<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/12/17</p>	<p>Earth Thebault has improved their energy efficiency by upgrading supporting equipment to their printing presses (installing more efficient compressions). Earth Thebault has also installed new VFD (Variable Frequency Drive) Motors to their printing web press over the last couple of years and is still continuing to do so if one of the older motors fail and need to be changed out.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/12/17</p>	<p>Earth Color implements a comprehensive waste management program through which 98% of their manufacturing waste is recycled. Total waste is quantified in collaboration with the Company's waste management vendor and accounted for a part of Earth Color's Annual Environmental Performance Review. Note: Even the Paper Dust collected in the Dust Collector from the Inline Trimming/Shredder Operation is collected in 55 gallon drums and sent out to a Paper Mill to be recycled at the Walsh Facility.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>4/12/17</p>	<p>Earth Color works with their clients to determine applicable eco-engineered design, inputs and manufacturing strategies to produce cost-effective products for their project and brands with minimized environmental impact and quantifiable results. Earth Color uses their Earth Aware Calculator to be able to calculate the environmental savings impact for a specific print job by taking into account the environmental attributes engineered into a chosen stock along with the low impact printing (LIP) systems utilized at Earth Color which helps their clients to make more informed and environmentally responsible print choices.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/12/17</p>	<p>Earth Thebault changed over to more efficient HVAC System in 2009. Floor tiles are made from recycled material (30% recycled material) Over the last 2 to 3 year, 10% of the fluorescent lights at the facility have been changed over to LED Lighting.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/12/17</p>	<p>Earth Thebault conducts tours at both their sites (Both the Pomeroy Rd Site as well as the Walsh Drive Site) roughly 5 to 6 times a year to Pre-College (Highschool Students) to discuss with them careers in both Manufacturing and Sustainability Jobs. The tour starts at the Pomeroy site and finishes at the Walsh site. 50% of the time the students are employees children and their classmates from school and 50% of the time the children are the customer's children and their classmates. The facility has also had students from both NJIT and Rutgers come to their site to discuss with them careers in both Manufacturing and Sustainability Jobs. Earth Color has also partnered with the Conserve Wildlife Foundation "CWF," of New Jersey on a project to study the threatened Northern Long-Eared Bat in New Jersey's forests. CWF of NJ, with the help of EarthColor, is conducting a safe catch-and-release program at five primary sites across the state of New Jersey. Researchers will identify, band and place a radio tracking device on bats to hopefully track those bats to their roosting tree sites. The objective is to get a better understanding of local population numbers and habitat requirements in New Jersey. The results will inform forest stewardship plans for New Jersey forest managers and landowners. More information about this bat program can be found under Earth Colors 2015/2016 Sustainability Report on Page 18 & 19.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/12/17</p>	<p>Earth Color has an Environmental Policy (Earth Color Corporate Sustainability Policy) that is a comprehensive written Environmental Policy that focuses on 7 Main Principles which are: 1) Governance and Ethics - A code for environmental and social responsibility that's transparent, measurable, accountable, and enforceable. 2) Responsible Forestry - An ongoing commitment to protect and promote the management of the world's forests vital for the health and longevity of our ecosystem 3) Environmental Protection - A strong focus on ensuring environmental sustainability, reducing our carbon footprint and contributing to overall climate protection 4) Resource Stewardship and Energy Management - Sourcing new and sustainable materials, reducing our energy use and embracing renewable energy sources 5) Workplace Enrichment - A positive, open, and diverse environment that brings out the best in our people and adds value to our business 6) Sustainable Supply Chains - Ensuring that everything we do or buy along the supply chain meets rigorous standards for sustainability and chain-of-custody 7) Beyond our Borders - An emphasis on client and ENGO partnerships to minimize our environmental impact around the planet The Corporate Environmental Policy is signed by the Corporate Sustainability Director - David Podmeyersky</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/12/17</p>	<p>Earth Thebault has an Environmental Management System called "Compliance Trax" were issues are included as legitimate business strategy and decisions. Earth Color Management gets Daily, Weekly and Monthly Tasks that need to be performed/addressed at the site. The EMS System tracks these tasks on a monthly basis. CMI (the Company's consulting firm) conducts quarterly audits to ensure that these daily, weekly and monthly tasks are generated by the EMS System at Earth Thebault and are being completed by the Company.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>4/12/17</p>	<p>Earth Color does publish an Annual Environmental Report The Annual Report is submitted by the Company every June of each year. The Report is signed by both Robert Kashan (the Senior Officer of the Company) , and David Podmeyersky - the Sustainability Director of the Company.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>4/12/17</p>	
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>4/12/17</p>	<p>Earth Thebault (both the Pomeroy Facility and Walsh Facility) combined have a total of 275 employees. Of these 275 employees roughly 82 employees or 30% come to work in van pools. Vans pick up these employees from Jersey City and Moonachie and bring them to work. If vans are not available, buses are provided. The vans/ buses are provided by an outside service.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/12/17</p>	<p>Earth Color purchases only products and services that are environmentally and socially responsible from suppliers that have policies governing their environmental and social performance. Earth Color also collaborates with all their suppliers on an on-going basis to constantly improve and upgrade the environmental and social characteristics of procured products and services. In 2014, Earth Color stepped up its commitment to protecting the world's forests. 65 percent of all the paper they purchased was FSC (Forest Stewardship Council) certified - up from 50 percent in 2012.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/12/17</p>	<p>Since April 2007, EarthColor has been committed to purchasing Green-e® Energy Certified wind-generated Renewable Energy Credits (RECs) offsetting 100 percent of their electricity usage. EarthColor customers are invited to apply a "Printed Using 100% Wind Energy" logo to their printed materials to demonstrate the difference they too are making by choosing an environmentally friendly printer.</p>

