces the amount of solvent that has to be ordered by the facility as well as the amount of "Hazardous Waste" that has to be shipped off-site as Hazardous Waste. The waste eventually does get shipped off site as Hazardous Waste, but it is re-used many times before it is shipped off-site and the amount of Hazardous Waste is a lot less than it would be if the Company did not recycle their waste solvents.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/13/14	Company has installed low flow toilets and urinals in most of the bathrooms at the facility starting in 2013.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/13/14	The Company is currently installing a new Regenerative Thermal Oxidizer at their facility to replace an aging 25 year old Catalytic Oxidizer. Company installing a more energy efficient Regenerative Thermal Oxidizer that will use less natural gas and less electricity to operate than their current Catalytic Oxidizer. The new larger Regenerative Thermal Oxidizer will also be scaled back and not used at its full potential to further save on natural gas usage and electricity.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/13/14</p>	<p>Company has replaced and is still replacing their old 40 watt T-12 8-ft. and 4-ft lighting fixtures with newer more efficient T-5 and T-8 Lighting Fixtures and 34 watt light bulbs or lower. Also, the old T-12 Lighting Fixtures would have 4 lights to them, the new lighting fixtures only have 2 lights to them - saving further energy. About 50% of the lights at the facility have been changed over from T-12 lights to T-8 and T-5 Lights, and there is currently no longer any T-12 8 ft. Lighting fixtures at the site.. Company has also changed all their incandescent lighting to compact florescent lighting. Changing of lights started in 2004 and continues as old light fixtures fail and need to be replaced.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>8/13/14</p>	<p>In April of 2014, the Company conducted an Environmental Enhancement Project on a 5- acre area of their property with help of the NJ DEP and the Army Corps of Engineers by planting 300 native trees and bushes on this 5-acre wetland area at their site.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>8/13/14</p>	<p>The Company has 4,000 solar panels installed on the roof of their warehouse building to produce 900,000 kilowatts of electricity for their facility which is roughly 25 to 30% of the electrical power used at their facility.</p>

LYNDHURST TWP MUNICIPAL COMPLEX

Site ID: LYNDHURST TWP MUNICIPAL COMPLEX
 18730 367 VALLEY BROOK AVE,
 LYNDHURST, NJ 07071

Stewardship Activities	Date Acknowledged	Comments
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/11/08</p>	<p>The Borough of Lyndhurst purchased two hybrid vehicles.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/11/08</p>	<p>Each year the Borough of Lyndhurst plants trees for their streetscaping program.</p>

MAHWAH TWP

Site ID: MAHWAH TWP
154032 475 CORPORATE DR,
MAHWAH TWP, NJ 07430

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/26/17	A rain garden was installed along the lake adjacent to Mahwah Department of Public Works yard. The rain garden will serve to reduce the storm water runoff and pollutant loading to the lake.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	3/10/08	The Borough has purchased a specific mower that removes all geese waste from their fields. Fecal coliform is a pollutant of concern in this area.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	3/10/08	Every year, the Borough of Mahwah hosts a stream clean up.

MAQUET CARDIOVASCULAR

Site ID: MAQUET CARDIOVASCULAR

MAHWAH TWP, NJ 07430

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	4/30/13	Datascope was able to provide a policy on the environmental pillar for their company. The policy focuses on the environmental impact associated with their choices on processes, equipment used, materials purchased, products made, suppliers and methods used to manufacture their product. Stewardship efforts were noted based on the data reviewed in the environmental policy.

MARCAL MFG CORP

Stewardship Activities	Date Acknowledged	Comments
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/16/11</p>	<p>Variable Speed Drives: In order to operate pumps at lower output rather than depending on a control valve to regulate flow from a pump running full out all of the time, Marcal have installed variable speed drives on larger pumps. This has saved ~1,160,000 KWH/yr so far. This year, this ongoing project will save an additional 450,000 KWH/yr. Heat Exchanger on Boilers: heat exchanger installed on the blow down water in the main boiler has saved 8,700 million BTU/yr. Installed new covering on Paper Machine Roll: The metal rolls installed in the paper machines are covered; normally with a rubber coating. Marcal opted for a more expensive (~ \$38,000 more) covering material that will save \$9,200 million BTU/yr. Compressed Air: Initiated a program to aggressively eliminate leaks in the system, Marcal has saved 1.18 million KWH/yr. Building Heat: A similar program aimed at repairing broken window, walls, etc has saved 9,200 million BTU/yr. This is an ongoing program that is expected to save a total of 21,000 million BTU/yr. Operational Efficiencies: 1) 1.13 million KWH/yr by changing the operation of a pulper to run full 50% of the time instead of partially full all of the time. 2) 2.6 million KWH/yr by changing the standard operating procedure at the paper machine to run 4 vacuum pumps ; with the fifth only being turned on when it is really needed. 3) 1.6 million KWH/yr by running various motors on automatic or only when needed. 4) 13,000 million BTU/yr by maximizing the usage of the more energy efficient of two boilers.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/16/11</p>	<p>Lighting: Marcal 3/4 finished with a project to replace T12 fluorescent & High Intensity discharge lighting fixtures with T8 fluorescent fixtures. Since 2009, this project has replaced approximately 2,600 fixtures and saved 2.8 million KWH / yr. Within the next two years, Marcal expects to replace an additional 900 fixtures for an additional savings of 1,000,000 KWH/yr. This project does receive an approximately 40% refund for the cost of fixtures from NJ Clean Energy Smart Start Program. Occupancy /Motion Sensors: Marcal has connected all non production area lighting to motion sensors. This has decreased energy use for these fixtures by 50%.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/16/11</p>	<p>April 11 & 12 2011, 75 Marcal employees volunteered to participate in a two day cleanup that included the Passaic River bank (in cooperation with Passaic Valley Sewage Commissioners) and a clean up the streets surrounding their property. In all, 10,940 pounds of garbage was collected. Marcal has adopted the Elmwood Park Marina (for the next 6 months) & donated seven (7) trees to Elmwood Park - six (6) Arborvitae and one (1) Weeping Willow as part of Earth Day Celebrations (that included an Energy & Health Fair.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/16/11</p>	<p>Marcal has a Vision Statement that includes and Environmental Policy. The Vision Statement is posted on a wall at the entrance of the facility.</p>

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/6/13</p>	<p>Facility is changing their pizza boxes, liquid ink will be replaced by wax blocks. There will no longer be hazardous waste onsite by 2013.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/6/13</p>	<p>Facility has a set goal of reducing 10% of their garbage and food waste to recycling within 3 months.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/6/13</p>	<p>The facility is installed high efficiency light bulbs throughout the building five years ago.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/6/13</p>	<p>Yes, copy of environmental policy was onsite for review and hanging on their environmental board.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/6/13</p>	<p>Facility is an ISO 14001 facility, EMS was onsite to review.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/27/13</p>	<p>The facility takes all discarded food waste and transports the waste to pig farms.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/27/13</p>	<p>The facility installed high efficiency light bulbs throughout the building five years ago.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/27/08</p>	<p>All waste food not able to be reused in process is sent to local farms.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/27/08</p>	<p>All lightbulbs in the plant were switched to T8 bulbs, higher efficiency bulbs.</p>

MEDITERRANEAN TOWERS SOUTH

Site ID: MEDITERRANEAN TOWERS SOUTH
176038 2000 LINWOOD AVE,
FORT LEE, NJ 07024

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/17/14	The facility conducts a combustion adjustment of their three 14 MMBTU/hr boilers on a quarterly basis. State regulation only requires these adjustments be conducted annually to reduce air pollution from the boilers.

MENSHEN PACKAGING USA

Site ID: MENSHEEN PACKAGING USA
11144 21 27 INDUSTRIAL PK,
WALDWICK, NJ 07463

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/18/09	Reduced fugitive emissions of paradichlorobenzine AKA 1, 4-dichlorobenzene (HAP) by 99% and have cut use by more than 80% in the past 5 years. Fugitive reduction cut by 7,000 lbs by improving their production lines and finished goods handling, also convincing customers to go with a soap substitute.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/18/09	Recent facility upgrade systems allow company to immediately reuse colored scrap plastics which were difficult to recycle previously. Also recently introduced procedures resulting in reusing all carrageenan gel product scrap and clean out water.

MONDELEZ GLOBAL

Site ID: MONDELEZ GLOBAL
12165 21 11 RT 208,
FAIR LAWN, NJ 074102696

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	6/18/13	Mondolez has a formal SOP for the handling and management of hazardous materials. The facility only uses hazardous materials that are approved by Kraft. As a result of the management system in place at the facility, there has been a substantial decrease in hazardous materials used onsite.
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	6/18/13	Facility has had a 24% reduction of water use from 2010 use to current use.
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	6/18/13	Facility has had a 7.4% reduction of energy from 2010 use to current use.
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	6/18/13	Facility has had a 20% reduction of usage and has a zero landfill policy.
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	6/18/13	All lights in the plant have been switched to the more efficient T8 bulbs.

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/18/13</p>	<p>Mondelez had developed the SSE Recognition Program, where employees are nominated based on their increased safety and environmental awareness that goes above and beyond what is expected. Recently Mondelez recognized an employee for their work on the bakery's dust collectors. By manipulating the equipment and changing their process based on the employee's idea, the bakery has improved its air emissions both inside and outside the plant.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/18/13</p>	<p>Mondelez is a voluntary member of the local Emergency Planning Committee which meets quarterly to address potential environmental issues and develops plans for handle emergency situations. Recent discussions dealt with proper use of generators and minimizing air emissions issues.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/18/13</p>	<p>Mondelez's environmental policy was hanging in the lobby and can be found at the following link: http://www.mondelezinternational.com/DeliciousWorld/sustainability/environmental-policy.aspx</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/18/13</p>	<p>Yes, facility obtained the ISO 14001 certification, EMS part of that certification.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>6/18/13</p>	<p>2011 report available on the website, http://www.mondelezinternational.com/SiteCollectionDocuments/pdf/KraftFoods_DeliciousWorld2011.pdf</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/17/09</p>	<p>All chemicals are approved by Kraft and a formal SOP for these chemicals is in place. As a result, there has been a substantial decrease in hazardous waste onsite.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/17/09</p>	<p>Through the KEMS approach, water use has been reduced by 11% for 2009.</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/17/09</p>	<p>Through the KEMS approach, energy use has been reduced by 7% for 2009.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/17/09</p>	<p>Through the KEMS approach, waste to landfill has been reduced by 20% for 2009.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/17/09</p>	<p>Yes, all lights in the plant have been switched to the more efficient T8 bulbs.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>8/17/09</p>	<p>Kraft is part of Fair Lawn's local emergency planning committee.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/17/09</p>	<p>There is an environmental policy signed by corporate officials and plant manager located throughout the facility.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/17/09</p>	<p>Kraft has its own "KEMS" system, Kraft Environmental Management System for all plants and facilities.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>8/17/09</p>	<p>Kraft has a trip reduction program which provides incentive and green parking spaces for those who carpool or have alternative fuel vehicles.</p>

MZB USA FOODSERVICE

Site ID: MZB USA FOODSERVICE
 14955 10 EMPIRE BLVD,
 MOONACHIE, NJ 070741380

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/18/09</p>	<p>A hard copy of the environmental policy can be found on file at the facility.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/18/09</p>	<p>The Sara Lee Environmental Management system is recorded on a binder. The system includes monthly meetings and a Site Run Action Plan. An environmental report is created but only available for upper management. Env. Report isn't available for the public.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>2/18/09</p>	<p>Sara Lee requires their food vendors in their supply chain to provide environmentally sound practices by policy. No other method specified.</p>

NATUREX INC

Site ID: NATUREX INC
 11236 375 379 HUYLER ST,
 SOUTH HACKENSACK, NJ 07606

Stewardship Activities	Date Acknowledged	Comments
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/22/15	Naturex Inc. has one electric vehicle (Nissan Leaf) and two hybrid vehicles (Toyota Prius) which is used by their sales people.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/22/15	Naturex Inc. continues to purchase energy generated from renewable sources. Direct Energy, 652.491 megawatt hours in 2015.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/6/13	The Naturex Inc. facility continues to participate with the Hess Corporation by purchasing energy generated from renewable resources. Ten (10) percent of their energy use is purchased from renewable resources. Both of their onsite buildings participate in this program (Serial numbers SPI 2012030508185 & SPI 2012030508184).
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	1/10/11	Since May 2009, Naturex purchases approximately 350 Mega Watt Hours per year (or 10% of usage) of electricity (wind and solar) from Hess Corporation.

------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/21/18</p>	<p>In 1998, Pan Chemical purchased a Solvent Recovery System. The Solvent Recovery System recycles the waste solvent that is used daily/weekly to clean out the mixing vessels that are used to mix ink products. The solvent used to clean out the mixing vessels is 70 to 90% methyl ethyl ketone and other HAP solvents that normally would have been sent out by the Company as hazardous waste. However, because of the Solvent Recovery System, the Company has reduced the amount of hazardous waste being sent out by 3,800 lbs./yr. since 1998. The Solvent Recovery System is still in operation today and 3,800 lbs. of solvent did not have to be sent out by the Company in 2017 as hazardous waste. Starting Between 2012 to 2015 and still on-going as of today, the Company has started a new dispersive pigment powder product called PanTINT - this new product is a resin free system featuring fast stir-in capability. This new product can be used for coatings, stains, aerosol, ink and concrete applications. Some of the new water based pigment systems feature an acrylic resin that are designed for wood and UV coatings and aqueous coatings and gravure inks. (Series 2, 4 and 18 PanTINT Products) Solvent usage in the Company pigments has dropped from 65 to 70% in 2012 to 55% now (in 2018).....and more water base products are coming later this year.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/21/18</p>	<p>In 2002, Company installed a new Chill Water System at the facility. The new Chill Water System is a closed system. Prior to 2002, the Company used to use City Water to cool down the 2 Roll Mills, Netch Mills and Eiger Mills at the site...the water would then be sent to the sewer system. Now, the water is recycled under the newer Chill Water System so no water is sent out to the sewer system. Additionally, starting in 2013, the Company has come up with a new product, a dry powder paint that uses no water. This means some of the water based paints at the site have been replaced by a new dry powder product "PanTINT" (Series 6) that uses no water to make this powder pigment product thus reducing the amount of water usage at the facility.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/21/18</p>	<p>In 2015, the Company modified 10 mixers and 2 mills over to VFD drives. To date (2018) the Company has replaced 50% of the motors on their mixers with variable speed drive motors, reducing energy consumption by as much as 60%.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/21/18</p>	<p>In 2012/2013 time period and still on-going today, the Company is re-formulating their paint products to reduce solvent usage and to conserve material. Prior to 2012, the Company solvent usage was 65 to 70% solvent and 30 to 35% water base pigments. As of 2017/2018, the solvent usage in the Company's pigments is now 55% solvents and 45% water and dry solid pigments - thus less solvents have been used by the facility.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/23/13</p>	<p>In 1998, Pan Chemical purchased a Solvent recovery System. The Solvent Recovery System recycles the waste solvent that is used daily/weekly to clean out the mixing vessels that are used to mix ink products. The solvent used to clean out the mixing vessels is 70 to 90% methyl ethyl ketone and other HAP solvents that normally would have been sent out by the Company as hazardous waste. However, because of the Solvent Recovery System, the Company has reduced the amount of hazardous waste being sent out by 3,800 lbs./yr. since 1998. The Solvent Recovery System is still in operation today and 3,800 lbs. of solvent did not have to be sent out by the Company in 2012 as hazardous waste.</p>

Natural Gas STAR Program.	8/2/13	PSEG is a Natural Gas STAR program partner. http://www.epa.gov/gasstar/partners/index.html
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/2/13	PSEG has recycled or reused over 90 percent of all non-hazardous solid wastes generated, not just recyclables. http://www.pseg.com/info/environment/ps_recycle.jsp
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	8/2/13	Link for PSEG Environmental Policy: http://www.pseg.com/info/environment/health.jsp
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	8/2/13	PSEG employs a comprehensive Corporate Environmental Management System to track and improve performance. This system is used to: 1) monitor key operational parameters to anticipate and reduce the likelihood of environmental incidents, 2) track and report on progress against objectives and targets, and 3) assess and verify conformance to legal and other requirements. See attached link for details: http://www.pseg.com/info/environment/sustainability/2009/green/enviromgmt.jsp
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	8/2/13	2013 sustainability report: http://www.pseg.com/info/environment/sustainability/2013/sustainability_report/HTML/index.html
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	8/2/13	
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	8/2/13	PSEG offers eligible employees Flexible Work Options such as, Telecommuting, Alternate Work Site, Compressed Work, Part-Time, Job sharing, and Flexible Work Hours.

Stewardship Activities	Date Acknowledged	Comments
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/10/13	PSE&G-Hackensack has several fleet vehicles running biodiesel and electric (hybrid).
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/10/13	PSE&G-Hackensack has installed solar panels on the telephone poles throughout the facility.

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	11/4/09	Piping insulation and variable speed fans installed on all lab hoods greatly saving on wasted heat production.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	11/4/09	Video conferencing equipment was installed which reduced world-wide travel by 5%.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	11/4/09	Since May 2008, facility has installed energy efficient lighting throughout the facility.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	11/4/09	Since May 2008, solar panels installed to generate 11 kW/hour supplemental energy gain.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/2/08	As part of a world-wide corporate effort, Reckitt Benckiser Inc. plans to reduce their CO2 emissions and energy use over the next year by 10%. At this particular site they have committed the money to complete the following projects by July/08, some of which has already been incorporated. Solar panels being installed to reduce energy by 10%. A cogen system will be installed by July to reduce the dependency on their boilers. All new energy-saving lighting throughout the entire building just installed. Piping insulation and variable speed fans installed on all their lab hoods greatly saving on wasted heat production. Also obtaining video conferencing equipment to reduce world-wide travel by 5%.
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	5/2/08	Published annually out of their England Corp. Headquarters. Compiles energy & hazardous materials use and solid and hazardous waste disposal activities, in an effort to analyze for future reductions. http://www.reckittbenckiser.com/site/RKBR/Templates/CorporateResponsibilityStyle3.aspx?pageid=259

RIDGEWOOD VILLAGE DPW

Site ID: RIDGEWOOD VILLAGE DPW
60592 561 PROSPECT ST,
GLEN ROCK BORO, NJ 07452

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/22/17	At the Ridgewood Site, the CHP engine only utilizes LED lighting, no fluorescent lighting is used.(Class 1 Lighting - Explosion Proof Lights)
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	8/22/17	Natural Systems Utilities currently owns and operates the CHP Engine at the site, and has an Environmental Policy called the EH & S Policy Statement. The Policy core elements are: 1) Management leadership and employee participation 2) Hazard identification and assessment 3) Hazard prevention and control 4) Environmental compliance and stewardship 5) Information and training 6) Evaluation of program effectiveness
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	8/22/17	Natural Systems Utilities uses an EMS system called Log Check. Information from this system can also be viewed from cell phones and Ipads through a special app.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/22/17	Solar panels are installed at the Ridgewood Site. Natural Systems Utilities also supplied solar panels to the local police station and fire station in Ridgewood. Since installation of solar panels in late 2013, the solar panels have produced 850,000 kW of electricity.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	8/22/17	Natural Systems Utilities conducts a carbon footprint analysis for all their sites on a monthly basis including the Ridgewood Site. This site roughly emits (when operating) up to around 43 tons of carbon emissions per month.

Stewardship Activities	Date Acknowledged	Comments
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>10/30/15</p>	<p>Borough has developed a tree farm on a newly acquired open space property. Once trees are mature they are transplanted to local lands and parks within the Borough.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>10/30/15</p>	<p>Borough partners with Hackensack Riverkeeper annually for a river clean up.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>10/14/09</p>	<p>The Borough currently collects electronic waste to be recycled. During the first year, the Borough recycled 9.87 tons of electronic waste.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/14/09</p>	<p>Since the last inspection, the Borough has completed an energy audit of three buildings. The report, developed by Metro Energy, was available for review.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>10/14/09</p>	<p>The Borough has obtained a Tree City USA designation from 2000-2009.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>10/14/09</p>	<p>The Borough has gone above and beyond the current requirements of the Municipal Separate Stormsewer System permit by retrofitting 90% of the catch basins.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>10/14/09</p>	<p>The Borough works in conjunction with the Hackensack Riverkeeper to conduct an annual river cleanup with the environmental commission.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/28/08</p>	<p>As of 2007, the Borough of River Edge is collecting and recycling cardboard. This waste stream is no longer going into the landfills.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/28/08</p>	<p>The Borough is in the process of conducting an energy audit for all municipally owned buildings.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/28/08</p>	<p>The Borough of River Edge is a Tree City since 2000.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>2/28/08</p>	<p>The Borough has retrofitted every catch basin in town. The requirement for the stormwater permit is to retrofit the drains once roads are repaired or resurfaced.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/28/08</p>	<p>The Borough of River Edge conducts an annual clean up along the Hackensack River every year.</p>

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/5/12	Ongoing effort to reduce energy consumption by upgrading lighting in new and existing buildings.

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/5/12</p>	<p>Borough is part of the Tree City program.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>3/5/12</p>	<p>Borough has reduced litter in their community by collecting trash from the commercial areas on the weekends.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/17/09</p>	<p>The Borough collects electronic waste from residents and properly disposes the hazardous waste.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/17/09</p>	<p>The Borough has completed an energy audit. As a result, numerous buildings have been switched to include the high efficiency bulbs and motion sensing for lights.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/17/09</p>	<p>The Borough has been a registered Tree City for the past 6 years. The Borough is committed to planting and maintaining the trees in their community.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/4/08</p>	<p>The Borough collects electronic waste from residents and properly disposes the hazardous waste.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/4/08</p>	<p>In cooperation with the New Jersey Meadowlands Commission, the Borough conducted an energy survey of public buildings for renewable energy resources.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/4/08</p>	<p>The Borough is a Tree City for the past 5 years. Each year, large amounts of trees are planted within the Borough.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	3/31/09	<p>Due to efficient manufacturing processes, the yield for hylauronic acid (major component for Synvisc) has improved. We can run fewer Hylatron runs and at the same time yield high levels of hylauronic acid. This has resulted in decrease in hazardous waste generation.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	3/31/09	<p>The expansion to the existing manufacturing plant is registered with USGBC and is currently targeting Silver under the LEED New Construction, Version 2.2. Construction is expected to be complete in late 2009.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/31/09</p>	<p>The following examples over the past 3 years highlight Genzyme's commitment to community outreach on the environment through environmental stewardship activities. On Friday, March 28th 2008, Genzyme Biosurgery volunteers and members of the Meadowlands Conservation Trust, Ridgefield Environmental Commission, and New Jersey Meadowlands Commission performed a creek clean-up event at Skeetkill Creek Marsh in Ridgefield. The goal was to remove floatable debris from the banks of the creek. On April 20th Genzyme employees participated in an Annual Earth Day Event sponsored by the Bergen County Soil Conservation District. This Bergen County Parks Erosion Control Project took place at Glen Rock Park in Glen Rock, New Jersey. Other organizations that participated were Master Gardeners Association, Bergen County Utilities Authority (BCUA), and United Water. Planting of 600 silky dogwood seedlings were performed by approximately 70 volunteers (stewards) in all. This is a great event every year. The Bergen County Executive ? Dennis McNerney was also present at this event. In honor of Arbor Day, which took place on April 27th 2007, Genzyme Biosurgery donated 100 white pine seedlings for the event and for volunteers to take home. The White Pine Seedlings were received from the New Jersey Forest Service as part of their Arbor Day celebration specials. On May 3rd, 2007 Genzyme Biosurgery (Ridgefield, NJ) co-hosted the 2nd Annual Skeetkill Creek Clean-up event with the Hackensack Riverkeeper Inc. Members of the Hackensack Riverkeeper Inc (Part of the International Riverkeeper Alliance), Capt Bill Sheehan ? The Hackensack Riverkeeper, New Jersey Meadowlands Commission, Ridgefield Environmental Commission, The Honorable Mayor of Ridgefield Boro ? Mayor Anthony Suarez, and Tina Schvedja ? Executive Director of the Meadowlands Conservation Trust were all present for Genzyme Biosurgery's Creek Clean-up event. Employees from our sister facility ? Genzyme Genetics, New York City joined in this year's Creek Clean-up event. 53 Employees from Ridgefield and 11 employees from Genetics in NYC participated. Note: in November 2007 Skeetkill Creek Marsh will be preserved for perpetuity through the Meadowlands Conservation Trust. Regular maintenance of the creek embankments over time will be performed by Neighborhood Landscaping Corp. and by Genzyme Biosurgery stewardship events. On Friday, April 21st, 2006, twenty Genzyme Biosurgery employees participated at an Earth Day Celebration event which included planting of silkwood bushes along a riverbank at the Saddle River County Park - the Otto Pehle Park Area as part of the "Erosion Control Project." The event was hosted by the Bergen County Soil Conservation District and the Bergen County Environmental Council, which Genzyme Biosurgery ? Ridgefield site, is a member of as of March 2006. Skeetkill Creek is a 16 acre wetlands area located across the street (Pleasant View Terrace) from Genzyme Biosurgery. Genzyme maintains a lookout area which is open to our employees and to the public. The creek is part of the Hackensack River Watershed. On Friday, April 28th, 2006: ?Skeetkill Creek Clean-up, Canoe Rides, and Native Seedling Planting FISH Event.? Sixty (60) Genzyme volunteers helped with the planting of native wetland plants in different areas of the Skeetkill Creek. Employees helped by paddling canoes and cleaning up in parts of the area including nature trail. A number also helped to remove a 7 foot diameter tractor tire from the creek (a 3 hour effort)</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/31/09</p>	<p>Multiple environmental stewardship events each year provide tremendous environmental outreach, collaboration, and assistance to various groups including Meadowlands Conservation Trust, Ridgefield Environmental Commission, New Jersey Meadowlands Commission, Bergen County Soil Conservation District, The Master Gardeners Association, The Bergen County Utilities Authority (BCUA), United Water, New Jersey Forest Service, Hackensack Riverkeeper Inc., Neighborhood Landscaping Corporation, Bergen County Environmental Council, and Hackensack River Watershed Association.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/31/09</p>	<p>Safety and Environmental Policy Genzyme Biosurgery- NJ Safety & Environmental Policy Statement The Genzyme Biosurgery-NJ facility is committed to maintain a safe and healthy work place for all employees, and to protect the environment and the communities in which we operate through continued responsible action. Genzyme Biosurgery's commitment to excellence starts at the top. The Senior Steering Committee, which is comprised of senior level executives from all areas of the company, provides overall guidance and direction. The Senior Vice President of Manufacturing establishes our environmental and safety philosophy. This is executed through the Vice President of Operations, who directs the activities of the Safety & Environmental Department. At the NJ facility, the Vice President of Operations ensures execution of corporate programs. The Safety & Environmental Department reports directly to the Vice President of Operations, develops local procedures, and manages implementation of programs. The success of our safety and environmental programs is a result of the commitment of our employees. All operations are dedicated to excellence and to continuous improvement through implementation of safety and environmental initiatives. Genzyme Biosurgery-NJ facility has set specific objectives to meet these commitments: ? To meet or exceed all requirements of all applicable environmental, health and safety regulations, and corporate standards- Genzyme Environmental Management System (ISO 14001) and OSHAS 18001. ? To provide support and reporting safety and environmental performance to all departments within the facility via the Safety & Environmental Department. ? To encourage and apply pollution prevention, resource conservation, waste minimization, reuse, and recycling practices to reduce impact on the environment. ? To minimize waste disposal costs and promote application of safe and innovative technologies for waste disposal. ? To measure key environmental performance indicators (i.e. air emission, solid waste, hazardous waste, water use, energy use). ? To promote responsible safety practices, increase safety awareness, and employee involvement through the safety committee ? To conduct risk assessments for all identified hazardous operations. ? To promote a safe work environment by conducting monthly safety audits and reporting incidents and accidents ? To strive to continuously improve our environmental and safety management systems and practices. This includes an annual review of objectives and targets. Also, to foster a safety work environment.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/31/09</p>	<p>The Ridgefield site has implemented an environmental management system based on the ISO 14001 standard. There is no immediate plan for external certification; however, every 2 years corporate environmental audits the site EMS against the ISO 14001:2004 standard to ensure implementation.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>3/31/09</p>	<p>The Ridgefield site is an EPA Wastewise partner. Also, the entire Genzyme Corporation is an EPA Climate Leaders partner, which includes the Ridgefield facility.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/31/09</p>	<p>The site has completed a comprehensive greenhouse gas emission inventory for all Kyoto gasses. The emissions from the Ridgefield site include Scope 1 and Scope 2 emissions from the combustion of natural gas and diesel fuel in stationary equipment, combustion of gasoline in Genzyme owned or leased vehicles, fugitive emissions from refrigerant leaks, and indirect emissions from purchased electricity. Genzyme is an EPA Climate Leader partner; therefore, EPA protocols were followed with emissions data and methodologies verified by a contractor.</p>

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/16/15	Uses a weed barrier mulch for outside cover crops. Uses an IPM monitoring routine for reduction in pesticide use.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/16/15	Drip irrigation for greenhouse.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	1/16/15	Recycles plastic plant pots, reuses plastic pots after sterilizing.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/16/15	Use natural lighting in greenhouse and fluorescent blubs.

WaterSense.	2/4/16	UWNJ is a member of EPA's WaterSense Program. http://www.epa.gov/watersense/
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	2/4/16	In 2012 they converted to ammonium sulfate from anhydrous an inherently safer technology .
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	2/4/16	They installed leak detection monitoring equipment within the water distribution network in one of their pumping districts to identify locations of leaks/breaks in piping. The project will take place for all their other districts in the future.
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	2/4/16	For the last 2 years, UWNJ makes Ozone by using liquid oxygen instead of pulling in ambient air using Air Prep. Equipment. The removal of the equipment has reduced the amount of electricity used at the plant.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/4/16</p>	<p>Encourages customers to employ e-billing & online payment which saves paper in both directions.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/4/16</p>	<p>UWNJ uses some hybrid vehicles as part of their service vehicle fleet.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/4/16</p>	<p>In the past 2-3 years they have been replacing all lights with LED and some motion detection lighting.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/4/16</p>	<p>UWNJ hosts educational programs at the plant - tours for local schools. Educational programs and materials for customers. http://www.unitedwater.com/conservation.aspx</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/4/16</p>	<p>UWNJ's operates under a Corporate Environmental Policy. http://www.unitedwater.com/sustainable-development.aspx</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>2/4/16</p>	
<p>WaterSense.</p>	<p>3/30/11</p>	<p>UWNJ is a member of EPA's WaterSense Program. http://www.epa.gov/watersense/</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/30/11</p>	<p>Dissolved Air Flotation clarification process has reduced the volume of backwash water used from 8 mgd to 1.4 mgd, hence reducing the amount of potable water needed. UWNJ is a member of EPA's WaterSense Program.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/30/11</p>	<p>For the last 2 years, UWNJ makes Ozone by using liquid oxygen instead of pulling in ambient air using Air Prep. Equipment. The removal of the equipment has reduced the amount of electricity used at the plant.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/30/11</p>	<p>UWNJ uses some hybrid vehicles as part of their service vehicle fleet.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/30/11</p>	<p>Plant Upgrade Project included installation of Energy-Efficient Lighting throughout the facility, Energy-Efficient building heating system, use of existing footprint and building materials made from recycled materials.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/30/11</p>	<p>UWNJ hosts educational programs at the plant - tours for local schools. Educational programs and materials for customers. http://www.unitedwater.com/conservation.aspx</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/30/11</p>	<p>UWNJ's operates under a Corporate Environmental Policy. http://www.unitedwater.com/sustainable-development.aspx</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>3/30/11</p>	

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/23/09</p>	<p>Dissolved Air Flotation clarification process reduced the volume of backwash water used from 8 mgd to 1.4 mgd, ultimately reducing the amount of potable water needed.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/23/09</p>	<p>Haworth Water Treatment Plant Upgrade Project included installation of energy-efficient lighting throughout the facility, energy-efficient building heating system, use of existing footprint and building materials made from recycled materials.</p>

SYMRISE INC

 11152 300 NORTH ST,
 TETERBORO, NJ 07608

Stewardship Activities	Date Acknowledged	Comments
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/9/10</p>	<p>SYMRISE has an Environmental Policy published in the Social Responsibility Corporate Report. http://www.symrise.com/fileadmin/user_upload/pdf/CSR_Report_2008_e.pdf</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/9/10</p>	<p>SYMRISE follows the principles of Green Chemistry. The policy is detailed in the Social Responsibility Corporate Report (page 28) http://www.symrise.com/fileadmin/user_upload/pdf/CSR_Report_2008_e.pdf</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/9/10</p>	<p>SYMRISE has an Integrated Supply Chain Management detailed in the Social Responsibility Corporate Report (page 14,15 & 19) http://www.symrise.com/fileadmin/user_upload/pdf/CSR_Report_2008_e.pdf</p>

TAKASAGO INTERNATIONAL CORP

Site ID: TAKASAGO INTERNATIONAL CORP
39049 4 VOLVO DR, STE 2
ROCKLEIGH, NJ 07647

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/27/12	Takasago International Corp is moving towards a global effort to minimize and reduce all hazardous and solid waste by 2% every year. This includes all consumer waste streams received throughout all of the companies they service and on-site activities that generate waste. At this particular site, Takasago International Corp (Takasago) has been successful in minimizing ethanol waste from their process by sending it out for reclamation (under the 40 CFR 261.6(a) - exemption for -industrial waste) and shipped via TES to MXI Environmental Services in Virginia where the ethanol is recycled and used for other resources (i.e. fuel high grade octane additive) throughout the Country. The facility has been able to reduce ethanol hazardous waste on-site for 2011 by 14.8%, according to facility calculations.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	2/27/12	Takasago provided an environmental policy that governs how they operate their process in a safe and environmentally friendly way. This policy outlines environmental tasks and initiatives of goals that have to be met by Corporate on an annual basis.

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/28/14	Facility is currently changing to LED lighting.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/28/14</p>	<p>Takasago International Corp Environmental Policy http://www.takasago.com/en/aboutus/sustainability/ehs/index.html</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/28/14</p>	<p>The Takasago International Corp site in Teterboro, NJ utilizes an environmental management system and the global corporation has also obtained ISO 14001 certification at all production sites.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>3/28/14</p>	<p>Takasago International Corp Sustainability Report. http://www.takasago.com/en/aboutus/sustainability/ehs/pdf/sustainability-report-2011.pdf</p>

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/2/16	Many light fixtures went from T-12 to T-8. All old mercury lighting fixtures in the gm were replaced with T-5 - all within the past 3 years. Installed new higher efficiency HVAC & cooling tower process within the past 3 years. In 2012 they replaced their old chiller system with a new more efficient unit. Previously, they were required to run one of their 14 MMBTU/Hr. boilers all summer to help cool the school. Now this 3.4 MMBTU/Hr. chiller allows the larger boiler to sit idle mid-April through mid-October.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/2/16	Solar panels were installed at their ball field few years ago which supplies energy for the fieldhouse, press box and scoreboards.