<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/12/17</p>	<p>The Carbon Footprint Analysis or Greenhouse Gas Information for Earth Thebault can be found under the Annual Sustainability Report - Page 10 of the 2015/2016 Report. Earth Thebault has been supplying the Carbon Footprint Information in their Sustainability Report since 2004. In 2014, Earth Color produced 14,963 metric tons of greenhouse gases from energy use and other direct sources, such as transportation, refrigeration and thermal oxidation, as well as mobile, stationary and indirect sources. Compared with the Company's Annual Sustainability Report from 2012, carbon emissions are down an additional 8 percent. If we look at the baseline 2008 Carbon Footprint Emissions Reporting Information, total carbon emissions are down 25.5 percent. from 2008 to 2014. Newest Carbon Footprint / Green House Gas numbers will not be available until July/August of this year (2017)</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/12/17</p>	<p>Earth Color has a comprehensive Wood Pulp & Paper Merchandise Management Policy of which the purpose of this Policy is to ensure that all paper, pulp or fiber from controversial sources, specifically from illegal logging, does not enter into any of their operations. No working relationships are undertaken with any vendors that are considered high-risk nationally or internationally. All of Earth Colors procurement practices adhere to the above policy. Any and all vendors of Earth Color are required to undergo a complete vetting process prior to establishment of a working relationship with Earth Color. In addition all vendors are required at a minimum to be completely compliant with the Lacy Act The Lacy Act protects both plants and wildlife by creating civil and criminal penalties for a wide array of violations. It prohibits trade in wildlife, fish, and plants that have been illegally taken, transported or sold. All vendors are obligated to sign a contract of compliance to Earth Color's terms and conditions as outlined in Earth Color's Policy. Earth Color requires that all their suppliers and procured materials are compliant with all national and international laws and treaties. Suppliers, products, and services are audited as deemed necessary to ensure stated sustainability policies and programs are in effect. Any suppliers providing materially important components - require certification such FSC (Forest Stewardship Council), SFI (Sustainable Forestry Initiative) or PEFC (Program for the Forest Certification), are to be reviewed each year and are expected to sign a compliance document with Earth Color.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>4/12/17</p>	<p>Earth Color offers mentoring to their suppliers through a broad environmental education program which has been extended to both their clients and supply chain partners. Earth Color also has a supply chain green development strategy in place through which they educate their suppliers and vendors on proper responsible forestry standards and work with them to ensure that they are progressing towards certifications. If they are not already certified, and are in fact compliant with these standards. The Sustainability Director of Earth Color spends 65% of his time mentoring their clients and supply chain vendors (some from out of the Country such as China and Finland), using these environmental education programs to help develop proper forestry standards for their businesses and to ensure that the suppliers and vendors are working toward receiving their certifications. 70% of Earth Color's clients and suppliers have been mentored using these broad environmental education programs.</p>
<p>Green Power Partnership.</p>	<p>1/16/13</p>	<p>Earth Color is a member of Green Power Partnership</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>1/16/13</p>	<p>Earth Color has reformulated the composition of its inks, coatings, and fountain solution used on their printing presses which have resulted in a reduction in hazardous waste used and disposed of at the site. According to records kept by the Company, the amount of Hazardous Waste has decreased by 75% over the last 4 years. (79,015 lbs. of Hazardous Waste in 2009 to 19,550 lbs. of Hazardous Waste in 2011).</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/16/13</p>	<p>Earth Thebault has initiated the following water reduction practices at their facility: 1) The Company has installed water-reducing fixtures (including motion activated faucets and toilets) 2) The Company has implemented an effective water filtration system that provides clean drinking water to their employees. 3) The Company has also replaced the water coolers used to cool down their printing presses The old water coolers used to operate 24 hours a day and used thousands of gallons of water. By installing the new water coolers, the Company has been able to save 4,844,500 gallons of water in just one year.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/16/13</p>	<p>Earth Thebault has improved their energy efficiency through the implementation of new and more efficient printing presses and by upgrading their supporting equipment (more efficient compressions). These new equipment changes occurred in 2009.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/16/13</p>	<p>Earth Color implements a comprehensive waste management program through which 98% of manufacturing waste is recycled. Total waste is quantified in collaboration with the Company's waste management vendor and accounted for as part of Earth our annual environmental performance review.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/16/13</p>	<p>Earth Thebault has ultra-sonic motion sensors retrofitted on the lighting in their building in most areas of the building. In 2009, Earth Thebault changed over to more energy-efficient lighting and HVAC Systems, low or no VOC Paints and Adhesives, FSC or SFI certified wood products, floor score certified tiles, and a minimum of 30 % recycled material for textiles.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/16/13</p>	<p>Earth Color works with their clients to determine applicable eco-engineered design, inputs and manufacturing strategies to produce cost-effective products for their project and brand with minimized environmental impact and quantifiable results. Earth Color uses their Earth.Aware calculator to be able to calculate the environmental savings impact for a specific print job by taking into account the environmental attributes engineered into a chosen stock along with the low impact printing (LIP) systems utilized at Earth Thebault which helps their clients to make more informed and environmentally responsible print choices. Examples of such savings are demonstrated on pages 25 through 28 of Earth Color's 2011/2012 Sustainability Report: http://www.earthcolor.com/sustainability/sustainability-report</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/16/13</p>	<p>Earth Color has an Environmental Policy (Earth Color Corporate Sustainability Policy) that is a comprehensive written environmental policy signed by their Corporate Sustainability Director - David Podmayersky. Earth Thebault's Corporate Sustainability Policy main focus is on the following principles: 1) The Company's Commitment and Mission 2) Governance and Ethics 3) Responsible Forestry 4) Environmental Protection 5) Resource Stewardship and Energy Management 6) Workplace Enrichment 7) Beyond our Borders (Earth Color strives to drive their sustainability in their print supplies to outside vendors). Note: Earth Thebault is a Division of Earth Color.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/16/13</p>	<p>Earth Color has a sound sustainability program which reaches beyond compliance and includes a systematic approach where environmental concerns are included as legitimate issues in business strategy and decisions. The sustainability program is reflected in Earth Thebault's Environmental Sustainability and Corporate Responsibility Policy which is applicable to all of their operations. Note: Earth Thebault is a Division of Earth Color.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>1/16/13</p>	<p>Earth Color does publish an Annual Environmental Report (signed by both the senior officer - Robert Kashan and the Corporate Sustainability Director - David Podmayersky). The Annual Environmental Report can be found under: http://www.earthcolor.com/sustainability/sustainability-report Note: Earth Thebault is a Division of Earth Color.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>1/16/13</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/16/13</p>	<p>Earth Color purchases only products and services that are environmentally and socially responsible from suppliers that have policies governing their environmental and social performance. Earth Color also collaborates with all their suppliers on an on-going basis to constantly improve and upgrade the environmental and social characteristics of procured products and services. Note: Earth Thebault is a Division of Earth Color.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/16/13</p>	<p>Earth Thebault purchages Green-e certified wind-generated Renewable Energy Certificates (RECs) from Community Energy, offsetting 100% of their electrical usage.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>1/16/13</p>	<p>Earth Color has accounted for all greenhouse gases at their facilities. The Greenhouse Gas calculation information has been provided by Earth Thebault in their 2011/2012 report Annual Environmental Report starting with page 12. The report can be found under: http://www.earthcolor.com/sustainability/sustainability-report Note: Earth Thebault is a Division of Earth Color.</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>1/16/13</p>	<p>Earth Color has a comprehensive Wood Pulp & Paper Merchandise Management Policy of which the purpose of this policy is to ensure that any paper, pulp or fiber from controversial sources, specifically from illegal logging, does not enter into any of their operations. No working relationships are undertaken with any vendors that are considered high-risk nationally or internationally. All of Earth Color's procurement practices adhere to the above policy. Any and all vendors of Earth Thebault are required to undergo a complete vetting process prior to the establishment of a working relationship with Earth Color. In addition, all vendors are required at a minimum to be completely compliant with the Lacey Act (The Lacey Act protects both plants and wildlife by creating civil and criminal penalties for a wide array of violations. It prohibits trade in wildlife, fish and plants that have been illegally taken, transported or sold). All vendors are obligated to sign a contract of compliance to Earth Color's terms and conditions as outlined in Earth Color's Policy. Earth Color requires that all their suppliers and procured materials are compliant with all national and international laws and treaties. Suppliers, products, and services are audited as deemed necessary to ensure stated sustainability policies and programs are in effect. Any suppliers providing materially important components that require certification such as FSC, SFI or PEFC are reviewed each year and are expected to sign a compliance document with Earth Color.</p>

ESTLING VILLAGE

Site ID: ESTLING VILLAGE
 14312 30 ESTLING LAKE RD,
 DENVILLE, NJ 07834

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/23/08	Facility has decreased the amount of waste generated from five drums a month to three or four drums a month.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/23/08	All of the toilets in the facility have been changed to low flow models.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/23/08	Facility consolidates deliveries by region and delivers to certain regions on certain days.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	7/23/08	Shop employees participate in a four day work week.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	7/23/08	Facility purchases recycled paper for the office.

FIABILA USA NAIL POLISH FILLING DIV

Site ID: FIABILA USA NAIL POLISH FILLING DIV
523215 106 IRON MOUNTAIN RD,
MINE HILL, NJ 07803

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/25/18	Company has installed water savings fixtures in the bathrooms in the mens and ladies locker rooms.

FISHER SCIENTIFIC CO INC

Site ID: FISHER SCIENTIFIC CO INC
59922 500 AMERICAN RD,
MORRIS PLAINS, NJ 07950

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/13/09	In June 2008, the Thermo Fisher Scientific (TFS) completed an Energy Use Reduction project onsite. This project involved replacing all of the florescent bulbs & fixtures onsite, with more energy efficient bulbs and fixtures. In addition, TFS installed both motion detectors, and timers on almost all of these new light fixtures as well. The addition of the motion detectors, and timers allows TFS to reduce their energy use by having the lights shut off when there are no facilit personnel in any specific warehouse area, with the only exception being a bank of lights over the loading bays onsite. TFS has seen a reduction in the amount of electricity being used onsite.

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/29/08	This site participated in the NJ Smart Start Buildings Program by installing prescriptive lighting and motion sensors.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/29/08	This site participated in the NJ Smart Start Buildings Program by installing prescriptive lighting and motion sensors.

HACKETTSTOWN TOWN MUA WATER PC PLANT @ IND PK

Site ID: HACKETTSTOWN TOWN MUA WATER PC PLANT @ IND PK
3285 ESNA DR,
WASHINGTON TWP, NJ 07840

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/27/11	The HMUA Solar Array was commissioned on September 23, 2011. The system, comprised of one hundred and forty four Trina 220 watt solar modules mounted on a Schletter ground mount racking system, has a capacity of 31.68 kilowatts. The solar array is anticipated to generate over 39,000 kWh annually, and offset of 30 tons of CO2 each year.

HAMILTON PARK CONFERENCE HOTEL

Site ID: HAMILTON PARK CONFERENCE HOTEL
 59948 175 PARK AVE,
 FLORHAM PARK, NJ 07932

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/12/08	Low flow toilet inserts and aerators for all faucets have been installed. There is a "clean rag" program that reduces the amount of paper towels used.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	5/12/08	http://www.hamiltonparkhotel.com/new-jersey-green-hotels.php Destination Earth program
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	5/12/08	Hamilton Park partnered with NJDOT to secure van pick-up and drop-off for staff commuting by train. Over 30% of the hotel's 240 employees participate in the program. This encourages employees to use public transportation, therefore reducing carbon emissions that would have been the result of all employees driving to work in separate vehicles.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	5/12/08	From the website: "Sourcing environmentally sensitive products and services locally, and purchasing organic, environmentally friendly/responsible and recycled supplies, whenever possible." Specifically - Since 2004 postconsumer napkins and toilet paper have been purchased. There is a clean rag program in use to decrease the number of paper towels being used. Compact green fluorescents are used in 90% of fixtures, low flow fixtures for toilets and faucets have been purchased. Coffee is organic.

HENRY TROAST AUTOBODY REFINISHING INC

7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	2/22/11	Within the past year, Henry Troast Auto Refinishing made changes to the paint/tint system used for painting automobiles. Enviro-Base High Performance tints are now water-based ; this reduces the amount of volatile emissions by up to 80% as well as the quantities of hazardous waste generated. The amount of solvent generated is significantly reduced. This decision to change tint formulations was voluntarily adopted.

HISHI PLASTICS USA INC

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/3/11</p>	<p>Hishi re-uses contact cooling water (used in production). The used water is recycled to a water tower situated on the roof.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/3/11</p>	<p>Hishi is source separating PVC/PET scrap plastic pellets/dust for recycling - MPI International Enterprises Inc, Piscataway, NJ. Empty industrial plastic bags are source separated/bailed and picked by Lincoln Park Dept of Public Works for recycling.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/3/11</p>	<p>Hishi is currently undertaking a lighting retro-fit project through NJ's Clean Energy program.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/3/11</p>	<p>Gerritsen has volunteered to offer assistance to the Morris County Utilities Authority. He has attended the Recycling Coordinator meetings and discussed the different types of recycling conducted at Hishi and how corporate world is looking into new recycling avenues for solid waste.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/3/11</p>	<p>Hishi has a written Environmental policy posted on-site (Conference Room Area).</p>

HONEYWELL INTERNATIONAL PROJECT PINPOINT

Site ID: HONEYWELL INTERNATIONAL PROJECT PINPOINT

 MORRIS PLAINS BORO, NJ 07950

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	5/19/17	
11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.	5/19/17	LEED Gold Certified.

HOWMET CASTINGS & SERVICES INC

Site ID: HOWMET CASTINGS & SERVICES INC
 3345 9 39 ROY ST,
 ROCKAWAY TWP, NJ 07866

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/8/15	Has gone to digital radiography in one area of plant with plans to expand to all areas reducing silver use and disposal.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/8/15</p>	<p>Alcoa -Dover has a waste reduction plan to lower what they send to the landfill. In 2013, 930 tons were sent, in 2014, 700 tons with a goal of reducing by 10% more for 2015. Monthly tracking is done. Waste Oil and shell get used as road bed, slurry goes to BPI for reclamation, Filter cake from WTP is reclaimed, Potassium hydroxide goes to Stericycle and metals are recycled.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/8/15</p>	<p>Implemented recycling programs for wax. It is no longer sent to landfill but back to the company that makes it. The ceramic shell material is also sent back to the supplier instead of being landfilled.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/8/15</p>	<p>An energy audit was completed by Veridity and recommendations are in the process of being implemented. Have reduced electricity usage by approximately a 9% decrease. They have installed a new furnace that is more efficient (2009).</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/8/15</p>	<p>Use own system that is similar to ISO14000. Divide it into 5 categories. Alcoa self audit tool lays out minimum expectations for each area to assure they do not lapse. Each group completes a full self audit annually. There is corporate auditing every 3 years.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/8/15</p>	<p>http://www.alcoa.com/sustainability/en/home.asp</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/14/14</p>	<p>Has gone to digital radiography in one area of plant with plans to expand to all areas reducing silver use and disposal.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/14/14</p>	<p>The use of public/potable water has been reduced by adjusting the cooling towers to blowdown based only on conductivity rather than constant overflow. Have installed ~ 10 low flow urinals & toilets</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/14/14</p>	<p>Have reduced electricity usage by approximately a 9% decrease. They have installed a new furnace that is more efficient (2009).</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/14/14</p>	<p>Implemented recycling programs for wax. It is no longer sent to landfill but back to the company that makes it. The ceramic shell material is also sent back to the supplier instead of being landfilled.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/14/14</p>	<p>Use own system that is similar to ISO14000. Divide it into 5 categories. Alcoa self audit tool lays out minimum expectations for each area to assure they do not lapse. Each group completes a full self audit annually. There is corporate auditing every 3 years.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/14/14</p>	<p>Has gone to digital radiography in one area of plant with plans to expand to all areas reducing silver use and disposal.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/17/12</p>	<p>Has gone to digital radiography in one area of plant with plans to expand to all areas reducing silver use and disposal.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/17/12</p>	<p>The use of public/potable water has been reduced by adjusting the cooling towers to blowdown based only on conductivity rather than constant overflow. Have installed ~ 10 low flow urinals & toilets</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/17/12</p>	<p>Have reduced electricity usage by approximately a 9% decrease. They have installed a new furnace that is more efficient (2009).</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/17/12</p>	<p>Implemented recycling programs for wax. It is no longer sent to landfill but back to the company that makes it. The ceramic shell material is also sent back to the supplier instead of being landfilled.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/17/12</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/17/12</p>	<p>Use own system that is similar to ISO14000. Divide it into 5 categories. Alcoa self audit tool lays out minimum expectations for each area to assure they do not lapse. Each group completes a full self audit annually. There is corporate auditing every 3 years.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/2/09</p>	<p>Howmet has reported that they achieved 82% hazardous waste reduction; 75% landfill waste reduction; 40% overall waste disposal reduction over the past several years. Howmet recycles potassium hydroxide waste previously hazardous waste under a beneficial re-use program.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/2/09</p>	<p>Reported 75% water usage reduction from recycling water throughout the process through the use of cooling towers.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/2/09</p>	<p>Reduction in ceramic and wax usage/disposal.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/2/09</p>	<p>Alcoa Howmet has a written environmental policy that establishes environmental goals and principals for the operations of the company.</p>

Green Power Partnership.	4/7/17	Earth Color is a member of EPA's Green Power Partnership. Earth Color has been a member of this EPA Voluntary Program since 2007. EPA's Green Power Partners - As a result of using green power, these organizations are helping to support the development of new renewable generation capacity nationwide while also helping to protect the environment. Using green power is an easy and effective way to reduce the environmental impacts of your electricity use.