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/12/14</p>	<p>The facility has a purchasing inventory manager at the site who monitors the purchasing of chemicals used in all the research labs at the facility. All chemical purchases are funneled through the purchasing manager instead of the individual labs. This helps reduce the over purchasing of chemicals and hazardous waste (the waste of chemicals) from each laboratory. Unilever has been able to reduce the quantity of hazardous chemicals that are purchased for their laboratories. Any leftover chemicals that are not used in the labs by Unilever at their Englewood Cliffs Facility are donated to Rutgers University for their labs to use.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/12/14</p>	<p>The Unilever Site in Englewood Cliffs has rain water sensors installed on their sprinkler systems so sprinklers only come on when the sensor indicates that the ground is dry and arid vs. having the sprinkler system operating every day. These sensors on the outdoor sprinkling systems were just replaced in 2014. The Unilever Site in Englewood Cliffs has low flow water saving fixtures in all their bathrooms and has sensors on all their faucets to turn the water on and off to prevent excess water usage.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>11/12/14</p>	<p>The Unilever Site in Englewood Cliffs re-uses food waste that is generated by their cafeterias or from their research/pilot plant department. The waste food is sent out to pig farms to be used as food for pigs instead of going to a landfill. The Unilever Site in Englewood Cliffs now purchases toilet paper for all bathrooms at their two large buildings that do not contain any cardboard "cores" so there is nothing to throw out after the roll is used.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/12/14</p>	<p>Between 2011 to 2012, the Unilever Site in Englewood Cliffs has switched over 80% of their fleet vehicles to low emission vehicles (hybrid vehicles). The Company CEO drives a hybrid vehicle.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/12/14</p>	<p>In 2007, the site replaced all their HVAC systems with energy efficient systems. Unilever has replaced all their windows with energy efficient tinted windows to reduce the need to operate their HVAC systems. The Company replaced all its lighting systems with energy efficient lighting fixtures. In 2009, the facility finished installing a new green roof on Building # 700. A Green Roof is a waterproof roof construction with appropriate load bearing capacity. The green roof at Unilever Building 700 is actually a green roof - grass and flowers grow on the roof of the building. In 2012, the facility installed a much more efficient dish washer in their cafeteria in Building # 700 that uses less energy. In 2013, the facility installed motion sensor timers for the lighting fixtures in Building 700 so that the lights will turn off or on depending on if someone was occupying that space.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/12/14</p>	<p>In 2009, the Unilever Site in Englewood Cliffs replaced two impervious parking lots at their site with two pervious concrete parking lots to reduce run-off. In 2013, Unilever planted 25 trees at their site to improve runoff at their site.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>11/12/14</p>	<p>The Unilever Site in Englewood Cliffs recycles their Lanova Computers. the computers are recycled by sending the computers back to the Computer Company "Lanova" instead of sending the computers to a landfill to be disposed of. The Unilever Site in Englewood Cliffs has reduced the amount of computers at their site (future e-waste) from 600 to 200 computers. The Unilever Facility in Englewood Cliffs as well as all Unilever Facilities in the United States and Canada (26 Sites) send ZERO Waste to Landfills. The Unilever Site in Englewood Cliffs does this through its recycling effort of all office supplies and equipment as well as through re-using any food waste from its cafeterias and laboratories. The Unilever Site in Englewood Cliffs has worked with (Sodexo Services) to eliminate the use of Styrofoam products used in the cafeteria at their site. The Unilever Site in Englewood Cliffs has removed all plastic containers in their cafeteria(s) and have replaced them with an environmental grade material that breaks down in the environment. The Unilever Site in Englewood Cliffs has worked with (Sodexo Services) to now use napkins in the cafeteria at their site that are made from recycled paper (more greener napkins), as well as uses new napkin dispensers that only dispense on napkin at a time to reduce wasting napkins. The Unilever Site in Englewood Cliffs, donates some of their leftover food from their cafeteria to local food bank which reduces the amount of food going out as waste from the site. Unilever as a whole each April (around earth day), sends a bus load of their employees out for one day to clean up a local, state or national park that is in close proximity to their building location. As far as the Unilever Facility in Englewood Cliffs, they send a bus load of their employees to Liberty State Park each year to help clean up the park.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/12/14</p>	<p>Unilever does Outreach Programs with the community focusing their Programs towards reducing water usage, recycling initiatives, and energy use reduction. The Company challenges families to create a brighter future for their children while having fun together. The Company has an interactive series called "Summer Sunlight Activities" developed in May of 2014 that encourages families to partake in simple and fun sustainable-living focused projects in their homes from greening the bathroom, to finding new uses for shampoo bottles, to getting their kids to turn off the water while brushing their teeth, or turn off the lights when they leave a room, or grow a summer garden outside - through this interactive program, children and families learn to build a better more sustainable world for themselves.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/12/14</p>	<p>The Company does have an Environmental Policy entitled "Unilever North America Safety, Health and Environmental Policy" also called the "SHE Policy" - signed by the vice president of the Supply Chain of Unilever North America as well as the President of Unilever North America, Kees Kruythoff. The Environmental Policy is updated annually.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>11/12/14</p>	<p>The Company does have an Environmental Management System at the site. The Company's Environmental Management System is called "Frameworks Standards" All Unilever manufacturing sites have implemented a Environmental Care Framework Standards. These require Unilever operations to establish a formal environmental management system. The framework is based on the ISO 14001 management systems standard, and is ultimately applicable to all parts of the business. The Framework Standards, which also cover occupational health, are supported by specific standards and guidance documents. These include specific standards covering third-party manufacturing, SHE management systems' auditing, environmental performance reporting, and the notification and investigation of SHE incidents. Detailed guidance documents have also been generated to cover areas such as environmental aspects evaluation, incident investigation and audit protocols to assess compliance with the SHE Framework Standards.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>11/12/14</p>	<p>Unilever does have an annual environmental report that comes out every April of each year for the previous year. The Environmental Report by Unilever is called: "Unilever Sustainable Living Plan" The Current Annual Report is under the website below for Calendar Year 2013: http://www.unilever.com/images/slp_Unilever-Sustainable-Living-Plan-2013_tcm13-388693.pdf 2014 Unilever Sustainable Living Plan will not be available until April of 2015.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>11/12/14</p>	<p>Unilever Englewood has a vanpool program (called Pegasus) available to their employees that it uses daily to pick up employees that live in the area of the facility so that they do not have to drive their own cars to work. Unilever Englewood has installed 7 bike-racks at their site to encourage employees who live in the area to ride their bikes to work instead of driving their cars to work. Unilever Englewood also has a website for their employees called www.everrideunilever.com which lists all the employees names and home address at the site. Employees are encouraged to use this website to find out other co-workers that live in the general area as they do and to try to start up a car-pool together so that there is a reduction of cars being driven to work. Unilever Englewood also allows telecommuting at least 1 to 2 days a week to employees to reduce the amount of vehicles driven to work daily.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/9/08</p>	<p>The facility hired a purchasing inventory manager who monitors the purchasing of chemicals used in all the research labs at the facility. All chemical purchases are funneled through the purchasing manager instead of the individual labs. This helps reduce the over purchasing of chemicals and hazardous waste (the waste of chemicals) from each laboratory. Any leftover chemicals that are not used in the labs by the Company are donated to Rutgers University for their labs to use.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/9/08</p>	<p>The facility has rain water sensors installed on their sprinkler systems so sprinklers only come on when the sensor indicates that the ground is dry and arid vs. the sprinkler system operating every day. The facility has installed within the last 4 to 5 years low flow water saving fixtures in their bathrooms and has sensors on all their faucets to turn the water on and off to prevent excess water usage. The facility also re-uses water that is used in their research/pilot plant operations to adjust the pH of the process waste water that is sent to BCUA (Bergen County Utilities Authority) instead of just flushing water to city sewer system.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/9/08</p>	<p>The facility re-uses food waste that is generated by their cafeterias or from their research/pilot plant department. The waste food is sent out to pig farms to be used as food for pigs instead of going to a landfill.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/9/08</p>	<p>The Company is now (since 2007) working on projects for green building implementation. The Company would like to eventually get LEED certified and is working toward getting LEED certified with some of the new construction going on at the site. The site has replaced all their HVAC systems with energy efficient systems. Unileaver has replaced all their windows with energy efficient tinted windows to reduce the need to operate their HVAC systems. The Company has replaced all its lighting systems with energy efficient lighting fixtures and they are currently installing a new green roof on their building at 700 Sylvan Avenue.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>7/9/08</p>	<p>Company recycles their computers. - Dell Computers are recycled by sending the computers back to DELL instead of sending them to a landfill to be disposed of. Printers, Copiers & Faxes are sent to a recycling company (Rex's Computer Co.) to be recycled. The Company has worked with Sodexo (their cafeteria food provider) to eliminate the use of Styrofoam in all the cafeterias at the site. The Company (Unileaver as a whole) each year sends a bus load of their employees out one day a year to clean up a local, state or national park that is close in proximity to their building location. As far as the Englewood Facility, they send a bus load of their employees to Liberty State Park each year to help clean up the park.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/9/08</p>	<p>The Company does have an Environmental Policy entitled "Unileaver/ Best Foods North America Safety, Health and Environmental Policy" signed by the president of the Company "John Rice."</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/9/08</p>	<p>The Company does have an Environmental Management System at the site. The Company has a self generated Environmental Management System that they call "Unileaver/Best Foods Englewood Cliff, Environmental Management System"</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>7/9/08</p>	<p>The Company does publish an Annual Environmental Report. The report does list information for all the Unileaver Facilities Nationwide. The information in regards to each Unileaver site is listed monthly in the report. Report is published on the web as a corporate report for all the Unileaver Sites Nationwide and not just for the Unileaver site in Englewood Cliff, although you can see the information from the Englewood Cliff site clearly marked in the report.</p>

<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>7/9/08</p>	<p>The facility has a vanpool program available and actually has its own vans that it uses to pick up employees that live in the area of the facility so that they do not have to drive their own cars to work. The Company also installed 7 bike-racks around their buildings to encourage employees who live nearby the facility to bike to work instead of driving their cars to work. The Company also has a website for their employees called www.everrideunilever.com which lists all the employees names and home addresses. Employees are encouraged to use this website to find out who lives in their general area and to try to start up a car-pool for those individuals that live in the same area as they do so as to reduce the amount of cars that are driven to work.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/23/09</p>	<p>Unimac Graphics has a signed "Quality and Environmental Policy" which was signed on January 2, 2009.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/23/09</p>	<p>Between May 13-15, 2009, Unimac Graphics underwent an environmental audit by "Det Norske Veritas" to conform with the Management System Standard for ISO 14001:2004. A copy of the management system certificate, issued by Det Norske Veritas, is valid through November 5, 2010.</p>

VERSA PRODUCTS CO INC

Site ID: VERSA PRODUCTS CO INC
 11477 22 SPRING VALLEY RD,
 PARAMUS, NJ 07657

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/19/08</p>	<p>---removed vapor degreasers using 1,1,1 trichloroethane ---company does not use lead products and participates in RoHS (Reduction in the use of Hazardous Substances)</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/19/08</p>	<p>-rain sensors were added to landscape sprinkler system to ensure sprinklers do not activate during bad weather</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/19/08</p>	<p>-in 2006 the company reduced its energy use for the entire building--- they participated in an energy survey conducted by Lehigh & installed energy efficient compressor & heaters</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/19/08</p>	<p>-scrap metal is recycled -waste oil is recycled off-site by Larco</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/19/08</p>	<p>-company now does internet conferences</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/19/08</p>	<p>-company now does internet conferences</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/19/08</p>	<p>participates in RoHS (Reduction in the use of Hazardous Substances) ----does not use any lead products</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/19/08</p>	<p>participates in RoHS (Reduction in the use of Hazardous Substances)----does not use any lead products-----suppliers must confirm to this policy</p>

WASHINGTON TWP MUNICIPAL BUILDING

Site ID: WASHINGTON TWP MUNICIPAL BUILDING
42664 350 HUDSON AVE,
WASHINGTON TWP, NJ 07675

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/10/10	The Borough hosted a paper shredding day with an outside vendor. The vendor collects the paper, shreds the materials then recycles the paper. Recycling of paper is required in NJ, however, providing "shredding days" to residents is not required and increases the recycling rates by including paper documents that residents will only recycle if shredded.

WESTWOOD BORO

 MANSFIELD, NJ 08022

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/27/09	Refer to inspection report dated 6/19/08 for the details.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/27/09</p>	<p>Burlington County beneficially reuses some of the waste that it generates as well as waste from other industries, instead of landfilling the material, as follows: a) Clean wood is recovered from the waste stream prior to landfilling & then shredded and utilized as a carbon source and bulking agent for the onsite biosolids composting facility. b) Crushed glass from recyclers is used as draining layer in the leachate collection system as new cells are constructed in the active SLF. c) Paper mill fiber with low clay content is utilized as biosolids bulking agent and carbon source. Also used to help stabilize SLF slopes. d) Ductile pipe foundry slag used on the SLF haul roads. e) NJDOT & NJTPA street sweepings used for SLF daily cover. f) Recovered drywall used as agricultural gypsum. g) Freon recovery program accumulates material to be sold for reuse. h) scrap metals recycling program is ongoing. i) Carpet recovered from incoming waste is recycled.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstrable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/27/09</p>	<p>Refer to inspection report dated 6/19/08 for the details.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>5/27/09</p>	<p>Refer to inspection report dated 6/19/08 for the original details. In addition, BC voluntarily prohibits household & conditionally exempt small quantity generators (CESQG) of hazardous waste (HW) from landfill disposal, establishing a separate hazardous waste program to manage this waste stream. This ongoing initiative allows responsible CESQG HW disposal even from these type of generators outside of the County. In addition, as part of this same program, the County has a satellite household HW collection program with most of the municipalities.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/27/09</p>	<p>Refer to inspection report dated 6/19/08 for the details.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>5/27/09</p>	<p>Refer to inspection report dated 6/19/08 for the details.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/19/08</p>	<p>a) Watering roads for dust control at solid waste facilities can consume substantial quantities of potable water. The County institutes a program to utilize storm water for that purpose in order to reduce ground water consumption. b) Wastewaters collected on site are recirculated in the County's bioreactor landfill to increase waste moisture content, enhance and accelerate anaerobic digestion of organic waste in the landfill, increase biogas production and increase useable landfill airspace through rapid settlement. c) Wastewater from fish farming aquaculture in the greenhouse is recycled and utilized for hydroponic production of tomatoes.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/19/08</p>	<p>Two buildings qualify under this category. The first is the Research and Demonstration Greenhouse which utilizes renewable landfill biogas in microturbines to co-generate electricity for lighting and hot water for heating. A supplemental boiler for heating also operates on biogas. The second building is the Rutgers EcoComplex, located on leased County property immediately adjacent to the Resource Recovery Complex. It encompasses a passive solar design and utilizes landfill biogas for heating. It should also be noted that the County owns and operates a 7.2 megawatt landfill gas-to-energy facility which supplies renewable electricity to all buildings and process operations within the Resource Recovery Complex.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/19/08</p>	<p>entered into two cooperative agreements with Rutgers University to allow for research, demonstration and incubation of new emerging environmental technologies related to environmental sustainability, as well as, education and extension services; one for the Research and Demonstration Greenhouse and one for the Rutgers EcoComplex. Work performed at both facilities has had broad statewide impacts in advancing innovative, sustainable, environmental technologies and policies. 7.2 megawatt (MW) landfill gas-to-energy facility at BCRRC provides all onsite electrical power needs (approximately 1 MW). The surplus (6.2MW) of electricity is sold to the grid as Class I Renewable Energy. In addition, the greenhouse utilizes landfill gas for heat and electricity and the Rutgers EcoComplex utilizes landfill gas for heating.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/19/08</p>	<p>The Division's recycling program provides outreach education and startup assistance to schools and multifamily dwelling complexes, commercial businesses and institutions to attain compliance with local and state law. Outreach is provided to homeowners through regularly scheduled workshops for backyard composting of food and yard waste. Outreach to the general public and the business communities regarding waste reduction, reuse and recycling is provided through direct mailing of newsletters and recycling calendar/brochures for the County Regional Recycling Collection Program. School tours of the Resource Recovery Complex are very popular during the spring and serve an important outreach function.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>6/19/08</p>	<p>The Burlington County Division of Solid Waste Management provides mentoring services to local, county and state agencies within the United States, international organizations and the private sector, in a number of areas, including bioreactor landfill technology, production of biomethane transportation fuel, composting of biosolids, recycling of traditional (wood, brush, tires, scrap metal, etc.) and non-traditional materials (mixed rigid plastics, carpet, consumer electronics, drywall) and the management of household and conditionally exempt small quantity generator hazardous waste.</p>

BURLINGTON TWP DPW

Site ID: BURLINGTON TWP DPW
 15512 851 OLD YORK RD,
 BURLINGTON TWP, NJ 08016

Stewardship Activities	Date Acknowledged	Comments
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/29/16</p>	<p>Burlington Twp recently performed an energy audit of all Township buildings. This included a reevaluation of all appliances and lighting fixtures in use.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/29/16</p>	<p>Burlington Township has a Green Team, that initiates Environmental education programs. It hosts a rainbarrel giveaway, tree plantings, and seedling giveaways</p>

BURLINGTON TWP SLF

16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	12/28/12	Recycling operations that go beyond state and county mandated recycling requirements include the following: The facility operates a " Recycled Books Library " where residents can drop off and pickup old books which promotes reuse. Hard cover books are normally not recyclable, therefore, the library offers an innovative way to reuse these difficult to recycle materials. The facility also established a carpet and padding recycling program, a Bulky Rigid Plastic Recycling Program, paint recycling and, recycling of treated and untreated wood, which are not required by the state or county recycling regulations.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	12/28/12	Burlington Township is certified as a Sustainable Jersey community and has established a Green Team to address environmental issues and develop environmental programs in the township.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	12/28/12	An annual town-wide Cleanup Day is held each year in April. Burlington Township also has a Community Day event each year and distributes information about the township's various environmental programs to residents.

BYRNE BROTHERS FARM

Site ID: 431917
 BYRNE BROTHERS FARM
 505 MONMOUTH RD,
 WRIGHTSTOWN, NJ 08562

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/30/14	The farm has a specially designed building to collect pesticide spillage, preventing it from being released into the environment.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/30/14	The farmer uses a drip irrigation system to conserve the total amount of water necessary to irrigate the crops.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/30/14	The business uses fluorescent T12 lighting to conserve energy.

CCL LABEL INC

Site ID: CCL LABEL INC
 17726 92 ARK RD,
 LUMBERTON, NJ 08048

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>1/13/15</p>	<p>CCL Label implemented a waste minimization plan that has drastically reduced their Hazardous Waste and Solid Waste generation rates. The plan included; saving left-over inks to be reused for another job, substituting their solvents parts washer with a non-hazardous aqueous parts washer, sending solvents out for reclamation, recovering silver from film processor with a silver recovery unit, using reusable solvent wipes instead of disposable solvent wipes, and by prohibiting the mixing of latex paints with non-latex paints or solvents. They also implemented a recycling program for their non-hazardous solid waste which included; used oil, used glycol, used batteries, spent lamps, lamp ballasts, scrap metal, cardboard, sending back spent or expired gas cylinders to the manufacturer, and by switching to CHEP pallets which can be recycled once damaged. CCL also manages their solvent based inks/paints as an HSM with over 14 tons being sent out annually as part of the HSM program.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/13/15</p>	<p>CCL Label implemented a waste minimization plan that has drastically reduced their Hazardous Waste and Solid Waste generation rates. 16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	1/21/14	Established and operates a compost operation from leaves collected, reducing fueling and disposal and providing compost to residents of Cinnaminson

COLGATE PALMOLIVE CO

Site ID: COLGATE PALMOLIVE CO
15544 400 ELBOW LN,
BURLINGTON TWP, NJ 08016

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	11/24/09	Lighting on the production floor has been converted to fluorescent bulbs. Motion activated lighting has been installed in all office, utility and cafeteria spaces.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	11/24/09	Use of green and low VOC emitting cleaning products

CONSARC CORP

Site ID: CONSARC CORP
10532 100 INDEL AVE,
WESTAMPTON TWP, NJ 08073

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/6/17	In 2009, Consarc Corp. retrofitted their lighting system throughout their offices with automatic lighting. Paperwork was provided and reviewed. Consarc Corp. hired a contractor (Groom Energy) to install the lighting system. The lighting system was purchased through Leviton Lighting Control Division and item name was Decora Wall Switch Passive Infrared Occupancy Sensor.

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/3/16</p>	<p>Introduced UV technology in treatment process. This reduced the facilities use of chemicals.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/3/16</p>	<p>They participate in Reclaimed Water for Beneficial Reuse (RWBR) program and has an approved wash down and sewer jetting practice.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/3/16</p>	<p>The site installed new energy efficient blowers to replace the antiquated inefficient system.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/3/16</p>	<p>The lighting and HVAC systems have been updated to be more efficient. Motion sensors were installed in hallways and restrooms to decrease energy consumption.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/3/16</p>	<p>The facility sponsors and participates in a local harvest festival. Personnel also speak to homeowners about their practices and environmental impact. They offer facility tours to local schools and other community groups.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>5/3/16</p>	<p>LEED Specialists designed the sites energy reduction program. The facility participates in NJ's Clean Energy Program.</p>

EVESHAM TWP MUNICIPAL BUILDING

Site ID: EVESHAM TWP MUNICIPAL BUILDING
 40579 984 TUCKERTON RD,
 MARLTON, NJ 08053

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/4/13	Sweep entire town twice a year although not required by permit, removing several cubic yards of material that would otherwise end up in the waterways
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/4/13	Developed and implemented a watershed mgnt program at local high school for high school students to participate
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/4/13	solar panels on Municipal Maintenance bldg and Parks and Recreation bldgs.

IELDSBORO BORO DPW

Site ID: FIELDSBORO BORO DPW
 57214 18 204 WASHINGTON ST,
 FIELDSBORO, NJ 08505

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/22/16</p>	<p>Fieldsboro installed a high efficiency heating system in the municipal building in 2013.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/22/16</p>	<p>Fieldsboro installed LED lighting at the veterans memorial in 2015.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>9/22/16</p>	<p>Fieldsboro constructed pervious pathways around the veterans memorial to reduce runoff.</p>

FLORENCE TWP MUNICIPAL COMPLEX

Site ID: FLORENCE TWP MUNICIPAL COMPLEX
17954 711 BROAD ST,
FLORENCE TWP, NJ 08518

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/22/13	Florence Township installed a new high efficiency heater in the DPW Building. Florence Township installed new low wattage/high efficiency light bulbs throughout the DPW Building.

GROSSMAN FARMS

Site ID: GROSSMAN FARMS
178069 120 SYKESVILLE RD,
NORTH HANOVER TWP, NJ 08562

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/20/17	To reduce hazardous material, the farmer recycles pesticide empty containers, cuts grass and weeds mechanically, has an integrated pest management (IPM) program and uses green cleaning products. Cover crops are used to protect the soil and reduce fertilizer.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/20/17	The farmer has 3 acres in drip irrigation system to conserve water.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/20/17	To save energy, the business uses fluorescent lighting (T8) and LED lighting.

GROWMARK FS CORP

Site ID: GROWMARK FS CORP
 414980 2545 RT 206 ,
 EASTAMPTON TWP, NJ 08060

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/21/13</p>	<p>Delivers product (pesticides and fertilizers) in refillable bulk containers to agricultural producers requesting bulk delivery to eliminate packaging requiring disposal and/or recycling.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/21/13</p>	<p>1. Replacement vehicles are smaller and use flex fuel. 2. Product delivery schedules are adjusted to accommodate delivery to multiple customers in fewer trips.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/21/13</p>	<p>1. Design of recently constructed warehouse incorporated clear polycarbonate windows at top of exterior walls reducing need for interior lighting. 2. Installed LED lighting fixtures and lamps in new building.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/21/13</p>	<p>Supports with donations of cash and gifts-in-kind the Cedar Run Wildlife Refuge, North Burlington County FFA, and other organizations with vested interest in the environment.</p>

HOMESTEAD NURSERY

Site ID: HOMESTEAD NURSERY
 200235 302 N PEMBERTON RD,
 PEMBERTON, NJ 08068

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/19/15</p>	<p>Mr McLaughlin detailed his efforts to reduce chemical (pesticide) input, reducing personal and environmental risk, through an Integrated Pest Management program. This includes nursery scouting, hand and mechanical weeding, ornamental crop rotation to reduce disease stress, and hiring one worker for hand control of weeds in container stock -- all as alternatives to chemical (pesticide) input. Furthermore, Mr McLaughlin has taken significant steps to prevent hazardous material spillage from his pesticide storage area, which is also where he loads/mixes material. The area contains porous concrete flooring, which leads to a containment area below the mixing area's floor. This area is reinforced concrete and steel bar (see attachment photos). In the event of a pesticide spill, this containment will catch any chemicals and prevent them from percolating into the soil.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/19/15</p>	<p>Mr McLaughlin uses only natural lighting in his pesticide loading and mixing area. One greenhouse on site now uses only solar heat, as opposed to burning fossil fuel for heat.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/19/15</p>	<p>Mr McLaughlin participates in the voluntary Helena Chemicals container recycling program, and last participated in 2014. This program collects all empty, used pesticide containers for recycling. It involves active participation on the farmers' part for storage and collection. This containers cannot be recycled through the municipality. Without participation in this program, these containers would be disposed of in landfill.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/19/15</p>	<p>Mr McLaughlin uses only natural lighting in his pesticide loading and mixing area. One greenhouse on site now uses only solar heat, as opposed to burning fossil fuel for heat.</p>

INDIAN MILLS NURSERY INC

128772 1130 OLD INDIAN MILLS RD,
TABERNACLE TWP, NJ 08088

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/31/14	The farmer uses mechanic and manual control to kill weeds. Most of the time herbicides are not used in this farm.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/31/14	The farmer has 6 acres with drip irrigation system to save water. The farmer uses mechanic and manual control to kill weeds. Most of the time herbicides are not used in this farm.

INTERSTATE STORAGE & PIPELINE CORP

Site ID: INTERSTATE STORAGE & PIPELINE CORP
17995 1715 BURLINGTON JACKSONVILLE RD,
JACKSONVILLE, NJ 08505

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/13/08	ISPC installed a fire hydrant hook up and pump to their drainage lagoons which are primarily used to hold stormwater runoff. This water has been made available to any fire department in the nearby area that has needed it to fill their trucks.

IRONSTONE FARMS

Site ID: IRONSTONE FARMS

16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/15/13	Recycle pesticide containers

JOHNSONS LOCUST HALL FARM

Site ID: JOHNSONS LOCUST HALL FARM
 624155 2691 MONMOUTH RD,
 JOBSTOWN, NJ 08041

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	11/19/18	To reduce hazardous materials, the business cuts grass and weeds mechanically, use stones to cover driveways. IPM is also used. The farmer monitors the fields for pests.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	11/19/18	The business has 10 acres in drip irrigation.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/19/18	The business has paperless communication with customers.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	11/19/18	The business has high efficiency LED lighting.

KATONA FARMS INC

Site ID: KATONA FARMS INC

CHESTERFIELD, NJ 08515

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/4/15	The farmer uses Integrated Pest Management (IPM) practices to reduce pesticide used in the field. Weeds are mechanically cut to reduce the herbicide applied.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/4/15	The farmer has 15 acres in drip irrigation system to save water.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/14/13	Farming operations utilize drip Irrigation to reduce water usage.

LANXESS SYBRON CHEMICALS INC

Site ID: LANXESS SYBRON CHEMICALS INC
14685 200 BIRMINGHAM RD,
BIRMINGHAM, NJ 08011

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/17/18	Lanxess Sybron Chemicals Inc. recently had their sales build upgraded with automated on/ off lighting. As part of this upgrade, they updated the lighting to a higher efficiency fluorescent lighting system.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/17/18</p>	<p>Lanxess Sybron Chemicals Inc. has an HSEQ Policy (Health, Safety, Environmental, Quality).</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/17/18</p>	<p>Lanxess Sybron Chemicals Inc. has an HSEQ Policy (Health, Safety, Environmental, Quality).</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>7/17/18</p>	<p>Lanxess Sybron Chemicals Inc. is part of a global organization which has various reports posted to their website relating to their direct environmental impact. Refer to their website to review the annual report.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>7/17/18</p>	<p>Lanxess Sybron Chemicals Inc. is part of a global organization which has various reports posted to their website relating to their direct environmental impact, specifically there is a report which directly covers their CO2 footprint. Refer to their website to review the annual report.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>7/17/18</p>	<p>Lanxess Sybron Chemicals Inc. has a "Supplier Code of Conduct" Policy for suppliers and service providers.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/14/08</p>	<p>Production water is reused.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/14/08</p>	<p>Motors and compressors are now equipped with variable frequency drivers in order to save electricity. Boiler controls upgraded to improved combustion efficiency.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/14/08</p>	<p>Carbon drum regeneration and spent sulfuric acid now used by other facilities as a useable product.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/14/08</p>	<p>LanXess Sybron sold 500 acres to the Township as to be preserved as Green Acres Space.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/16/18</p>	<p>Uses pulse treatment for cooling tower which uses less water. Installed low flow aerators and hands free sensors on faucets.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/16/18</p>	<p>The environmental policy can be found online.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/16/18</p>	<p>Lockheed Martin has a certificate of registration from NQA Global Assurance certifying that the EMS has been assessed. The certificate, with designation ISO 14001, is valid until 2019.</p>

17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	2/16/18	Carpooling program in place.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/16/18	205 mW solar installed
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/25/12	Facility is replacing faucets on sinks hands free/sensor units to ensure that faucets are not left running when not in use.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	10/25/12	There is a written environmental policy which is posted throughout the facility & shared with service contractors. The policy can be viewed at www.lockheedmartin.com/ms2/EnvironmentSafetyHealth.html
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	10/25/12	Lockheed Martin has a certificate of registration from NQA Global Assurance certifying that the Environmental Management System (EMS) has been assessed & approved. The certificate with designation ISO 14001: 2004, is valid until 3/30/2012. There is a 2011 ESH Audit Schedule for various aspects & inspections. An ESH Assessment Checklist is completed for the inspections. 15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/16/16	They have a reuse program for the sewage treatment plant to use the grey water from the sewage effluent in their sprinkler system for the ball fields and on the Country Club greens
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/16/16	They have solar panels on the Municipal building that they sell credits back for. They switched to LED lighting in the municipal building and the police building. They installed a high efficiency hvac system and high efficiency boilers in the municipal building
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/16/16	They have a Forestry management plan for the entire town
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/16/16	They send out letters to residents encouraging them to go green and give suggestions like cutting and leaving grass clippings, they try to encourage businesses to do the same, and they are implementing a food waste recycling program for residents as well

MEDFORD NURSERY

Site ID: MEDFORD NURSERY
128503 560 EAYRESTOWN RD,
LUMBERTON TWP, NJ 08048

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/31/14	The nursery implements integrated pest management (IPM) practices, visually monitoring pests to decide if thresholds are met and a pesticide application is required. This is to reduce to overall pesticides applied. Weeds are controlled manually, through mechanical cutting or hand pulling, to reduce herbicide applications.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/31/14	The business uses energy efficient fluorescent lighting.

Clean School Bus USA.	3/17/10	See entry dated 3/7/08 for details.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/17/10	See entry dated 3/7/08 for details.

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/17/10</p>	<p>See entry dated 3/7/08 for details.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/17/10</p>	<p>See entry dated 3/7/08 for details.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>3/17/10</p>	<p>See entry dated 3/7/08 for details.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/17/10</p>	<p>See entry dated 3/7/08 for details.</p>
<p>Clean School Bus USA.</p>	<p>3/7/08</p>	<p>school buses have been retrofitted to use biodiesel</p>
<p>ENERGY STAR Product Certification</p>	<p>3/7/08</p>	<p>all motors purchased are Energy Star certified</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/7/08</p>	<p>Municipal Utilities has a beneficial reuse program for treated wastewater</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/7/08</p>	<p>Twp. recently purchased 150 acres to be preserved as open space through Green Acres program</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/7/08</p>	<p>Twp. is involved in stream cleanups and building of canoe launches along Rancocas Creek in partnership with Burlington County</p>

<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>3/7/08</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/7/08</p>	<p>the Twp. has ordinances in place prescribing the purchase of recycled products whenever possible; this is included as part of all bid specs</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/26/13</p>	<p>Maintenance has switched to environmentally friendly parts cleaners, chemicals and lubricants</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/26/13</p>	<p>Shower heads have been converted to low flow</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/26/13</p>	<p>At Rancocas STP 1. Installation of VFD and premium efficiency motors wherever possible 2. Because of Rancocas STP upgrades, elimination of Plant #1 (oldest) and related components reduced overall energy consumption 3. Replaced inefficient and energy consuming tertiary sand filters with energy efficient rotating disc filters 4. Eliminated the use of powered activated carbon in the treatment process which eliminated the delivery of virgin carbon and idling of the commercial vehicle during the extended offloading process 5. Installed non-required Bio-Air unit at headwork's which eliminated the need to run 6-13,000 rpm high velocity ventilation fans 24 hrs./day - 365 days per year</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/26/13</p>	<p>1. Equipped Sewer collection trucks with fuel transfer tanks to allow for refilling emergency generators during weekly maintenance. Eliminates the need for refueling of emergency generators by a large commercial refilling vehicle used by an outside vendor. Both gasoline, diesel fuels and emissions will be reduced 2. Collection System Operators using "Smart Routing" to drive to pump stations in order to reduce travel time, fuel consumption and vehicle emissions.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/26/13</p>	<p>At Maple Ave STP 1. Installed motion sensor lighting 2. Replace metal halide/high pressure sodium light fixtures with LED or fluorescent fixtures</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/26/13</p>	<p>On June 1, 2011 Mt. Holly SA presented a "Training" session and plant tour for NJDEP enforcement covering a wide variety of topics including operations, compliance, reporting, training and data management. On January 26, 2012 Mt. Holly SA gave a presentation to the Mt. Holly Middle School's after school program. The presentation is an overview of wastewater treatment technologies and how the activities of students and families affect our environment with an emphasis on surface and drinking water</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/26/13</p>	<p>Environmental Policy is in place and updated July 22, 2013</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/26/13</p>	<p>Mt. Holly SA has implemented a system to effectively monitor and control operations to minimize chemical usage</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>7/26/13</p>	<p>On-site MTMUA Lab personnel have moved to 4-10 hour shifts. Also car pooling is used to attend all seminars and training. Attend Webinars whenever possible, rather than travel to distant seminars.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>7/26/13</p>	<p>Maple Avenue WTP (sub station to Mount Holly Mun. Utilities Authority), is operating a 4,862 panel ground-mounted solar photovoltaic module energy system capable of generating 1239 kW DC or 1058 AC electric.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/28/12</p>	<p>Maintenance has switched to environmental friendly parts cleaners, chemicals and lubricants</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/28/12</p>	<p>Shower heads have been converted to low-flow</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/28/12</p>	<p>At Rancocas STP 1. Installation of VFD and premium efficiency motors wherever possible. 2. Because of Rancocas STP upgrades, elimination of Plant #1 (oldest) and related components reduced overall energy consumption 3. Replaced inefficient and energy consuming tertiary sand filters with energy efficient rotating disc filters 4. Eliminated the use of powdered activated carbon in the treatment process which eliminated the delivery of virgin carbon and idling of the commercial vehicle during the extended offloading process 5. Installed non-required BioAir unit at headworks which eliminated the need to run 6-13,000 rpm high velocity ventilation fans 24 hrs/day - 365 days per year</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/28/12</p>	<p>1. Equipped Sewer Collection trucks with fuel transfer tanks to allow for refilling emergency generators during weekly maintenance. Eliminates the need for refueling of emergency generators by a large commercial refilling vehicle used by an outside vendor. Both gasoline, diesel fuel and emissions will be reduced 2. Collection System Operators using "Smart Routing" to pump stations to reduce travel time, fuel consumption and vehicle emissions</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/28/12</p>	<p>At Maple Ave STP 1. Installed "auto on/off" lighting sensors in infrequently occupied buildings where lights would typically be on all day. 2 Replacing metal halide / high pressure sodium light fixtures with LED or fluorescent fixtures</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/28/12</p>	<p>On June 1, 2011, Mt Holly MUA personnel presented a "training" session and plant tour for NJDEP enforcement covering a wide variety of topics including operations, compliance, reporting, training and data management at Mt. Holly MUA. On January 26, 2012 Mt. Holly MUA gave a presentation to the Mt. Holly Middle School's after school program. The presentation is an overview of wastewater treatment technologies and how the activities of students/families affect our environment, with an emphasis on surface and drinking water.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/28/12</p>	<p>The facility has implemented a system to more effectively monitor and control operations to minimize chemical usage</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/28/12</p>	<p>On-site MTMUA Lab personnel have moved to 4-10 hours shifts. Also car pooling is used to attend all seminars and training. Attend "Web-i-nars" whenever possible, rather than travel to distant seminars</p>

MOUNT LAUREL TWP MUA CHURCH STREET BOOSTER STATION

Site ID: MOUNT LAUREL TWP MUA CHURCH STREET BOOSTER STATION
 10716 1201 S CHURCH ST,
 MOUNT LAUREL TWP, NJ 08054

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/6/13	Downsized pump sizes and switched to variable speed drive pumps
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	3/6/13	Conducts Environmental Education classes at local schools and provides tours to the schools.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/6/13	Solar panels still in place at Ramblewood location
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	11/30/11	All overboard water is now directed to new water treatment system rather than discharged offsite like most PWs
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	11/30/11	Site has installed solar panels at Ramblewood well location that provide for alt energy source

------------------------	-------------------	----------

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/26/13</p>	<p>Implements wastewater reuse for vehicle washing, spray composting and plant washdowns</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/26/13</p>	<p>always changing /improving energy use via improvements with lighting fixtures for example</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/26/13</p>	<p>continues to offer tours /ed to schools</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/26/13</p>	<p>Solar panels installed at Ramblewood Pump Station providing power for the pump station</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/29/08</p>	<p>purchases only non mercury thermometers for lab. Old thermometers are being recycled at Haz waste disposal site</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/29/08</p>	<p>Use reclaimed water for vehicle wash</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/29/08</p>	<p>VFD units at pump stations to reduce electrical consumption</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/29/08</p>	<p>Participates with local schools to install "Do not dump drains to waterways" emblems on storm water inlets. Also conducts tours/ workshops for local schools, boys and girl scouts , as well as gifted and talented students, creek bank restoration projects</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/29/08</p>	<p>Purchase recycled paper, soy based hand cleaners, and other environmentally friendly products</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/7/16</p>	<p>Mt. Laurel upgraded its lighting system in the Municipal Center to have high efficiency lighting with low wattage light bulbs and motion sensors, as well as installed 3 new high efficiency hvac units.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/22/13</p>	<p>Mt. Laurel has upgraded its lighting system in the Municipal Center with high efficiency/low wattage light bulbs and motion sensors; and 3 new high efficiency hv/ac units were installed at the Municipal Center.</p>

NATIONAL AUTO DEALERS EXCHANGE

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/28/17</p>	<p>NADE continues their extensive recycling program by documenting all recycled materials including asphalt millings, light bulbs, kitchen grease waste & metals in addition to newspapers and can goods that are commonly recycled.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/28/17</p>	<p>NADE continues to use Solar Panels that provide electricity for four (4) buildings.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/13/16</p>	<p>NADE continues their extensive recycling program, documenting all recycled materials including asphalt millings, light bulbs, kitchen grease & metals in addition to materials required to be recycled.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/13/16</p>	<p>NADE has installed Solar Panels that generate renewable energy and provides electric for four (4) buildings.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/13/15</p>	<p>NADE continues their extensive recycling program, documenting all recycled materials including asphalt millings, light bulbs, kitchen grease & metals in addition to materials required to be recycled.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/6/13</p>	<p>All recycling is documented . Extensive recycling program, including items not mandated to be recycled under any ordinances including: asphalt millings, all light bulbs, kitchen grease, metals, in addition to required recycling of paper, cardboard, and glass.</p>

NJ AMERICAN WATER CO

Site ID: NJ AMERICAN WATER CO
 38198 RT 68 & LINCOLN DR,
 MANSFIELD, NJ 08022

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/2/16	Continued use of variable frequency drives on blowers, conserving energy.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	6/2/16	Continued operation under written environmental policy.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/2/16	Solar lights previously installed on exterior of plant are still in use as confirmed by operator.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/6/13	8 solar lights recently installed on exterior of treatment plant, Variable frequency drives installed on blower motors to conserve energy, larger filter membranes were installed that take less energy for wastewater to pass through.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	6/6/13	confirmed written documentation onsite: Environmental Management Plan, including plans for operation in a more environmental friendly manner.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	6/6/13	confirmed written documentation onsite: Environmental Management Plan, including plans for operation in a more environmental friendly manner.

NJ AMERICAN WATER DELAWARE RIVER REGIONAL WTP

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	11/14/18	A 2017 - 2018 project removed chlorine gas from the plant and replaced it with an onsite sodium hypochlorite generation system.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	11/14/18	In 2018, all of the light fixtures for the administrative office area were upgraded to high efficiency LED lights.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	11/14/18	NJAW has an Environmental Grant Program which is available online.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	11/14/18	There is a description of AW / NJAW's policy for compliance with Federal and State regulations is available online. The page also describes the AW Environmental Management Plan System and internal audit program. There is a specific Environmental Management Plan for NJAW's South Service Area (Burlington, Camden, Gloucester and Salem Counties).
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	11/14/18	NJAW utilizes an Environmental Management System (EMS) which is reviewed on a quarterly basis to evaluate environmental performance.
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	11/14/18	There is an annual Environmental Report posted on the NJAW website.

23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	11/14/18	NJAW participates in Partnership for Safe Water. NJAW Delaware River Regional Water Treatment Plant is a 15-Year Director's Award Winner (Treatment Program Phase III). Further information can be found on the American Water Works Association website
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	11/14/18	A 1,000 kWdc Solar Project was installed in 2012.
Partnership for Safe Water.	5/2/08	NJAW Delaware River Plant is currently a Phase III Director's Awardee and is a current Five-Year Director's Award winner. Further information on this voluntary program & on NJAW Delaware River Plant's participation in this program can be found at the American Water Works Association website at the following address: http://www.awwa.org/Resources/utilitymanage.cfm?ItemNumber=616&navItemNumber=29265
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	5/2/08	Partnership for Safe Water. An annual report is submitted to EPA via computer files for raw and finished water turbidity on a "Partnership" software as well as a brief narrative of how the treatment benchmarks were achieved without major capitol expenditures.

NJDOC YARVILLE YOUTH CORRECTIONAL FACILITY

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/21/17	Farm practices for hazardous materials reduction is in the form of utilizing rice hulls and weed mats for weed prevention. These practices greatly reduce the amount of herbicide used on the farm yearly.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/21/17	Drip irrigation is used on several acres of the farm.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/21/17	LED lighting is used on site.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	12/21/17	Solar panels are used for clean power and are attached to the main office building.

PRODUCTIVE PLASTICS INC

Site ID: PRODUCTIVE PLASTICS INC
480318 103 W PARK DR,
MOUNT LAUREL, NJ 08054

Stewardship Activities	Date Acknowledged	Comments
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	10/13/17	Productive Plastics Inc. has an Environmental Management System in place at the facility.

Natural Gas STAR Program.	2/26/13	EPA Natural Gas STAR Program - Distribution Sector http://www.epa.gov/gasstar/partners/index.html
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/26/13	Generating less hazardous waste - By 2007, annual hazardous waste production from PSEG's New Jersey facilities dropped to less than 25 tons per year, from 1,460 tons per year in 1992. This dramatic improvement is the result of prudent management and segregation of hazardous materials, finding uses for surplus materials, removing hazardous components before disposal and through product substitution. http://pseg.com/info/environment/ps_recycle.jsp
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	2/26/13	http://pseg.com/info/environment/ps_recycle.jsp
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	2/26/13	http://pseg.com/info/environment/ps_greening.jsp

3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	2/26/13	http://pseg.com/info/environment/health.jsp
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	2/26/13	http://pseg.com/info/environment/sustainability/2009/green/enviromgmt.jsp
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	2/26/13	http://pseg.com/info/environment/sustainability/2012/sustainability_report/HTML/index.html
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	2/26/13	
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	2/26/13	Employee Trip Reduction is detailed in the document entitled Flexible Work Options, Enterprise Practices - Human Resources 770-14 dated 1/17/12.

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/16/18	Automatic on/off water faucets located in the restrooms.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/16/18	There is a total of 85 hybrid vehicles and 2 electric charging stations.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/16/18	Automatic lighting located in the conference rooms.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/16/18	There are a total of 4,563 solar panels in-service.

21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	6/16/17	4 acres of site have been converted to "naturalized" area
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	6/16/17	class trips to golf course to emphasize commitment to the environment
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/22/15	Audubon International certification of achievement issued April 2012 for Chemical Use Reduction & Safety on 20 acres of the club.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/22/15	Audubon International certification of achievement issued Sept 2011 for water conservation. Less water is used for irrigation under this program. Received additional certification for water quality management in August 2012
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	6/22/15	Certified Audubon Sanctuary through Audubon International.

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/22/15</p>	<p>Audubon International certification of achievement issued August 2012 for Environmental Planning, Wildlife & Habitat Management.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/22/15</p>	<p>Certified Audubon Sanctuary through Audubon International. One of the components under this program is a certification of achievement issued Sept 2012 for outreach and education.</p>

21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	6/13/16	Certain areas of the campus go unused by students and are allowed to revegetate with natural native vegetation some areas are planted with wildflowers to increase natural bird habitat, this also discourages geese habitation.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	10/7/08	The campus has 10 acres that they have turned into natural areas where they plant wildflowers and do not mow.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	10/7/08	They have instilled natural methods to scare and discourage Canadian geese from nesting on campus. This has cut down on their numbers significantly.

RUSSOS FRUIT & VEGETABLE FARM CORP

Site ID: RUSSOS FRUIT & VEGETABLE FARM CORP
 62011 186 CARRANZA RD,
 TABERNACLE, NJ 08088

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/12/17	To reduce hazardous materials, the farmer cuts grass and weeds mechanically and rotate the crops in the field. The pesticide empty containers are recycled with Helena Recycling Company.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/12/17	The farmer uses high efficiency lighting to save energy.

SAFETY KLEEN SYSTEMS INC 2-139-04

 SOUTHAMPTON TWP, NJ 08088

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/21/15	Since 2009, Safety-Kleen has eliminated their lower flash solvent, which carried hazardous waste codes D001, D018 and D039. Safety-Kleen now only offers one solvent, Premium 150, which is considered non-hazardous. Safety-Kleen also offers a wide array of aqueous solvents that are considered non-hazardous.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	12/21/15	EMS is included in their ISO 14001 Certification. EMS is reviewed annually and updated as necessary. Safety-Kleen provided a copy of the last ISO conformity document, which includes the Southampton facility. Document is dated January 1, 2014.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	3/10/08	
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	3/10/08	ISO 14001

SELLE FARM

16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/12/14	Shoprite Store #523 started a program with Organic Diversions LLC (5 Greentree Center, Route 73, Suite 104 in Marlton, NJ) in which all expired produce is collected and sent to be used as fertilizer and/or made into animal feed. Around that same time, they also started donating day old bakery items to homeless food shelters. These two programs have drastically decreased the amount of solid waste sent for landfill disposal. Solid waste pick-ups previously occurred every other day; they have been reduced to 1 to 2 pick-ups per month. They also have a contact with MOPAC (741 Souder Road Elroy, PA) for animal by-products and fat rendering. These pick-ups occur twice per week.

19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/6/16	Company has been moving towards smaller, more energy efficient vehicles. Purchased Prius to replace larger vehicle.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	4/6/16	Installed solar panels at the facility.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	6/1/09	The facility completed the installation of solar panels on building 3351
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	6/1/09	On National Public Lands Day 9/27/08, 75 Volunteers removed invasive plants and replaced them with native species. The volunteers also mounted bird nesting boxes and conducted a trash clean up and erosion control projects.
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	6/1/09	Earth Day event April 25, 2009 was a 650 guest environmental education initiative. There were several educational activities aimed at children of all ages, including arts and craft pertaining to trees and Earth Day. Interpretive hikes were given by naturalists to educate the public about the Pine Barrens, interaction with live animals and a educational puppet show. Fort Dix's Natural Resources Office celebrated Environmental Education Week (April 20-24, 2009) by hosting the Fort Dix Elementary School and two Girl Scout Groups with lessons on tree planting, plant identification, leaving no impact on environmental programs along with ecological hikes. The Office also hosted a Girl Scout group on April 7, 2009 with a lesson on Reptilian adaptation.
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	6/1/09	The facility operates under an Environmental Policy statement dated Jun 19, 2008 and signed by the Base Commander
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	6/1/09	The facility is operating under the ISO 14001 EMS Audit Protocol dated May 29, 2008.

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/31/11	Ft. Dix has an irrigation pond they fill with sewage treatment effluent which is used to irrigate the Fountain Green Golf Course located on base. They have calculated an annual savings of 23 million gallons of potable water.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/31/11	The Helicopter Hanger and Marine Aircraft Group HQ, the Marine Reserve Center and the Navy FRC facilities all recieved LEED Silver ratings for the design on these buildings which included : low flow toilets and motion sensor operated sinks, compact flourescent lighting, occupancy sensors, urea -formaldehyde free building materials, low VOC paints and coatings, all building materials used were manufactured regionally and had a 10% post consumer recycled contant, 75% of construction materials were diverted from landfills and recycled onsite, in floor radiant heating, high efficiency chillers, shading on windows and condensing boilers, high albedo paving and shading to reduce heat island effect.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	10/31/11	Ft. Dix has an area wide environmental policy that addresses their environmental management system.

<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>10/31/11</p>	<p>Ft. Dix has utilized a flex work schedule consisting of four 10 hr work days, which eliminates 8 commutes per participating employee, per month.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>10/31/11</p>	<p>The Helicopter Hanger and Marine Aircraft Group HQ, the Marine Reserve Center and the Navy FRC facilities all recieved LEED Silver ratings.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/31/11</p>	<p>Ft. Dix has installed solar panels on the roof of the 99th National Guard HQ building and on the field adjacent to the Controlled Humidity Storage Facility.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/10/09</p>	<p>There is also an immense truck wash reclaim/reuse system onsite that incorporates 2 lined lagoons with large filter units and several large power wash stations that can handle tanks. This facility is also equipped with a mechanism that vigorously moves the trucks in an up and down motion to shake off any mud caked on the tires which cuts down on water use.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/10/09</p>	<p>Ntl Guard building onsite has 1800 sq ft of solar panels on its building</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/10/09</p>	<p>On National Public Lands Day Sept 29, 2007. Ft Dix rounded up over 145 volunteers and removed over 520 invasive plants and replaced them with 220 native plant species. The volunteers also built a foot bridge, mounted bird nesting boxes, installed split rail fencing around a lake with educational signage, and initiated a trash clean up effort that recovered 7,100 lbs of trash and debris.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/10/09</p>	<p>Earth Day event (April 19) last year was a 500 guest large environmental education initiative. There were several educational activities aimed at children of all ages, including arts and crafts pertaining to trees and Earth Day, interpretive hikes given by naturalists to educate the public about the Pine Barrens, interactions with live animals, an educational puppet show, and a prescribed burn. In addition to Earth Day, Fort Dix's Natural Resources Office celebrated Environmental Education Week (April 14-19), by visiting Fort Dix Elementary School and gave lessons for grades K-3, which included Earth Day activities (becoming a living tree factory, planting seedlings, and play games about tree life cycles) etc.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>2/10/09</p>	<p>Soldiers are bused back and forth to shooting ranges to cut down on vehicle use.</p>

Site ID: USDOD NAVY AEGIS TECH AREA
 14113 300 CENTERTON RD,
 MOORESTOWN, NJ 080574234

Stewardship Activities	Date Acknowledged	Comments
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/21/13</p>	<p>20 HP VFD's were installed on three cooling tower fans in May, 2012 and 100 HP VFD's were installed on three cooling tower pumps in April, 2013.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/21/13</p>	<p>Ongoing replacement of T12 tubes with T8 tubes, as needed</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/21/13</p>	<p>DoD Environmental Policy 4. POLICY. Pursuant to References (b), (c), and (d), it is DoD policy that: a. The Department of Defense shall integrate EMS into missions, activities, functions, contracts, and installation support agreements as a business practice for improving overall performance. b. EMS is a vital supporting component of the DoD mission and is therefore the responsibility of all DoD personnel. It is not just an environmental function responsibility, but requires active participation from all functions and organizations. c. The DoD Components are encouraged to integrate safety and occupational health management systems into their EMS. d. The DoD Compliance Management Plan (CMP) established in ADUSD(ESOH) Memorandum (Reference (h)) and associated OSD-level policy and oversight activities shall function in lieu of an overall DoD organizational EMS. When an EMS exists at the appropriate facility and/or organizational level, the elements of the CMP shall be part of the EMS and a separate CMP is not required. e. EMS shall be used to enhance the operational mission of DoD Components. EMS shall be used to manage the environmental aspects of DoD operations, the impacts of environmental conditions, and constraints on the mission. This requires inclusion in the EMS of the activities and environmental impacts of tenants, vendors, and suppliers, as appropriate, in accordance with each DoD Component's determination pursuant to paragraph 2.a. of Enclosure 2.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/21/13</p>	<p>http://www.dtic.mil/whs/directives/corres/pdf/471517p.pdf</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/21/13</p>	<p>http://www.fedcenter.gov/_kd/Items/actions.cfm?action=Show&item_id=12371&destination=ShowItem</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/4/12</p>	<p>Installed VFDs on cooling tower fans</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/4/12</p>	<p>Ongoing replacement of T12 tubes with T8 tubes, as needed</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/4/12</p>	<p>http://www.dtic.mil/whs/directives/corres/pdf/471517p.pdf</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/4/12</p>	<p>http://www.fedcenter.gov/_kd/Items/actions.cfm?action=Show&item_id=12371&destination=ShowItem</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. 14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/15/17	To reduce hazardous materials, the farmer recycles pesticide empty containers, cuts grass and weeds mechanically and has and integrated pest management (IPM) program.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/15/17	To conserve water, all 12 acres of grapes utilize a drip irrigation system.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/15/17	To save energy, the business uses solar panels, energy efficient fluorescent lighting (T8) and LED lighting and high efficiency energy appliances.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/17/14</p>	<p>All 12 acres of grapes utilize a drip irrigation system. This reduces the total amount of water necessary to sufficiently irrigate the crop.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/17/14</p>	<p>The farmer recycles pesticide empty containers, reducing waste.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/17/14</p>	<p>The business also uses energy efficient, fluorescent lighting (T8) and LED lighting. The appliances used are high efficiency energy, further conserving energy.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/17/14</p>	<p>The business uses solar panels.</p>

Less water use</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/27/13</p>	<p>Upgrading older stormwater inlets with new standards stormwater inlets even though not required by permit</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/27/13</p>	<p>Special environmental education booklets which are handed out at special, community events including events with girl/boy scouts and in school classrooms.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>11/27/13</p>	<p>Formal policy with custodial contract for green product purchasing</p>

WILLINGBORO TWP MUA @ WILLINGBORO IND PK

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/1/18	Use of methane from sludge digester as fuel to generate heat to heat the digester.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/1/18	Use of microturbine to convert digester methane to electricity. Use of 750 kW solar panel system.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/25/16	Use of methane from sludge digester as fuel to generate heat to heat the digester.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/25/16	Continuing replacement of fluorescent light tubes with LEDs.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	4/25/16	Continued use of microturbine to convert digester methane to electricity and continued use of 750kW solar panel system.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	2/3/15	MUA has been staging various metals to be recycled at the STP, waiting until enough material has accumulated before waste is hauled away. Various metal pieces, including ductile iron from broken equipment, i.e.: hydrants, from all sections of the MUA have been accumulating.

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/3/15</p>	<p>Beginning on 11/23/10 at the WMUA STP, a 780 kW photovoltaic system went on-line, providing power to the STP. Starting on 11/19/10 at the WMUA Meribrook potable plant, a 280 kW photovoltaic system went on-line, providing power to the potable plant. A 65 kW microturbine system went on-line in April 2011 at the STP. (Due to ongoing digester system repairs, the microturbine system has been off-line since July 2014)</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/7/13</p>	<p>MUA has been staging metals to be recycled for a few years, with the last recycling event in June 2012. Various metal pieces, including ductile iron from broken equipment, ie: hydrants, from all sections of the MUA were recycled in 2012.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/7/13</p>	<p>Beginning on 11/23/10 at the WMUA STP, the new 780 kW photovoltaic system went on-line, providing power to the STP. Starting on 11/19/10 at the WMUA Meribrook potable plant, the new 280 kW photovoltaic system went on-line, providing power to the potable plant. Beginning in April 2011 at the STP, the new 65 kW microturbine system went on-line.</p>

YUNOS FARM

Site ID: YUNOS FARM
 195776 924 JACKSONVILLE RD,
 BORDENTOWN, NJ 08505

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/19/14	The farmer uses integrated pest management without pesticides use. The pests are removed by hand, with leaf blowers, netting, temperature control, crop rotation and beneficial insects.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/19/14	The business uses a drip irrigation system.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/19/14	In 3 hydroponic greenhouses, the farmer has tomatoes, pepper and cucumber.

151 FOODS

 543901 151 BENIGNO BLVD,
 BELLMAWR, NJ 08031

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/18/17	Water reduction achieved through the use of approximately 2 dozen low-flow toilets.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/18/17	Inedible waste (raw dough/flour from floor sweepings, etc) is recycled via rendering company called NJ Reconserve. Edible finished product waste (baked rolls, etc) are recycled to Buttercup Farms in Pennsylvania. Waste plastic bags are picked up for recycling by the waste management company. Scrap metal is recycled.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/18/17	LED lighting found throughout most of the building, including motion-sensors in some areas.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	8/18/17	Facility uses "green" pest management practices, specifically using border collie dogs to keep geese away from building roof and surrounding areas.

2 RIVERSIDE DRIVE COMMERCIAL BUILDING

 CAMDEN CITY, NJ 08104

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/13/15	Use nontoxic sprays to clean and repair bridges.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/13/15	Had an energy efficiency contest within entire DRPA building to see which floor could reduce all energy consumption the most. Incentive was a pizza party given by the CEO of DRPA.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	4/13/15	Greenports initiative to operate electrified cranes instead of diesel started 5/5/08 - ongoing
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	4/13/15	Solar panels operate some of the maintenance building at the Ben Franklin Bridge yard.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	4/13/15	Carbon footprint analysis was completed within all of DRPA.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/11/13	Use of non-toxic sprays for weed reduction/elimination on railroad tracks, coordinated with New Jersey Environmental Federation (NJEF).

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/11/13</p>	<p>"Green Port" Initiative</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/11/13</p>	<p>Solar Panels installed on Camden maintenance building</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>6/11/13</p>	<p>reduction of Carbon Footprint through Green Port Initiative. Still ongoing project</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/10/12</p>	<p>Signed and executed the "Green Port Initiative"</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>1/10/12</p>	<p>Agreement in place is to reduce Carbon Footprint and Emissions</p>

7861 AIRPORT HIGHWAY LANE BUILDING @ COOPER RIVER PLAZA

Site ID: 7861 AIRPORT HIGHWAY LANE BUILDING @ COOPER RIVER
 380582 PLAZA
 7861 AIRPORT HWY LN,
 PENNSAUKEN, NJ 08109

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/7/17	Recycling efforts go beyond the mandatory requirements. Their main manufacturing process, plastics extrusion, results in some waste plastic scrap being generated by the extruders. This scrap material is recycled. In addition, any finished product (finished plastic sheathings) that may be considered waste are also recycled. For example, finished product that may have failed QA/QC standards, or be excess product.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/7/17	Building was originally equipped with fluorescent lighting. Gradual replacement process: as the old bulbs burn out, they are replaced with new energy-efficient LED lights.

AC MOORE

Site ID: AC MOORE
 129442 130 AC MOORE DR,
 CEDAR BROOK, NJ 08081

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/29/17	A.C. Moore has installed a total of 11,332 solar panels on their property, covering 12.5 acres. These solar panels generate 4,620,000kWh of clean renewable electricity, which is enough to power more than 350 homes.

ALTEC INDUSTRIES INC

Site ID: ALTEC INDUSTRIES INC
600014 342 CHESTNUT AVE,
WEST BERLIN, NJ 08091

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/22/18	Altec improved their energy efficiency by changing all of their halogen light bulbs to LED lighting in September 2017.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/22/18	Altec has taken steps to reduce their total material disposal. In October 2017, Altec purchased a Parker Filter Cart which is used for hydraulic flushes. Previously, when Altec pumped the fluid out they would generate approximately 110-gallons of petroleum waste, with the Parker Filter Cart the petroleum waste was reduced to 5-10 gallons.

AUDUBON MUTUAL HOUSING CORP

Site ID: AUDUBON MUTUAL HOUSING CORP
16046 20 ROAD C,
AUDUBON PARK, NJ 08106

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/20/16	Audubon Park changed a low lying depression on the river within the public park into a rain garden. They enlisted the help of volunteer organizations. The rain garden also attracts butterflies due to the native vegetation planted.

BARRINGTON BORO

Site ID: BARRINGTON BORO
126699 229 TRENTON AVE,
BARRINGTON, NJ 08007

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	11/16/17	They replaced all lighting with energy efficient bulbs in all boro buildings and added motion sensors.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	11/16/17	Additional streets are swept twice a year, even though these additional streets are not required to be swept.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	11/16/17	Barrington has a Green Team and Shade Tree Commission.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/25/14	Motion Sensors and replacement of lighting with new energy efficient T-8 light bulbs in all Boro Buildings
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/25/14	Removal of 43.19 tons of materials from Boro streets by street sweeping, although not required by permit
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	9/25/14	Green Team established and Shade Tree Commission established

BELLMAWR BORO SEWER AUTH LAKE PARK SLF

Site ID: BELLMAWR BORO SEWER AUTH LAKE PARK SLF
 63374 21 BROWNING RD,
 BELLMAWR, NJ 08099

BERLIN TWP RECREATION COMPLEX

Site ID: BERLIN TWP RECREATION COMPLEX
 382285 LUKE AVE & PINE AVE,
 BERLIN TWP, NJ 08091

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/10/09	The township has a comprehensive recycling program that includes items that are not required to be recycled by the county plan. These items include all types of consumer waste electronics since 2005 ("anything with a cord") and concrete debris since 1999. Township has been composting leaves & yard waste since ~ 1990.

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/29/14	High efficiency, low-wattage incandescent bulbs used in buildings, energy efficient reflective heating system, motion shut-off switches installed in public works building and city hall

 ERIAL, NJ 08081

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/13/15</p>	<p>The school has installed a catchment system that collects rain water off of roof top to be used for organic garden watering.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/13/15</p>	<p>The school built a 1306.5 kw dc sized solar project in 2013. The solar panels were shipped on wooden pallets. The school originally set pallets aside for disposal but decided to reuse the wooden pallets to build raised garden beds for the green team organic garden.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/13/15</p>	<p>The hallways have motion sensed lighting that manages the use of energy by turning lighting on when motion is detected and conserving energy by turning lights off in non-motion detected hallways.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/13/15</p>	<p>The school installed a 1306.5 kw DC sized solar panel project on the front lawn in December 2013. The school has conserved 11,651 60 watt bulbs, an offset for approximately 36,741 trees, savings of 1,465 tons of CO2, AND 165,337 gallons of gasoline through the installation of this project, according to the software system (live data solar, by DECK monitoring) that displays live data for the students to observe.</p>

BOCCELLA PRECAST

Site ID: BOCCELLA PRECAST
 593826 324 NEW BROOKLYN RD,
 BERLIN, NJ 08009

Stewardship Activities	Date Acknowledged	Comments
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>8/9/17</p>	<p>Boccella Precast has a contractor Seashore Asphalt, come to the site several times a year to crush any of the precast slab waste. The crusher separates out the rebar, which is hauled off from another contractor while the concrete is crushed into small sized rocks and hauled off for the use in his other business. Boccella reduces their waste by allowing Seashore Asphalt to crush wasted pre-casts and reuse the stone and concrete for other projects The facility also operates a large wet saw for cutting hollow core slabs to contractor specifications. The water (and dust/ concrete pieces) from cutting is drained outside the batch plant into a concrete basin where it evaporates leaving only small rock and sand which the facility uses to make concrete pieces which are then added to the waste, crushed and reused by Seashore Asphalt.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/9/17</p>	<p>The large batch plant operates 9 Natural Gas Trinity tankless hot water heaters used for heating the pre-casts during the winter months. Tankless hot water heaters do not require large water storage tanks but instead provide instantaneous hot water eliminating energy wasted by heating a large tank(s) of water for indefinite periods of time; reducing both fossil fuel usage as well as the emissions associated with its combustion.</p>

CAMDEN CNTY COLLEGE

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/9/16	all vegetative plantings on campus are drought resistant and low maintenance native species
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/9/16	all exterior parking lot and roadway lighting has been replaced with high efficiency LED lighting
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/9/16	materials from construction including asphalt and concrete paving are all recycled instead of thrown away
11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.	6/9/16	Science and Classroom building has LEED Silver certification

CAMDEN CNTY DPW ROAD DEPT COMPLEX

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/26/15	SMART initiative has resulted in the capture of 4.3 Million Gallons of stormwater over the course of 3 years.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/26/15	The Environmental Center in Cherry Hill, is a County owned and operated building that is LEED certified.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	8/26/15	Over 50 Green infrastructure projects completed under SMART initiative
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	8/26/15	Camden has implemented a S.M.A.R.T initiative. (Stormwater Management and Resource Training) www.camdensmart.com - It is a sustainability plan that includes about 50 initiatives for changes in infrastructure that involve water conservation, green building design, energy efficiency, etc. Has resulted in measurable changes already, 223 rain barrels distributed to residents, 1,458 trees planted, 4.3 Million Gallons of stormwater captured.
11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.	8/26/15	The Environmental Center in Cherry Hill, is a County owned and operated building that is LEED certified.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/9/17	
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/9/17	
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/9/17	
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	1/9/17	
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/9/17	

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/9/17</p>	<p>Opened a new riverfront walkway across from the treatment plant connecting Phoenix Park, which was built by CCMUA, with CCMUA fishing pier; worked with DRPA on Gateway Park along Cooper River removing contaminated soil.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/9/17</p>	
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/9/17</p>	<p>Working with Camden City school district on a lead awareness program</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/9/17</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/9/17</p>	
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>1/9/17</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/9/17</p>	

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/9/17</p>	
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>1/9/17</p>	
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>1/9/17</p>	<p>Serving as Chair of the National Association of Clean Water Agency's environmental justice and community service task force; serving on the steering committee of the New Jersey Waterworks program designed to optimize and accelerate implementation of CSO improvement projects.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/2/16</p>	
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/2/16</p>	
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/2/16</p>	
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/2/16</p>	

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/2/16</p>	
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>5/2/16</p>	
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>5/2/16</p>	
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/2/16</p>	<p>CCMUA started a program called PowerCorps Camden, providing work for at-risk youth to clean rain gardens, parks, and storm sewer inlets while also providing life skills and job placement training.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/2/16</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/2/16</p>	<p>The facility received a ISO14001 certification for plant-wide environmental management system</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/2/16</p>	

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/2/16</p>	
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/2/16</p>	<p>CCMUA awarded a contract to build a sludge digester and combined heat/power system that will provide 50-60% of the plant's electricity from sludge biogas. They also installed a sewage to heat facility that takes latent heat from sewage and uses it in the boilers instead of oil or natural gas.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>5/2/16</p>	
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>5/2/16</p>	<p>CCMUA served on a committee representing National Association of Clean Water Agencies to develop Utility of the Future recognition program (modeled somewhat after NJDEP Stewardship Program)</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13; Southern Camden County pipeline construction was finished, allowing elimination of Ancora and Winslow STPs, improving water quality in Pinelands National Reserve</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13; sludge drying system now fully operational</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13; also started new initiative - Camden Collaborative Initiative with Camden, EPA, NJDEP, CCMUA, Cooper's Ferry with others assisting that consists of 6 working groups covering air emissions, brownfields, flooding, environmental education, sustainability, and recycling; added another 10 rain gardens; CCMUA also agreed to provide long term control CSO planning for Camden City and Gloucester City and oversee Camden's sewer and drinking water operations</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13; recertified in February 2014 with Platinum Status by National Biosolids Partnership</p>

<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>2/12/14</p>	<p>for details see entry dated 4/15/13</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/6/13</p>	<p>for details see the entry dated 12/9/2009</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/6/13</p>	<p>for details see entry dated 5/14/2008</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/6/13</p>	<p>for details see entry dated 5/14/2008</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/6/13</p>	<p>for details see entry dated 5/14/2008</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/6/13</p>	<p>for details see entry dated 5/14/2008</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/6/13</p>	<p>for details see entry dated 1/15/2012; CCMUA did provide an easement to NJDEP and Natural Land Trust so 30 acres of land in Camden's Cramer Hill section could be preserved</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>3/6/13</p>	<p>for details see entry dated 2/8/11; sludge drying facility construction completed which will, upon full operation, move all sludge handling indoors, thus reducing any possible odors</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/6/13</p>	<p>see entry dated 1/15/2012; 9 more rain gardens have been constructed</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/6/13</p>	<p>for details see entry dated 5/14/2008</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/6/13</p>	<p>for details see entry dated 5/14/2008; recertified by National Biosolids Partnership in January 2013</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/6/13</p>	<p>for details see entry dated 5/14/2008</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/6/13</p>	<p>for details see entry dated 5/14/2008</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/6/13</p>	<p>Installed 1.8 MW solar power array that began operation in summer 2012</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/6/13</p>	<p>for details see entry dated 5/14/2008</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>3/6/13</p>	<p>for details see entry dated 1/15/2012</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>1/15/12</p>	<p>for details see entry dated 12/9/2009</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/15/12</p>	<p>for details see entry dated dated 5/14/2008</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/15/12</p>	<p>for details see entry dated dated 5/14/2008</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/15/12</p>	<p>for details see entry dated dated 5/14/2008</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/15/12</p>	<p>for details see entry dated dated 5/14/2008</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/15/12</p>	<p>CCMUA is working with NJDEP and Natural Lands Trust to convert a 40 acre site in Camden's Cramer Hill section into a state park/wildlife habitat. Efforts are underway to secure a transfer of property or a conservation easement.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/15/12</p>	<p>for details see entry dated 2/8/11</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/15/12</p>	<p>CCMUA partnered with NJDEP Brownfields group, Camden City, Coopers Ferry, Rutgers, and the NJ Tree Foundation to form the Camden SMART initiative, which built 11 rain gardens in Camden and obtained funding for 24 more; CCMUA worked with Urban Promise and the Delaware Riverkeeper to perform river sampling with high school students, and works with Hopeworks to hire student interns from Camden</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/15/12</p>	<p>for details see entry dated 5/14/2008</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/15/12</p>	<p>for details see entry dated 5/14/2008</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>1/15/12</p>	<p>for details see entry dated 5/14/2008</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/15/12</p>	<p>for details see entry dated 5/14/2008</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/15/12</p>	<p>obtained a one million dollar grant from PSE&G to implement a pilot geothermal project</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>1/15/12</p>	<p>for details see entry dated 5/14/2008</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>1/15/12</p>	<p>CCMUA was asked by the National Biosolids Partnership to provide assistance to Atlantic County Utilities Authority, as well as two out-of-state utilities (Md. and Pa.) in developing an environmental management system that could obtain NBP certification. CCMUA also worked with the Water Environment Federation to develop a national "sustainability archive" of best utility practices so that these practices could be disseminated across the industry; a presentation was given at the WEF conference in October 2011</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/8/11</p>	<p>for details see entry dated 12/9/2009</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/8/11</p>	<p>for details see entry dated 5/14/2008</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/8/11</p>	<p>for details see entry dated 5/14/2008</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/8/11</p>	<p>for details see entry dated 5/14/2008</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/8/11</p>	<p>for details see entry dated 5/14/2008</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/8/11</p>	<p>CCMUA continues to be responsible for maintenance/upkeep of Millenium Park in Camden and the 2 acre nature trail at the Winslow treatment plant in Winslow Twp.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>2/8/11</p>	<p>for details see entry dated 12/9/2009; CCMUA is still working with NJDEP and NJDHS to demolish the old Ancora treatment plant and seal wells, but all flow is now being sent to Delaware #1 STP. CCMUA continues a PCB trackback program, and has identified three source sites, two of which are active. Additional data is being collected on the active sites before a remediation plan can be proposed.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/8/11</p>	<p>CCMUA published a paper in the Utility Executive, a national periodical published by water Environment Federation, that advocated Environmental Justice as a best management practice for utilities based in economically distressed communities. CCMUA partnered with Camden City, Rutgers University, and NJ Tree Foundation to create the Camden SMART initiative (Stormwater Management and Resource Training), a green infrastructure program designed to reduce flooding in the city</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/8/11</p>	<p>for details see entry dated 5/14/2008</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/8/11</p>	<p>for details see entry dated 5/14/2008</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>2/8/11</p>	<p>for details see entry dated 5/14/2008</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>2/8/11</p>	<p>for details see entry dated 5/14/2008</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/8/11</p>	<p>CCMUA awarded a contract for for construction of 3 MW solar power system at the Delaware 1 treatment plant to be completed Fall 2011</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>2/8/11</p>	<p>for details see entry dated 5/14/2008</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>12/9/09</p>	<p>VOC containing parts cleaners were eliminated from the maintenance garage.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>12/9/09</p>	<p>For details see entry dated 5/14/2008</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/9/09</p>	<p>For details see entry dated 5/14/2008</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/9/09</p>	<p>For details see entry dated 5/14/2008</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/9/09</p>	<p>For details see entry dated 5/14/2008</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/9/09</p>	<p>Construction of Millemium Park providing community with direct access to the Delaware River, construction of a 2 acre nature trail at Winslow Plant, tree planting program across the street from the Camden Plant</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>12/9/09</p>	<p>At the request of the NJDEP and NJDHS, The CCMUA is working to eliminate the failed Ancora Sewage Treatment Plant and to convey its flow to its plant in Camden. This will eliminate the discharge of inadequately treated sewage to the groundwaters of the Pinelands. CCMUA is undertaking a PCB trackback analysis to identify significant sources of PCB's with the hope of working with the DRBC and DEP to eliminate or reduce those sources CCMUA is undertaking a USEPA-funded transformer inventory for Camden County as a pollution prevention effort.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/9/09</p>	<p>CCMUA has been managing sewer and water upgrades for the Camden City Central Gateway Project at the request of NJEDA, Camden County, and the City of Camden; CCMUA assisted with implementation of an EPA CARE grant awarded to the Waterfront South Community Group to create a Waterfront South Environmental Network of government, industry, and community representatives who work together to improve quality of life and the environment in the neighborhood; At the request of NJ Dept of Treasury and NJDEP, CCMUA assisted the City of Camden in managing its water and sewer contract with Camden Water; At the request of State of NJ and Camden County, CCMUA took over installation of solids/floatables controls for Camden City's and Gloucester City's CSO systems, and installed netting systems in 20 of the 35 CSO outfalls.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/9/09</p>	<p>For details see entry dated 5/14/2008</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/9/09</p>	<p>For details see entry dated 5/14/2008</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>12/9/09</p>	<p>For details see entry dated 5/14/2008</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>12/9/09</p>	<p>For details see entry dated 5/14/2008</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>12/9/09</p>	<p>For details see entry dated 5/14/2008</p>