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/7/17</p>	<p>Earth Color has reformulated the composition of their inks, coatings and fountain solutions used on their printing presses which have resulted in a reduction in hazardous waste used and disposed of at the site. According to the Sustainability Director of Earth Thebault, the amount of Hazardous Waste has reduced by roughly 80% over the last 8 years. The facility is down to just 2 chemicals now that are sent out as "Hazardous Waste" and they hope to by the end of the year, to be down to just 1 chemical that will be sent out as Hazardous Waste. Their ultimate goal is to not have to send anything out as Hazardous Waste and not to produce any either. The Company is working with their ink suppliers and engineers to phase out any toxic chemicals used in their coatings, inks and fountain solutions and is applying the 12 Principles of Green Chemistry to eliminate toxic chemicals. (Since 2008 VOC emissions have been reduced by Earth Color by 18%) - but between 2012 and 2016 the VOC emissions have basically remained steady. 12 Principles of Green Chemistry 1.Prevention - It is better to prevent waste than to treat or clean up waste after it has been created. 2.Atom Economy - Synthetic methods should be designed to maximize the incorporation of all materials used in the process of the final product. 3.Less Hazardous Chemical Syntheses - Wherever practicable, synthetic methods should be designed to use and generate substances that possess little or no toxicity to human health and the environment. 4.Designing Safer Chemicals - Chemical products should be designed to affect their desired function while minimizing their toxicity. 5.Safer Solvents and Auxiliaries - The use of auxiliary substances (e.g., solvents, separation agents, etc.) should be made unnecessary wherever possible and innocuous when used. 6.Design for Energy Efficiency - Energy requirements of chemical processes should be recognized for their environmental and economic impacts and should be minimized. If possible, synthetic methods should be conducted at ambient temperature and pressure. 7.Use of Renewable Feedstocks - A raw material or feedstock should be renewable rather than depleting whenever technically and economically practicable. 8.Reduce Derivatives - Unnecessary derivatization (use of blocking groups, protection, temporary modification of physical/chemical processes) should be minimized or avoided if possible, because such steps require additional reagents and can generate waste. 9.Catalysis - Catalytic reagents (selective as possible) are superior to stoichiometric reagents. 10.Design for Degradation - Chemical products should be designed so that at the end of their function they break down into innocuous degradation products and do not persist in the environment. 11.Real-time analysis for Pollution Prevention - Analytical methodologies need to be further developed to allow for real-time, in-process monitoring and control prior to the formation of hazardous substances. 12.Inherently Safer Chemistry for Accident Prevention - Substances and the form of a substance used in a chemical process should be chosen to minimize the potential for chemical accidents, including releases, explosions, and fires.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/7/17</p>	<p>Earth Color has initiated the following water reduction practices at their Pomeroy NJ Facility - 1) The Company installed water reducing fixtures (including motion sensed activated faucets and toilets. 2) The Company has implemented an effective water filtration system that provides clean drinking water to their employees. 3) The Company replaced the water coolers used to cool down their sheet fed printing presses with high efficient chillers. The company is conserving roughly 4,800,000 gallons of water per year. 4) The company officials state that when weather is colder (below 50 Degree F), the Company uses mechanical cooling instead of refrigeration chillers to cool down their printing presses. The mechanical cooling uses ambient air to cool down the presses thus the refrigeration chillers do not need to be used which saves on water consumption. Water consumption from 2008 at all the Earth Color sites was down to 33% but has not changed much between the years, 2012 to 2016.</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/7/17</p>	<p>Earth Thebault has improved their energy efficiency by upgrading supporting equipment to their printing presses (installing more efficient compressions). Earth Thebault has also installed new VFD (Variable Frequency Drive) Motors to their printing presses over the last couple of years and is still continuing to do so if one of the older motors fail and need to be changed out.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/7/17</p>	<p>Earth Color implements a comprehensive waste management program through which 98% of their manufacturing waste is recycled. The total waste is quantified in collaboration with the Company's waste management vendor and accounted for as part of Earth Color's Annual Environmental Performance Review.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>4/7/17</p>	<p>Earth Color works with their clients to determine applicable eco-engineered design, inputs and manufacturing strategies to produce cost-effective products for their project and brands with minimal environmental impact and quantifiable results. Earth Color uses their Earth Aware Calculator to calculate the environmental savings impact on specific print jobs by taking into account the environmental attributes engineered into a chosen stock along with the low impact of the printing (LIP) systems that are utilized at Earth Color, which help their clients to make more informed and environmentally responsible printing choices.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/7/17</p>	<p>Earth Thebault has ultra sonic motion sensors retrofitted on the lighting in their building in most area of the building. The company also changed over to more efficient HVAC System in 2009. Floor tiles are made from recycled material (30% recycled material) Over the last 2 to 3 year, 30% of the fluorescent lights at the facility have been changed over to LED Lighting. In Client Rooms, there are Dimmable LED Lighting that have "color correction" because colors of coating to customers appear different in certain lighting.....so LED Lighting needs to be "corrected" so the customer sees the true color of the ink.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>4/7/17</p>	<p>The Earth Thebault Pomeroy Facility has installed 7 Bio-oxidizers which are prototype carbon sequestration devices throughout the press rooms at the facility which effectively have reduced fugitive VOC emissions in these rooms from the printing presses. The VOC and Carbon emissions from the presses are captured and broken down organically by enzymes and natural bacteria into non-hazardous solids. This technology has effectively reduced the airborne emissions and pollutants at this facility.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/7/17</p>	<p>Earth Thebault conducts tours at their sites (both the Pomeroy Rd Site as well as the Walsh Drive Site) roughly 5 to 6 times a year to Pre-College (Highschool Students) to discuss with them careers in both Manufacturing and Sustainability Jobs. The tour starts at the Pomeroy site and finishes at the Walsh site. 50% of the time the students are employees children and their classmates from school and 50% of the time the children are the customer's children and their classmates. The facility has also had students from both NJIT and Rutgers come to their site to discuss with them careers in both Manufacturing and Sustainability Jobs. Earth Color has also partnered with the Conserve Wildlife Foundation of New Jersey on a project to study the threatened Northern Long-Eared Bat in New Jersey's forests. CWF of NJ, with the help of EarthColor, is conducting a safe catch-and-release program at five primary sites across the state of New Jersey. Researchers will identify, band and place a radio tracking device on bats to hopefully track those bats to their roosting tree sites. The objective is to get a better understanding of local population numbers and habitat requirements in New Jersey. The results will inform forest stewardship plans for New Jersey forest managers and landowners.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/7/17</p>	<p>Earth Color has an Environmental Policy (Earth Color Corporate Sustainability Policy) that has a comprehensive written Environmental Policy that focuses on 7 Main Principles which are: 1) Governance and Ethics - A code for environmental and social responsibility that's transparent, measurable, accountable, and enforceable. 2) Responsible Forestry - An ongoing commitment to protect and promote the management of the world's forests vital for the health and longevity of our ecosystem 3) Environmental Protection - A strong focus on ensuring environmental sustainability, reducing our carbon footprint and contributing to overall climate protection 4) Resource Stewardship and Energy Management - Sourcing new and sustainable materials, reducing our energy use and embracing renewable energy sources 5) Workplace Enrichment - A positive, open, and diverse environment that brings out the best in our people and adds value to our business 6) Sustainable Supply Chains - Ensuring that everything we do or buy along the supply chain meets rigorous standards for sustainability and chain-of-custody 7) Beyond our Borders - An emphasis on client and ENGO partnerships to minimize our environmental impact around the planet The Corporate Environmental Policy is signed by the Corporate Sustainability Director - David Podmayersky</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/7/17</p>	<p>Earth Thebault has an Environmental Management System called "Compliance Trax" where issues are included as legitimate business strategy and decisions. Earth Color Management get Daily, Weekly and Monthly Tasks that need to be performed/addressed at the site. The EMS System tracks these tasks on a monthly basis. CMI (the Company's consulting firm) conducts quarterly audits to ensure that these daily, weekly and monthly tasks that are generated by the EMS System at Earth Thebault, are being completed by the Company.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>4/7/17</p>	<p>Earth Color does publish an Annual Environmental Report The Annual Report is submitted by the Company every June of each year. The Report is signed by both Robert Kashan (the Senior Officer of the Company) , and David Podmayersky - the Sustainability Director of the Company.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>4/7/17</p>	
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>4/7/17</p>	<p>Earth Thebault (both the Pomeroy Facility and Walsh Facility) combined have a total of 275 employees. Of these 275 employees roughly 82 employees or 30% come to work in van pools. Vans pick up these employees from Jersey City and Moonachie and bring them to work. If vans are not available, buses are provided. The vans/ buses are provided by an outside service.</p>

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/7/17</p>	<p>Earth Color purchases only products and services that are environmentally and socially responsible from suppliers that have polices governing their environmental and social performance. Earth Color also collaborates with all their suppliers on an on-going basis to constantly improve and upgrade the environmental and social characteristics of procured products and services. In 2014, Earth Color upped its commitment to protecting the world's forests. 65 percent of all the paper they purchased was FSC (Forest Stewardship Council) certified - up from 50 percent in 2012.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/7/17</p>	<p>Since April 2007, EarthColor has been committed to purchasing Green-e® Energy Certified wind-generated Renewable Energy Credits (RECs) offsetting 100 percent of their electricity usage. EarthColor customers are invited to apply for the "Printed Using 100% Wind Energy" logo to their printed materials to demonstrate the difference they are making by choosing an environmentally friendly printer.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/7/17</p>	<p>The Carbon Footprint Analysis or Greenhouse Gas Information for Earth Thebault. Earth Thebault has been supplying the Carbon Footprint Information in their Sustainability Report since 2004. In 2014, Earth Color produced 14,963 metric tons of greenhouse gases from energy use and other direct sources, such as transportation, refrigeration and thermal oxidation, as well as mobile, stationary and indirect sources. Compared with the Company's Annual Sustainability Report from 2012, carbon emissions are down an additional 8 percent. If we look at the baseline 2008 Carbon Footprint Emissions Reporting Information, total carbon emissions are down 25.5 percent. from 2008 to 2014. Newest Carbon Footprint / Green House Gas numbers will not be available until July/ August of this year (2017)</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/7/17</p>	<p>Earth Color has a comprehensive Wood Pulp & Paper Merchandise Management Policy of which the purpose of this Policy is to ensure that all paper, pulp or fiber from controversial sources, specifically from illegal logging, does not enter into any of their operations. No working relationships are undertaken with any vendors that are considered high-risk nationally or internationally. All of Earth Colors procurement practices adhere to the above policy. Any and all vendors of Earth Color are required to undergo a complete vetting process prior to establishment of a working relationship with them. In addition, all vendors are required at a minimum to be completely compliant with the Lacy Act The Lacy Act protects both plants and wildlife by creating civil and criminal penalties for a wide array of violations. It prohibits trade of wildlife, fish, and plants that have been illegally taken, transported or sold. All vendors are obligated to sign a contract of compliance with Earth Color's terms and conditions as outlined in their Policy. They also require that all their suppliers and procured materials are compliant with all national and international laws and treaties. Suppliers, products, and services are audited as deemed necessary to ensure stated sustainability policies and programs are in effect. Any suppliers providing materially important components - require certification such as FSC (Forest Stewardship Council), SFI (Sustainable Forestry Initiative) or PEFC (Program for the Forest Certification), are to be reviewed each year and are expected to sign a compliance document with Earth Color.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>4/7/17</p>	<p>Earth Color offers mentoring to their suppliers through a broad environmental education program which has been extended to both their clients and supply chain partners. Earth Color also has a supply chain green development strategy in place through which they educate their suppliers and vendors on proper responsible forestry standards and work with them to ensure that they are progressing towards certifications; if they are not already certified, and are in fact compliant with these standards. The Sustainability Director of Earth Color spends 65% of his time mentoring their clients and supply chain vendors (some from out of the Country such as China and Finland), using these environmental education programs to help develop proper forestry standards for their businesses and to ensure that the suppliers and vendors are working toward receiving their certifications. 70% of Earth Color's clients and suppliers have been mentored using these broad environmental education programs.</p>

Green Power Partnership.	6/6/12	EarthColor is a member of Green Power Partnership.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/6/12	EarthColor has reformulated the composition of their inks, coatings and fountain solutions used on their printing presses which have resulted in a reduction in hazardous waste used and disposed of at the site. According to records kept at the site, the amount of Hazardous Waste has reduced by 75% over the last 4 years. (79,015 lbs. of Hazardous Waste in 2009 to 19,550 lbs. of Hazardous Waste in 2011).
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/6/12	Earth Thebault has initiated the following water reduction practices at their facility: 1) The Company installed water-reducing fixtures (including motion - activated faucets and toilets) 2) The Company has implemented an effective water filtration system that provides clean drinking water to their employees. 3) The Company also replaced the water coolers used to cool down their printing presses (the old water coolers used to operate 24 hours a day and used thousands of gallons of water). By installing the new water coolers, the Company saves roughly 4,844,500 gallons per year of water. The water coolers were replaced in 2009.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/6/12	Earth Thebault has improved their energy efficiency through the implementation of new and more efficient printing presses and by upgrading their supporting equipment (more efficient compressions). These new equipment changes occurred in 2009.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/6/12	EarthColor implements a comprehensive waste management program through which 98% of their manufacturing waste is recycled. Total waste is quantified in collaboration with the Company's waste management vendor and accounted for as part of Earth Thebault's annual environmental performance review.
13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.	6/6/12	EarthColor works with their clients to determine applicable eco-engineered design, inputs and manufacturing strategies to produce cost-effective products for their project and brand with minimized environmental impact and quantifiable results. EarthColor uses their Earth.Aware calculator to be able to calculate the environmental savings impact for a specific print job by taking into account the environmental attributes engineered into a chosen stock along with the low impact printing (LIP) systems utilized at Earth Thebault which helps their clients to make more informed and environmentally responsible print choices. Examples of such savings are demonstrated on pages 25 through 28 of EarthColor's 2011/2012 Sustainability Report: http://www.earthcolor.com/sustainability/sustainability-report