<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>12/9/09</p>	<p>CCMUA has been working with the Water Environment Federation's Sustainable Utilities Task Force to develop an encyclopedic resource of water and wastewater treatment practices that can be implemented at other utilities' facilities CCMUA's Deputy Executive Director presented talks at NJWEA Technical Conferences in April and September 2009 regarding CCMUA's Environmental Management System and at Water Environment Federation national conference regarding CCMUA's Environmental Management System and Environmental Justice.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/14/08</p>	<p>CCMUA recieved an EPA grant to perform a county-wide PCB reduction study. VOC containing parts cleaners were eliminated from the maintenance garage</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/14/08</p>	<p>CCMUA has a permit for reuse of treated wastewater; the reuse water is used for in- plant washdowns and street sweeping. CCMUA also has made reuse water available for municipalities to use in jet trucks for collection system cleaning during drought conditions</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/14/08</p>	<p>Primary tank maintenance reduced energy use in the secondary treatment system, belt thickener replacement reduced energy use in the handling of residuals; these occurred during the past three years. Oxygen plant upgrades planned during the next 12 to 24 months (contracts have been awarded) will realize a half million dollar per year energy savings; CCMUA has taken steps to reduce inflow and infiltration, which saves energy by eliminating treatment of groundwater and stormwater</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/14/08</p>	<p>CCMUA voluntarily provided 50 thousand dollars in funding to the county for household waste collection days last year</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/14/08</p>	<p>all trucks used for collection system were converted to ultra low sulfur diesel; CCMUA purchased a hybrid vehicle as a trial</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>5/14/08</p>	<p>Construction of Millemium Park providing community with direct access to the Delaware River, construction of a 2 acre nature trail at Winslow Plant, tree planting program across the street from the Camden Plant</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/14/08</p>	<p>CCMUA provides plant tours to school and community groups; CCMUA works with Heart of Camden community group and is a partner in Hopeworks, which is a school program offering student internships. CCMUA's Deputy Executive Director volunteers on the Science Advisory Board of Waterfront South, another citizen community group. CCMUA also initiated a city ordinance to minimize truck traffic through a nearby residential community.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/14/08</p>	<p>the CCMUA has a written Environmental Mission Statement to guide policy and decision making</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/14/08</p>	<p>CCMUA uses a group of key employees who hold regular meetings to determine ways to optimize plant operations; monthly reports are generated reviewing air, water, and sludge compliance and assessing current maintenance programs and capital improvements</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/14/08</p>	<p>voluntary Alternative Workweek Program, allowing most employees to take a day off every other week by working longer days</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/14/08</p>	<p>internal practice is to purchase recycled office products whenever possible; this is not a written policy, but the Deputy Director stated that the policy is expected to be followed</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>5/14/08</p>	<p>as part of a Green Initiative 9(Camden County Green Ribbon Panel) all county facilities have had greenhouse gas emissions calculated</p>

<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>5/14/08</p>	<p>CCMUA has been asked by the EPA to present their Environmental Mission Statement and its implementation strategies to other wastewater facilities; presentations have been made by the Deputy Executive Director at conferences as follows: March 2007 in Atlanta, GA, June 2007 in Dallas, TX, October 2007 in San Diego, CA, December 2007 in Hartford, CT, March 2008 in Tampa, FL, and April 2008 in Philadelphia, PA.</p>

CAMPBELL SUPPLY CO

Site ID: CAMPBELL SUPPLY CO
14663 1 CAMPBELL PL,
CAMDEN, NJ 08103

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>10/6/14</p>	<p>Campbell is currently operating a Food Composting Program (via Waste Management) and a Filtered Water Fountain Program to reduce the use of bottled water on-site</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/6/14</p>	<p>current building utilizes sky lighting in the office areas to maximize natural sunlight and reduce electricity consumption</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>10/6/14</p>	<p>A copy of the 2014 Corporate Social Responsibility Report and Executive Summary can be provided by myself.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/25/12</p>	<p>The building uses sky lighting in some of the office areas for natural lighting, thus reducing the electricity consumption of the facility. The facility has also upgraded the external and internal lighting systems by installing lighting systems with more efficient lamps and electronic ballasts. The savings from this upgrade will result in 286,229 kWh/year saved.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>10/25/12</p>	<p>The facility holds an Earth Day Expo at the facility each year in celebration of Earth Day.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/6/08</p>	<p>current building utilizes sky lighting in the office areas to maximize natural sunlight and reduce electricity consumption</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/6/08</p>	<p>Facility held an Earth Day Expo in the dining facility in April (2008)</p>

CHERRY HILL TWP MUNICIPAL BUILDING & POLICE DEPT

Site ID: CHERRY HILL TWP MUNICIPAL BUILDING & POLICE DEPT
16860 820 MERCER ST,
CHERRY HILL, NJ 08002

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/8/17</p>	<p>Since 2009, Cherry Hill Township established an Integrated Pest Management Program to reduce the use of pesticides and herbicides at all open spaces, parks, and facilities in Cherry Hill.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>11/8/17</p>	<p>The Township has a yard waste composting program that creates compost at the Kresson Ecology Center and provides it free to all residents.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/8/17</p>	<p>They have performed several lighting upgrades to switch to all LED's and install occupancy sensors in all offices, meeting rooms, bathrooms and parking lots in the community center, municipal building, public works building, Barclay Farm, Croft Farm, and Town Hall.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/8/17</p>	<p>The Township established a no mow program in a number of basins and parcels throughout the township to establish pedestrian walking trails and increase wildlife habitat. They have also installed rain gardens at several locations to control storm water runoff and implemented wildflower seeding at several Route 70 medians, as well as built and maintain floating gardens.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>11/8/17</p>	<p>Cherry Hill Township received silver certification for Sustainable New Jersey. This required the establishment of a Green Team that actively promotes and develops sustainable actions within the township.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/8/17</p>	<p>Cherry Hill has an education outreach program funded by an EPA Climate Showcase Communities Grant, run by their Environmental Board to help reduce the carbon footprint of the community, conduct volunteer programs and giveaway rain barrels.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/8/17</p>	<p>In 2010, Cherry Hill adopted a Sustainability Plan element as part of the Cherry Hill Township Master Plan.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/8/17</p>	<p>The 100 kWh solar panel system supplies 50% of the energy to the Department of Public Works and Town Hall buildings.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>11/8/17</p>	<p>Cherry Hill Township has completed a municipal carbon footprint in 2009 as well as a community carbon footprint in 2010 which is used as base line data to monitor energy use.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/9/12</p>	<p>Since 2009, Cherry Hill Twp established an Integrated Pest Management Program to reduce the use of pesticides and herbicides at all open spaces, parks and facilities in Cherry Hill.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/9/12</p>	<p>the Township has a yard waste composting program that collects residential yard waste, creates compost at the Kresson Ecology Center and then provides it for free to all residents.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/9/12</p>	<p>The Township recently completed a lighting upgrade of both the Township's Community Center and the municipal building. The lighting in the Community Center was replaced with new LED lighting, and the Township building had high efficiency CFL's installed, as well as occupancy sensors in all offices, meeting rooms and bathrooms.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>4/9/12</p>	<p>In 2010 the Township began a No-Mow Program. The No-Mow program has reestablished meadows in a number of parcels throughout the Township, providing needed habitat and opportunity to create new pedestrian trails. In addition, the twp has installed rain gardens at several locations to control storm water runoff and implemented a wildflower project on Rt. 70 medians.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>4/9/12</p>	<p>Cherry Hill Township is a Sustainable Jersey certified community and has a Green Team that actively promotes and develops sustainable actions within the township.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/9/12</p>	<p>Cherry Hill has an energy education outreach program funded by an EPA Climate Showcase Communities Grant to help reduce the carbon footprint of the community.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/9/12</p>	<p>in 2010, Cherry Hill Twp adopted a Sustainability Plan element as part of the Cherry Hill Twp Master Plan.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/9/12</p>	<p>A 100 kWh solar panel system was installed on the roof of the Public Works Building in Dec. 2010. The panels provide approx. 50% of the buildings energy needs.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/9/12</p>	<p>Cherry Hill Twp has completed a municipal carbon footprint in 2009 as well as a community carbon footprint 2010 which are used as base line data to monitor energy use.</p>

COLLINGSWOOD BORO DPW WATER PLANT

Site ID: COLLINGSWOOD BORO DPW WATER PLANT
 37424 678 HADDON AVE, 285 HILLCREST AVE
 COLLINGSWOOD, NJ 08108

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/12/13	Collingwood Borough did some research and decided to replace its "RED" incandescent traffic lights with new high efficiency LED lights, which are expected to last up to 10x's longer than the old type.

COMARCO PRODUCTS INC

Site ID: COMARCO PRODUCTS INC
 125220 501 JACKSON ST,
 CAMDEN, NJ 08104

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/22/17	The facility installed 6 electric Bosch and Ariston tankless/ on-demand hot water heaters stationed around the facility. There are 2 in production room, 1 in eggplant peel room, 1 in packaging room., 1 in employee cafeteria., and 1 in plant office giving a total of 6.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/22/17	The facility installed 99 SUNPOWER 230 Solar Panels on their roof of their business in 2012.

 CAMDEN, NJ 08103

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/11/18</p>	<p>Facility implements a closed-loop gray water re-use system on their wash lines.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/11/18</p>	<p>The overall nature of their business (reconditioning industrial storage containers for re-use, such as steel/plastic drums and totes) helps to promote recycling and re-use of raw materials, and helps to minimize carbon footprint. In addition, any containers that cannot be re-used are recycled as scrap.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/11/18</p>	<p>Energy efficient LED lighting has been installed several areas.</p>

CONTEMPORARY GRAPHIC SOLUTIONS @ COOPER RIVER PLAZA

 PENNSAUKEN, NJ 08110

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/26/15	Printing, die cutting, bindery and assembly use water recycling. In addition, the facility has a waterless toilet.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/26/15	Five motion detector light sensors were installed in the facility.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	1/26/15	Facility has reduced their carbon footprint by using non-toxic inks with a low VOC content.

CRW GRAPHICS

Site ID: CRW GRAPHICS
 28618 9100 PENNSAUKEN HWY,
 PENNSAUKEN, NJ 08110

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/14/08	Approximately three ago CRW substituted a hazardous press wash with a non-hazardous press wash material. Additionally, the photographic process has been eliminated from printing operations. As a result, CRW no longer generates hazardous wastes. Prior to the material substitution, CRW was classified as a large quantity generator of hazardous waste.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/14/08	CRW has eliminated water-consuming press machinery. As a result, water consumption was reduced by 300,000 gallon per year.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/14/08	CRW recovers waste heat from the digital printing press. The waste heat recovery system provides condition air to a wing of the printing operation. The system modulates according to heating and cooling needs. Additionally, CRW has replaced approximately 100 cathode ray tube monitors with flat screen monitors.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	5/14/08	CRW eliminated mailing methods which previously produced invalid mailing sites. As a result, paper waste and other wasted resources were eliminated. CRW employs a "Continuous Improvement Plan" which routinely examines ways in which to systematically reduce planned waste in the printing process.
8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?	5/14/08	As of September, 2007 CRW Graphics received the Forestry Stewardship Council Certification (FSC). Accordingly, CRW is now part of the FSC custody chain that includes forest management, pulp and paper manufacturing, warehousing and distribution. The mission of the FSC is to promote environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

DATWYLER SEALING SOLUTIONS

Site ID: DATWYLER SEALING SOLUTIONS

 PENNSAUKEN, NJ 081101204

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/31/17	The facility evaluated their waste streams and noticed that the majority of their waste was the scrap rubber. Approximately 20 tons of rubber waste per week was being generated. The facility reached out to Regupol America, a Pennsylvania company that shreds the rubber and makes rubber mats. After giving them a few samples and completing a few test runs, Regupol determined that waste rubber could be used as an acceptable feedstock for their operation. In August 2016, the facility began shipping full truckloads of rubber waste to Regupol on a weekly basis. The facility managed to reduce their waste management costs and also reduced the amount of trash being sent to the landfill. The facility wanted to improve their carbon print even more and teamed up with Road Runner, a waste management company to help reduce their solid waste generation rates even further. When the new recycling plan is implemented, 89% of their trash will be recycled and 10% will go to the landfill. Datwyler has reduced excess material expenditures and needless consumption, limited waste hauling expenses and landfill use as well as utilized market functions for an environmentally conscious business decision.

DEMOCRACY PREP CHARTER SCHOOL

Site ID: DEMOCRACY PREP CHARTER SCHOOL
 17917 1400 COLLINGS RD,
 CAMDEN, NJ 08104

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/15/13	Food/organic waste from the school's cafeteria is stored separately in 6 green/yellow plastic Waste Mgmt trash cans, which is then picked up (3x weekly) for recycling. These trash cans were empty during inspection, as a pickup had recently occurred, but did show signs of use. This recycling activity goes beyond the current recycling requirements and thus, is eligible for Stewardship.

DISC MAKERS

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/15/16	In April of 2015, Disk Makers purchased a new laser machine which was found to reduce the volume of hazardous waste generated at the site by approximately a third.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/15/16	Fixtures in all the bathrooms were changed and waterless urinals were installed throughout.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/15/16	Within in the past 2-3 years, Disk Makers has replaced their lighting to higher efficiency bulbs within their Packing Department, Warehouse and Shipping Department.

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/22/16</p>	<p>Volatile organic compounds (VOCs) are reclaimed at the facility.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/22/16</p>	<p>The facility has installed motion sensor light switches in office, production, and warehouse areas.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>4/22/16</p>	<p>Chemical waste management - conversion of hazardous waste to nonhazardous foam insulation is conducted at this facility.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/22/16</p>	<p>Facility offers outreach. The facility has offered free insulation to Habitat for Humanity as well as providing manpower for construction.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/22/16</p>	<p>The facility has a Responsible Care Code that is signed by the DEO of the company.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/22/16</p>	<p>The facility has an Environmental Health and Safety Policy.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>4/22/16</p>	<p>The facility has a Global Emissions Inventory Report.</p>

<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/22/16</p>	<p>The facility has a Global Emissions Inventory Report.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/22/16</p>	<p>Suppliers are annually audited by The Dow Chemical Company.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>1/9/14</p>	<p>Volatile organic compounds (VOCs) are reclaimed at the facility.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/9/14</p>	<p>The facility has installed motion sensor light switches in office and production areas.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/9/14</p>	<p>Chemical waste management - conversion of hazardous waste to nonhazardous foam insulation is conducted at this facility.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/9/14</p>	<p>The facility offers outreach. The facility has offered free insulation to Habitat for Humanity as well as providing manpower for construction.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/9/14</p>	<p>The facility has a Responsible Care Code that is signed by the CEO of the company.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/9/14</p>	<p>The facility has an Environmental Health and Safety Policy.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>1/9/14</p>	<p>The facility has a Global Emissions Inventory Report</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>1/9/14</p>	<p>Suppliers are annually audited by Dow Chemical.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/19/08</p>	<p>Volatile organic compounds (VOCs) are reclaimed at the facility.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>3/19/08</p>	<p>Chemical waste management - conversion of hazardous waste to nonhazardous foam insulation.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/19/08</p>	<p>Plant offers outreach. Offers free insulation to Habitat for Humanity as well as providing manpower for construction.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/19/08</p>	<p>Responsible Care Code that is signed by the CEO of the company.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/19/08</p>	<p>-Environmental Health and Safety Policy. -Loss Prevention Principles.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>3/19/08</p>	<p>Global Emissions Inventory Report.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/19/08</p>	<p>Suppliers annually audited by Dow Chemical.</p>

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/5/18	Low-flow toilets are in each bathroom of the building.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	4/5/18	Facility is in the plastic molding business. Scrap plastic pieces and remnants are either re-used or sold in order to minimize their solid waste. No plastic scrap is landfilled, all is recycled.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/5/18	Replaced old lighting ballasts with energy efficient ones.

ECHELON FORD INC

Site ID: ECHELON FORD INC

 STRATFORD, NJ 08084

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/26/18	Ford's body shop uses a BASF SmartTrak color mixing system which is able to find the exact color formula and amount of paint to be used for each paint job. The DeKups System is used with the SmartTrak system. The DeKup system uses disposable cups for use in gravity and siphon spray guns. The DeKups System works by allowing you to mix and spray your paint from one cup. Built-in filter options mean you don't have to strain the paint before you get to work, while the disposable gravity cups mean you can just toss the item out when finished. By using these system's Ford is generating very little to no hazardous waste. Hazardous waste generated from the cleaning of spray guns are cleaned with lacquer thinner (Fineline 699). The resulting mixture of waste lacquer thinner/ paint is placed in a three-gallon capacity distillation unit (ChemChamp) to recover the lacquer thinner. Distillation bottoms are disposed of in the solid waste dumpster, which is permitted under 40 CFR 262.14(a)(5)(iv). On a monthly average approximately 2.7 gallons of paint waste is distilled on-site, approximately 2-gallons of thinner is recovered. During this process, approximately .5 lbs. of distillation bottoms are generated.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/26/18	Ford had switched most of their facility from fluorescent lamps to LED lighting since June 2014. All service offices, used car offices, show room and waiting area were switched over to LED. Currently the out door lighting is in the process of switching to LED lighting and the service repair and auto body shop will be the last two areas to switch over.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/31/16	reduction in the use of Hg, Cd, Cr+6, PBDE, and PBB.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/31/16</p>	<p>Elimination of use of styrofoam cups, replaced with reusable mugs and cups, saving approx 52,000 cups/year.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>8/31/16</p>	<p>Replacing packaging materials with recycled/ biodegradable options. Plastic utensils in the cafeteria have been replaced with biodegradable alternatives.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>8/31/16</p>	<p>Edmund Optics provides time off for employees to assist charity organizations including Surfrider Foundation, Newton Creek Watershed, and Sustainable Haddonfield.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/31/16</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/31/16</p>	<p>http://www.edmundoptics.com/company/compliance/</p>

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/16/15	Facility collects all rainwater from the site and stores it in large above-ground storage tanks. The water is then used in the shredder mill for processing. There is no surface water discharge permit for the site. All water is recycled.

EUROPEAN COFFEE CLASSICS INC

Site ID: EUROPEAN COFFEE CLASSICS INC
10177 1401 BERLIN RD,
CHERRY HILL, NJ 08034

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/5/19	The facility has already installed LED lighting in just over 75% of the facility and has motion sensors in other areas to conserve energy usage.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/5/19	European Coffee Classics installed 1,672 Trina Solar Panel modules (each 280w) on the rooftop of their 100,000 square foot facility in the Spring of 2017, which generates up to 468.16 KW. European Coffee Classics has generated a total of 947.02 MWh while eliminating 776 tons of CO2 from the atmosphere since the facility obtained their solar panels in Spring of 2017.

FLYING FISH BREWING CO

------------------------	-------------------	----------

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/4/18</p>	<p>Flying Fish Brewery recaptures steam generated during boiling of the wort and for every 5 gallons of wort generated, they capture the equivalent of one gallon of hot water that is then used in the brewing process.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/4/18</p>	<p>Throughout the brewery, Flying Fish has installed Passive Solar Light Tubes, which are used for transmitting or distributing natural or artificial light for the purpose of illumination, and are examples of optical waveguides. The brewing equipment is fully automated reducing the number of pumps required. They boil the water under slightly reduced pressure reducing the need for more heat from natural gas. Flying Fish utilizes a high efficiency Miura boiler from Japan which works on demand requiring just a small fraction of the natural gas compared to what a conventional boiler provides.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/4/18</p>	<p>Flying Fish Brewing saves and ships all of the spent barley to the local dairy farmer for feed. Last year the amount of spent barley sent to the farm was more than 2 million pounds. All carpeting throughout the building was rescued from the dumpster of a multinational company, and all furniture was purchased used and then reconditioned. All bathrooms in the building use high powered air dryers eliminating the need for paper towels. Paper, metal, plastic, glass and wooden pallets are recycled in the facility. Under normal steeping of the barley, about 80% of the sweet barley liquid called wort is eventually used to make the beer while the remaining 20% is remaining spent barley. Over the years, Flying Fish has formulated their beer to utilize 93% of the wort obtained from this process and so use 40% less ingredients to make their beer.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/4/18</p>	<p>Throughout the brewery, Flying Fish has installed Passive Solar Light Tubes, which are used for transmitting or distributing natural or artificial light for the purpose of illumination, and are examples of optical waveguides.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>4/4/18</p>	<p>Around the back of the brewery, there is a Rain Garden that features native plants that attract bees and hummingbirds. Because of where the brewery is located, 15% of the rainwater from the roof is diverted back to the garden versus rushing into Cooper Creek where it just contributes to erosion.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/4/18</p>	<p>The main brewery roof features 463 solar panels that provides 20% of their electrical energy.</p>

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/8/16	Collection system pumping stations were changed to variable speed motors for reducing energy usage. Two pump station changes were completed by August 2008. Water plant changed from set rate motor controls to step start type, reducing energy usage. The township has a permit application in progress which will allow vegetative waste energy production to be used on a 100 acre plot capped landfill.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/8/16	Enviro utilities has four bicycles (with work baskets) for staff usage to complete routine work out in the systems, for both the potable or wastewater plants, rather than using the work trucks.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/8/16</p>	<p>CFL's were purchased in the early 2008 & installed at pump stations, wells & at the water treatment plant. Also, the township is working with Rutgers for rain water infiltration systems to reduce stormwater overflows.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>9/8/16</p>	<p>Their community Forestry management plan was approved in 2007. the city has planted trees every year since 2005 and maintains the city gardens, a fruit orchard, and grape vines, as well.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/8/16</p>	<p>The township has a Clean Water Partner (partnership with DE estuary) program which began in the Fall 2005. They educate businesses about STW, runoff pollution and inlet labelling. The township has gotten three businesses have signed up. The township has a formal pledge to improve good housekeeping of their sites to control activities & prevent pollutant discharges. The city provides information package, training and checklist. Finally, the township has twice yearly surface water body cleanup events with service groups in city as well.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/19/09</p>	<p>Collection system pumping stations were changed to variable speed motors reducing energy usage. Final two pump stations changes were completed by August 2008. Water plant changed from set rate motor controls to step start type, reducing energy usage.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. GLOUCESTER CITY, NJ 08030

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/19/15	Facility operates a 9MW DC/7.5 MW AC solar panel field on the roof of building 20. This is the largest roof-top installation of solar panels in the US. Approximately 2,750 panels were installed.

GRASSO FARMS

Site ID: GRASSO FARMS
 127838 503 FLEMING PK,
 WINSLOW TWP, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/27/15	The farmer utilizes Integrated Pest Management (IPM) practices to avoid unnecessary or gratuitous pesticide use.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/27/15	The farmer has utilizes drip irrigation over 130 acres, conserving the total amount of water necessary to properly irrigate the crop.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/27/15	The farmer recycles the pesticides empty containers with Helena and New Jersey Department of Agriculture, preventing them from being placed in a landfill.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/27/15	The site conserves energy by using a sky light to light the packinghouse and other buildings. Sodium lighting and T5 fluorescent lighting to further conserve energy are also used.

HADDONFIELD BORO DPW

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/12/13	Haddonfield Township has changed all of its old light bulbs with halogen bulbs and installed motion sensors in all the rooms at Borough Hall.

HADDON TWP

Site ID: HADDON TWP
59207 135 HADDON AVE,
HADDON TWP, NJ 08108

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/7/17	The Township provides compost tumblers and rain barrels to all residents.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/7/17	Hadden Township hosted several volunteer clean ups at Newton Creek, Edison Woods and Sadler Woods. They also provide trees to be planted throughout town each year.

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/7/17</p>	<p>Haddon Township received silver level grade from Sustainable NJ.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/7/17</p>	<p>Haddon Township has an Environmental Commission, an Environmental Education Center, and rain gardens.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/24/14</p>	<p>Municipality hands out compost vessels for all residents in town.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>7/24/14</p>	<p>Volunteer Cleanups of Newton Creek, Edison and Sadler Woods</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>7/24/14</p>	<p>State Sustainable Municipality</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/24/14</p>	<p>Environmental Commission, Environmental Education Center, Rain Gardens</p>

HADDON TWP BD OF ED HIGH SCHOOL

Site ID: HADDON TWP BD OF ED HIGH SCHOOL
10022 406 MEMORIAL AVE,
HADDON TWP, NJ 08108

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/3/16	School has installed High efficiency Boilers and switched all lights bulbs to LED lights throughout the facility.

HIKMA PHARMACEUTICALS USA INC

Site ID: HIKMA PHARMACEUTICALS USA INC
14662 2 ESTERBROOK LN,
CHERRY HILL, NJ 080034099

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/19/13	Facility has converted the press wash material from hazardous solvent based material to non-hazardous aqueous based material. Westward recently conducted a HW Reduction Mapping project & there is a HW Tracking System in place. A HW Disposal chart from 2011 to 2012 shows a large drop in disposal rates.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/19/13	Facility has low-water use fixtures and auto flush fixtures in order to conserve water. For process applications, the sample ports have been modified for discharge water savings. Purified process water changes include software and orifice size modification for a water savings goal of 10 million gallons per year. A portion of reject process water is recycled to be used in cooling towers.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/19/13	Facility has reduced waste transportation to incinerators by 50% by implementing greater waste storage capacity at the point of waste generation. There are two 90-day storage areas, with pick-ups reduced from previous schedule due to larger storage capacity.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/19/13</p>	<p>The old lighting system has been upgraded with electric ballasts and "green lamps" to conserve energy. The new lighting systems are automated to turn on & off, I witnessed this during inspection.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/19/13</p>	<p>I saw Westward's Environmental Policy signed by senior officer. Policy is posted and employees are made aware of the policy. Westward had an Energy Audit conducted by a contracted company to evaluate environmental performance when they took over the facility from Baxter.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/19/13</p>	<p>West-Ward Pharmaceuticals does employ an environmental management system to manage it's operations. The system is currently being evaluated for ISO 14001 certification.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/23/08</p>	<p>Baxter had converted the press wash material from hazardous solvent-based material to non-hazardous aqueous-based material.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/23/08</p>	<p>Baxter has installed low-water use fixtures and auto flush fixtures in order to conserve water. Within process applications, the company has modified sample ports for discharge water savings. Purified process water changes include software and orifice size modification for water saving goal of 10,000,000 gallons for year 2008. Additionally, Baxter recycles a portion of reject process water to be used at the cooling towers.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/23/08</p>	<p>Baxter has reduced waste transportation to incinerators by 50 % by implementing greater waste storage capacity at the point of waste generation.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/23/08</p>	<p>Baxter has upgraded its lighting systems with electronic ballasts and "Green Lamp" in order to conserve electricity.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/23/08</p>	<p>Environmental policy was available at the time of the survey.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/23/08</p>	<p>Baxter has ISO 14001 certification, with latest revision dated April 29, 2008</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/19/17</p>	<p>all buildings in process of being converted to LEDs</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/19/17</p>	<p>still trying to obtain certification for sustainable NJ</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/19/17</p>	<p>Green Tea coordinates lake cleanup each year</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/29/14</p>	<p>Laurel Springs Boro changed out older municipal building lighting systems with new energy efficient lighting and bulbs</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/29/14</p>	<p>Laurel Springs Boro established a "Green Team" as the initial step for obtaining Sustainable N.J Municipal certification.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/29/14</p>	<p>Laurel Springs Boro "green team" coordinates and conducts volunteer lake cleanup annually in Laurel Springs</p>

LAWNSIDE BORO

Stewardship Activities	Date Acknowledged	Comments
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/6/17</p>	<p>they have installed energy efficient lighting in all municipal buildings and at the senior center.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/6/17</p>	<p>they have upgraded almost all inlets to meet bike safety criteria regardless of paving and they have put in rain gardens with the public school children and girl scouts throughout the township.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/6/17</p>	<p>Lawnside has taken several initiatives to achieve a Sustainable NJ ranking of Bronze. Activities include establishing an environmental advisory committee and a mission statement.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/6/14</p>	<p>New energy efficient lighting installed in Municipal Bldgs. The new Lawnside Senior Housing Project opened in 2013 and each unit has Energy Star rated appliances, energy efficient heating and cooling systems and water saving plumbing fixtures. http://www.nj.gov/dca/hmf/media/news/2013/approved/20131120.html</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/6/14</p>	<p>Upgraded majority of stormwater inlets to new design standards, above what is required by permit</p>

LEHIGH CEMENT CO

Site ID: LEHIGH CEMENT CO
 30634 595 MORGAN BLVD,
 CAMDEN, NJ 08104

Stewardship Activities	Date Acknowledged	Comments
Climate Leaders.	8/27/15	
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/27/15	This year the facility will be using rainwater to spray down the roadways leading into the plant as well as the concrete pads and paths throughout the plant. By using the rainwater that has collected, the facility will not have to fill the water truck using a fire hydrant, which is part of the City water grid.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/27/15	On January 1, 2008, the facility started a new energy conservation program in hope of reducing electrical energy demand by at least two kilowatts per hour/per ton. The facility installed timer switches for exterior lighting, motion detectors for interior lighting and sent memos to all employees reminding them to shut off all un-needed electrical appliances/components when not in use. The facility also encourages employees to shut off all unused power strips to eliminate phantom power usage.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/27/15	Facility utilizes by-products from other industries, such as fly ash from coal-fired power generation and blast furnace slag from iron production.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	8/27/15	In winter 2007, 10 trees were purchased to be planted in the spring 2008 to add to the 87 trees & several shrubs planted in fall 2006
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	8/27/15	The facility hosts a monthly Community Advisory Panel (CAP) to which other businesses and community members (churches, educational organizations, citizens) are invited where plant activities are discussed. There is a wide variety of topics discussed during the CAP meetings, ranging from crime prevention, environmental concerns, community clean-ups to neighborhood tree plantings.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/27/15</p>	<p>Corporate Environmental Policy is posted in the lobby of the office building. The policy promotes the use of recyclable products, reduction in the use of non renewable resources and greatly encourages sustainable development projects.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/27/15</p>	<p>Currently certified by BSI as ISO 14001 compliant. Initial certification was registered on April 14, 2003 and our plant has retained the certification since</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>8/27/15</p>	<p>http://www.holcim.com/CORP/EN/id/1610652460/mod/gnm50/page/editorial.html</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>8/27/15</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>8/27/15</p>	<p>An environmental purchasing policy is in place. A majority of all purchases must be made through an approved vendor list. This approved vendor list is maintained by a central procurement organization.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>8/27/15</p>	<p>Greenhouse gas emissions are calculated monthly. Calculations are done for CO2, NOx, SOx, and VOC. The WBCSD Cement Protocol version 2 is used. In 2006 the facility was audited by KPMG and passed the audit.</p>
<p>Climate Leaders.</p>	<p>3/17/08</p>	<p>EPA Climate Leaders Partner</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/17/08</p>	<p>This year the facility will be using rainwater to spray down the roadways leading into the plant as well as the concrete pads and paths throughout the plant. By using the rainwater that has collected, the facility will not have to fill the water truck using a fire hydrant, which is part of the City water grid.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/17/08</p>	<p>On January 1, 2008, the facility started a new energy conservation program in hope of reducing electrical energy demand by at least two kilowatts per hour/per ton. The facility installed timer switches for exterior lighting, motion detectors for interior lighting and sent memos to all employees reminding them to shut off all un-needed electrical appliances/components when not in use. The facility also encourages employees to shut off all unused power strips to eliminate phantom power usage.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/17/08</p>	<p>Facility utilizes by-products from other industries, such as fly ash from coal-fired power generation and blast furnace slag from iron production.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/17/08</p>	<p>In winter 2007, 10 trees were purchased to be planted in the spring 2008 to add to the 87 trees & several shrubs planted in fall 2006.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. LINDENWOLD BORO MUNICIPAL BUILDING & POLICE DEPT

Site ID: LINDENWOLD BORO MUNICIPAL BUILDING & POLICE DEPT
 9997 2001 EGG HARBOR RD,
 LINDENWOLD, NJ 08021

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/11/17	Installation of new motion sensors for LED lighting and updated heating systems in public works building and police department. The Lindenwold Borough is aggressive in its recycling efforts to go beyond what is required in reclamation of tires, concrete, asphalt, and scrap iron.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/11/17	A rain garden has been constructed at the municipal building, the high school, and elementary school.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/11/17	Four Borough schools have installed solar panels.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/22/14	New motion sensors for new LED lighting and heating systems in Public Works buildings
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	12/22/14	A rain garden has been constructed at the new Municipal Bldg. The Boro is aggressive in its recycling efforts, going beyond what is required in the reclamation of tires, concrete, asphalt, and scrap iron.

MAFCO WORLDWIDE CORP

Site ID: MAFCO WORLDWIDE CORP
 14674 300 JEFFERSON AVE, & 3RD ST
 CAMDEN, NJ 08104

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/22/16	They collect condensate from the stack and re-use the water. Also they use low-flow toilets.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	7/22/16	Facility established several plants and flowerbeds on the property and maintains their landscaped areas.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	7/22/16	Facility donates tree mulch they produce to the Camden City Tree Foundation, who uses it for mulch around trees planted in the city.

MATRO FAMILY FARMS

Site ID: MATRO FAMILY FARMS
 180865 819 FLITTERTOWN RD,
 WINSLOW TWP, NJ 08037

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/5/18	The farm mechanically controls weeds through tilling. They also employ IPM strategies.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/5/18	They utilize drip irrigation on 200 acres of farmland.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/5/18	The farm uses LED lighting.

MOD TEK

Site ID: MOD TEK
53909 2550 HADDONFIELD RD,
PENNSAUKEN, NJ 08110

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/16/16	Facility uses water-based inks or UV-based inks in their printing presses (as opposed to more traditional solvent-based inks). In addition, they clean the press rollers using an eco-friendly, non-solvent ultrasonic cleaning machine.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/16/16	The facility just recently replaced some of their building heat HVAC systems with more efficient units. Also, there are plans to have the building's current fluorescent lighting replaced with more energy-efficient LED lighting, planned for the near future, but not yet conducted.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	12/16/16	Facility owns over 600 solar panels, installed on the roof. 150kw capacity.

NEW ENGLAND MOTOR FREIGHT

Site ID: NEW ENGLAND MOTOR FREIGHT
38768 1618 UNION AVE,
PENNSAUKEN, NJ 08110

 15663 301 SPRING GARDEN RD ,
 ANCORA, NJ 080379699

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/10/15	WATER USE REDUCTION In aprox 2011, renovated the Laundry Room with more efficient equipment that vastly reduced water use from its prior ~ 3.5 gal water per lb laundry, to now only ~ 3/4 gal per pound laundry. Also: replaced standard sinks with low-flow models in several buildings, amounting to 100+ sinks. Also: installed some low-flow toilets, aprox 20.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/10/15	Made numerous improvements to the air conditioning systems, replacing older units with more efficient equipment, including aprox 20 new rooftop commercial units on the dorms that replaced outdated thirty-year-old AC units. Also replaced 12 very large wall AC units in the day rooms, and 30+ new high-efficiency ductless AC units primarily in office areas, . Also: after analyzing and making adjustments to their boiler equipment, they were able to reduce the pressure their boilers operated at while still meeting their heat/hot water needs, which correspondingly reduced their boiler natgas fuel usage by 10-15%. Also: using LED lights in several locations, ~ 50 installed so far, and continuing with more over time. Also: switched from magnetic light ballasts (T12) to electronic ballasts (T8/T5). Also: several motion-sensor lights installed.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	4/10/15	ENV ENHANCEMENT Have planted a few dozen new deciduous trees on the grounds, mostly as replacements for dead or unhealthy trees that had to be cut down. Also planted holly shrubbery.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	4/10/15	GREENHOUSE Hands-on patient programs involving horticulture and plant-growing are held in the onsite greenhouse.