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/6/12</p>	<p>Earth Thebault has ultra-sonic motion sensors retrofitted on the lighting in their building in most areas of the building. The Company also changed over in 2009 to a more efficient HVAC System, low or no VOC Paints and Adhesives, FSC or SFI certified wood products, floor score certified tiles and a minimum of 30 % recycled material for textiles.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/6/12</p>	<p>The Earth Thebault Pomeroy Facility has installed Bio-oxidizers which are prototype carbon sequestration devices throughout the press rooms at the facility which effectively have reduced fugitive VOC emissions in these rooms from the printing presses through the process of bio-physics. The VOC and Carbon emissions from the presses are captured and broken down organically by enzymes and natural bacteria into non-hazardous solids. This technology has effectively reduced the airborne emissions and pollutants at this facility.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/6/12</p>	<p>EarthColor has an Environmental Policy (Earth Color Corporate Sustainability Policy) that is a comprehensive written environmental policy signed by their Corporate Sustainability Director - David Podmayersky. Earth Thebault's Corporate Sustainability Policy main focus is on the following principles: 1) The Company's Commitment and Mission 2) Governance and Ethics 3) Responsible Forestry 4) Environmental Protection 5) Resource Stewardship and Energy Management 6) Workplace Enrichment 7) Beyond our Borders (Company strives to drive their sustainability in their print supplies to outside vendors). Note: Earth Thebault is a Division of EarthColor.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/6/12</p>	<p>EarthColor has a sound sustainability program which reaches beyond compliance and includes a systematic approach where environmental concerns are included as legitimate issues in business strategy and decisions. The sustainability program is reflected in Earth Thebault's Environmental Sustainability and Corporate Responsibility Policy which is applicable to all of their operations. Note: Earth Thebault is a Division of EarthColor.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>6/6/12</p>	<p>EarthColor does publish an Annual Environmental Report (signed by both the senior officer - Robert Kashan and the Corporate Sustainability Director - David Podmayersky). The Annual Environmental Report can be found under: http://www.earthcolor.com/sustainability/sustainability-report Note: Earth Thebault is a Division of EarthColor.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>6/6/12</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/6/12</p>	<p>EarthColor purchases only products and services that are environmentally and socially responsible from suppliers that have policies governing their environmental and social performance. EarthColor also collaborates with all their suppliers on an on-going basis to constantly improve and upgrade the environmental and social characteristics of procured products and services. Note: Earth Thebault is a Division of EarthColor.</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/6/12</p>	<p>Earth Thebault purchases Green-e certified wind-generated Renewable energy Certificates (RECs) from Community Energy - by doing this, the Company offsets 100% of their electrical usage.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>6/6/12</p>	<p>EarthColor has accounted for all greenhouse gases at their facilities. The Greenhouse Gas calculation information has been provided by Earth Thebault in their 2011/2012 Annual Environmental Report starting with page 12. http://www.earthcolor.com/sustainability/sustainability-report Note: Earth Thebault is a Division of EarthColor.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>6/6/12</p>	<p>EarthColor has a comprehensive Wood Pulp & Paper Merchandise Management Policy of which the purpose of this Policy is to ensure that all paper, pulp or fiber from controversial sources, specifically from illegal logging, does not enter into any of their operations. No working relationships are undertaken with any vendors that are considered high-risk nationally or internationally. All of EarthColor's procurement practices adhere to the above policy. Any and all vendors of Earth Thebault are required to undergo a complete vetting process prior to establishment of a working relationship with EarthColor. In addition, all vendors are required at a minimum to be completely compliant with the Lacey Act (The Lacey Act protects both plants and wildlife by creating civil and criminal penalties for a wide array of violations. It prohibits trade in wildlife, fish, and plants that have been illegally taken, transported or sold.). All vendors are obligated to sign a contract of compliance to EarthColor's terms and conditions as outlined in EarthColor's Policy. EarthColor requires that all their suppliers and procured materials are compliant with all national and international laws and treaties. Suppliers, products, and services are audited as deemed necessary to ensure stated sustainability policies and programs are in effect. Any suppliers providing materially important components that require certification such as FSC, SFI or PEFC are reviewed each year and are expected to sign a compliance document with EarthColor. Note: Earth Thebault is a Division of EarthColor.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>6/6/12</p>	<p>EarthColor promotes responsible purchasing of forest products in their supply chain through a broad education program which has been extended to both their clients and supply chain partners. EarthColor also has a supply chain green development strategy in place through which they educate their suppliers and vendors on proper responsible forestry standards and work with them to ensure they are progressing toward certifications, if they are not already certified, and are in fact compliance with these standards.</p>
<p>Climate Leaders.</p>	<p>8/12/10</p>	<p>ETI is a member of EPA's Climate Leaders Program. As part of its membership, ETI has embarked upon the mission of reducing carbon emission by 40% of revenue dollar by 2012. http://www.epa.gov/climateleaders/partners/partners/earthcolor.html</p>
<p>Green Power Partnership.</p>	<p>8/12/10</p>	<p>ETI is a member of the Green Power Partnership and is Top 20 Printers. http://www.epa.gov/greenpower/toplists/top20printers.htm</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/12/10</p>	<p>ETI has taken the following steps to improve water stewardship. a) Installation of water-reducing fixtures & technology, including motion-activated faucets & toilets and b) Replacement of water coolers that were used to cool printing presses running 24 hours and used thousands of gallons of water with air coolers. The change has amounted to a total savings of 4,844,500 gallons in just one year.</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/12/10</p>	<p>ETI has installed state of the art Heidelberg XL presses effectively reducing the energy required per impression by approx. 10-15%.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/12/10</p>	<p>ETI has undertaken actions to reduce total material usage and/or disposal. Recycling of liquids semisolids, aluminum plates & wood pallets (accounts for 99% manufacturing waste generated). ETI also employs the DEPCOR program (see item #4).</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>8/12/10</p>	<p>ETI has undergone an environmental profiling of the entire paper & print supply chain and has develop a comprehensive algorithm for quantifying the impact along with developing a patent pending calculator available to clients. ETI also calculates and reports to clients the long term impact of the materials & workflow choices.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/12/10</p>	<p>ETI purchased a hybrid vehicle (Toyota Prius) to replace a much older vehicle used by the Quality Assurance team. The Prius gets approx. 40 MPG, about twice the mileage of the older vehicle. ETI has a no-idling (at the loading dock) and a targeted full truckload policy for raw materials, semi-finished & finished goods. ETI also works with larger carriers in offering carbon neutral shipping options. Carbon emissions for vehicles owned & operated by ETI are monitored via EPA Climate Leaders program (minimize total mileage).</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/12/10</p>	<p>Renovations were done in 2009 to ensure high Air Quality standards. a) Energy Efficient lighting & HVAC, b) Ultrasonic lighting motion sensors, c) Electronic faucets & some low flush toilets, d) Low/No VOC paints & adhesives, e) FSC or SFI - Certified wood products, f) Floor score certified tiles, g) Minimum 30% recycled material for textiles, h) Maintenance of large green space at our Pomeroy facility and i) Voluntary indoor air quality improvement via Bio-oxidation (see #22).</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>8/12/10</p>	<p>Maintains large green space at Pomeroy facility.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>8/12/10</p>	<p>Bio-oxidizers & carbon sequestration devices are being used in the press rooms to capture VOCs and carbon emissions. The VOCs captured are broken down by enzymes & bacteria in the devices and converted into non-hazardous solids. By employing the bio-oxidization technology, ETI has been able to reduce VOC emissions from sheet-fed presses by 75% (7.18 tons) and eliminate odors at the press rooms. The technology works in conjunction with thermal oxidation technology used for web press areas. Recent Environmental Awards - NJ GreenPower Purchaser of the Year in 2008 and EPA Green Power Purchaser of the Year in 2009. 2010 Environmental Innovation Award for Thought Leadership (http://whattheythink.com/video/view.cfm?id=45733). 2008 & 2009 Gold Award Winner National - Most Environmentally Conscious Product. 2008 Gold Award Winner & 2009 Silver Award Winner National - Most Environmentally Responsible Printer. http://americanprinter.com/environment/excellence-awards/2009-environmental-excellence-winners-0803/</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>8/12/10</p>	<p>ETI has hosted educational seminars on array of environmental issues within the print communication industry - Sustainability Director was invited to speak at environmental events sponsored by New York University. ETI has hosted numerous college intern groups providing firsthand experience with the implementation of environmental stewardship within a company. In 2009 & 2010, ETI also has collaborated with the Institute of Sustainable Communications backing their SOS Reach & Urban Scholar's program, supporting academic & career development of promising financially disadvantage young students. http://www.sustainablecommunication.org/</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/12/10</p>	<p>ETI's operates under a comprehensive written Environmental Policy that states ETI's commitment to environmental performance and underpins ETI's sustainability programs. The policy is signed by the Director of Sustainability, executed under the direction of the Sustainability Department and is strongly supported by senior and executive management.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/12/10</p>	<p>ETI utilizes an Environmental Management System (EMS) as outlined in the written Environmental Policy. The environmental performance of ETI's processes and practices is tracked and evaluated on an annual basis. ETI's EMS entails the employment of a comprehensive umbrella program called DEPCOR (Design, Procure, Consume & Recycle) putting structure to integrating sustainable design, engineering, procurement, consumption and recycling. The program evaluates the life-cycle assessment of products & materials that ETI uses and produces - sort of the cradle-to-cradle concept.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>8/12/10</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>8/12/10</p>	<p>ETI has implemented an Environmental Purchasing Policy resulting in the purchase of products & office supplies that are recognize as environmentally responsible. ETI actively works with its vendors to minimize the environmental impact of the entire supply chain. ETI also actively works to educate its clients on their options for environmental choices & quantifying the actual environmental impact reductions.</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>8/12/10</p>	<p>ETI runs all operations on 100% renewable energy in the form of wind generated Renewable Energy Certificates (RECs). In 2007, ETI committed to purchase 25 million kW h of Green-e Energy Certified wind generated RECs from Community Energy, offsetting 100% of electricity usage. ETI then purchased in 2008 - 32 million kW h, in 2009 32,996,000 kW h, and in 2010 & 2011 - 31 million kW h. ETI was awarded NJ GreenPower Purchaser of the Year in 2008 and EPA Green Power Purchaser of the Year in 2009 (http://www.epa.gov/greenpower/awards/winners.htm#earth).</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>8/12/10</p>	<p>ETI accounts for its Greenhouse Gas Emissions (GGEs) and reports its impact annually. The total amount of GGEs produced and emitted by ETI's Parsippany site is independently measured in metric tons & evaluated by Compliance Management International. In 2009, ETI produced 8,725 metric tons of GG gas resulting from energy use, transportation, refrigeration, thermal oxidation, as well as mobile, stationary and indirect sources. ETI uses the US EPA Climate Leaders reporting structure. ETI's goal is a 40% reduction by revenue dollar by 2012, ETI's current years reporting data puts it ahead of that goal.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>8/12/10</p>	<p>ETI requires that Supply Chain partners subscribe to environmentally sound business practices. To this end, ETI has a vendor & supply chain green development strategy - to educate suppliers & vendors on environmentally friendly business practices, proper sustainable forestry standards, and work with suppliers & vendors to ensure that they are progressing towards and beyond compliance.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>8/12/10</p>	<p>ETI has a Client Education program by proactively working with clients to help provide a better understanding of how to utilize environmentally sustainable strategies while reaching cost effective solutions. The Client Education program has served to enhance the willingness of clients to increasingly choose certified and/or recycled raw materials over non-certified/virgin fiber when printing with ETI.</p>

MACYS DEPT STORE @ ROCKAWAY TOWNSQUARE MALL

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/28/11</p>	<p>The facility is sending their waste fragrance containing ethanol alcohol for reclamation (under 40 CFR 261.2) via Chemtron Corp in Ohio to a licensed Distilled Spirit Plant (DSP). According to information reviewed, the ethanol-based products (perfumes/colognes) are sent for reclamation. The ethanol is then recovered and bulked from shredded perfumes and colognes. Material is collected from this activity is sent off-site from Chemtron to a licensed DSP site for reclamation as stated above. The material is run through a distillation column, then through a molecular sieve to remove water and impurities. Recovered ethanol is stocked and sold into the industrial market</p>

10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	2/28/18	Outreach programs are set up with the local 4H programs and the local high school.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/28/18</p>	<p>Bayer Healthcare's environmental policy is available online.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>2/28/18</p>	<p>Bayer Healthcare's annual environmental report is available online.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>2/28/18</p>	<p>Bayer Healthcare offers a shuttle program for all staff.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>2/28/18</p>	<p>LEED certified</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>2/28/18</p>	<p>Carbon footprint analysis information is available in Bayer Healthcare's online annual environmental report.</p>
<p>ENERGY STAR.</p>	<p>9/9/08</p>	<p>All copiers and printers used onsite are now EPA Energy Star rated.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/9/08</p>	<p>Company has reduced the volumes of organic materials/chemicals being utilized onsite, needed for the analytical work being conducted onsite. This was accomplished by changing the methodology of the lab procedures occurring onsite. This has reduced the amount of hazardous materials being utilized onsite, as well as reducing the amounts of hazardous waste being generated offsite.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/9/08</p>	<p>Company has been performing what is called "Making Science Makes Sense". Facility representatives go to local junior high schools, and high schools to teach the local students about science and environmental responsibilities (stewardship).</p>

23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	9/9/08	
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/9/08	Company in the process of installing solar panels on a new building addition. The entire solar panel installment should be finished by late 2008/early 2009.

19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/29/09	CCM has purchased hybrid vehicles including Ford Escape and Toyota Prius. 2/10/06 we purchased a 2006 Prius hybrid which replaced a 1992 Dodge Caravan Wagon which we sold on 9/22/06. 12/17/08 we purchased a 2009 Ford Escape SUV hybrid which replaced a 1992 Dodge Caravan Wagon which was sold on 3/13/09. We estimated the gas savings to be about \$3,000 but cannot verify the actual savings at this time.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	9/29/09	Site has a carpool program. Forty employees required to take part in program, sign a code of ethics, get preferred parking. CCM sent the following info: For every 5 times an employee carools they get one ticket in the quarterly drawing where they win gift cards and other prizes. If they have not carpoled for an entire quarter their name is moved to the bottom of the document until they begin carpooling again. (Quarterly calculation sheet will be e-mailed since it is a large document.)

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/6/17	Replaced all steam traps in 2017. This resulted in less water waste and reduced dependency on boilers. Also installed low flush toilets.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/6/17	In 2017, installed 3 electric car recharging stations on site for employees, physicians and visitors.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/6/17	Replaced all 17,000+ fixtures with LED lighting in 2017.

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/6/17</p>	<p>Installed raised garden beds for the community participating in "Grow It Green Morristown" in support of local green markets program.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/13/10</p>	<p>MMH has planted low-water plantings. Moreover, MMH has installed waterless urinals in about twelve locations. This has accounted for savings of 40-gal./yr.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/13/10</p>	<p>MMH has reduced its food waste by instituting a food waste recycling program. The food is sent for composting.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/13/10</p>	<p>MMH uses low VOC paints for projects in patient care areas. MMH has been re-lamping and instituting other energy efficiency programs that have resulted in energy saving evidence by lower utility bills.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/13/10</p>	<p>MMH has instituted an in-house Go Green Team. The team is comprised of Atlantic Health employees who initiate and report Eco-friendly projects throughout the Atlantic Health System. The Go Green Team have initiated an online discussion group where employees participate in green initiatives & ideas.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>1/13/10</p>	<p>Atlantic Health provides carpooling services and incentives to its employees.</p>

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/13/10</p>	<p>Atlantic Health's Environmental Services departments use Green Seal certified cleaning products, wherever possible.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>1/13/10</p>	<p>The new & expanded Neonatal Intensive Care unit is certified as a LEED project by the US Green Building Council. The Gagnon Cardiovascular Institute is certified by the Green Guide to Healthcare.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/14/08</p>	<p>For better risk assessment policy, they have reduced mercury 98.9%.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/14/08</p>	<p>They recently installed variable-speed boilers and cooling towers. Also have installed all new lower energy lighting for their new buildings.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/14/08</p>	<p>Morristown Mem. Hosp. has an employee representative attend and supply input for the Morristown Sustainability Committee. The committee is sponsored by the Dodge Foundation intended to make an environmental difference in the community.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/14/08</p>	<p>Eco-friendly cleaning products used.</p>

MORRISTOWN TOWN MUA WTP

Site ID: MORRISTOWN TOWN MUA WTP
3784 80 E HANOVER AVE @ WHIPPANY RIVER ,
HANOVER, NJ 07960

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/9/10	The Project included the installation of 2,885 solar panels on the site of Morristown's Wastewater Treatment Plant. The solar panels are capable of generating enough electricity (635,800kWh/year AC) to power the entire facility. Morristown has a "Real-Time Energy Generation and Sun Monitoring" link which can be found on its website at http://www.townofmorristown.org/sun.html . This link provides the public the ability to see how much energy the solar panels are generating at any given time.

19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	10/28/16	Due to the efficiency of the 3 new side arm garbage trucks purchased, garbage pickups happen on 4 days in the Township instead of 5. Therefore, there is a reduction in fuel used and pollution of the air.

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/1/12	The facility replaced the UV disinfection system, which previously had 15 racks of UV bulbs, with a more efficient Trojan UV 3000 system that has 7 racks of higher wattage UV bulbs resulting in less energy use.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/1/12	The facility used a green program offered through the State of NJ to install High Efficiency lighting and AC.

Stewardship Activities	Date Acknowledged	Comments
Green Power Partnership.	8/29/13	The Company is an active member of EPA's Green Power Partnership Voluntary Program.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/29/13	Company has low flow toilets and urinals in all their bathrooms. Toilets are low flow - 1.6 gallons of water used per flush instead of 3.5 gallons (normal tank). Urinals are low flow - 0.6 gallons of water used per flush instead of 1 gallon (normal urinal) The Company also installed on their sprinkler system to water their large property, sensors that will indicate whether if it is raining outside. If the sprinkler system is operating and it begins to rain, the sprinkler system will automatically shut itself off to preserve water.

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/29/13</p>	<p>The Company has been changing out the motors on their old small printing presses at least 5 a year of the last 10 years. The Company has roughly "76" 1- person printing presses and has changed over the motors on 50 printing presses of the last 10 years or roughly 25 presses over the last 5 years. Each new motor is 10% more efficient than the motor that was replaced. The Company also used to turn on every press at their facility in the morning, but now only turns on the presses that are to be running jobs that day, so less electricity is used because machines that are not being used are not turned on to waste electricity. The Company also has a timer on 8 of their old Lino Type Printing Presses which will shut off the presses automatically after the job on the machine is completed.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/29/13</p>	<p>The Company sends their outdated, broken and unusable small printing presses to a metal scrap yard (Rockaway Recycling - located on West Main Street in Rockaway) - to recycle the metal from the small Printing Presses instead of sending the small printing presses/ metal out to a Landfill. In 2012, the Company was able to recycle 9,200 lbs. of metal from the printing presses that if not recycled would have gone to a Landfill. The Company also recycles their magnesium printing plates. The printing plates are also sent to the metal scrap yard "Rockaway Recycling" to recycle the magnesium printing plates instead of sending the plates out to a Landfill. In 2012, the Company recycled 927 lbs. of magnesium printing plates that if not recycled would have gone to a Landfill..</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/29/13</p>	<p>The Company installed in their newer warehouse section of their facility (built in 2007), new T-8 bulbs that are more energy efficient and use a lot less electricity. A T8 bulb is 32 watts which makes the T8 bulb a more energy-efficient bulb to use. Company also has "tinted windows" throughout their building to help reduce the heat produced by sunlight.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>8/29/13</p>	
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>8/29/13</p>	<p>Company has reduced the amount of days a week that their building is open from 5 days a week to 4 days a week for the months of January to September (8 months) to reduce the amount of commutes to the office by their personnel. The actual work week hours reduced only equals to 4 hours a week, but because the building is closed 1 day a week, there are no vehicles from the employees at this facility every Friday between January and September of the year on the roads which saves on vehicle emissions to and from the facility to employees homes. The Company does however operate on a normal 5 day/week schedule from September to January (4 months), because the Company produces greeting cards and the biggest Holiday for Greeting Cards is Christmas. So the Company works a 40 hour work week (5 days a week / 8 hr. days) vs. (4 days a week and 9 hour days), during the other 8 months.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>8/29/13</p>	<p>"Renewable Solar Energy Project" completed in September 2012. The project included the installation of solar panels on the property of Prudent Publishing that are capable of generating up to 942.35 Kw of electricity to power the facility's daily operations. Prudent Publishing has a link which can be found on its website at http://prudentpublishing.trinitysolar.info. This link provides the public the ability to see how much energy the solar panels are generating at any given time. There are roughly 2,000 solar panels located on the roof of the building as well as round the property at this facility.</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>8/1/13</p>	<p>Yes: Solar Power via Trinity Solar System (942.35 Kw generating capability)</p>

ROBERTET REALTY

Site ID: ROBERTET REALTY
3590 400 INTERNATIONAL DR,
MOUNT OLIVE, NJ 078281395

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	6/4/08	Givaudan's environmental policy is posted in its web site and in the annual Environmental report. http://www.givaudan.com/givcom/jsp/channelViewUtil.jsp?channel=Our%20Company/Environment
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	6/4/08	Below is the link for 2007 Safety & Environmental report. http://www.givaudan.com/givcom/jsp/channelViewUtil.jsp?channel=Our%20Company/Environment
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	6/4/08	Greenhouse gas emissions calculations for Givaudan's worldwide facilities are attached to the annual Environmental report. Givaudan also submitted data for the Mt. Olive facility.

22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/26/08	On or about October 1999, the RVRSA in partnership with the Department undertook a demonstration to lower nitrate levels by implementing ON/OFF AERATION technique. The biological nutrient removal process was achieved by selectively turning off surface aerators from the oxidation channels thus creating anoxic zones within the channels. Nitrate levels were reduced from 5.00 mg/l to about 1.5-2.0 mg/l. Side benefits included: substantial savings in energy cost, about 10% reduction in kilowatt-hour consumption; decreased levels in phosphorus levels (3.4 mg/l to about 1.2-1.8 mg/l) and a 20% reduction in chlorine demand due to lower levels of oxidants in the clarifiers.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/23/11	Roger Coss Auto Body purchased a solvent-free tint and paint system, reducing their VOC emissions and hazardous waste generation by operating the solvent-free painting system.