NJ RUTGERS UNIVERSITY CAMDEN CAMPUS

Site ID: NJ RUTGERS UNIVERSITY CAMDEN CAMPUS
 15897 PEARL ST,
 CAMDEN, NJ 08102

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/11/15</p>	<p>Micro-Scale Chemistry is a waste minimization technique that can be utilized effectively in organic chemistry laboratories. The Rutgers chemistry Department has demonstrated environmental stewardship by utilizing this technique. This concept uses smaller amounts of chemicals initially, which results in lesser amounts of hazardous waste being generated. Chemical Reuse Program - REHS has implemented a chemical reuse program where unopened virgin chemicals that are no longer needed or are being disposed of as waste, are collected, stored and offered for re-use within the university. Solvent waste reuse went from 68,422 lbs. in 2002 to 90,924 lbs. in 2014.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/11/15</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/11/15</p>	<p>http://rehs.rutgers.edu/rehs_ehsms.html</p>
<p>WasteWise.</p>	<p>7/11/13</p>	<p>Rutgers is an EPA WasteWise Partner - Recyclemania participant.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/11/13</p>	<p>Facility installed bottle-filling dispensers at two water fountains at the college campus, including one in the gym. These devices allow users to easily fill re-usable bottles with drinking water from a water fountain, thus reducing the amount of plastic bottles that enter the solid waste stream. These devices are equipped with water filters, and have a digital numerical display to show its usage (the # of bottles saved from landfills). The dispenser in the gym had a counter reading of 43,314 at time of inspection. The second dispenser was not observed at this time. Dispensers are identified as Halsey Taylor Hydro-Boost, at a cost of aprox \$400 each.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/11/13</p>	<p>Rutgers- Camden is retrofitting or replacing all light fixtures in their buildings with more energy efficient fixtures.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>7/11/13</p>	

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/30/08</p>	<p>The EPA named Rutgers "WasteWise Partner of the Year for 2007" for its food organics recycling, traditional recycling efforts and Chemical Reclamation Program. During the 2007 reporting period, the university's waste prevention initiatives resulted in more than 15,800 tons of material that was either recycled or reused, saving Rutgers almost \$840,000 in landfill costs.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/30/08</p>	<p>Rutgers is implementing a five-year program to retrofit or replace lighting fixtures. When completed, the university expects to see annual energy cost savings of \$4 to \$5 million, and reduce electricity use by more than 42 million kilowatt hours per year.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/30/08</p>	<p>In April, captured the "Gorilla Prize" in RecycleMania 2008, by collecting more than 2.7 million pounds of recyclables during the 10-week contest.</p>

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/28/16</p>	<p>Industrial Container Rain Water Use Cycle: Steel industrial containers, or more commonly known as 55-gallon drums, typically are used for the transport of petroleum products over the world's oceans and highways. These containers, after being emptied by the user of the product, can be used over and over again as long as they are not damaged in handling or corroded from being exposed to the elements for long periods of time. The process of returning a drum for reuse has multiple steps and is typically performed by a US Department of Transportation registered reconditioner. The process starts with shipping the empty drums from the user of the product to the reconditioning facility. The first step at the facility is inspecting each drum for eligibility for reuse. If it can be reused, it then gets an initial internal pressure wash with hot water followed by a pressure rinse of hot water. This removes 90% of the residual petroleum material that may have remained in the drum. The drum then gets a second internal pressure wash and an external wash. The last wash step is the drum then is filled with steam for a prescribed time period. After being steamed the steam is immediately vacuumed out rendering the drum dry. The drum then goes down the line to be leak tested, steel shot blasted to remove the original paint, repainted, appropriate labels and markings applied and ultimately sold to the next user. The operation above is water intensive if all the wash steps used city water. What this facility has done is to start collecting rain water. The rain water is used in the final internal rinse. This rinse is done by using a 700-gallon tank of rain water that is recirculated into the drum and gravity fed back into the tank. This water will last (work effectively) for several thousand drums. Once the water is spent it is pumped into transport tanks and is used to replace the water in the initial rinse tank. The initial rinse tank water is used to replace the water in the initial wash tank. Wastewater from the initial wash tank is sent to a used oil recycling facility that separates the petroleum from the water. The petroleum is refined and sold as a fuel and the water is treated. The only process that uses city water is the steaming of the drums at the end. This uses a few ounces of city water per drum and provides for clean steam to maximize the cleanliness of the drum. The condensate that is vacuumed out is collected and is used to replenish the initial wash and rinses tanks as they lose water due to evaporation.</p>

If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/28/10	The company is swapping out high hazard for low hazard materials in their processes. Simple Green All-Purpose Cleaner replaced a harsh Oakite product in degreasing. An organic acid toilet bowl cleaner replaced Flush Away. Blasocut, a water-miscible metal working coolant, replaced Simcool & other cutting oils which caused employee respiratory issues.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	10/28/10	The company implemented a four (4) day/ten (10) hour per day schedule to eliminate unnecessary commuting trips.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	10/28/10	While the company had no written environmental purchasing policy per se, they were able to demonstrate which chemicals on-site fit the criteria as environmentally responsible products.

PSE&G AUDUBON GAS T&D

Site ID: PSE&G AUDUBON GAS T&D
10477 535 NICHOLSON RD,
AUDUBON, NJ 08106

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/5/16	The facility replaced 6 bathroom sink water nozzles in order to reduce PSE&G's water consumption. Urinals were upgraded with sensors to activate flushing frequency and water reduction.

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/5/16</p>	<p>PSEG offers no-cost charging and free parking to employees participating in the electric car incentive program. PSE&G continues to take action to lower the emissions from our own fleet of vehicles. They have improved the fuel efficiency of the fleet by 15% over the past 5 years. Almost 50% of the light truck duty vehicles are now hybrids, and 66% of the aerial lift trucks now have electric drives, allowing the operation of the lift without running the engine. At this location, they've purchased 14 hybrid vehicles that have been in use since 2008. See website: https://www.pseg.com/info/environment/sustainability/pdf/sustainability_report.pdf</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/5/16</p>	<p>PSE&G has clean energy- producing solar farms built on landfills and industrial properties called brownfields which feeds power into the electric grid. For example, Thorofare Solar Farm, Trenton Solar Farm, and Camden Schools. See website: https://www.pseg.com/info/environment/sustainability/pdf/sustainability_report.pdf</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/5/16</p>	<p>FEAT (Functional Environmental Achievement Team) is an environmental outreach resource group that participates in various projects like the Barnegat Bay Osprey Event and the Earth Day Events.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/5/16</p>	<p>Southern Gas Environmental Professionals implement the company's written environment policy located in the Utility Operation Services Environmental Guidance Procedure Manual.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>1/5/16</p>	<p>PSEG is a partner in the Natural Gas Star Program, which implements cost-effective technologies and practices to reduce greenhouse gases.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/5/16</p>	<p>When considered for a new contract of any type, suppliers go through a rigorous pre-qualification review. See website, https://www.pseg.com/info/environment/sustainability/pdf/sustainability_report.pdf</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/5/16</p>	<p>PSEG has a Solar 4 All Program that uses pole-attached solar panels which saves space while generating highly distributed solar energy to the grid. In addition, the Solar Loan Program targets businesses and homeowners. See website: https://www.pseg.com/info/environment/sustainability/pdf/sustainability_report.pdf</p>

<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>1/5/16</p>	<p>PSEG publishes a sustainability report annually that indicates progresses made in order to lower their green house gasses. This report was primarily developed according to the Global Reporting Initiative (GRI) Sustainability Reporting Guidelines Version 4 (G4). The report is extensive and covers almost all sources of green house gasses and if and how they were lowered compared to the previous year's reports. See website, https://www.pseg.com/info/environment/sustainability/pdf/sustainability_report.pdf</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>1/5/16</p>	<p>After contracts are awarded, the performance of key suppliers is monitored by PSEG Procurement in concert with the Corporate Health and Safety organization. In addition, a third party compliance auditor verifies certain health and safety information to conform with regulatory and PSEG standards. See website: https://www.pseg.com/info/environment/sustainability/pdf/sustainability_report.pdf</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>1/5/16</p>	<p>PSE&G's energy efficiency programs are designed to serve the broadest range of customers. For example, we target many of our energy efficiency efforts to hospitals, residential multifamily housing, non-profits and municipal buildings, and thus ensure the societal benefits are distributed more widely across the communities. See website: https://www.pseg.com/info/environment/sustainability/pdf/sustainability_report.pdf</p>

PSE&G CAMDEN GAS PLANT M&R STATION

Site ID: PSE&G CAMDEN GAS PLANT M&R STATION
14081 2ND ST & SPRUCE ST,
CAMDEN, NJ 08105

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/30/17</p>	<p>A Waste Minimization plan is in place for the entire department. Scorecard measures encourage reducing the generation of hazardous waste.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>11/30/17</p>	<p>Employees are trained throughout the year about General Environmental Awareness that involves waste management, spill prevention, hazardous waste areas, sensitive areas and climate change initiatives.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/30/17</p>	<p>PSE&G's Functional Environmental Achievement Team (FEAT) is an environmental outreach resource group that participates and sponsors various projects such as river cleanups, invasive plant removal, and urban gardening.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/30/17</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>11/30/17</p>	
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>11/30/17</p>	<p>Company posts its annual corporate sustainability report.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>11/30/17</p>	<p>The site is included in the company's involvement in the EPA Natural Gas STAR Program, of which PSE&G has been a member of since 1993.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>11/30/17</p>	<p>A consultant was hired to create an air source inventory for this site to identify and document all air emission sources.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>11/30/17</p>	<p>PSE&G Environment, Health and Safety Program Guide element 11 - Systems shall be in place to provide a reasonable level of assurance that contractors, suppliers, and business partners comply with applicable EHS requirements and do not present undue risks to the business.</p>

REDKEYS DIES

Site ID: REDKEYS DIES
19661 1307 MARKET ST,
GLOUCESTER CITY, NJ 08030

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/24/08	Nightly shutdown of all machinery, lights and computers. lighting fixtures are on motion sensors.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/24/08	Product delivery vehicle was downsized to smallest available engine size in 2006. Vehicle mileage improved from 12 mpg to 25 mpg.

RESINTECH INC @ 1 RESINTECH PLAZA

Site ID: RESINTECH INC @ 1 RESINTECH PLAZA
 182532 160 COOPER RD,
 BERLIN TWP, NJ 08091

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/11/16	Three oil based reciprocating compressors which ran at maximum continuously while in operation were replaced with 3 new high efficiency units with variable speed control which responds to demand on an as needed basis.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	3/11/16	Facility has an Environmental Policy and employees are made aware of the policy for the site. ISO 9001:2008 Certified. In the process of obtaining ISO-10001.
11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.	3/11/16	Replaced two thirds of the toilets with low flow toilets.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/11/16	Two large 300 kW solar fields installed in 2012 on Resintech Property. One is jointly owned & used by Compex Corp (located on Commerce Drive behind Resintech) and one provides power exclusively to Resintech and back to the grid. Resintech upgraded the electrical system in the buildings to make best use of the solar panel electricity to further reduce energy usage. Solar field used by resintech has 7 large panels in each row of 12 rows. Resintech has a large flat panel screen monitor in the reception area that has a live feed readout of the electricity being produced and cumulative energy reductions since the initial date of operation.

RIVER FRONT RECYCLING & AGGREGATE

Site ID: RIVER FRONT RECYCLING & AGGREGATE
 35402 1301 26TH ST, & HARRISON AVE
 CAMDEN, NJ 08105

Stewardship Activities	Date Acknowledged	Comments
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/18/13</p>	<p>The old lighting system has been upgraded with "Green Lamps" fluorescent lights to conserve energy. The new low-energy "Green Lamps" have been installed throughout the building.</p>

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	11/12/14	A drip irrigation system is used in the hanging basket plants area to conserve water.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/12/14	The farmer recycles and reuses the plastic containers, pots, hanging baskets, and other nursery containers. The farmer recycles pesticide empty containers with Camden County on their hazardous waste collection day.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	11/12/14	The farmer uses natural light. If needed, fluorescent lighting is used in the greenhouses to conserve energy.

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/21/14</p>	<p>They have a mercury free program that covers their thermometers and pressure cuffs. They also recycle their fluorescent tubes and pipette tips.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/21/14</p>	<p>Implemented major energy use reduction methods on the buildings' interiors. Movement triggers lights and fume hoods to stay on or turn off automatically.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/21/14</p>	<p>They have a comprehensive Environmental Policy that covers all affected media on campus ie: Underground Storage Tanks, Air and Water Quality, Pesticide Use, Wetlands preservation, Solid and Hazardous Waste management and source reduction and recycling.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/2/11</p>	<p>the university has implemented a mercury free program with the thermometers and pressure cuffs. They also recycle their fluorescent tubes and pipette tip boxes.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/2/11</p>	<p>Installed motion sensors on their light fixtures and occupancy sensors for their HVAC system on some newer buildings.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/2/11</p>	<p>UMDNJ has adopted a university wide Environmental Pollution Control Policy that covers all aspects of possible affected media on campuses: underground storage tanks, air & water quality, pesticide use, wetlands preservation, solid and hazardous waste mangement, and source reduction and recycling.</p>

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/5/14	Food waste other than meat is put into grey bins and then fed into the Bio Tec machine. The Bio Tech machine breaks down the food into water, which is then flushed into the septic/waste water sewer. The following excerpt was taken from the website www.biohitech.com, "Eco-Safe Digester® is simple technology that eliminates food waste on-site. Since the digested food waste is converted into grey water it is natural to use the municipal sewer systems to transport that water to wastewater treatment facilities where it will be recovered. There is no waste to store or transport, no solids generated, and no extra handling is required." The solid waste compactor pick up has been substantially reduced since the Bio Tech machine was implemented. The solid waste compactor was getting picked up every Monday and Friday. Thus, less waste being put into the landfills.

21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	11/20/17	They sweep more streets than what is required.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	11/20/17	The Green Committee provides compost bins to residents and a vegetable garden at the school.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	11/13/14	Conducts street sweeping of local streets in town although no regulatory requirement to do so. Will begin to report quantity remove even though not required
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	11/13/14	Established Green Committee; Rain Garden set up at Community Center; Compost Bins provided to residents

SPRINGDALE FARMS

Site ID: SPRINGDALE FARMS

 CHERRY HILL TWP, NJ 08003

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/13/13	Springdale Farms has installed a drip irrigation to conserve water use.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/13/13	Springdale Farm uses recycle plastic bags at their market.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/24/15	The farm uses Integrated Pest Management (IPM) methods, including controlling weeds mechanically. This reduces the total amount of pesticide applied.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/24/15	This site recycles empty pesticide containers, reducing waste.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/24/15	The business uses high efficiency fluorescent lighting, conserving energy.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/13/13	2/3 of the imperfect tomatoes are either feed to pigs or sent to a local food bank eliminating disposal in the landfill.

STRATFORD BORO DPW & SEWER AUTH STP

Site ID: STRATFORD BORO DPW & SEWER AUTH STP

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/10/13	Stratford Borough has updated and upgraded its internal lighting system (replacing 40 yr. old fixtures) with new high efficiency, low wattage fixtures and bulbs in the Municipal Building and in the Public Works Building.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/16/10	Yes. "Soft start" electrical controls installed on two pumping stations (PS), PS #1 in the summer of 2007 & PS #2 in the summer of 2008. Changing to these controls reduces electricity usage at the stations.

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/22/18	Facility conducted a lighting replacement project for the entire production area. All fluorescent lighting fixtures were replaced with low-energy, high-efficiency LED lighting fixtures.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	6/22/18	Facility employs an employee trip reduction program which allows for telecommuting and flexible work schedules.

THANKS FOR BEING GREEN

Site ID: THANKS FOR BEING GREEN
463848 5070 CENTRAL HWY, STE B
PENNSAUKEN, NJ 08109

Stewardship Activities	Date Acknowledged	Comments
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	6/8/15	Consumer electronic pickups and employee locations are coordinated to minimize travel.
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	6/8/15	The facility warehouse has skylights, reducing the need for lighting. The facility also installed zone lighting, so only lights in areas where work is being performed are turned on. The facility also installed motion detecting switches in the bathroom, so lights are not left on by mistake.
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	6/8/15	The facility communicates with other businesses and schools to discuss improving their electronic recycling, even if they don't contract with Thanks for Being Green. Thanks for Being Green recently partnered with Cherry Hill East High School to hold a collection event and educate on the importance of electronic recycling:
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	6/8/15	The company has a one page Environmental Policy.
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	6/8/15	The company has an Environmental Management System.
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	6/8/15	The facility signed a contract with Coverall Health-Based Cleaning System. They only use environmentally friendly cleaning supplies / systems. As part of their R2 certification the facility must audit our downstream vendors to ensure they are handling the product in an environmentally sound manner.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/7/15</p>	<p>U.S. Vision has upgraded much of their equipment in Surfacing, resulting in a reduction of water usage. U.S. Vision has also installed water reducing nozzles and automatic water turn on valves in their bathrooms in order to minimize water consumption.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/7/15</p>	<p>U.S. Vision strives to recycle and reduce waste in their facilities as often as possible. In 2014, the company recycled approximately 19 tons of materials including: leaves, office paper, non-ferrous metal, light iron, wood and used oil. Refer to the attached recycling report in the NJEMS attachments list for further details.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>8/7/15</p>	<p>Where possible, U.S. Vision purchases products and office supplies that are recognized as environmentally responsible.</p>

19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/18/14	purchase of hybrid vehicles for town fleet
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/18/14	motion sensors installed for lighting shutdown/energy saving, new energy efficient lighting and HVAC ,replacing older lighting/heating systems.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	3/18/14	Street sweeping over 100 miles of streets, 3 times a year, removing pollutants from the streets, although not required by permit. Gifting of land to Wharton State Park
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	3/18/14	Winslow Township is a Sustainable Jersey community and has received the Bronze level certification.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/18/14	solar panels for senior center, accounting for 80% of energy use at center

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/27/15	Alternative offers a "green" pesticide control program, where they use pesticides with EPA designated minimum-risk, exempt active ingredients, such as castor oil, in place of synthetic pesticides. Further, they use integrated pest management (IPM) techniques to reduce pesticide application. These include exclusion, cleaning, installing screens, and the use of steel wool. Instead of performing a pesticide application for fleas, they first vacuum, to see if that will resolve the problem. These practices include outreach to customers, explaining the reasoning behind these techniques and how they are effective. This reduces the application of chemical (hazardous) pesticides, reducing potential exposure to people and the environment.

AVALAWN CARE

Site ID: AVALAWN CARE
550912 46 BROOKS AVE,
CAPE MAY COURT HOUSE, NJ 08210

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/17/16	This business will not install landscape irrigation timers without rain gauges, to prevent irrigation when weather conditions render irrigation unnecessary. They advise customers to monitor weather conditions to prevent unnecessary irrigation and water waste.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/17/16	The shop utilizes natural light through a sun roof, reducing the business' energy consumption. Additionally, the business has a tankless water heater. The water heater turns on only when hot water is called for, rather than continuously running and keeping all water hot. This further reduces energy consumption.

AVALON BORO MUNICIPAL BUILDING

Site ID: AVALON BORO MUNICIPAL BUILDING
49307 3100 DUNE DR,
AVALON, NJ 08210

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/12/18	After a study on irrigation in green areas owned by the Township was conducted, Avalon now uses a smart irrigation system that uses sensors to determine humidity, wind, and temperature which will determine the correct time to irrigate using the most efficient methods to lower evapotranspiration.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/12/18	Changed over heating systems to gas powered radiant heat in municipal buildings and school.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/12/18</p>	<p>Avalon has an aggressive recycling initiative, including the implementation of recycling depots where they accept additional items beyond what is required to include rigid plastics, e-waste, and metal.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/12/18</p>	<p>Installed electric vehicle charging stations in Avalon.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/12/18</p>	<p>Converted all lighting to LEDs in all municipally owned buildings.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>9/12/18</p>	<p>Dune grass plantings are conducted every year, beach cleanups are conducted 2x/ year.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/12/18</p>	<p>In collaboration with the Wetlands Institute, Avalon implemented a terrapin protection project along highways and a monarch butterfly project in an area of open space in Avalon.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/12/18</p>	<p>The town has recently adopted an ordinance to eliminate the use of plastic bags, straws and cups from all businesses in Avalon.</p>

<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>9/12/18</p>	<p>Sustainable New Jersey 2017, recieved bronze certification</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/24/15</p>	<p>Conducted a study on irrigation for green areas owned by township and now use a "smart" irrigation system, that employs sensors to determine the humidity, wind, temperature which determines the correct time to irrigate. The irrigation systems are lower to the ground to avoid evapotransporative loss and the droplets are bigger so as not to be carried away by the wind.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/24/15</p>	<p>Changed over heating system in municipal buildings and school from propane to gas powered radiant heat which uses reflectors and is more efficient. Also have implemented a recycling program that includes rigid plastics, e-waste and metal, which goes beyond the required recycling items.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/24/15</p>	<p>Lighting changes to LED lights in municipal buildings and city hall.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>8/24/15</p>	<p>Dune grass plantings practices noted in 2012 are continued.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/22/12</p>	<p>Avalon has installed higher efficiency light bulbs and added motion sensors for the lighting in the Public Works Building.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>8/22/12</p>	<p>Avalon Borough implemented a Dune Vegetation Management Plan in 2010 and has continued management of the dunes in their community with ongoing dune maintenance projects, (i.e. planting of dune grasses, removal of black pines).</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/21/10</p>	<p>Avalon Borough Environmental Commission oversaw the development and implementation of the Dune Vegetation Management Plan. In 2010, a Pilot Project test area at 74th Street was initiated to reestablish native dune vegetation and remove Japanese Black pine from the sensitive coastal ecosystem. Dune Vegetation Management Plan http://www.avalonboro.org/news/dune-vegetation-plan/Website%2012_16_09%20Dune%20Veg%20Mgmt%20Plan.pdf</p>

BEACHCOMBER CAMPING RESORT

Site ID: BEACHCOMBER CAMPING RESORT
38037 462 SEASHORE RD,
LOWER TWP, NJ 08204

Stewardship Activities	Date Acknowledged	Comments
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/12/13</p>	<p>The main office is equipped with solar panels capable of generating 21 kW of electricity.</p>

BLUE STAR LAWN CARE CORP

Site ID: BLUE STAR LAWN CARE CORP
 376476 1411 RT 9 ,
 SWAINTON, NJ 08210

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/25/16	The business recycles grass clippings on 35 of his customers' properties. This improves soil tilth by increasing soil organic matter and water holding capacity, and by retaining plant nutrient level, including the nitrogen content, in the root zone of the soil and in the thatch, thus, reducing the need for synthetic fertilizer application. This increases nitrogen content, reducing the need for synthetic fertilizer applications.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/25/16	The business recycles grass clippings on 35 of his customers' properties. This improves soil tilth by increasing soil organic matter and water holding capacity in the root zone of the soil and in the thatch, thus, reducing the need for irrigation.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/25/16	The business uses LED lighting to conserve energy.

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/16/13	The farmer has drip irrigation on 10 acres reducing the water use in the field.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/16/13	This farm recycles his pesticide plastic containers. The pesticide containers are sent to state sponsored recycling program.

CAPE MAY CITY DPW

Stewardship Activities	Date Acknowledged	Comments
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/5/18</p>	<p>The convention hall and cape may city public works building underwent a lighting and ballast update project. Motion sensors were also installed.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/5/18</p>	<p>Cape May City has formed an environmental commission that conducts several outreach programs each year.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>9/5/18</p>	<p>Cape May City has an environmentally preferable purchasing policy that requires bidders to certify in writing that the environmental attributes claimed in competitive bids are accurate.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>9/5/18</p>	<p>Solar panels were installed at the lifeguard HQ, public works building, water treatment facility and convention hall.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/8/15</p>	<p>The Convention Hall in Cape May City and the Cape May City public works building changed out all of its old lights and ballasts and motion sensors were installed.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/8/15</p>	<p>Cape May City has formed an Environmental Commission that conducts several outreach programs each year. The latest were Harbor Fest, Harbor Clean Up Day, and a Nature Conservancy Clean Up Day.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>9/8/15</p>	<p>Solar Panels were installed at the Lifeguard headquarters, public works building, the water treatment facility, and the convention hall.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>9/8/15</p>	<p>Cape May City has an Environmentally Preferable purchasing policy (green purchasing policy) that requires bidders to certify in writing that the environmental attributes claimed in competitive bids are accurate.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/24/12</p>	<p>Convention Hall in Cape May City recently changed out all of its old lights and ballasts for most energy efficient ones. In addition, throughout Cape May City Hall new lights, ballasts and motion sensors were installed. The Cape May City Public Works Building got new lights and ballasts.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>10/24/12</p>	<p>Cape May City has formed an Environmental Commission that conducts several outreach programs each year. The latest were Harbor Fest, Harbor Clean Up Day, and a Nature Conservancy Clean Up Day</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/24/12</p>	<p>Solar Panels were installed at the Lifeguard Headquarters; Public Works Building; the Reverse Osmosis Facility and at Convention Hall.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>10/24/12</p>	<p>Cape May City has an Environmentally Preferable Purchasing Policy (called its Green Purchasing Policy). It is an 11 page policy that requires, as applicable, successful bidders to certify in writing that the environmental attributes claimed in competitive bids are accurate.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/9/16</p>	<p>The public works does not use pesticides or herbicides.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/9/16</p>	<p>Traffic lights use LED bulbs.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/9/16</p>	<p>County purchases hybrid vehicles for fleet and buses that run on bio diesel.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/9/16</p>	<p>County libraries constructed in Sea Isle City, Wildwood, and Stone Harbor are all LEED certified.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/9/16</p>	<p>Turtle fencing for all seashore communities on County roads in Stone Harbor and Sea Isle Blvd. to prevent turtle road crossing on highways.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/9/16</p>	<p>Have an active Clean Communities Program composed of 13 groups, all volunteers that organize road clean ups at various times throughout the year. Last year, 240 bags of road litter was cleaned up by Clean Communities people.</p>

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/9/16</p>	<p>Company purchases only green cleaning products and paper products.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>3/9/16</p>	<p>County libraries constructed in Sea Isle City, Wildwood, and Stone Harbor are all LEED certified.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/27/13</p>	<p>Public works uses biodegradable cleaner/solvents. No use of pesticides /herbicides</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/27/13</p>	<p>Traffic lights use LED bulbs replacing older less energy efficient bulbs</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/27/13</p>	<p>County purchases hybrid vehicles and buses that run on bio-diesel</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/27/13</p>	<p>Sea Isle City County Library received Silver LEED Certification. The building has the following: 1) High efficiency mechanical and advanced utility conservation systems 2) Geothermal heating and cooling system 3) Materials were purchased from within 500 miles of the site to promote local economy 4) Recycled content building materials, LED site lighting, low water use fixtures and native plants</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>9/27/13</p>	<p>Providing turtle fencing for all seashore communities for turtle protection.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>9/27/13</p>	<p>purchasing green cleaning products and paper products.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>9/27/13</p>	<p>Silver LEED Certification for the new County Library in Sea Isle City</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/17/08</p>	<p>Public works uses biodegradable part cleaner solvents. County does not use pesticides or herbicides</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/17/08</p>	<p>County crushes used oil filters to reclaim used oil for recycling, steel casings are recycled</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/17/08</p>	<p>County is purchasing hybrid vehicles and some vehicles will be using bio fuels</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>4/17/08</p>	<p>terrapin nesting habitats have been constructed near Corson's Inlet and Townsend's Inlet</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/17/08</p>	<p>Most housekeeping and paper products purchased are recognized as environmentally responsible products</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>4/17/08</p>	<p>provides assistance to other municipalities to address stormwater compliance</p>

CAPE MAY MARINA

Site ID: CAPE MAY MARINA
38305 124 ROSEMANS LN, 12 FALCON RIDGE FORMER
CAPE MAY, NJ 08204

Stewardship Activities	Date Acknowledged	Comments
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>5/14/09</p>	<p>Entire stormwater infrastructure has been re-designed to maximize the removal of sediment, oil, soluble metals, herbicides, pesticides and fertilizer as follows: The property is divided into three zones that first channel overland flow through grassy swales for sediment removal. Each of the three swales then delivers the stormwater to a dedicated "Stormwater Management StormFilter" unit that houses rechargeable media filled cartridges that trap particulates and absorb materials such as dissolved metals, hydrocarbons, and nutrients in polluted runoff prior to discharging to surface water.</p>

CAPE MAY NATIONAL GOLF CLUB

Site ID: CAPE MAY NATIONAL GOLF CLUB
 37833 834 FLORENCE AVE, & RT 9
 ERMA, NJ 08204

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/9/15	The golf course uses integrated pest management (IPM) programs to reduce chemical/pesticide input. This includes eliminating all pre-treatments of insecticides, scouting to observe pests and only then chemically treating the problem. The golf course superintendent maintains a higher pest threshold, in order to avoid unnecessary applications, thereby reducing the potential risk of harm for humans and the environment.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/9/15	All empty pesticide containers are recycled, rather than disposed of in general waste. This reduces the golf course's annual waste.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	7/9/15	Installation of solar panels providing all energy needs for clubhouse, maintenanc and operations
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/3/12	Installation of solar panels providing all energy needs for clubhouse, maintenanc and operations

CAPE MAY POINT BORO

Site ID: CAPE MAY POINT BORO
 129147 215 LIGHTHOUSE AVE,
 CAPE MAY POINT, NJ 08212

Stewardship Activities	Date Acknowledged	Comments
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/15/18</p>	<p>The Boro has changed all of the ballasts and light bulbs in the municipal hall and public works garage and office and has added motion sensors for the lighting and AC.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>10/15/18</p>	<p>The Boro planted a butterfly garden to promote Monarch habitat.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>10/15/18</p>	<p>The Boro gives away milkweed plants every year to residents to plant on their yards to increase the Monarch population.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/19/12</p>	<p>Cape May point Borough has changed all of the balasts and light bulbs in Borough Hall and in the Public Works garage and office as well as adding motion sensors which turn the light on and off in these buildings. In addition, a new more energy efficient central air conditioning unit was installed at the Fire Department.</p>

CAPE MAY POINT BORO DPW

Site ID: CAPE MAY POINT BORO DPW
58247 215 LEHIGH AVE, & YALE AVE
CAPE MAY POINT, NJ 08212

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	4/16/15	The Borough of Cape May Point rehabilitated approximately 1/4 acre of property owned by the Municipality located at the intersection of Oak and Sunset Blvd. The rehabilitated area is designed to attract different species of Butterflies, specifically the Monarch Butterfly (<i>Danaus plexippus</i>).

CAPE MAY WINERY & VINEYARD

Site ID: CAPE MAY WINERY & VINEYARD
 148035 709 TOWN BANK RD,
 LOWER TWP, NJ 08204

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/1/13	To reduce the use of hazardous materials (pesticides and herbicides), the farm uses Integrated Pest Management (IPM) techniques. Mechanical controls are employed to control weeds.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/1/13	To conserve water the farm uses a drip irrigation system to water crops in their fields.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/1/13	Energy efficient T5 fluorescent lighting is used at the facility to reduce energy use.

COASTAL LANDSCAPING

Site ID: COASTAL LANDSCAPING
 180212 2 16TH ST,
 MIDDLE TWP, NJ 08251

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/15/16</p>	<p>The business offers an Integrated Pest Management (IPM) type program for residential lawn care. This includes eliminating preventative treatments, use of pest monitoring, and treating only as needed. Lawns are core aerated and seeded, cultural practices that reduce pest pressure without resorting to pesticide application. These IPM practices reduce the overall amount of pesticides applied, thereby reducing risk to human health and the environment.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/15/16</p>	<p>Coastal Landscaping also offers irrigation services, including "smart controllers" for irrigation. As part of their program, they educate customers on how to conserve water use. This includes using rain sensors and discouraging irrigation done on a "timer" basis; Coastal Landscaping educates customers on taking weather conditions into account when turning on their irrigation system. They use a wireless system to monitor sprinklers remotely, from their office location, and they employ new, updated nozzles to further conserve water.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/15/16</p>	<p>The business has issued tablets to their employees for record keeping, reducing paper consumption. They also offer email communication with their customers whenever possible, further conserving materials used.</p>

Site ID: COMTOM
 553453 443 DELSEA DR, AKA RT 47
 CAPE MAY COURT HOUSE, NJ 08210

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/5/18	Pets at Peace purchases and distributes Zero Waste pet body bags from Pet Passages to the local veterinaries in the area and once they are re-collected they are incinerated at Pets at Peach reducing the amount of emissions that normal pet body bags typically emit. These Zero Waste pet body bags are environmentally friendly because they are manufactured using recycled plastic which is cleaner for the environment because they don't use raw/virgin material.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	10/5/18	Pets at Peace also inspects the pet body bags for toys and removes them prior to incineration. Any toys or beds that owners leave along with the deceased pets are cleaned and donated to the Cape May County Animal Shelter.

CONOVER FARMS

Site ID: CONOVER FARMS
 127866 306 DELSEA DR, AKA RT 47
 MIDDLE TWP, NJ 08210

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/21/17	To reduce hazardous materials, the farmer cuts the grass and weeds mechanically, and use an integrated pest management system (crop rotation, scouting insects) to monitor the fields.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/21/17	
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/21/17	To save energy, the farmer placed fiber glass panels on the roof of two buildings and uses fluorescent lighting in the main building.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/28/13	Since 1973, the farm has used drip irrigation on 50 acres of farmland to conserve water use.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/28/13	The facility uses energy efficiency T8 fluorescent lighting and has installed fiberglass panels in the roof of the packinghouse to allow natural light to supplement the electrical lighting in the facility and reduce energy use.

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/15/14	Installation of low flush toilets and faucets in bath houses
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/15/14	LED lighting throughout all campground bldgs, motion sensors and energy efficient light bulbs for street lighting in Campground
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	7/15/14	Solar panel installation

EASTERN SHORE NURSING HOME & REHABILITATION CENTER

Site ID: EASTERN SHORE NURSING HOME & REHABILITATION CENTER
 17504 1419 RT 9,
 CAPE MAY COURT HOUSE, NJ 08210

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/30/13	Use of low flow fixtures and ongoing leak testing SOP. Eliminated laundering onsite
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/30/13	Replaced old incandescent and lighting system with compact fluorescent and T-8 bulbs

EXCLUSIVE LAND DESIGN INC

Site ID: EXCLUSIVE LAND DESIGN INC
 230182 658 GOSHEN RD,
 CAPE MAY COURT HOUSE, NJ 08210

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/1/16	Mr. Saioni engages in several Integrated Pest Management (IPM) practices at his business. Specifically, he scouts for turf pests, rather than perform a broadcast application. He also hand pulls weeds, reducing herbicide applications. These practices reduce the total amount of pesticides applied by the business.

FOREVER GREEN LAWN CARE @ PLAZA 9

Site ID: FOREVER GREEN LAWN CARE @ PLAZA 9
28689 215 SHORE RD, AKA RT 9
MARMORA, NJ 08223

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/16/16	This business voluntarily recycles its pesticide containers, rather than placing them in general waste. This reduces the total amount of nondegradable waste the facility generates.

GARDEN GREENHOUSE & NURSERY INC

Site ID: GARDEN GREENHOUSE & NURSERY INC
 148041 1919 RT 9,
 CLERMONT, NJ 08210

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/27/13	This site uses Integrated Pest Management (IPM) methods to reduce the amount of pesticides used in this facility, especially in the weed control, which is controlled manually
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/27/13	Drip irrigation system is used to reduce water usage.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/27/13	In the site is used high efficiency lighting T5.

HARBORTOWN RESORT MARINA INC

Site ID: HARBORTOWN RESORT MARINA INC
38291 900 OCEAN DR,
CAPE MAY, NJ 08204

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/29/13	Installed a 100% water recycling system for boat wash operations at the marina
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	10/29/13	Harbortown Resort Marina Inc provides a free pump out service to boaters to keep them from dumping sewage into the ocean.

HOLLY LAKE CAMPGROUND

Site ID: HOLLY LAKE CAMPGROUND
37506 HOLLY RD,
DENNIS TWP, NJ 08214

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/30/12	Changed out all lighting throughout campground from incandescent to flourescent, even in some instances purchasing new lighting fixtures to replace those incandescent fixtures that wouldn't accommodate flourescent bulbs

HOLLY SHORES CAMPGROUND

Site ID: HOLLY SHORES CAMPGROUND
37952 491 RT 9,
LOWER TWP, NJ 08204

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/21/17	To reduce hazardous materials, the farmer recycles the pesticide empty container, cut grass and weeds mechanically and uses IPM (crop rotation-monitoring pets in the field).
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/21/17	To save water,the farmer has 15 acres with drip irrigation system.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/21/17	The business uses Fluorescents lighting to save energy.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/1/13	The farmer has installed drip irrigation on 10 acres of his farm which conserves water.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/1/13	The facility has upgraded all fluorescent lighting to the more energy efficient T- 5 light fixtures throughout the facility.

NATALI VINEYARDS

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	6/23/17	<p>To reduce hazardous materials, the business recycles all pesticide containers. Also, this farm uses Integrated Pest Management (IPM) methods to reduce the amount of pesticides used on the farm. Next, he monitors the pests in the field and cuts grass and weeds mechanically.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	6/23/17	<p>The farm uses a drip irrigation system to save water.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	6/23/17	<p>This farm has about 8 big windows in the roof to conserve energy and uses LED lighting.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	9/18/13	<p>Natali Vinyards uses Integrated Pest Management (IPM) methods to reduce the amount of hazardous materials (i.e. pesticides and herbicides) used in this facility, especially for weed control, which is controlled mechanically.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	9/18/13	<p>A drip irrigation system had been installed in 7 acres of the vineyard to conserve water.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/18/13</p>	<p>This farm recycles all pesticide containers. The pesticide containers are sent to a state sponsored recycling program.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/18/13</p>	<p>The farm uses energy efficient fluorescent lights inside the facility and also has installed 8 skylights in the roof to allow natural light into the facility to reduce energy use. .</p>

NJ AMERICAN WATER CO

3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	5/27/09	The Environmental Policy was adopted May 30, 2008 and can be found on the American Water Works Company, Inc. website at the following web address: http://www.amwater.com/files/Environmental_Policy_2008-05-30.pdf

NORTH WILDWOOD CITY MUNICIPAL BUILDING

Site ID: NORTH WILDWOOD CITY MUNICIPAL BUILDING
9608 901 ATLANTIC AVE,
NORTH WILDWOOD, NJ 08260

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	10/19/17	The City has designated natural areas by the Hereford Lighthouse and the amphitheater that they maintain, they sweep more than what is required in the permit continuously, they put permanent sediment filters in all new inlets to keep sediment loading out of their piping, and they use watertight seals on replacement piping for storm water system upgrades to eliminate the possibility of groundwater infiltration.

NOVASACK BROTHERS TURF FARMS

Site ID: NOVASACK BROTHERS TURF FARMS
 42128 DENNISVILLE RD & GRACETOWN RD,
 SOUTH SEAVILLE, NJ 08246

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/18/13	The farm recycles the empty pesticides container. The pesticide containers are sent to state sponsored recycling program.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/18/13	High efficiency T5 fluorescents lighting is used inside of the business.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	9/18/13	The facility uses environmentally friendly Go green products as cleaning supplies for the office.

OCEAN CITY GOLF COURSE

Site ID: OCEAN CITY GOLF COURSE
558611 26TH ST & BAY AVE,
OCEAN CITY, NJ 08226

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/21/15	They also implement integrated pest management (IPM) practices. By minimizing water usage, they prevent fungicides. This limits the amount of pesticides (chemicals) input on the course, reducing potential exposure to harm from pesticides for the public on the course and the surrounding environment. Furthermore, they use IPM practices (threshold, mechanical control) for the soccer fields on the course, as they are primarily used by children.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/21/15	The golf course uses city water, and Mr. Gaskill stated they syringe the property and hand water the property, as opposed to continuous mechanical irrigation, to stay below an 85,000 gallon threshold. Furthermore, they utilize rain sensors to prevent unnecessary watering.

OCEAN CITY MUNICIPAL BUILDING

Site ID: OCEAN CITY MUNICIPAL BUILDING
157426 861 ASBURY AVE, & 9TH ST
OCEAN CITY, NJ 082263444

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/6/13	use of LEDS now for Traffic lights and Boardwalk/Street Lights
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/6/13	use of biodiesel for vehicles

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/6/13</p>	<p>motion sensors and thermo control for energy use reduction in buildings. Use of CFLs and LED for signage</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/6/13</p>	<p>Solar panels for buildings in place</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/19/09</p>	<p>Biodiesel used to fuel City vehicles and hybrid vehicles purchased. New city-wide trolley system initiated in 2007, downtown area has "free" trolley service. City street converted to a bike way to encourage biking.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/19/09</p>	<p>All city buildings use CFLs, began using LED signage, improved thermostat controls, aerators and motions detectors</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/19/09</p>	<p>- Ocean City sponsors an Earth Day Celebration, Env. Commission participated in Project Porchlight - passing out CFL bulbs on the boardwalk and throughout the community.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/19/09</p>	<p>Installation of 2000 solar panels on five City buildings</p>

<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>11/19/09</p>	<p>The City has provided speaker for conferences and workshops to assist other communities in achieving sustainability, including, Cape May Chamber of Commerce, Association of New Jersey Environmental Commissions, New Jersey League of Municipalities, New Jersey Future, and Rutgers Sustainable State Institute.</p>

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/3/16	The course does not treat their pools (water areas). they engage in manual algae collection. This prevents the use of algacides and reduces the total amount of pesticides used on the course.

SEA ISLE CITY DPW

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/19/18	LED light bulbs are still in use on street lights along JFK Blvd. Also it was reported that the City uses LED lights on Holiday Lighting Displays in city.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/19/18	Energy efficient lighting and heating/cooling systems are utilized in municipal buildings.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	1/19/18	The Municipality through the Environmental Commission continues to run an invasive species eradication program. Specifically, Dune Grass plantings are conducted. During these events invasive species are replaced with Dune Grass and Beach Plums.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	1/19/18	A Diamond Back Terrapin ("DBT") Rescue Program which includes installation of fencing and /or structures to guide DBTs away from roadways.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	1/19/18	Two annual volunteer beach cleanup programs are conducted in the Municipality.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/1/17	The city has converted all the street and public lighting to LEDs.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/1/17</p>	<p>The city has energy efficient lighting, heating and cooling systems installed in all the municipal buildings.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>5/1/17</p>	<p>The city has an established invasive species elimination program that includes removing Black Pine trees, and replacing them with Beach plum trees. They also help maintain piping plover nesting areas by not placing garbage cans in nesting areas and not raking the beach if there is an established nest.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/1/17</p>	<p>There are 2 annual beach cleanups conducted between the City Environmental Commission and volunteers. They also have a turtle rescue program that includes the installation of fencing and structures to divert turtles from roadways. They have also newly installed a structure that acts as an egg laying sanctuary behind the library for them.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/19/16</p>	<p>LED light bulbs are still in use on street lights along JFK Blvd. Also it was reported that the City uses LED lights on Holiday Lighting Displays in city.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/19/16</p>	<p>Energy efficient lighting and heating/cooling systems are utilized in municipal buildings.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/19/16</p>	<p>The Municipality through the Environmental Commission continues to run an invasive species eradication program. Specifically, Dune Grass plantings are conducted. During these events invasive species are replaced with Dune Grass and Beach Plums.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/19/16</p>	<p>A Diamond Back Terrapin ("DBT") Rescue Program which includes installation of fencing and /or structures to guide DBTs away from roadways.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/19/16</p>	<p>Two annual volunteer beach cleanup programs are conducted in the Municipality.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/13/13</p>	<p>Use of LED light bulbs for street lights on JFK Blvd, LED lights for all Christmas lighting in city.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/13/13</p>	<p>Energy efficient lighting and new heating/cooling systems for municipal buildings.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>9/13/13</p>	<p>established an invasive species eradication program, replacing invasive species on dune and in town with species such as Beach Plums</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/13/13</p>	<p>2 annual volunteer beach cleanup programs, established a Turtle Rescue Program which includes installation of fencing and /or structures to guide turtles away from roadways</p>

SEASHORE ASPHALT CORP

Site ID: SEASHORE ASPHALT CORP
 14600 2451 DENNISVILLE PETERSBURG RD, AKA RT 610
 WOODBINE, NJ 08270

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/9/15	Facility has solar panel cells that generate a portion of the electricity to operate the plant.

SHOREWAY LANDSCAPING INC

Site ID: SHOREWAY LANDSCAPING INC
 573913 5200 SHAWCREST RD,
 WILDWOOD, NJ 08260

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/14/16	The business employs an Integrated Pest Management (IPM) program. Rather than preventatively broadcasting pesticides to all properties, Mr. Dunn has his employees scout for pests. Only when a pre-set number of pests are observed does the business perform a treatment. This reduces the total amount of pesticides, which are hazardous materials, applied by the business.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/14/16	After triple rinsing empty, plastic pesticide containers, Mr. Dunn voluntarily recycles them, reducing the total amount of waste generated by the business.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	10/14/16	The business is run from a residential location, which utilizes solar panels to generate 46% of the total consumed electricity.

SMART SOLUTIONS PEST MANAGEMENT CORP

Site ID: SMART SOLUTIONS PEST MANAGEMENT CORP
 412884 1115 DELSEA DR, AKA RT 47
 RIO GRANDE, NJ 08242

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/11/16	Mr. Bourne uses integrated pest management (IPM) techniques with his customers to reduce the total amount of chemicals applied. Primarily, this includes scouting for pests. He does not perform applications where there is no evidence of pest activity (i.e. does not broadcast treat when not deemed necessary). He also will use low-impact pesticides first, such as baits.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	7/11/16	The office is equipped with solar panels. This reduces the businesses overall non-renewable energy consumption.

SPRAY DOCK SALES & SERVICE

Site ID: SPRAY DOCK SALES & SERVICE
 38313 18 LAKE RD,

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/11/17	The boro's irrigation ordinance limits usage and saves water
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/11/17	The public works building is powered by solar power

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>4/11/17</p>	<p>The Wetlands institute and Clean Ocean Action teams up with the Township to host a beach clean up. The Township also hosts a volunteer planting of wildflowers to support monarch butterfly migrations</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>4/11/17</p>	<p>The Township has an informal agreement with landscapers to not blow grass clipping into the street to protect the stormwater.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/6/13</p>	<p>New energy efficient lighting in town bldgs, motion sensors for lighting, and new energy efficient cooling systems</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>9/6/13</p>	<p>Solar panels on Maintenance Bldgs</p>

TONYS MARINE RAILWAYS INC

Site ID: TONY'S MARINE RAILWAYS INC
38292 1203 RT 109,
LOWER TWP, NJ 082040000

Stewardship Activities	Date Acknowledged	Comments
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/13/09</p>	<p>Facility only uses biodegradable soaps when washing boats.</p>

TRI CNTY TERMITE & PEST CONTROL INC

Site ID: TRI CNTY TERMITE & PEST CONTROL INC
 517106 10 E 9TH ST,
 OCEAN CITY, NJ 08226

Stewardship Activities	Date Acknowledged	Comments
ENERGY STAR.	1/8/16	The office uses Energy Star rated appliances, conserving total energy consumed by the business.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/8/16	The business policy used is: Integrated Pest Management (IPM) techniques at all locations. Before applying a pesticide, the business uses non-pesticidal methods first, such as mechanical exclusion. Applicators will educate the customers about IPM techniques, including cleaning methods. If a pesticide must be applied, the business will use a low-impact pesticide first. IPM techniques are built into the contracts for all State/county buildings use for business services. All these practices reduce the total amount of pesticide being applied.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	1/8/16	The business participates in the Department of Agriculture's pesticide container recycling program, reducing the amount of waste designated for landfills and keeps all records electronically, reducing paper consumption.

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/18/13	installation of low flow toilets for public bathhouses and installation of motion sensors for all faucets in bathrooms
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/18/13	Ocean View Resort has changed out incandescents in all public bathrooms to more energy efficient fluorescent bulbs

UPPER TWP MUNICIPAL BUILDING

Site ID: UPPER TWP MUNICIPAL BUILDING
 17847 2100 TUCKAHOE RD,
 MARMORA, NJ 08223

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/23/17	Added motion sensors for lighting in all township buildings, as well as converted to LED at community center and gym. Also replaced HVAC to be more efficient in municipal building and community center.

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>10/23/17</p>	<p>The Township does two roadside cleanups a year by collaborating with community groups such as Boy Scouts and Clean Communities. Also established a living shoreline as part of a restoration project including a boat ramp where instead of hard scaping, native plants were planted.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>10/23/17</p>	<p>Set up butterfly garden at library and gives classes on rain barrels to residents.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>10/23/17</p>	<p>Received NJ Bronze certification with established green team initiatives.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/14/14</p>	<p>Added motion sensors in all Twp Bldgs reducing lighting use</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>8/14/14</p>	<p>Set up a Butterfly Garden project and Rain Barrell projects for Twp residents</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>8/14/14</p>	<p>Establish Twp Green Team for school outreach. Also set up a Butterfly Garden project and Rain Barrell projects for Twp residents</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/14/14</p>	<p>applied for Sustainable New Jersey certification. Established a "Green Team" in town</p>

WEST CAPE MAY BORO

Site ID: WEST CAPE MAY BORO
 45206 732 BROADWAY,
 WEST CAPE MAY, NJ 08204

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/28/15	West Cape May previously installed high efficiency, low wattage bulbs and motion sensors in the municipal building
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/28/15	Solar Panels were installed in the 2010, they create enough energy to power the municipal building
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/15/13	West Cape May has installed high efficiency, low wattage light bulbs and motion sensors at the municipal building (not in the court room).
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	1/15/13	Solar Panels were installed in 2010; they create the electricity for the municipal building.

20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/15/14	Solar panels installed on roof

WILDWOOD CITY MUNICIPAL BUILDING

Site ID: WILDWOOD CITY MUNICIPAL BUILDING
 14525 4400 NEW JERSEY AVE,
 WILDWOOD, NJ 08260

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/25/13	Street light upgrade - change out of older bulbs with new energy efficient LED lighting
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/25/13	Special meshing installed in stormwater inlets to prevent wildlife getting caught up in inlets, also retrofitted all inlets in city to comply with new opening requirements, even though not required until a roadway is repaved.

WILDWOOD CONVENTION CENTER

Site ID: WILDWOOD CONVENTION CENTER
 173248 4501 BOARDWALK,
 WILDWOOD, NJ 08260

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/25/14	They are part of the State of NJ's SMART program, BPU & Clean Energy Program, njcleanenergy.com
11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.	9/25/14	Center has installed LED lighting in the hallways and outside emergency lighting.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/25/14	Convention Center has installed 600 Kw solar panels on the roof.

WILDWOOD CREST BORO

Site ID: WILDWOOD CREST BORO

21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	11/26/13	Reconstruction of Sand dunes and native species plantings with all costs covered by the city as an environmental enhancement plus protection. Street sweeping through City removing close to 400 tons of sand/debris that would have made its way to the waterways.

WILLOW CREEK FARMS

Site ID: WILLOW CREEK FARMS
59301 168 STEVENS ST,
WEST CAPE MAY, NJ 08204

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/15/13	This farm uses Integrated Pest Management (IPM) methods to reduce the amount of pesticides use in this facility. Weeds are controlled mechanically to reduce the use of herbicides in the fields.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/15/13	Drip irrigation has been installed on 50 acres of farmland to reduce water used in the field.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/15/13</p>	<p>This farm recycles all pesticide containers. The pesticide containers are sent to a state sponsored recycling program.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/15/13</p>	<p>This farm uses all fluorescent lighting T5 inside the facility to save energy . Solar panels have been installed and generate renewable energy for the winery storage area.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>8/15/13</p>	<p>The facility has installed solar panels which generates renewable energy for the winery storage area.</p>

WOODBINE BORO

Site ID: **WOODBINE BORO**
127149 **809 FRANKLIN ST,**
WOODBINE, NJ 08270

Stewardship Activities	Date Acknowledged	Comments
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/8/13</p>	<p>New low wattage, high efficiency light bulbs and motions sensors have been installed at the Borough Hall.</p>

YESTERDAYS RESTAURANT & LIQUOR STORE

Site ID: YESTERDAYS RESTAURANT & LIQUOR STORE
38046 316 ROOSEVELT BLVD,
UPPER TWP, NJ 082230000

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/23/16	The facility recently replaced all lighting with LED lighting to reduce energy use.

3RD TIMES A CHARM FARM

Site ID: 3RD TIMES A CHARM FARM
487247 65 SCHAFFER AVE,
CEDARVILLE, NJ 08311

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/8/13	The farmers recycles the empty pesticide containers through the state sponsored program.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/8/13	The facility uses high efficiency T5 fluorescents lighting.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	8/8/13	The facility uses an environmentally friendly cleaning product for all purpose clean up at the farm.

ACKLEYS DEERVIEW NURSERY

Site ID: ACKLEYS DEERVIEW NURSERY
 144938 36 W DEERFIELD RD, AKA RT 540
 UPPER DEERFIELD TWP, NJ 08318

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/29/14</p>	<p>This farm recycles the pesticide containers. The pesticide containers are sent to state sponsored recycling program to reduce materials.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/29/14</p>	<p>The farmer has a truck (Eco-Boots) used in the farm with high efficiency in the combustible using.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/29/14</p>	<p>The business has high efficiency lighting LEDs and fluorescent lighting to save energy. High efficiency air and heater are used in the business, as well as a high efficiency refrigerator in the workers' lunch room to increase energy efficiency.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>7/29/14</p>	<p>The farmer has solar panels to run his business saving energy.</p>

ADAMUCCI FARMS INC

Site ID: ADAMUCCI FARMS INC
 128596 TRENCH RD & BARRETT RUN RD, AKA 1 ADAMUCCI LN
 HOPEWELL TWP, NJ 08302

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/10/14	The site uses mechanical controls for weeds, and inspects the field before any pesticide application to eliminate unnecessary chemical application. Ladie bugs are also used to naturally control insects.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/10/14	The farmer has 60 in drip irrigation system to save water..
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/10/14	The site uses high efficiency lighting and natural light in the packinghouse.

ARDAGH GLASS INC

Site ID: ARDAGH GLASS INC
 14522 443 S EAST AVE,
 BRIDGETON, NJ 08302

Stewardship Activities	Date Acknowledged	Comments
ENERGY STAR.	7/19/16	Received Energy Star as they are within top 10% of energy efficiency

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/19/16</p>	<p>Facility received their Certification for ISO 14001 which helps reduce environmental impacts as their business grows.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>10/30/13</p>	<p>Cooling towers were installed for reuse of process cooling water.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>10/30/13</p>	<p>The company replaced all production and warehouse lighting with high efficiency lighting within the last 5 years,.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>10/30/13</p>	<p>All reject containers are crushed and re-melted in the process. This reduces solid waste and reduces natural gas use.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>10/30/13</p>	<p>Facility is currently participating with 4 other glass companies in a Life cycle analysis.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>10/30/13</p>	<p>Since 2003, the facility utilizes trip consolidation. For example shop off and final destination.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/30/13</p>	<p>Skylights were installed in remote warehouse. The warehouse is operated during daylight hours only so the skylights eliminate the need for lighting during working hours. Insulating the roofs to reduce heating and cooling energy.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>10/30/13</p>	<p>Facility purchases post-consumer cullet from recyclers to maintain a target of 35% post-consumer recycled cullet into glass.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>10/30/13</p>	<p>Facility works with trucking firms to practice "Drop & Pull". When load comes in, the trucker drops the load first to unload and pulls an empty trailer to ensure there is no idling of trucks waiting to unload.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/25/08</p>	<p>Cooling towers were installed for reuse of process cooling water.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/25/08</p>	<p>a. Energy efficiency improved with the implementation of oxy-gas firing on Furnace 1 in September 1999. b. Waste heat recovery (Edmeston Particulate Control System) was implemented as part of this particulate reduction process in the new source Furnace 2 in April 1998. The process was incorporated from installations in Europe and modified for use in an oxy-gas furnace. The process relies on capturing waste heat, which would normally go to the atmosphere, by forcing the hot exhaust gasses through cullet. This process reduces glass melting energy by 10-15% in furnace 2 by reducing both oxygen and natural gas.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/25/08</p>	<p>All reject containers are crushed and re-melted in the process. This reduces solid waste and reduces natural gas usage.</p>

<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>4/25/08</p>	<p>Leone is currently participating with 4 other container glass companies in a Life Cycle Analysis.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/25/08</p>	<p>In 2003 Leone began utilizing trip consolidation. For example, "shop off" and "final destination".</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/25/08</p>	<p>Skylights were installed in the remote warehouse. The warehouse is operated during daylight hours only so the skylights eliminate the need for lighting during working hours. Insulated roofs reduce reduce heating and cooling energy.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/25/08</p>	<p>Leone purchases post-consumer cullet from recyclers to maintain a target of 35% post-consumer recycled cullet in the glass. Packaging material is purchased from vendors who use recycled paper.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/25/08</p>	<p>Leone works with trucking firms to practice "Drop & Pull". When a load comes in, the trucker drops the load first to unload and pulls an empty trailer to ensure there is no idling of trucks waiting to unload.</p>

20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	10/22/18	The facility is equipped with solar panels capable of generating 63,000 kW of renewable energy.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	11/1/17	The facility is equipped with solar panels capable of generating 63,000 kW of renewable energy.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	10/11/16	The facility is equipped with Solar Panels capable of generating 63,000 kW of renewable energy. The system was put into service in February 2012.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	10/20/15	The facility is equipped with Solar Panels capable of generating 63,000 kW of renewable energy. The system was put into service in February 2012.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	12/9/13	The facility installed Solar Panels capable of generating 63,000 kW of renewable energy. The system was put into service in February 2012.

BLUE STERLING NURSERY

Site ID: BLUE STERLING NURSERY
 127965 372 SEELEY COHANSEY RD,
 HOPEWELL TWP, NJ 08351

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/30/15	90% of weeding is mechanically-hand pulled, reducing the need for this establishment to apply herbicides to control the weeds.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/30/15	This establishment recycles the water they use to irrigate the plants and ornamental crops they grow for sale.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/30/15	This establishment makes an effort to recycle the empty plastic containers that they retail/wholesale their ornamental plants in. They also reuse the plastic containers when possible.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/30/15	This establishment has installed fluorescent lighting in their offices, breakroom, and storage building.

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/12/17</p>	<p>Applied to CCIA for use of sweeping to be composted and land applied. Sweepings are sampled and if they meet criteria, kept out of the hazardous waste removal inventory.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/12/17</p>	<p>Bridgeton City has a vehicle wash bay system that recycles all wash water.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/12/17</p>	<p>Bridgeton City has been actively switching all street lampposts to LED lighting.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/12/17</p>	<p>Bridgeton City has partnered with the Littoral Society to build, paint, and provide rain barrels to several public areas throughout the City. Currently the barrels are staged at the zoo. The Littoral Society has also been active in developing rain gardens.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/23/14</p>	<p>vehicle wash system that recycles all the wash wastewater for reuse</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/23/14</p>	<p>changed out over 40 street lampposts to LED lighting</p>

BRIDOR USA INC

Site ID: BRIDOR USA INC
58816 2260 INDUSTRIAL WAY,
VINELAND, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/1/11	Warehouse and offices are lit by sky lights to illuminate work space. If electric lighting is used, high efficiency bulbs are in place.

CALPINE NJ GENERATION CUMBERLAND GENERATING STATION

Site ID: CALPINE NJ GENERATION CUMBERLAND GENERATING STATION
15862 4001 E MAIN ST, AKA RT 49
MILLVILLE, NJ 08332

Stewardship Activities	Date Acknowledged	Comments
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	8/23/10	In the spring of 2010, Calpine donated 10,000 saplings for distribution to the students of school districts in Millville & Vineland. In addition, employees have been participating in the annual Fall coastal clean-up (Delaware Bay day).

CARL MEHAFFEY NURSERY

Site ID: CARL MEHAFFEY NURSERY
 128717 226 PECKS CORNER COHANSEY RD,
 BRIDGETON, NJ 08001

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/18/17	The farmer recycles pesticide empty containers and others plastic with a private company. The farmer reduces his hazardous waste use by cutting weeds and grass mechanically, as well as using other IPM methods to control pests in fields.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/18/17	This farm has solar panels for the electricity in his farm. The farmer puts high efficiency lighting T5 in his garage used to repair the agricultural machineries and uses fluorescent lighting, in his business.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/1/13	The farmer puts high efficiency lighting T5 in his barn/garage used to repair the agricultural machinery at his nursery.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	7/1/13	This farm uses solar panel for the energy in the farm.

Site ID: CARL TARABBIO JR FARMS
127972 3104 S WEST BLVD,
VINELAND CITY, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/22/17	The farmer recycles the empty pesticide containers to reduce hazardous materials and mows weeds to use less herbicides, in the field. Also, the farmer uses an integrated pest management (IPM) program to handle pests.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/22/17	To save water approximately 6.5 acres has a drip irrigation system used on it.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/22/17	the business uses LED lighting to reduce energy.

CASA DI BERTACCHI CORP @ VINELAND IND PK

9385 1910 GALLAGHER DR,
VINELAND, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/23/14	Each of the two boiler units were fitted with "Combustion Management Systems" that reduced natural gas consumption with a savings of \$8,000 to \$20,000. Boiler #1 was fitted in 2007 and Boiler #2 was fitted in 2009.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/23/14</p>	<p>In 2012 the facility installed T5-HO bulbs with individual motion sensors on each fixture in all the warehouse areas.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/27/12</p>	<p>April 2009, Boiler #2 was fitted with a "Combustion Management System". This installation reduced consumption of natural gas for an additional savings of \$5,000-\$8,000.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/27/12</p>	<p>Installed 2012, all warehouse areas now use T5-HO bulbs with individual motion sensors on each fixture.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>10/20/09</p>	<p>April 2009, Boiler #2 was fitted with a "Combustion Management System". This installation reduced consumption of natural gas for an additional savings of \$5,000-\$8,000.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/20/09</p>	<p>Casa Di Bertacchi replaced 1/3 of its roof with GAF Materials Corp EverGuard TPO Design Line. This EverGuard TPO white roof membrane meets or exceeds the initial and "aged" ENERGY STAR reflectivity requirements. Casa Di Bertacchi plans to continue roof replacement with this product line.</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/8/08</p>	<p>In 2007, Boiler #1 was fitted with a "Combustion Management System". Reduced consumption of natural gas yielding a savings of \$20,000 in fuel efficiency. Boiler #2 is planned to be fitted with the "Combustion Management System" in 2009.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/30/15</p>	<p>The nursery uses Integrated Pest Management (IPM) practices, reducing the amount of pesticide needed for effective pest control. Weeds are controlled weeds mechanically, and beneficial insects field monitoring are employed to avoid pesticide applications.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/30/15</p>	<p>Of the 300 acres sown, 260 are watered using a drip irrigation system. This conserves the total amount of water necessary to sufficiently irrigate the crop. The remaining 40 acres are irrigated only with natural rainfall.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/30/15</p>	<p>The business uses computers to communicate with customers, as opposed to mailing or photo copying paper. This conserves total material used. This site recycles empty pesticide containers and nursery containers with the Department of Agriculture and Helena Chemical Recycling program, reducing the amount of waste.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/30/15</p>	<p>This business uses a combination of high efficiency LED lighting and natural sky lighting to conserve energy. The office uses natural ventilation, further conserving energy.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>9/30/15</p>	<p>"Green" products are used for cleaning.</p>

COVIA HOLDINGS CORP DIVIDING CREEK FACILITY

Site ID: COVIA HOLDINGS CORP DIVIDING CREEK FACILITY
15863 1100 WHITEHEAD RD,
DIVIDING CREEK, NJ 08315

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/24/15</p>	<p>This location recycles all cardboard, paper and plastic. They are not required to do this by the municipality. They have to pay to get everything taken by Waste Management</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/24/15</p>	<p>They have replaced all light bulbs in the office buildings with high efficiency green bulbs</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/24/15</p>	<p>The facility has Wildlife habitat Council Certification. Each year, they plant native plants to invite native birds to establish a habitat. They also have released 300 quail hatchlings to the property for reintroduction. They continually replenish sedum as a food source and blackberry and multiflora rose for habitat.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/24/15</p>	<p>A corporate environmental Policy is in place for all locations</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/9/08</p>	<p>During the summer months, the site maintains electric curtailment during peak hours when the temperature is high. The plant runs its operations at night during non peak hours. The impact of reducing the amount of electricity equates to less emissions generated by electric companies.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>4/9/08</p>	<p>The site has been involved in environmental enhancement projects with the Wildlife Habitat Council (WHC) since 1994. The site will be applying for recertification with WHC in 2008.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/9/08</p>	

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/9/08</p>	<p>Unimin's EMS system cross references ISO's 14000/EMP and consists of EMP sections for Process Management, Process Control and Process Assurance Sections.</p>

19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/12/08	"Tele-Conferencing" meetings to reduce trips & conserve fuel
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/12/08	Lighting is being converted to high efficiency fluorescent bulbs throughout the Emergency 911 Communication Center
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	6/12/08	"Car pooling" initiative in place

22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	4/13/17	CCIA continues to capture landfill gas where it is collected and sends across the way to Cumberland County Gas to convert it to Energy using 3 (16.54 MMBtu/hr. - 1600 KW each) engines that burn the landfill gas to produce an average 3.4 MW of electricity with all 3 engines operating at about 75% load. This system went on-line in March of 2009 and continues to produce electricity as the landfill is currently expanding to add 3 more cells.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	10/9/09	Captured methane gas from the landfill is generating electricity, which is being sent to the public use grid. System went on-line March 2009 and is capable of generating a maximum of 4.9 MWatt of energy. Currently, it is operating three generators at 98% efficiency.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/17/15	The farmers utilize integrated pest management (IPM) practices, reducing the total amount of pesticide application necessary to control pests. This includes monitoring the field before any pesticide application, to see if a pest infestation exists. Weeds are eliminated mechanically and pulled up by hand, reducing herbicide applications.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/17/15	The farm utilizes a drip irrigation system, conserving the total amount of water necessary to sufficiently irrigate the crops.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/17/15	The business installed energy efficient fluorescent lighting to conserve energy.

DEERFIELD TWP

Site ID: DEERFIELD TWP

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/2/12	The plant "Chemical Approval" process limits or eliminates the hazardous materials brought into the plant.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/2/12	A water reuse project was installed that reduced water consumption by more than 50 million gallons
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/2/12	A project was installed that reduced natural gas usage by 50 billion btu

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/2/12</p>	<p>Vineland plant has and will continue to seek out product suppliers to reuse packaging materials such as pallets, totes, cardboard and chipboard</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/2/12</p>	<p>Entire warehouse area, which encompasses 1/2 the total plant, has been retrofitted with motion sensor fluorescent lighting activated only when activity is taking place.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/2/12</p>	<p>Corporate website details Environmental Policy at General Mills. CEO has been an active supporter and has delivered key-note addresses at Sustainability Summits hosted by the food industry. For more details, see http://content.generalmills.com/Responsibility/Environment.aspx</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/2/12</p>	<p>E.M.S. in place throughout the facility</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/2/12</p>	<p>The Vineland plant utilizes technology to reduce travel by using "Live Meeting" and "Global Crossing" to meet with peers in Minneapolis rather than traditional flight travel</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/1/09</p>	<p>Entire warehouse area, which encompasses 1/2 the total General Mills / Progresso Quality Foods plant, has been retrofitted with motion sensor fluorescent lighting activated only when activity is taking place in the warehouse</p>

GENOA FARMS INC

Site ID: GENOA FARMS INC
128564 373 UNION RD, & GENOA AVE
VINELAND CITY, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/23/13	Recycling pesticide containers

GROWMARK FS

Site ID: GROWMARK FS
31041 55 SILVER LAKE RD ,
BRIDGETON, NJ 08302

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/20/13	Rain water collected from pesticide and fertilizer secondary containment and containment pads is collected into dedicated water recycle tank and used as diluent in commercial spray operation of this Business.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/20/13	Delivers product (pesticides and fertilizers) in refillable bulk containers to agricultural producers requesting bulk delivery eliminating smaller packaging units requiring disposal or recycling of containers.

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/20/13</p>	<p>1. Replacement pick-up trucks are smaller and use flex fuel. 2. Product delivery schedules are adjusted to accommodate multiple customers in fewer trips.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/20/13</p>	<p>1. Roof of newly constructed bulk-storage building contains clear/ transparent sections reducing need for interior lighting and electrical energy. 2. Installed energy-efficient lighting fixtures and lamps and appliances in new building.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/20/13</p>	<p>1. Participated in the "Environmental RESPECT Awards" Project sponsored by DuPont Crop Protection Company and conducted by CropLife Media Group and Farm Chemicals International from 2006 through 2009. Business received awards for being judged 'best in the state of New Jersey' for two years and in 2007 was awarded an engraved crystal trophy as 'best in region' (five awards given in the US). Award recognizes in part the Business' "Display of concern for customer service and safety, and promotion of environmental stewardship among farmer-customers" and its "Active participation in environmental stewardship and in safety education for employees, customers and the community". 2. Donated seed and fertilizer to Quality Deer Management Association - Southern New Jersey Branch (Millville) for deer food plot. 3. Field scouts report the emergence and development of economic pest populations/infestations in the southern region of the State to Rutgers Cooperative Agricultural Extension Service for incorporation into their Weekly Newsletter forwarded to agricultural producers statewide providing an "early warning" of an advancing threat to crop production.</p>

19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	10/17/11	1. On-board cab heaters on all trucks so drivers don't have to idle vehicle when not on road 2. All trucks have been retrofitted to be aerodynamic, to save on fuel usage 3. All Trucks/Trailers have been retrofitted to 10 wheel units (one larger tire takes place of 2 conventional tires) to make overall vehicle more fuel efficient and also allows less end of life tire disposal. For more information see: http://www.epa.gov/smartway/documents/partnership/trucks/partnership/techsheets-truck/EPA-420-F10-041.pdf 4. All Truck engines have been set to not exceed 65 mph on open road, or 67 mph on cruise.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	10/17/11	All cleaning products are biodegradable

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/9/18	To reduce hazardous material use, the business recycles empty pesticide containers, the plastic mulch and the drip irrigation tap. Grass and weeds are also cut mechanically.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/9/18	To save water, the farmers have a few acres of a drip irrigation system.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/9/18	This business has high efficiency LED lighting and uses electronic communication with their customers.

 CEDARVILLE, NJ 08311

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/12/13	This farm recycles all pesticide containers. The pesticide containers are sent to state sponsored recycling program. This farm uses Integrated Pest Management (IPM) methods to reduce the amount of pesticides use in this facility.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/12/13	This farm uses drip irrigation on 30 acres of the facility for water use reduction.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/12/13	Within the last two years, the facility upgraded all fluorescent lighting to the more energy efficient T- 5 light fixtures throughout the facility.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	8/12/13	J.G. Akerboom Nurseries has been participating in the Woodland Stewardship Management plan. The farm is inspected each year for continued participation and every 10 years, the site must renew its participation in the program. The owner has received a recognition certificate for his participation in this program.

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/17/17	The farmer has a drip irrigation system in place to save water.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/17/17	The farmer uses a IPM program to control pests and they cut weeds mechanically to avoid the need to apply herbicides and they recycle the pesticide empty containers.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/17/17	The business is mainly computerized to reduce paper and they use LED lighting to save energy.

The machinery for the drip irrigation was created by the farm.</p>

KAFFE MAGNUM OPUS INC

Site ID: KAFFE MAGNUM OPUS INC
 496470 500 WADE BLVD,
 MILLVILLE, NJ 08332

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/9/13	The facility's newest coffee roaster, a Loring - Kestrel S35, was purchased deliberately for its exhaust recirculation and fuel efficiency. This roaster uses 80% less fuel to that of a similar direct exhaust unit.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	12/9/13	There are two items which would fall into this category: 1) All coffee is received in burlap bags. These bags used to go to the landfill. The bags are now sent to local tree farms and are used to ball the roots of the trees/shrubs. 2) Coffee chaffe, the waste product from the roasting of coffee beans, is sent to local farms and is used as a soil nutrient. This highly organic waste is tilled into the soil. Again, this waste product initially was landfilled.

KERNAN FARMS

Site ID: KERNAN FARMS

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/12/10	Installed restrictor hoses reducing water flow from 1200 gpm to 600 gpm
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/12/10	Installed "solar bee" solar panel in waste water lagoon for power operation

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/12/10</p>	<p>Recycled 30.37 tons of steel and aluminum scrap metal in 2008. Also recycled 17,447 tons of clam shells.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/12/10</p>	<p>Installed new energy efficient lighting system</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/12/10</p>	<p>Purchases only boxes made out of recycled materials.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/12/10</p>	<p>Installed "solar bee" solar panel in lagoon system for power generation to run aerators in lagoon</p>

LANDIS SEWER AUTH WWTP & PUMP STATION

9353 1776 S MILL RD, DEAD END
VINELAND, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/10/11</p>	<p>During warmer summer months, LSA takes 1/2 the plant off line to use energy more efficiently</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/10/11</p>	<p>1. Replanted White Cedars 2. Bob White Project: In 2011 grasses planted for bob white habitat. Bob Whites were also released 3. Active "Forest Management Plan"</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>11/10/11</p>	<p>1. Agricultural-Forestry Program Only biosolids are used on LSA farm sites - no chemical fertilizer is used 2. 185kw Co-generator on site allowing LSA to utilize up to 72,000 cf/day of methane from the digester for energy. Co-generator produces ~1million BTUs of hot water for use in the LSA facility buildings.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/10/11</p>	<p>1. LSA provides public speakers on environmental issues. 2. LSA also offers on-site tours of the facility, highlighting environmental features</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/10/11</p>	<p>Landis Sewerage Authority "Mission Statement" outlines a comprehensive environmental policy</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/10/11</p>	<p>1. Second phase has a total of 17,180 solar panels at LSA 2. Wind turbine capable of generating 1.8 - 2.4 kw of electric.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>8/13/09</p>	<p>Reducing LSA's demand for electricity, a new 185Kw Co-Generation on-site facility utilizing up to 72,000 cf/day of greenhouse gases (methane) from the digester that was wasted and burned as flares in the past, went on line in 2008. This "green" electric power also produces almost a million BTU's of hot water for use in the LSA treatment facility.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>8/13/09</p>	<p>Phase 1 installation of 15,000 solar panels has been completed. Also the installation of a wind turbine capable of generating 1.8 - 2.4 kw of energy has been completed. Official dedication of all green energy systems at LSA is planned for September 17, 2009.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>8/18/08</p>	<p>Reducing LSA demand for electricity, a new 185 Kw Co-Generation on-site facility utilizes up to 72,000 cf/day of greenhouse gases (methane) from the digester that was wasted and burned as flares in the past. This "green" electric power also produces almost a million BTU's of hot water for use in the LSA treatment facility</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/23/13</p>	<p>This farm uses Integrated Pest Management (IPM) methods to reduce the amount of pesticides use in this facility, since 1983.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/23/13</p>	<p>This farm uses drip irrigation on 800 acres of the facility for water reduction.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/23/13</p>	<p>This farm uses all fluorescent lighting inside the facility.</p>

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	10/10/14	The facility has switched to newer, low NOx boilers to burn cleaner, more efficient fuel, primarily natural gas.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	10/10/14	The facility has switched to an in-house bottle plant adjacent to their juice plant, eliminating significant transportation.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/22/16	The business uses mechanical weed control in place of pesticide.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/22/16	The farmer uses drip irrigation, and a high efficiency pump.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/22/16	The pesticide empty containers are recycled.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/22/16	The air conditioning used here is high efficiency.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/14/18	To reduce hazardous materials, rice bulls are used to control weeds and grass and weeds are controlled mechanically.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/14/18	3.3 million gallons of water are recycled and reused per year, and approximately 10 acres of the farm use a drip irrigation system.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/14/18	The tractor uses a high efficiency system to save fuel.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/14/18	The business uses LED(s) lights and high efficiency appliances (freezer and heater).
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/14/18	The business has 180 solar panels.

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/9/16</p>	<p>The facility installed an electric vehicle refueling station located in the front parking lot, open to the public. Through New Jersey's Clean Energy Program, Mamacita upgraded their HVAC and lighting systems. The facility uses T-5 fluorescent lighting throughout the building - (T5 fluorescent lamps have a higher luminous efficacy than T8 lamps while the luminous efficacy indicates how much light a lamp generates from the energy it consumes. The higher the value, the more energy efficient the lamp is). The facility also operates 3 tankless HW heaters (demand-type or instantaneous water heaters provide hot water only as it is needed thereby eliminating the standby energy losses associated with storage water heaters). Mamacita also installed a Power Management System from Adirondack Energy. This Power Management System 'smooths' out power being supplied to the load or process, eliminating unwanted signals and variations bringing current and voltage waveforms in alignment. This system saves money and energy simultaneously. The Power Management Boxes, located in various areas of the facility, increases their power efficiency factor from 83 to 99% throughout the building.</p>

KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/7/09</p>	<p>Eliminated the use of Chlorine and SO2 at WWTP by switching to UV.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/7/09</p>	<p>Recycles the effluent at the WWTP for plant washdowns and operations. Reuse approximately up to 100,000 gallons a day.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/7/09</p>	<p>Provides for school trips through facility and developed website that explains water quality and what should be put down drains.</p>

MOONEYHAM NURSERY

Site ID: MOONEYHAM NURSERY
 145663 560 HARMONY RD,
 BRIDGETON, NJ 08302

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/21/18</p>	<p>To reduce hazardous materials, the farmer controls weeds and grass mechanically, the pesticides empty containers are recycled with the Helena Chemical and the nursery containers are occasionally re-used.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/21/18</p>	<p>The farmer has 6 acres in drip irrigation system to save water.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/21/18</p>	<p>The business uses fluorescents and LED lighting and a high efficiency heater.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/15/15</p>	<p>Uses mechanical weed control to avoid applied herbicides. Monitoring pests in the field previously to decide any pesticide application</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/15/15</p>	<p>The farmer has drip irrigation system to save water.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/15/15</p>	<p>The pesticides empty containers are recycled with the Helena Chemical Program.</p>

MUZZARELLI FARMS

Site ID: MUZZARELLI FARMS
 158733 3460 OAK RD,
 VINELAND, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/9/15	The farmer has designed the building to control pesticide spills- the pesticide storage area, and mixing area are located in this site. The pesticide application equipment is washed in this building. The farmer uses Integrated Pest Management (IPM) to control pests in the field. Mechanic weed control is used to save herbicide.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/9/15	The farmer has 100 acres in drip irrigation system to save water. The irrigation pump is high efficiency Tier 4. The water used in the packinghouse and the yard is recycled. This water is used in the field.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/9/15	To save energy the farmer uses LED's and T5 fluoresces

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/27/18	Refurbishing Dept. replaced VOC paints with aqueous paints. The facility installed a new parts cleaner to reduce volumes of waste generated on-site.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/27/18	Recycling of Hydro Testing Water Installation of eight waterless urinals
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/27/18	Replaced old equipment with energy efficient equipment to reduce energy consumption. Replaced 3 old Air Compressors with 2 new Gardner Denver Air Compressors with VFD's.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/27/18	Installed LED Lighting fixtures, this includes the removal of approx. 25 Metal Halide Lights. Installed 60 LED Warehouse High Bay Lights with motion and light sensors in Buildings 2, 3 and 4 to date. Installed 97 LED Lights in Admin/Conference Rooms/Break Room/Outside.

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/31/17	At Vial & Ampule location, the facility has installed a mop water recycling system. This is a self-contained oil/water separator which recirculates filtered water for mop water reuse. Residual waste is hauled and treated by Safety-Kleen.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/31/17</p>	<p>All glass furnace drains drain directly into a small crusher (installed directly under each drain) which converts the glass into reusable cullet for batch make-up. Normally furnace drain glass is stored outside and must be hauled offsite because it no longer meets usable specifications (exposed to outdoor contamination).</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>8/31/17</p>	<p>Facility installed a 3,211 solar panel system on "K shed " warehouse. The system generates 700 KW of power.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/5/15</p>	<p>In 2013-2014, the non-contact cooling systems for all furnace water jackets were changed to "crusher" systems, reducing water usage ~50%.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/5/15</p>	<p>New French high efficient transformers have been installed for their electric furnaces.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/5/15</p>	<p>Bad batch mixtures are recycled either as cullet, or sent to asphalt plants as part of their mix. Due to the increase in value in scrap metal, all scrap metal is separated and recycled.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/5/15</p>	<p>Nipro is certified for ISO 14001-2004 Environmental Management System.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/5/15</p>	<p>Two roof-top solar systems, 200 & 500 kW installed, starting 3/12,</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/23/14</p>	<p>New French high efficient transformers have been installed for their electric furnaces.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/23/14</p>	<p>Bad batch mixtures are recycled either as cullet, or sent to asphalt plants as part of their mix. Due to the increase in value in scrap metal, all scrap metal is separated and recycled.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/23/14</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/23/14</p>	<p>Nipro is certified for ISO 14001-2004 Environmental Management System.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/23/14</p>	<p>A large roof-top solar array has been installed to help reduce electricity usage.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/26/12</p>	<p>New French high efficient transformers have been installed for thier electric furnaces.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/26/12</p>	<p>Bad batch mixtures are recycled either as cullet, or sent to asphalt plants as part of their mix. Due to the increase in value in scrap metal, all scrap metal is separated and recycled.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/26/12</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/26/12</p>	<p>Nipro is certified for ISO 14001-2004 Environmental Management System.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/26/12</p>	<p>A large roof-top solar array has been installed to help reduce electricity usage.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/3/09</p>	<p>Added a new transformer for the electric furnaces to reduce energy usage.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/3/09</p>	<p>So called bad batch mixtures are recycled to an asphalt plant instead of landfilling. Scrap metal (including systems taken out of the processes) are accumulated and recycled. Single waste stream recycling program through Cifalogio Inc. includes magazines (not part of Cumberland County mandated items).</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/3/09</p>	<p>ISO 14001 certified.</p>

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/13/13	In September 2011, nine LED lighting fixtures were installed in the parking areas of Bayside Minimum Prison and five fixtures for the parking area of the Maintenance Shop. About 2 yrs ago, all of the lighting was upgraded to the new T-8 grade lights at Bayside Medium Prison.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/24/12	Addition: In September 2011, nine LED lighting fixtures were installed in the parking areas of Bayside Minimum Prison and five fixtures for the parking area of the Maintenance Shop. Approximately six years ago, all of the motor control centers at three pumping stations at the Bayside Medium Prison were replaced with variable frequency drives (VFDs). Furthermore, over a period of approx. 2 years, all of the motors for air blowers and pumps were changed to high efficiency motors in the complex, including at least 30 VFDs. About one yr ago, all of the lighting was upgraded to the new T-8 grade lights at Bayside Medium Prison.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/17/11	Approximately five years ago, all of the motor control centers at three pumping stations at the Bayside Medium Prison were replaced with variable frequency drives (VFDs). Furthermore, over a period of approx. 2 years, all of the motors for air blowers and pumps were changed to high efficiency motors in the complex, including at least 30 VFDs. In the past year, all of the lighting was upgraded to the new T-8 grade lights at Bayside Medium Prison.

------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/27/15</p>	<p>The facility recycles pesticide empty containers. Also the nursery plastic containers are recycled through a company. The facility uses mechanical controls to reduce the amount of herbicide used.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/27/15</p>	<p>The farmer uses drip irrigation to save water.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/27/15</p>	<p>The facility uses mechanical controls to reduce the amount of herbicide used.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/27/15</p>	<p>This agricultural facility has a building designed to contain pesticide spills. The pesticide storage area, the pesticide mixing area and the area to wash the pesticide application equipment are maintained, all of them in this building. The design of this working area contains any potential spills by directing them to a catch tank.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>3/27/15</p>	<p>This business was certified by Veriflora Sustainably Grown.</p>

 HOPEWELL TWP, NJ 08302

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/22/14	He uses mechanical control for weeds, reducing herbicides applied.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/22/14	The farmer has a drip irrigation system, reducing the total amount of water necessary to irrigate the crop.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/22/14	The site uses high efficiency lighting in the business, and a skylight in the packinghouse and the garage, conserving energy.

PONTANO THOMAS

Site ID: PONTANO THOMAS
 53812 1100 SHERIDAN AVE,
 VINELAND, NJ 08361

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/22/17	The farmer recycles the pesticide empty containers to reduce hazardous materials and weeds are mowed to use less herbicides, in the field. The farmer uses an integrated pest management (IPM) system to handle pests. Finally, the fields are monitored to detect pest infestation in the fields. Finally, a computerized system is used in the pesticide application equipment to calculate the amount of pesticide used for the targeted pest.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/22/17	The farmer has a drip irrigation system in place on some acres to save water.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/22/17	LED lighting is used in the business to reduce energy, as well as an irrigation pump system with a solar panel attached to it to save energy.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/13/13	The farm properly manages and disposes of pesticides by recycling old pesticide products on a yearly basis during the county clean-up days.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/13/13	The farm uses a drip irrigation system in all farm fields and this has resulted in reduced water use.

RIGGINS NURSERY

Site ID: RIGGINS NURSERY

20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/6/15	The site has solar panel cells that provide a portion of the electrical power needed to operate the plant.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	11/20/13	This stewardship survey confirms earlier survey, STW130001-240283. Solar panels provide electricity for most of operations at site
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/19/13	Solar panels provide electricity for most of operations at site

SPARACIO STRAWBERRY FARM

Site ID: SPARACIO STRAWBERRY FARM
51228 670 LANDIS AVE,
DEERFIELD TWP, NJ 08302

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/25/15	To control weeds, the farmer uses mechanical control, which reduces the use of chemical herbicides.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/25/15	Drip irrigation on 14 acres of peppers and strawberries for water reduction

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/25/15</p>	<p>This farm recycles all pesticide containers. The pesticide containers are sent to the state sponsored recycling program.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/14/13</p>	<p>The farmer uses drip irrigation system on 14 acres to reduce the amount of water usage in the farm.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/14/13</p>	<p>This farm recycles all pesticide containers. The pesticide containers are sent to the state sponsored recycling program.</p>

SUNNYSIDE FARMS INC

Site ID: SUNNYSIDE FARMS INC
 543028 331 MORTON AVE,
 ROSENHAYN, NJ 08352

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/27/15	Pesticide empty containers are recycled by USDA and Helena Company. The farmer uses high efficiency Tier 4 tractor to work the fields. This business has IPM system to control- uses mechanical weeds control, monitoring field before any pesticide application.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/27/15	Uses LED's bulbs to save energy.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/27/15	The farmer has high efficiency windmills to produce the energy handling the business.

SUNNY SLOPE FARMS

Site ID: SUNNY SLOPE FARMS
 42133 400 GREENWICH RD,
 HOPEWELL TWP, NJ 08302

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/31/14	This site uses Integrated Pest Management (IPM) techniques to reduce chemical input of herbicides. These include mechanical weed control.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/31/14	The farne has 50 acres in drip irrigation system to save water..
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/31/14	This site participates in Helena Chemical Corp's voluntary container recycling program. If it did not participate in this program, used pesticide containers would be entered into landfill.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/31/14	This site uses energy-efficient fluorescent lighting.

THOMAS SCRIVANI FARMS

Site ID: THOMAS SCRIVANI FARMS
 222888 4942 PIACENZIA AVE,
 VINELAND, NJ 08361

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/2/17	The business uses IPM practices to reduce hazardous materials and monitors it's farm field for pest infestation. Next, the grass and weeds are cut mechanically and they recycle their empty pesticide containers.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/2/17	To save water the farmer uses a drip irrigation system.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/2/17	The business uses fluorescent lighting to save energy.

TOLOTTI FARMS

Site ID: TOLOTTI FARMS
120325 2455 CORNUCOPIA AVE,
VINELAND CITY, NJ 08360

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/23/14	In the farm weeding is controlled mechanically to decrease herbicide applications in the field.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/23/14	The farmer has approximately 28 acres with drip irrigation system to save water. To save energy, the farmer has high efficiency sodium lighting and a skylight in his business. The farm has a high efficiency electric pump. All water pumps are Tier 3 or Tier 4.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/23/14	To save energy the farmer has high efficiency sodium lighting and skylight in his business. The farm has a high efficiency electric pump. All water pumps are Tier 3 or Tier 4.

------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/28/17</p>	<p>Hazard Materials Reduction: - Facility uses chemical-based drug testing kits. After use, a stabilizing powder is added, so the spent product becomes regular waste instead of hazardous waste. -The facility previously used silver-based xray films in their medical department, but has since switched to digital x-rays.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/28/17</p>	<p>Water Reduction efforts are onsite include: - rainwater is collected, stored and re-used to clean the work dock area. - low flow toilets, sinks, showerheads and laundry (high efficiency washers) Also the facility is on private well water from the Kirkwood-Cohansey aquifer.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/28/17</p>	<p>LED lights have been installed at various locations throughout the bldg (replacing the less efficient CFL lighting). At least 1,000 LED lamps installed so far.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/28/17</p>	<p>Recycling: numerous materials are recycled: - dental amalgam waste (a regulated medical waste) is filtered out from the water stream and recycled annually to Solmetrix company. - palletes are repaired/recycled by Poor Boy Pallet. - food waste is recycled through Waste Management - waste Fryer Grease / Kitchen Grease is recycled by Smarter Fuels - a large quantity of waste alkaline batteries (ex, AA batteries) are sent back to the distributor, Power Commissary Inc. - waste printer ink cartridges are recycled through Funding Factory. - approximately 700 lbs per year of brass from spent firearm shell casings (onsite shooting range) are recycled to Giordanos in Vineland NJ. - expired/waste x-ray films (containing silver) are sent offsite for recycling.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/28/17</p>	<p>Transportation improvements have been implemented: - Buses are equipped with diesel particulate filters to reduce air pollution - three electric vehicles are used onsite (3 gator trucks)</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/28/17</p>	<p>An outreach program does exist. A community relations board meets quarterly where the public and businesses are invited to attend.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/28/17</p>	<p>The facility does have an Environmental Management Plan. It is comprised of 12 distinct procedures. Overseen by Mr. Jeff Unger. Started in 2012. Assigned Committee members each play a designated role based on the functions of their specific department. Meet quarterly. Purposes of this Environmental Management Plan are multifold, including, for example: - Increase recycle rate - training with affected personnel on operational controls and SOPs - annual drills For example, did a mock drill of a fuel spill at an above ground storage tank during a supplier delivery. - Document control (revisions are re-dated) - environmental concerns are ranked based on their potential for adverse affects, with determinations on how to prevent a negative impact, and are re-ranked each year. - NJ state regulations and federal EPA regulations are reviewed - internal auditing is done once per year (unannounced) to ensure all departmental policies are being followed - employee concerns can be reported to this committee - implementation of corrective action of any violations (if applicable) - develop new goals and objectives each year</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>6/28/17</p>	<p>An annual effectiveness report is created. It indicates what areas need improvement, documents the results of the environmental audits, etc. A 60 page annual report is published, but only on the intranet for internal use only, due to security concerns with this being a correctional facility.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/28/17</p>	<p>Purchasing policy is implemented for eco-friendly products, such as: - dish soap and laundry soap - Green Spartan multi-purpose surface cleaner (product name HDQC2) - no voc paint</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/28/17</p>	<p>Renewable Energy: solar panels are installed (by Constellation Energy) and have been operating since approximately 2012-2013. The facility owns these solar panels, and the power generated is used solely at their buildings and is not sold back to the grid. These solar panels supply a portion of their overall electricity needs but not 100%.</p>

US SILICA CO MAURICETOWN PLANT

Site ID: US SILICA CO MAURICETOWN PLANT
 16023 9035 NOBLE ST,
 MAURICETOWN, NJ 08329

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	5/20/16	1) The facility created a community park known as "Mauricetown Park". The park is maintained by U.S. Silica and the Boy Scout Troops from Vineland and Cape May. All materials required for repairs and upkeep of the park are supplied by U.S. Silica. 2) U.S. Silica partakes in a project with the NJDEP Division of Fish, Game & Wildlife known as the "South Jersey Quail Project". This project is designed to build potential quail nesting areas to aid in the re-population of the quail species in South Jersey.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	10/27/15	The facility has created a community park known as "Mauricetown Park." The park is maintained by U.S. Silica and Boy Scout Troops from Vineland and Cape May. U.S. Silica Provides all materials necessary for repairs and upkeep of the park. U.S. Silica also partakes in a project with the NJDEP Division of Fish & Wildlife known as the "South Jersey Quail Project." This project is designed to build potential quail nesting areas to aid in the re-population of the quail in South Jersey.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/16/13	This farmer uses Integrated Management Pest(IPM) in his farm to control pests, reducing pesticides application in the field.

WHEATON INDUSTRIES INC

Site ID: WHEATON INDUSTRIES INC
9489 300 M ST,
MILLVILLE, NJ 08332

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/13/18	The Zonar system is fully electronic and reduces the need for paper.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	6/13/18	Through the DVR report, excess idling and emissions from idling are monitored and used against the driver's bonus. In addition to CO2, emissions of CO, NOx, VOC and PM are logged and reported from idling.

WHITE WAVE FOODS

Site ID: WHITE WAVE FOODS
26270 70 ROSENHAYN AVE,
BRIDGETON, NJ 08302

Stewardship Activities	Date Acknowledged	Comments
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/5/08	all trucks and tractors used at this farm operate on biodiesel

ZIRKLES NURSERY

Site ID: ZIRKLES NURSERY
503612 473 SHEPPARDS MILL RD,
BRIDGETON, NJ 08302

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>1/25/19</p>	<p>Empty pesticide containers are recycled through the Helena Chemical recycling program. Grass and weeds are controlled manually and/or mechanically. The parking lot and driveways are cover by stones to control weeds. Pests are monitoring in the field.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/25/19</p>	<p>The farm has a drip irrigation system.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/25/19</p>	<p>The business uses fluorescent, LED(s) lighting, high efficiency heater and air conditioner.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/27/14</p>	<p>The nursery uses PB irrigation. This system regulates the amount of water that can be used to irrigate the crops, according to the crop needs. This prevents unnecessary overwatering of the crops.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/27/14</p>	<p>The farm recycles all greenhouse plastics, and all nursery plastic containers are reused. This reduces the total amount of waste generated by the facility.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/27/14</p>	<p>The business uses high efficiency fluorescent lighting.</p>

220 LITTLE FALLS ROAD BLDG @ PECKMAN RIVER IND PLAZA

Site ID: 220 LITTLE FALLS ROAD BLDG @ PECKMAN RIVER IND PLAZA
 81360 220 LITTLE FALLS RD,
 CEDAR GROVE TWP, NJ 07009

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/29/14	This site has changed their lighting throughout the facility to 4' T8 Starcoat Ecolux lamps. These lamps are more energy efficient than the previous lamps. See attachments for more specific information on T8 lamps. In addition, Aerospheres, Inc. replaced a unit heater with a new unit heater that is more efficient than the existing unit heater. The new heater is 83% efficient compared to the old heater which was 60% efficient.

 IRVINGTON, NJ 07111

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/20/11	Site has installed energy efficient lamps through PSE&G Energy Efficient Upgrade Proposal. Hi-Speed signed contract for upgrade on 4/20/10 and PSE&G 5/4/10. Completed Job Certificat Form signed and dated on 6/12/10.

55 LA FRANCE AVENUE MANUFACTURING BUILDING

Site ID: 55 LA FRANCE AVENUE MANUFACTURING BUILDING
 9179 51 55 LA FRANCE AVE , 55 LA FRANCE AVE
 BLOOMFIELD, NJ 07003

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/27/13	General Plastics has reduced the amount of hazardous waste (adhesive sludge composed mainly of ethanol and methanol sludge) generated at the facility by making several adjustments to their equipment and by training their employees to operate the equipment more efficiently. Over the past 3 years the company has reduced the amount of hazardous waste generated and disposed of at the facility from 220 gallons per year to 55 gallons of hazardous waste.

ALCARO & ALCARO PLATING CO INC

Site ID: ALCARO & ALCARO PLATING CO INC
 8763 112 PINE ST, & GLENRIDGE AVE
 MONTCLAIR, NJ 07042

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	1/18/12	Alcaro & Alcaro was able to provide the Department with a copy of their Environmental Policy. This policy has been saved in NJEMS (Attachment List)
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	1/18/12	Alcaro & Alcaro is currently following management systems, standards, and guidelines that apply to ISO 14001:2004. Alcaro was originally approved on 12/19/03. Their ISO 14000:2004 certificate number is UEN 1079. Copy of environmental policy and environmental standards were placed into NJEMS.

AMERICAN FUJI SEAL INC

Site ID: AMERICAN FUJI SEAL INC
14905 17 STEWART PL,
FAIRFIELD, NJ 07006

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/3/08	ELECTRIC COMPRESSOR ROOM HOT AIR RECLAMATION SYSTEM
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	4/3/08	SHEET PLASTIC RECYCLING PROGRAM. NOV. 2006 TO JANUARY 2008, 320 TONS WERE RECYCLED.

ANHEUSER BUSCH

Site ID: ANHEUSER BUSCH
14244 200 RT 1/9,
NEWARK, NJ 07101

Stewardship Activities	Date Acknowledged	Comments
WasteWise.	9/7/11	Anheuser-Busch participates in Waste Wise.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/7/11	Eliminated ink coating with laser coating on all bottles. Technology not available for cans.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/7/11	Since 2008 the facility has continued its focus on water reduction in operations through reducing the excess water nozzles on the rinser's, reducing the water cycles on the can and bottle conveyors to conserve water usage, moving from dual rinsing to single rinsing and eliminating pre and post pasteurizer wash offs. Also the bottle lines in 2010 has gone to a dry lubricant which cuts the amount of water used significantly.

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/7/11</p>	<p>A majority of the motor driven equipment at the facility has been converted over the past 10-15 years to variable frequency drives (VFD's). VFD's lower electrical energy consumption by adjusting the speed of the motor to the changing load demands. Typically VFD's consume only 25% as much energy at 50% speed then it will at 100% speed. Anheuser-Busch has estimated that this initiative has contributed to a reduction of 85,000 kwh per year in electricity purchases.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/7/11</p>	<p>The facility recycles all of its spent grain and sends it to near-by cattle farms as feed. From 2008 to 2010 the facility has recycled 368,934 tons of spent grain. Our spent yeast is sold to Campbell's Soup in South Plainfield NJ as a flavor carrier. From 2008 to 2010 the facility has recycled 19,675 tons of spent yeast. All of our aluminum is recycled and re-used as a raw material for our can production facilities. From 2008 to 2010 the facility has recycled 265 tons of aluminum. The plant recycles more material and has a recycling rate of 99%. In addition, Anheuser-Busch installed a CO2 Advances Purification System (CAPS) which is a system that recovers CO2, a byproduct of the brewing fermentation process. The recovered CO2 is purified and then reused in Anheuser-Busch operations. Purchase of CO2 has been reduced by 94% over the last five years.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/7/11</p>	<p>Anheuser-Busch has installed energy efficient light fixtures throughout the facility, as well as, motion detectors for areas that are rarely occupied.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/7/11</p>	<p>Anheuser-Busch operates a Bio-Energy Recovery System (BERS) at their facility. BERS is a method of turning the nutrients in wastewater from the brewing process into renewable biogas (methane). The renewable biogas is used in one of the brewery's steam generating boilers which reduces the amount of natural gas or fuel oil purchases by roughly 10%.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/7/11</p>	<p>Anheuser Busch participated in the 2011 Greater Newark Clean Up. AB also participated in the Passaic River Coalition clean up and beautification of the Passaic River in 2010 & 2011. In 2011 AB put down top soil, planted grass and installed park benches along the river.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/7/11</p>	<p>A corporate environmental Policy exists signed by CEO Carlos Brito. See attached. http://www.ab-inbev.com/go/social_responsibility.cfm or http://www.ab-inbev.com/go/social_responsibility/global_citizenship_report/welcome_from_our_chief_executive_officer.cfm</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/7/11</p>	<p>The company is managed under Voyager Plant Optimization (VPO) management system. This management systems is based on a house created by various pillars all with specific requirements. There are a total of 6 Pillars: Quality, Environmental, Safety, Maintenance, Management and People. Each pillar has specific requirements used to operate day to day management systems.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>9/7/11</p>	
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>9/7/11</p>	<p>Solar: The facility has installed close to 130,000 sq. ft. of solar panels on the roof of our operations building. At peak production the solar panel array is capable of producing 10% of the facilities electricity demand. Since May of 2010 the solar panel array has produced 950,000 kwh of energy and saved approximately \$104,000.00 in purchased electricity. Biogas - Anheuser-Busch operates a Bio-Energy Recovery System (BERS) at their facility. BERS is a method of turning the nutrients in wastewater from the brewing process into renewable biogas (methane). The renewable biogas is used in one of the brewery's steam generating boilers which reduces the amount of natural gas or fuel oil purchases by roughly 10%.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>9/7/11</p>	<p>Anheuser Busch uses EPA's ECO database to research vendors.</p>
<p>Climate Leaders.</p>	<p>3/28/08</p>	<p>Anheuser-Busch Companies, Inc. has pledged to reduce their total U.S. GHG emissions by 5 percent from 2005 to 2010 through energy conservation and reuse.</p>
<p>WasteWise.</p>	<p>3/28/08</p>	<p>They actively participate and were elected to the Wastewise "Hall of Fame" and award winner in 2005. Actively recycling in-house bottles and cans, also have set up various container collection facilities throughout the state.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/28/08</p>	<p>Eliminated ink coating for laser coating on all bottles. Technology not available for cans.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/28/08</p>	<p>They have installed a steam trap to recover much of their vapor previously lost to the atmosphere and have altered some rinse cycles. Internal awareness training for their employees to conserve.</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/28/08</p>	<p>Heat exchangers for brew kettles, condensers installed and CO2 advanced purification distillation columns in use.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/28/08</p>	<p>Wood chips used in the brewing process are reused as mulch.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/28/08</p>	<p>2 hybrid vehicles purchased for mostly on-site transportation and local trips.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/28/08</p>	<p>Added compact and induction lighting throughout much of the plant.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>3/28/08</p>	<p>Waste process methane from brewing used as energy for their water treatment plant combustion sources.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/28/08</p>	<p>Part of the Greater Newark Clean Up Day, and wetland estuary preservation at a nearby community park; participates in local resident gardens judging and recognition for a greener Newark; and plant a tree projects.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/28/08</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/28/08</p>	<p>Anheuser Busch operates utilizing a comprehensive Environmental Management System.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>3/28/08</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/28/08</p>	<p>Anheuser-Busch policies and purchasing decisions result in the purchase of substantial amounts of post-consumer materials, including packaging materials and recycled paper products, such as office supplies, towels and tissues.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/28/08</p>	<p>Anheuser Busch performs background checks on their suppliers who are encouraged to provide products and services consistent with the EHS policy. They seek vendors who engage in stewardship, pollution prevention, resource conservation programs and who have good health and safety histories.</p>

BELLEVILLE TWP CITY HALL

Site ID: BELLEVILLE TWP CITY HALL
48562 152 WASHINGTON AVE,
BELLEVILLE, NJ 07109

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/15/13	The lighting systems in all of the municipal buildings have been changed to energy efficient systems with motion sensors to turn off lights in unoccupied rooms.

BLOOMFIELD TWP

Site ID: BLOOMFIELD TWP
58277 1 MUNICIPAL PLAZA ,
BLOOMFIELD, NJ 07003

Stewardship Activities	Date Acknowledged	Comments
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	1/17/13	Bloomfield has changed the street lights in the North/Center Business District to energy efficient, LED lights.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	1/17/13	Bloomfield and the Third River Watch sponsor and conduct river bank clean-ups once or twice per year.

BUCKEYE NEWARK TERMINAL

Site ID: BUCKEYE NEWARK TERMINAL
15751 1111 DELANCEY ST, 981 1111 DELANCEY ST
NEWARK, NJ 07105

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>12/10/18</p>	<p>Water collected in Buckeye Terminal's only oil to water separator or at the bottom of the storage tanks at the facility is being sent to the Lorco Petroleum Company where the waste water is being recycled. Buckeye Terminals recycles roughly 20 Fluorescent bulbs per year that contain high pressure sodium and mercury vapor. These fluorescent bulbs are being replaced by LED Lighting. The sodium/mercury fluorescent bulbs are sent to Batteries and Bulbs in Linden or Hazlet to be recycled.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>12/10/18</p>	<p>Buckeye Terminals conducts hydrotesting on their storage tanks once every few years. The Company uses river water instead of city water for the test. The water is then recycled back into the river after it is used for the Hydro testing. This saves about 3,150,000 gallons of city water per tank.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/10/18</p>	<p>Buckeye Terminals recycles roughly 2,000 lbs. of scrap metal a year. Buckeye Terminals uses a water power wash to clean the outside of their tanks instead of sand blast grit. Buckeye Terminals recycles AA, AAA and 9 Volt Batteries at the site.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/10/18</p>	<p>Buckeye Terminal is currently changing all its 1000 watt mercury vapor lights to 400 watt LED Lighting. Eventually all lighting at this Terminal will be changed over to LED Lighting. Currently 30% of mercury vapor lighting outdoors and 70% of mercury vapor lighting indoors have been changed to LED Lighting.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/10/18</p>	<p>Buckeye Pipeline does have an Environmental Policy that is signed by the senior officer of the organization, Clark C. Smith - President of Buckeye Pipeline and CEO and Senior Staff Members. The Environmental Policy focuses on Health, Safety, Security and Environmental Values of the Company.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/10/18</p>	<p>Buckeye Pipeline does operate under an Environmental management System. The EMS for the storage tanks at the site is called "BEST". There is also another Management System for the storage tanks at the site called "TMS" which is an Internal Tank Management System. Additionally, there is an EMS for the Waste Related Documents that is an online data base system called "Cintellate".</p>

<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>12/10/18</p>	<p>Buckeye Terminal mentors to other petroleum industry personnel through monthly contractor meetings and the Northeast District Health and Safety, Security, Environmental Program.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/27/17</p>	<p>Water collected in Buckeye Terminal's oil to water separators or at the bottom of their storage tanks is being sent to the Lorco Petroleum Company where the waste water is being recycled. Buckeye Terminal (Newark) recycles roughly 36 Fluorescent bulbs per year that contain high pressure sodium and mercury vapor. This number will likely increase this year as the mercury vapor lights and high pressure sodium lights are all being replaced by LED lighting. Fluorescent bulbs from inside the facility are taken to Bethlehem Lamp Recycling in Bethlehem, PA.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/27/17</p>	<p>Buckeye Terminal conducts hydro testing on their storage tanks once every few years. In 2015, Buckeye Terminal performed hydro testing on tanks 9 & 10. The Company used river water to conduct the testing and afterwards recycled the water back into the river saving roughly 3,150,000 gallons of city water per tank.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/27/17</p>	<p>1) Buckeye Terminal recycles roughly 2,000 lbs. of scrap metal a year. The scrap metal is sent to C&K Scrap Metal at 225 Clifford Street in Newark NJ. 2) Buckeye Terminal uses a water power wash to clean the outside of their tanks instead of sand blast grit. 3) The Company recycles AA, AAA and 9 Volt Batteries at the site. Batteries are picked up by Waste Management Lamp Tracker from Williamston, SC on an annual basis. 4) Buckeye Terminal recycles roughly 48 aerosol cans a year. These cans are used for work done inside their storage tanks. The Company can expect a decrease in recyclable cans generated each year since they are switching to a pump instead of aerosol cans.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/27/17</p>	<p>Buckeye Terminal is currently changing all its mercury vapor lights (1000 watt lights) to 400 watt LED lighting. All lights at the terminal will be changed over to LED. This year at least a dozen outdoor lights at the terminal have been changed over to LED lighting. Interior lighting is also being changed to LED as new bulbs are needed. LED bulbs are replacing incandescent and fluorescent bulbs.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/27/17</p>	<p>Buckeye Pipeline does have an Environmental Policy that is signed by the senior officer of the organization, Clark C. Smith - President of Buckeye Pipeline and CEO and Senior Staff Members. The Environmental Policy focuses on Health, Safety, Security and Environmental Values of the Company.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/27/17</p>	<p>Buckeye Pipeline does operate under an Environmental Management System. The EMS for the storage tanks at the site is called "BEST". There is also an Environmental Waste Manual called "Cintellate" at the site. This manual is updated annually.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>6/27/17</p>	<p>Buckeye Terminal mentors to other petroleum industry personnel through monthly contractor meetings and the Northeast District Health and Safety, Security, Environmental Program.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/24/15</p>	<p>Water collected in Buckeye Terminal's oil to water separators or at the bottom of their storage tanks that is a mixture of water and petroleum oils used to be shipped out as hazardous waste from the Newark Terminal. Now the water is being sent to the Lorco Petroleum Company where the waste water is being recycled. Buckeye Terminal (Newark) - Recycles roughly 36 Fluorescent bulbs that contain High pressure sodium and mercury vapor- (36 per year) - Fluorescent bulbs are taken to the following Recycling Center Annually: Bethlehem Lamp Recycling, Bethlehem, PA (Note: Fluorescent bulbs are being replaced by LED Lights)</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/24/15</p>	<p>1) Buckeye Newark Terminal monitors peak electrical times and avoids conducting tank to tank loading during these peak times. By monitoring the peak electrical times, this act helps reduce the electrical load to the electrical grids at PSE&G. 2) Buckeye Newark Terminal has a 100 hp and a 300 hp pump that they use to transfer product between storage tanks. These pumps can transfer roughly 45,000 gallons/minute of product or 273,000 gallons/hr. of product and can be operating anywhere between 2 to 10 hours during the tank loading process. 3) Buckeye Newark Terminal accesses the website www.pjm.com for the PJM electrical grid and looks under either Demand Response or Peak Load Information-Historical Load Data under Operational Analysis to see if there is a peak load or some sort of event going on in their region that is causing a peak load to the grid. The Company will then curtail its tank to tank loading operations until there is no longer a peak load to the grid.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/24/15</p>	<p>1) Buckeye Newark Terminal recycles roughly 2,000 lbs. of scrap metal a year (mostly parts of old pumps) - The scrap metal is sent to C & K Scrap Metal at 225 Clifford Street Newark NJ to be recycled. 2) Buckeye Newark Terminal used to use sand blast grit (roughly 1,000 lbs. of sand blast grit), to sand blast their tanks to remove peeling paint and dirt from their large storage tanks prior to painting the tanks. Used sand blast grit used to go out as Hazardous Waste. Now Buckeye Newark Terminal since uses a water power wash to wash off the flaking paint and dirt from their storage tanks prior to painting their tanks, eliminating the use of sand blast grit. 3) Buckeye Newark Terminal recycles Batteries- They have one 5-gallon bucket for large batteries (C&D Batteries) and one 1-gallon bucket for smaller general use batteries (AA, AAA or 9V Batteries)- Batteries are picked up by annually by Waste Management Lamp Tracker, from Williamston, SC 4) Buckeye Newark Terminal recycles Aerosol Cans (about 48 cans a year) - Cans are sent to the following recycling center: Waste Management, Attalla, AL</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/24/15</p>	<p>Buckeye Newark Terminal has replaced all their original 60 watt light bulbs with green tipped compact fluorescent lights that use less mercury and lead and are only rated at 15 watts. The Company has replaced all lighting at their site with these compact fluorescent bulbs as well as also replacing the lighting ballasts for these lights for better energy efficiency. Buckeye Pipeline Newark Terminal also installed a more efficient, smaller capacity air conditioning system which uses less Freon (R22). Buckeye Pipeline Newark Terminal installed LED Lighting for their tank valve indicators and just recently within the last couple of months installed LED perimeter lighting at fence and dock areas of the property. These new LED lights decreased the wattage use from 1000 to 400 watts.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/24/15</p>	<p>Buckeye Pipeline does have an Environmental Policy that is signed by the current seional officer of the organization - Clark C. Smith (President of Buckeye Pipeline and CEO) and Senior Staff Members: Jeremiah Ashcroft, Robert Malecky and Mary Morgan all SVP Presidents of Pipeline & Terminals The Environmental Policy focuses on Health, Safety, Security and Environmental Values of the Company.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/24/15</p>	<p>Buckeye Pipeline does operate under an Environmental Management System - The EMS consists of written Manuals that provide guidance for the following environmental topics; Air, Community Right to Know, Lead, PCB, SPCC, Tanks, Waste, and Water.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/13/13</p>	<p>Water collected in Hess's oil to water separators or at the bottom of their storage tanks that is a mixture of water and petroleum oils used to be shipped out as hazardous waste from the Newark Terminal. Now the water is being sent to the Lorco Petroleum Company where the waste water is being recycled.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/13/13</p>	<p>Hess Newark Terminal conducts hydro testing at least once every two years on one of the large fuel oil storage tanks at the site to test to see if there are any leaks in the seems of the tank. The Company used to use city water to conduct the hydro test on the tanks. The amount of city water used to conduct these hydro testing on the tanks used to be 1 to 2 million gallons of water depending on if one o two tanks were tested in the year. This city water would be sent to the sewer system and go out to get treated at Passaic Valley STP. Starting in 2008, The Company uses water now from Newark Bay to conduct the hydro tests on their storage tanks at their facility. After the water is used to check for leaks in the tank, the water is tested and recirculated back into Newark Bay. The Company is saving 1 to 2 million gallons of city water every two years by using Newark Bay water for the hydro testing of their tanks. Note: The last hydro testing was conducted at Amerada Hess Newark Terminal in 2011.</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/13/13</p>	<p>1) Hess Newark Terminal monitors peak electrical times and avoids conducting tank to tank loading during these peak times. By monitoring the peak electrical times, this act helps reduce the electrical load to the electrical grids at PSE&G. 2) Hess Newark Terminal has a 100 hp and a 300 hp pump that they use to transfer product between storage tanks. These pumps can transfer roughly 45,000 gallons/minute of product or 273,000 gallons/hr. of product and can be operating anywhere between 2 to 10 hours during the tank loading process. 3) Hess Newark Terminal accesses the website www.pjm.com for the PJM electrical grid and looks under either Demand Response or Peak Load Information-Historical Load Data under Operational Analysis to see if there is a peak load or some sort of event going on in their region that is causing a peak load to the grid. The Company will then curtail its tank to tank loading operations until there is no longer a peak load to the grid. 4) As of 2010, Hess Newark Terminal is now gravity filling their barges instead of using pumps to load petroleum products to their barges. Roughly 80% of the barges at Hess Newark Terminal are filled by gravity filling which reduces the electrical load on the pumps used to pump petroleum products to the barge.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/13/13</p>	<p>1) Hess Newark Terminal recycles roughly 2,000 lbs. of scrap metal a year (mostly parts of old pumps) - The scrap metal is sent to C & K Scrap Metal at 225 Clifford Street Newark NJ to be recycled. 2) Hess Newark Terminal used to use sand blast grit (roughly 1,000 lbs. of sand blast grit), to sand blast their tanks to remove peeling paint and dirt from their large storage tanks prior to painting the tanks. Used sand blast grit used to go out as Hazardous Waste. Now Hess Newark Terminal since 2008 uses a water power wash to wash off the flaking paint and dirt from their storage tanks prior to painting their tanks, eliminating the use of sand blast grit.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/13/13</p>	<p>Hess Newark Terminal has installed since 2008 all new green tipped compact fluorescent lights that use less mercury and lead as well as lower wattage. Original bulbs were 60 watt bulbs but these compact fluorescent bulbs are only 15 watt bulbs. The Company has replaced all 56 bulbs at their site with these compact fluorescent bulbs as well as with new electronic ballasts for better energy efficiency. The Company also installed in 2008 a more efficient, smaller capacity air conditioning system which uses less Freon (R22). The Company most recently (2011) has installed LED Lighting for their tank valve indicators.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/13/13</p>	<p>The site is operated under a comprehensive written environmental policy that is signed by the senior officer of the organization, John B. Hess. A summary of the outline of the Environmental Policy can be obtained through this website: http://www.hess.com/ehs/policies/ehspolicy.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/13/13</p>	<p>Hess has an Environmental Management System that they operate under. The EMS System has 20 Environmental Procedures that the Company operates under. Each Procedure is labeled EMS 1, EMS 2 and so on until EMS 20. The EMS System does have one "certification" for one of their EMS Procedures. The EMS Procedure that deals with handling of Bio-Diesel Fuel is "Certified" as BQ 9000.</p>

<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>9/13/13</p>	<p>The link to Hess Annual Environmental and Sustainability Report is: http://www.hess.com/sustainability/reports.aspx and then pick year 2012. Calendar Year 2012 is the most recent Annual Sustainability Report.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>9/13/13</p>	<p>Company has been conducting Carbon Footprint analysis and is accounting for all the Greenhouse Gases releases at their facilities around the world/country. The Greenhouse Gas Emissions can be found under the Annual Sustainability Report Website below under page 65 of the 2012 Annual Sustainability Report. Report list both direct and indirect GHG Emissions. http://www.hess.com/sustainability/reports.aspx</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>12/10/10</p>	<p>Water collected in Hess's oil to water separators or at the bottom of their storage tanks that is a mixture of water and petroleum oils used to be shipped out as hazardous waste from the Newark Terminal. Now the water is now being sent to the Company's Refinery in Port Reading to be used as Process Water at the Refinery.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>12/10/10</p>	<p>Hess conducts hydro testing at least once every two years on one of the large fuel oil storage tanks at the site to test to see if there are any leaks in the seams of the tank. The Company used to use city water to conduct the hydro test on the tanks. The amount of city water used to conduct these hydro testing on the tanks used to be 1 to 2 million gallons of water depending on if one or two tanks were tested in the year. This city water would be sent to the sewer system and go out to be treated at Passaic Valley STP. Starting in 2008, the Company uses water from Newark Bay to conduct the hydro tests on the storage tanks at their facility. After the water is used to check for leaks in the tank, the water is tested and recirculated back into Newark Bay. The Company is saving 1 to 2 million gallons of city water a year by using Newark Bay Water for the hydro testing of their tanks. Note: Last hydro testing was conducted in 2008. The next hydro testing will be conducted in 2011 according to the Company.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/10/10</p>	<p>Hess monitors peak electrical times and avoids conducting tank to tank loading during these peak times. By monitoring the peak electrical times, this act helps reduce the electrical load to the electrical grids at PSE&G. The Company has a 100 hp and a 300 hp pump that they use to transfer products between storage tanks. These pumps can transfer roughly 45,000 gallons/minute of product or 273,000 gallons/hr of product and can be operating anywhere between 2 and 10 hours during the tank loading process. The Company accesses the website www.pjm.com for the PJM electrical grid and looks under either Demand Response or Peak Load Information-Historical Load Data under Operational Analysis to see if there is a peak load or some sort of event going on in their region that is causing a peak load to the grid. The Company will then curtail its tank to tank loading operations until there is no longer a peak load to the grid. As of earlier this year, the Company is now also gravity filling their barges instead of using pumps to load petroleum products to their ships/ barges. In 2010, the Company loaded roughly 70 to 80 barges of which maybe roughly 60+ barges were loaded by gravity fill instead of by using pumps (which would use up a lot of energy/electric to operate), to pump on petroleum products onto the barge(s).</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/10/10</p>	<p>Hess recycles roughly 2,000 lbs. of scrap metal a year, mostly parts of pumps. Scrap metal is sent to a facility in Newark. The Company used to use sand blast grit (roughly 1,000 lbs. of sand blast grit) to sand blast their tanks to remove peeling paint and dirt from their large storage tanks prior to painting the tanks. Used sand blast grit used to go out as Hazardous Waste. Now, the Company within the last 2 years uses a water power wash to wash off the flaking paint and dirt from their storage tanks prior to painting their tanks, eliminating the use of sand blast grit.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/10/10</p>	<p>In their Main Building Hess installed within the last 2 years new energy efficient lights (green tipped compact fluorescent lights) that use less mercury and lead. The Company had 32 fluorescent bulbs at their site and replaced all the bulbs with the 15 compact fluorescent bulbs. In the garage area within the last year, the Company replaced all their fluorescent bulbs (15 bulbs) with 6 compact green tipped fluorescent bulbs. The Company also installed within the last 2 years a more efficient, small capacity air conditioning system which uses less Freon (R22). The older air conditioning system had a higher ozone depletion capacity using R-11.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/10/10</p>	<p>The site is operated under a comprehensive written environmental policy that is signed by the senior officer of the organization, John B. Hess. A summary of the outline of the Environmental Policy is posted at the site. All the written policies and procedures can be found under the Company's website: http://www.hess.com/ehs/policies/ehspolicy.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/10/10</p>	<p>Hess has an Environmental Management System that they operate under. The EMS System has 20 Environmental Procedures that the company operates under. Each Procedure is labeled EMS 1, EMS 2 and so on until EMS 20. The EMS System does have one "certification" for one of their EMS Procedures. The EMS Procedure that deals with handling of Bio-Diesel Fuel is "Certified" as BQ 9000.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>12/10/10</p>	<p>The link for the Annual Environmental & Sustainability Report is listed under the link below: http://www.hess.com/reports/sustainability/US/2009/default.pdf Note: The 2010 Annual Environmental Report will be completed by June of 2011. The Website is currently showing the 2009 Annual Compliance Report.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/13/09</p>	<p>Within the last year or two the following have been done at the facility. 1) The Company has switched all their fluorescent light bulbs to green tip light bulbs which do not contain mercury. This is being done at all the Amerada Hess Sites across the country and has already been done at the Amerada Hess site in Newark. 2) The Company has installed a more efficient air conditioning system (smaller capacity) which uses less freon (New Freon = R-22)....(Old Freon was R-11). The older air conditioning system had a higher ozone depletion capacity. 3) Water collected in the Company's oil to water separators or at the bottom of the tanks that is a mixture of water and petroleum oils used to be shipped out as hazardous waste at the Newark Terminal, but the water is now being sent to the Company's Refinery in Port Reading to be used as process water at the refinery.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/13/09</p>	<p>In the past, when the Site conducted their hydro testing on their tanks (hydro testing is conducted at least once a year on one of the large fuel oil storage tanks at the site to test to see if there are any leaks in the seams of the tank), the Company used to use city water to conduct these tests. The amount of city water that was used to conduct the hydro test on the tanks used to be between 1 to 2 million gallons of water depending on if one or two tanks were tested in the year. This water would just be sent to the sewer system and go to Passaic Valley STP. Now (within the past year or two), the Company uses water from Newark Bay to conduct the hydro tests on the storage tanks at their facility. After the water is used to check for leaks in the tank, the water recirculated back into Newark Bay. The Company is saving 1 to 2 million gallons of city water a year by using Newark Bay Water for the hydro testing of their tank(s).</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/13/09</p>	<p>The Company monitors peak electrical times and avoids conducting tank to tank loading during these times when there is peak electrical loading at the grids (at PSE&G). This helps reduce the load to the electrical grids (at PSE&G). The Company has a 100 and a 300 Hp pump that they use to transfer products between tanks. These pumps can transfer roughly 45,000 gallons/minute of product or 273,000 gallons/hr. of product and can be operating anywhere between 2 to 10 hrs. during the tank loading process. The Company access the website www.pjm.com and looks under either Demand Response or Peak Load Information - Historical Load Data under Operational Analysis to see if there is a peak load or some sort of event going on in their region that is causing a peak load to the grid. The Company will then curtail its tank to tank loading operations until there is no longer a peak load to the grid. PJM = Pennsylvania, Jersey Maryland and deals with the electrical grid in these states.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/13/09</p>	<p>The site is operated under a comprehensive written environmental policy that is signed by the senior officer of the organization (John B. Hess). A summary of the outline of the Environmental Policy is at the site and all the written policies and procedures are under the Company's Website www.hess.com</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/13/09</p>	<p>The link for the Annual Environmental Report is listed below. http://www.hess.com/ehs/env_health_safety.htm</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>12/1/08</p>	<p>The link for the Annual Environmental Report is listed below. http://www.hess.com/ehs/env_health_safety.htm</p>

BUILDING 80 @ NEWARK LIBERTY INTNL AIRPORT

22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	7/1/18	The facility is a participant in the Department's Passaic River Nitrate Initiative.

CALDWELL COLLEGE

Site ID: CALDWELL COLLEGE
22083 9 RYERSON AVE,
CALDWELL, NJ 07006

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/9/11	Facility is conducting a re-lamping project on campus resulting in energy savings. Metal halide lamps are being replaced with new fluorescent high bay lamps. Installed and in the process of programming an energy management system for the HVAC units. System manages how the units run and overall using less energy. Facility installed occupancy sensors for the heat pumps in Dominican Hall from the ends of 2010 through the beginning of 2011. When the room is unoccupied, the sensor automatically activates the temperature set-back function.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/10/10	Caldwell College has undertaken a re-lamping project on campus resulting in energy savings evidence by lower utility bills. Metal halide lamps are being replaced with new fluorescent high bay lamps. The school has applied for a rebate under the NJ SMART Buildings BPU program.

CARDOLITE CORP

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/1/15	Company officials state that in 2014, they installed new condensers for Boilers as well as replaced steam traps all to conserve water. Company states that they have had a 20% reduction in their water usage since the installation of the condensers and steam straps for the Boilers.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/1/15</p>	<p>Since 2012/2013 the Company has been changing their Incandescent Fluorescent Lighting to more efficient Halogen Lighting all around the facility - roughly 80% of the lighting fixtures at the facility have been changed over to new more efficient Halogen Lighting.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/1/15</p>	<p>Cardolite does have an Environmental Policy called the "Cardolite Employee Health, Safety and Security Policy"</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/1/15</p>	<p>Cardolite does have an Environmental Management System called "SOCMA" which stands for: Synthetic, Organic, Chemical, Manufacturers, Association with a website of www.socma.org Company states its is similar to ISO 1400 (ISO90001) Newark, USA ISO 9001:2008 Certificate</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/1/11</p>	<p>Starting in 2010, the Company now recycles Ethylene Diamine EDA to be re-used or re-introduced back into their products instead of sending it out as hazardous waste. Roughly 127,503.00 lbs of EDA was recycled/re-used in 2010 instead of going out as Hazardous Waste.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/1/11</p>	<p>Cardolite does have an Environmental Policy called the "Cardolite Employee Health, Safety and Security Policy" which is under the following website: http://www.cardolite.com/Pages/About_us_environmental.html</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/1/11</p>	<p>Cardolite does have an Environmental Management System called "SOCMA" which stands for: Synthetic, Organic, Chemical, Manufacturers, Association with a website of www.socma.org Company states its is similar to ISO 1400</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/1/11</p>	<p>Company uses Cashew Nut Shell Liquid (Bio Fuel) as an alternate cleaner fuel for their two large Boilers. (19 and 21 MMBTU Boilers). Company imports Cashew Nut Shell Liquid. Company used 576,586 gallons of Cashew Nut Shell Liquid (Bio Fuel) in their Boiler(s) in 2010.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/25/09</p>	<p>Cardolite has an Environmental Policy posted online. Below is the link to the Policy. http://www.cardolite.com/Pages/About_us_environmental.html</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/29/17</p>	<p>Between 2014 and 2015, Colonnade Apartments changed all the water fixtures in the 560 apartments at the site to low flow water fixtures. These fixtures include toilets, faucets in both kitchen and bathrooms, and shower heads.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/29/17</p>	<p>In 2014, Colonnade Apartments began changing all fluorescent lights to LED Lighting. To date, 65,000 fluorescent lights have been replaced by more efficient and less energy using LED Lighting. Later this year, Colonnade Apartments (PF Holdings LLC) will replace the lighting in both lobbies of the apartment complex and all the exterior lighting outside of the building. In the Summer of 2018, Colonnade Apartments will replace the lighting in the Parking Lot and Parking Deck at the Complex. 15 storage rooms at the apartment complex have light sensors installed that shut off the lights after 15 to 20 seconds if no motion is detected in the room.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/29/12</p>	<p>75% of all the toilets in the apartments at the apartment complex over the last 3 years have been replaced from 3 gallon toilets to 1.6 gallon toilets. (420 Apartments Total) (When tenants leave the complex, the toilets in the apartment complex are switched over from the 3 gallon to 1.6 gallon toilets). The apartment complex has also installed water savings shower heads in all the apartments at the apartment complex (560 Apartments total).</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/29/12</p>	<p>Over the past year, Colonnade has replaced their fluorescent light bulbs and regular light bulbs throughout the Apartment Building. The fluorescent light bulbs in the hallways, and storage rooms have been replaced with new High Energy Efficient Light Bulbs. All Emergency Lighting has also been replaced by High Energy Efficient Light Bulbs. To date, 400 fluorescent light bulbs in the hallways, and storage rooms have been replaced with new High Energy Efficient Light Bulbs. Also, in all 15 storage rooms at the Apartment Complex, the Complex has installed Light Sensors that will shut off the lights in the room after 15 to 20 seconds if no motion is detected in the room.</p>

3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	1/8/15	CVS provided me with a signed copy of the company's environmental policy. The policy was signed by an officer of the company.

DELTECH RESIN CO

Site ID: DELTECH RESIN CO
15976 49 RUTHERFORD ST,
NEWARK, NJ 07105

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/21/14	In 2014, The Company changed out all their windows in the Administration Building at their Site (Building # 1) from single paneled windows to Thermal Double Pane Windows. - Thermal Pane Windows are more efficient allowing less heat to escape the building in the winter and less heat to get into the building during the summer, lowering fuel cost for the Company. Thermal windows are typically two to four times more efficient than older single pane windows. This means the Company is reducing their winter heating bills by about 20 to 30 percent. The Company also in 2014 changed out their incandescent light bulbs to more energy efficient compact fluorescent light bulbs. This was also done in the Administration Building at their Site (Building # 1). CFLs (Compact Fluorescent Lights) - help save money, use less energy, reduce light bulb changes, and lower greenhouse gas emissions. In late 2014/early 2015, the Company also installed a new more efficient rated 8.0 MMBTU Fulton Boiler to replace their aging Hydrotherm Boiler # 2 also at 8.0 MMBTU/hr. heat input.. The new Fulton Boiler is more reliable than the older Hydrotherm Boiler. The Flame is sensed by using a flame rod, no constant blower is required. Boiler is constructed to ASME Code. The design compensates for expansion and contraction, which cause other boilers to eventually leak or fail. No Expensive Chimney Needed, the combustion burner is self-venting through an AL29-4C stainless steel vent. Sidewall venting does not require a draft inducing fan. Highest Efficiency - Boiler efficiency is up to 86%. Simple Reliable Spark Plug Ignition - No pilot or complex start sequence. Only a small assist starting fan is required. Following ignition this is shut off so there is no continuous electrical usage.

DIRECT PRINTING IMPRESSIONS

7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	9/22/16	Environmental Enhancement Project: Direct Printing Impressions, Inc. (DPI) has renewed its Forest Stewardship Council (FSC) certification. The FSC certification provides assurance that forests are being managed to the highest environmental and social standards. DPI's certification type is "Group Chain of Custody". This certification traces the path of products from forests through the supply chain, verifying that FSC-certified material is identified or kept separated from non-certified material throughout the chain. Chain-of-Custody process ensures the consumer that the FSC-certified products they purchase are coming from responsibly managed sources. For a consumer to purchase an FSC-certified product, every company that previously had ownership of the forest product material components of the end product would have had to be FSC certified. Therefore, about 95% of DPI's paper used in their printing process is FSC certified.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	5/10/13	Direct Printing Impressions, Inc. (DPI) is Forest Stewardship Council (FSC) certified. The FSC certification provides assurance that forests are being managed to the highest environmental and social standards. DPI's certification type is "Group Chain of Custody" which this certification traces the path of products from forests through the supply chain, verifying that FSC-certified material is identified or kept separated from non-certified material throughout the chain. Chain-of-Custody process ensures the consumer that the FSC-certified products they purchase are coming from responsibly managed sources. For a consumer to purchase an FSC-certified product, every company that previously had ownership of the forest product material components of the end product would have had to be FSC certified. Therefore, about 95% of DPI's paper used in their printing process is FSC certified. Below is the website that shows DPI's certification. http://info.fsc.org/Detail?id=a0240000006tf9TAAQ

D&M CLEANERS

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/24/13	Within the last 5 years, the Company has installed low flush toilets in their restrooms to reduce the amount of water usage at their facility.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/24/13	In 2007, the Company changed over 20 lights from the older fluorescent T-12 lights to the newer T-5 Green Tipped Fluorescent Lights which save on money over time because of a longer lifespan of the T-5 lights while producing more light with less wattage. The T5 also maintains maximum light output for almost the entire lifetime of the bulb.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/24/13	GJ Chemical is a part of NACD - National Association Chemical Distributors and their Responsible Distribution Program - A condition of membership in the Association is a signed commitment to Responsible Distribution, a third-party verification program (which is done every 5 years), which requires members to continuously improve performance in the environment, health, safety, and security.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	9/24/13	The Company has an Environmental Policy which they call their "Quality Policy Statement" that is signed by Upper Management.

EASTERN CONCRETE MATERIALS INC NEWARK PLANT

Site ID: EASTERN CONCRETE MATERIALS INC NEWARK PLANT
23936 1196 MCCARTER HWY,
NEWARK, NJ 07104

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/11/08	Water use is reduced by using stormwater for its process eliminating potable water use. Also, they use a "state of the art" sweeper for dust control without the use of water.

EAST ORANGE CITY GENERAL HOSPITAL

Site ID: EAST ORANGE CITY GENERAL HOSPITAL
14234 300 CENTRAL AVE,
EAST ORANGE CITY, NJ 070182819

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/16/16	Hospital has installed water savings fixtures (motion sensors) in their 15 public bathrooms to conserve water.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/16/16	Hospital between 2012 and 2014 has replaced 5 out of their 12 Fleet Vehicles with low emission vehicles (Ford Escapes and Dodge Caravans). Replacement of vehicles was done through a State Grant Program.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/2/09	East Orange General Hospital has three (3) reciprocating engines burning natural gas for supplemental electrical power for the hospital. The heat generated from operating the engines is captured and used to provide domestic hot water to the building. EOGH's 80 S. Munn Ave. building is a certified NJ ENERGY STAR Home. The building is used as short-term housing for behavioral health hospital patients.

ESSEX CNTY COLLEGE

Site ID: ESSEX CNTY COLLEGE
171274 303 UNIVERSITY AVE,
NEWARK, NJ 07102

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/6/10	ECC has installed waterless urinals throughout campus.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/6/10	ECC has installed occupant sensors and electronic ballast throughout campus resulting in energy savings. ECC installed new variable speed drives for motors (back-up systems) through the NJ Clean Energy. ECC installed heat pumps to heat domestic water.

ESSEX CNTY RESOURCE RECOVERY FACILITY

Site ID: ESSEX CNTY RESOURCE RECOVERY FACILITY
14211 183 RAYMOND BLVD, 70 74 BLANCHARD ST
NEWARK, NJ 071057355

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/1/18	In September of 2017, Covanta stopped using Phosphoric Acid to treat the ash at their site to reduce the pH of the ash prior to the ash leaving the facility to be used to cover a Landfill in Gloucester County. Prior to the Baghouse Installation, Covanta was using 600 gallons/day of Phosphoric Acid. After the baghouse installations, the Phosphoric Acid usage went down to 200 gallons/day and then eventually down to 0 gallons a day and stopped being used in September of 2017. Covanta Essex has recently installed a Reverse Osmosis Machine to help treat the city water that is used in the water tubes for their Boilers. The water in the water tubes must be deionized water and all minerals in the water are usually taken out by using sulfuric acid and caustic acid. The Reverse Osmosis Machine will reduce the amount of caustic and sulfuric acid usage at the facility to treat the city water but since the unit has just been installed.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/1/18</p>	<p>Water Use Reduction Activities at Covanta Essex: 1) All Process Water and Storm Water at the site (100%) is captured and re-used so there is no Process Water or Storm Water going to the city sewer system. 2) Covanta Essex has installed waterless fixtures in the Men's Rooms located in the Admin Building and the Men's Locker Room. Each waterless fixture can save 50,000 gallons of water usage per year.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/1/18</p>	<p>Covanta Essex has done the following Green Building Implementations at their site: 1) Covanta Essex has switch-out all lights in their Administration Building (Admin Building) from Sodium Mercury Lights to new T-5 Fluorescent Bulbs. - This replacement of lights reduced the amount of mercury emission being emitted from the older lights. 2) Covanta Essex changed out all the lights in the Tipping Bay Floor and Atrium from Fluorescent Lights to LED Lights. 3) Covanta Essex installed "Sky-lights" on the Tipping Floor, and in the areas of the Ash Bunker and Ferrous Bunker at the facility. 4) The Air Handlers for the air conditioning system for the control room at Covanta Essex have been upgraded to VFD Motor Drives. The VFD (Variable Frequency Drives) - These motor drives are more efficient and use less energy since you can operate the VFD at any speed below its maximum, thus you can vary airflow by controlling the motor speed instead of the air outlet damper. .</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>2/1/18</p>	<p>Most of the refuse trucks that come to Covanta Essex operate on diesel fuel. Many of the Waste Hauling Companies that send their vehicles to Covanta Essex had expressed to Covanta Essex Personnel that they would like to replace their fleet of Diesel Trucks with cleaner CNG Trucks, but that there were no CNG facilities in the area to fuel CNG fuel trucks. Covanta Essex decided to build a CNG fueling station at their site so that their Waste Haulers could have a place to fuel up new CNG trucks if the waste haulers decided to switch out their fleet of vehicles from diesel trucks to CNG trucks. Starting in the fall of 2012, Covanta Essex began construction of the CNG Facility at their site. Covanta Essex and their partner in this endeavor, Clean Energy Fuels, completed the CNG site at Covanta Essex and the on-site compressed natural gas (CNG) fueling station commenced commercial operations in January of 2013. The station is open and accessible to all CNG powered refuse vehicles that deliver to the Covanta Essex facility. At this time roughly 3 to 5 % of the trucks coming to Covanta Essex use CNG Fuel. Most of the waste haulers are from the Department of Sanitation in Newark. The city of Newark plans on slowly switching over their fleet from diesel fuel vehicles to CNG fueled vehicles over the next couple of years by purchasing a couple of CNG trucks a year to replace some of the older diesel fueled vehicles.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/1/18</p>	<p>During the spring of 2017, Covanta and Rutgers teamed up with St. Benedict's Prep School in Newark to make the campus more eco-friendly by capitalizing on the seasonal rainfall. St. Benedict's Prep School's goal was to reintroduce native plants to the grounds while reducing the strain on the city's combined sewer system by collecting rooftop runoff and redirecting it into a proposed garden. The project was championed by the Green Bees, a sustainability-focused after-school program whose members volunteer their time to drive recycling practices and environmental awareness. After some generous funding from Rutgers, a \$1,000 plant donation from Covanta, and a bit of gritty, hands-on work from all, the student group's goal was realized and the campus was able to give their new rain garden two green thumbs up. According to Rosana Da Silva of the Rutgers Cooperative Extension (RCE) Water Resources Program. By collecting rooftop runoff and redirecting it into the proposed garden, 22,400 gallons of water was captured and used for the garden, which is equivalent to how much water 250 people use in a day! St. Benedict's continues to work with Covanta and the Go Green Initiative to educate themselves on sustainability and develop ways to spur conservation within their community. One such effort was the installation of several, strategically placed recycling bins around the grounds of the school. The new additions, accompanied by a student-made informational video, reintroduced the positive impact even one person could make on the environment. Also in 2017, To help spread awareness and promote safer e-waste practices, Covanta Essex has engaged in electronic collection efforts in the city of Newark. Along with several local groups including Newark's Ironbound Business Improvement District, Panasonic, and Urban Renewal in the City of Newark, Covanta has hosted six e-waste collection events (one a year since 2012), which have amassed over 25,000 lbs. of electronics being collected. For the longest time, the negative impacts of unused and discarded pharmaceuticals had been overlooked. Now that the growing damage caused by the opioid epidemic has entered the limelight, so too has the importance of responsible waste practices in relation to those substances. In support of national efforts to alleviate these issues, Covanta Essex as well as other Covanta Facilities' has developed the Prescription for Safety Program (Rx4Safety). For nearly a decade, this initiative has provided a safe and reliable avenue for the disposal of medications through "drug take back days." These community-sponsored events have destroyed over four million pounds of unwanted drugs and medications, educating the public on the dangers of misuse all while keeping the unwanted substances out of our waterways, our soil, and our homes. Covanta Essex volunteers annually in "Slam Dunk the Junk." - a litter cleanup with the Recycling Coordinator of Newark and Panasonic. The event in 2017 took place in Vailsburg Park and had over 5,000 people in attendance. Covanta Essex is an annual sponsor of the Earth Day Events that occurs at the Essex County Environmental Center in Roseland, NJ. Covanta Essex holds an annual open house at their facility to discuss the latest control equipment to reduce emissions at their site. (New Baghouses just installed). The open house for 2017 was held in June. Covanta Essex still is part of the "Adopt a Median" project in the city of Newark and cleans up a section of Raymond Blvd not too far away from their facility. Covanta Essex also sponsors a sea lion exhibit at the local County Zoo (Turtle Back Zoo)</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/1/18</p>	<p>The Company does have an Environmental Policy that establishes the environmental goals and principles of the Company. The policy is signed by current senior officer of the Company, Stephen F. Jones - President and CEO). A copy of the Environmental Policy is posted in various places throughout Covanta Essex and a copy of the Environmental Policy can be found in the EHS Manager's Office. Covanta Energy has adopted an environmental policy for its renewable energy projects and other operations that consists of five principals: Protection, Compliance, Conservation, Qualification and Commitment</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/1/18</p>	<p>Covanta Essex operates under an Environmental Management System. Covanta's Environmental System is called EMIS which stands for "Environmental Management Information System". The system is much like a tracking system. The EMIS System lists all permit conditions from any permit that Covanta Essex has with the DEP and EPA. The system submits weekly and monthly reminders of reports due that month or that week that need to be completed by the Company. A task list is generated by the EMIS System and weekly inspection reports need to be completed as part of this EMIS System. The EMIS System also lists all the "incidents" that occur at Covanta Essex, Hot Loads, Opacity Exceedances, Permit Emission Exceedances are all reported on this EMIS System as well as information on what caused the exceedance and possibly (if known), what was done to rectify the exceedance. The RCA Section of the Incident Section of the EMIS (Root Cause Analysis - RCA), is updated weekly by Covanta Essex. In conjunction with this new EMIS System, Covanta Essex 's Environmental Program operates under "Technical Standard 204 - Environmental Management Program Requirements"</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>2/1/18</p>	<p>Covanta Essex created an Annual Environmental Report called "Covanta Sustainability Report" The report can be found at their website.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>2/1/18</p>	<p>Within the Sustainability Report under the section listed: "Environment" - Reducing Greenhouse Gas Emissions - Covanta Essex along with the rest of the 45 Covanta Facilities all over the world submit information in regards to Carbon Reduction as well as Greenhouse Gas (GHG) Emission Reductions.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/19/13</p>	<p>In August of 2008, Covanta Essex purchased an aqueous parts cleaner for the site - thus reducing the amount of solvents used at the site in the older parts cleaner. Previously, the old cold parts washer used 15 gallons of Petroleum Naphtha (a VOC product), as the cleaning solution to clean small metal parts. The new parts cleaner is a heated parts washer that uses 30 gallons of an aqueous based product (Arma-Kleen Combo Cleaner) which is a mixture of Sodium Hydroxide and Sodium Carbonate (a non VOC Product) as the cleaning solution. The amount of Petroleum Naphtha that was used in the Parts Washer and disposed of each quarter was 15 gallons. So a total of 60 gallons of Petroleum Naphtha per year no longer has to be disposed of by the site. Within the last year, Covanta Essex hired "Crusan Controls" out of Benton Pa., to help "tweek" both the lime slurry controls and ammonia controls at the site. Both the lime slurry controls and the ammonia injection controls now work manually. Covanta Essex has been able to reduce the amount of lime slurry and ammonia injected into their boiler system at the following rates: 1) Ammonia Injection - The normal ammonia injection rate to each Boiler at Covanta Essex to control NOx Emissions from the 3 Boilers at the site (prior to the tweeking of the Ammonia Injection Controls) - was roughly 9 gallons/minute. Now the normal ammonia injection rate into the Boilers is roughly 0.1 or 0.2 gallons a minute (so roughly 8.9 gallons a minute of ammonia usage has been reduced at the facility) - Ammonia deliveries to the facility have dropped by half due to the lesser amount of ammonia being consumed in the Boiler System at Covanta Essex. Covanta Essex used to receive two deliveries of Ammonia at the site each week (each delivery of Ammonia is 20 tons...so 40 tons per week of Ammonia delivered to the site each week), but now Covanta Essex only receives one delivery of Ammonia to their site...so Covanta Essex is using at least 20 tons less of ammonia a week at their site for their 3 Boilers. 2) Lime Slurry - The normal amount of Lime Slurry used to control SO2 emissions from the 3 Boilers at the site (prior to the tweeking of the Lime Slurry Controls) - was roughly 30 gallons/minute. Now the normal Lime Slurry rate into the Boilers is roughly 21gallons a minute (so roughly 9 gallons a minute of Lime Slurry has been reduced at the facility) - Lime Slurry deliveries to the facility have dropped by half due to the lesser amount of Lime Slurry being consumed in the Boiler System at Covanta Essex.....Covanta Essex used to have 10 deliveries of Lime Slurry delivered to the site each week (each delivery of Lime Slurry is 20 tons - so 200 tons of Lime Slurry delivered to the site each week), now Covanta Essex receives 5 to 6 deliveries of Lime Slurry to the site each week (100 to 120 tons of Lime Slurry per week), so Covanta Essex is using at least 80 to 100 tons less Lime Slurry a week at their site for their 3 Boilers. Since 2009, Covanta Essex has installed a Low NOx SNCR System on all 3 Boilers (not just one of their Boilers), which has also reduced the amount of Ammonia required to be injected into the Boilers to control NOx emission.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/19/13</p>	<p>Water Use Reduction Activities at Covanta Essex: 1) All Process Water and Storm Water at the site (100%) is captured and re-used so there is no Process Water or Storm Water going to the city sewer system. 2) Covanta Essex has installed waterless urinals in the Men's Rooms located in the Admin Building (2 Waterless Urinals) and the Men's LockerRoom (1 Waterless Urinal). Each urinal can save 50,000 gallons of water usage per year.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/19/13</p>	<p>The Motor Drives for the Ash Cranes were upgraded to VFD Motor Drives. The VFD (Variable Frequency Drives) - are more efficient and use less energy since you can operate the VFD at any speed below its maximum. (The change to VFD motor drives for the Ash Cranes occurred between 3 to 4 years ago) .</p>