ROYSONS CORP

Site ID: ROYSONS CORP
15760 40 VANDERHOOF AVE,
DENVER, NJ 07834

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/6/15	This facility manufactures wall coverings and has gone to completely water based inks (no longer using solvent based as of 3/15. The only product that remains on their RTK list is propane. Since 2004 Roysons has changed status from a large quantity generator of Hazardous Waste to a conditionally exempt small quantity generator via increasing solvent ink recycling, increased use of water based ink, switched to water based topcoats, increased digital printing. MIBK was completely removed from the building in 2011.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/6/15	Increased Solvent ink recycling, increased wood, metal, and vinyl recycling programs.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/6/15</p>	<p>Installed new lighting system with on demand lighting for entire facility. Set thermostats 1 degree cooler in winter.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/6/15</p>	<p>Formatted in ISO 14001-2004 format</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/6/15</p>	<p>Reduced inventory, reduced solvent storage to reduce risk of spill, consolidate shipments from suppliers to reduce fuel usage in transit, receive more resources from one supplier reducing number of deliveries, decrease cardboard purchasing as reuse of cardboard increases.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/28/12</p>	<p>Since 2004 Roysons has changed status from a large quantity generator of Hazardous Waste to a conditionally exempt small quantity generator via increasing solvent ink recycling, increased use of waterbased ink, switched to waterbased topcoats, increased digital printing. MIBK was completely removed from the building in 2011.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/28/12</p>	<p>Increased Solvent ink recycling, increased wood, metal, and vinyl recycling programs.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/28/12</p>	<p>installed new lighting system with on demand lighting for entire facility. Set thermostats 1 degree cooler in winter.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/28/12</p>	<p>Environmental Mgt. system Manual 2/16/12 www.roysons.com</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/28/12</p>	<p>Formatted in ISO 140001-2004 format</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>2/28/12</p>	<p>reduced inventory, reduced solvent storage to reduce risk of spill, consolidate shipments from suppliers to reduce fuel usage in transit, receive more resources from one supplier reducing number of deliveries, decrease cardboard purchasing as reuse of cardboard increases.</p>

 RANDOLPH TWP, NJ 07869

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/26/09	This site has entered the NJDEP's beneficial reuse program and uses grey water in toilets and for fire prevention.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/26/09	This site has a T8 system that automatically turns off the lights when a person leaves the room in 5 out of 6 buildings
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/30/08	This site has entered the Department's beneficial reuse program and used grey water in toilets and for fire prevention.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/30/08	This site has T8 system that automatically turns off the lights when a person leaves the room in 4 out of 5 of their buildings.

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/18/08	The facility reuses its waste water to wash down dog pens. The facility uses only a few hundred gallons of clean water per day versus several thousand gallons per day. The facility would like to use its waste water for the fire suppression system and lawn watering in the future.

STATE FARM MUTUAL AUTO INSURANCE

Site ID: STATE FARM MUTUAL AUTO INSURANCE
 128435 300 KIMBALL DR,
 PARSIPPANY TROY-HILLS, NJ 07054

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/5/15	There are low flow toilets (approximately 100) faucet aerators in all of the rest rooms.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	5/5/15	This site is LEED certified with a Silver Certification
11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.	5/5/15	This site is LEED certified with a Silver Certification

JEFFERSON TWP, NJ 07438

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/20/13	Dissolved Oxygen (DO) probes have been installed in the plant to cycle the two blowers. The two blowers used to run continuously, but now the DO probe tells the automated system when to turn off one blower and turn on the other. The blowers add air into the sewage to help digestion and treatment. By monitoring the levels of DO the system can turn off blowers to parts of the plant that have the required DO for that stage, and turn them on when the DO levels start to drop. This has caused the power use to be reduced by 50%.

TABOR ROAD OWNER

Site ID: TABOR ROAD OWNER
257286 175 201 TABOR RD, 201 TABOR RD
MORRIS PLAINS, NJ 07950

19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/4/12	Provide web meetings to reduce travel.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	1/4/12	Employees are able to bring in spent batteries & electronics from home to be properly disposed of by J&J.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	1/4/12	The facility conducted an Earth Day 2010 program including recycling programs, prizes, and educational games.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	1/4/12	

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/4/12</p>	<p>Electronic system and corporate standards mimic ISO 14001.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>1/4/12</p>	<p>J&J publishes an annual sustainability report http://www.jnj.com/connect/caring/environment-protection/environment-performanc</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>1/4/12</p>	<p>Employees have option to work hours in 9 days instead of 10 days.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/4/12</p>	<p>Corporate requirements require paper purchased contain a percentage of recycled paper.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>1/4/12</p>	<p>Johnson & Johnson utilizes guidance established by EPA's Climate Leaders program and the World Resource Institute's Greenhouse Gas Protocol to calculate greenhouse gas emission</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/10/08</p>	<p>Provide web meetings to reduce travel.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/10/08</p>	<p>Employees are able to bring in spent batteries & electronics from home to be properly disposed of by J&J.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/10/08</p>	<p>Part of Morris County Partners for Parks-volunteer for park clean up. Donate unused supplies to local schools.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/10/08</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/10/08</p>	<p>Electronic system and corporate standards mimic ISO 14001.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>6/10/08</p>	<p>J&J publishes an annual sustainability report http://www.jnj.com/connect/caring/environment-protection/environment-performance</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>6/10/08</p>	<p>Employees have option to work hours in 9 days instead of 10 days.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/10/08</p>	<p>Corporate requirements require paper to be a percentage recycled.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>6/10/08</p>	<p>Johnson & Johnson utilizes guidance established by EPA's Climate Leaders program and the World Resource Institute's Greenhouse Gas Protocol to calculate greenhouse gas emissions.</p>

TETRA TECH INC

Site ID: TETRA TECH INC
 157571 6 CENTURY DR, STE 300
 PARSIPPANY, NJ 07054

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	3/23/17	The site has a detailed policy letter signed by the CEO.
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	3/23/17	Tetra Tech generates a "Sustainability Report Card" and maintains this information.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	3/23/17	IT has maximized the use of new energy efficient computers. Offices have reduced use of consumable office supplies. BD/Marketing has increased electronic delivery of materials.
8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?	3/23/17	The requirement to subscribe to environmentally sound business practices is written into contracts when applicable.
9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.	3/23/17	Tetra Tech has participated in a number of mentor-protégé programs sponsored by various governmental agencies. Through these programs, Tetra Tech has assisted businesses in developing their capabilities while gaining viable subcontractors to support its projects.

TIFFANY & CO

Site ID: TIFFANY & CO
16272 15 SYLVAN WAY,
PARSIPPANY, NJ 07054

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/27/12	Low flow faucets and urinals were installed in 2009
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/27/12	This site has a photovoltaic System that is made up for solar electric panels. Work was completed in 8/2006.

TILCON NY INC MT HOPE FACILITY

Site ID: TILCON NY INC MT HOPE FACILITY
3355 625 MT HOPE RD,
ROCKAWAY TWP, NJ 07885

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	10/29/15	In 2009, Tilcon partnered with the Wildlife Habitat Council (WHC), a non-profit organization dedicated to restoring and enhancing wildlife habitat. They maintain the Mt Hope Wildlife Habitat Site, which was certified in 2010. They also donate material to various Eagle Scouts projects. Tilcon also participates in Keep Rockland Beautiful various cleanups each year.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	10/29/15	This facility has class trips from multiple schools every year. They offer quarry tours to local school groups, college students, West Point Military Academy cadets and boy scout troops. Tilcon employees explain our local geology and demonstrate how we mine, crush, grade and distribute our crushed stone aggregates to local customers. They also donate traffic cones, barrels and sand bags to Rockaway Police for their annual motorcycle Garlic Run.

TRI STATE QUIKRETE

Site ID: TRI STATE QUIKRETE
3599 150 GOLD MINE RD,
FLANDERS, NJ 07836

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/17/08	Facility has all low flow toilets.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/17/08	Equipment is always replaced with something that is more energy efficient, including electric motors, starters etc.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	4/17/08	Facility has reduced its waste from five dumpsters a month to one dumpster a month. One of the ways that this is accomplished is by exchanging broken pallets for refurbished pallets.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/17/08	Trucks have governors installed limiting top speed to 63mph to increase fuel efficiency.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	4/17/08	Donated material to the local Eagle Scouts for projects. Donated material to Mount Olive for park restoration.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	4/17/08	Copy of the corporate policy is kept on site.

TRUGREEN

 94237 9 MIDDLEBURY BLVD,
 RANDOLPH TWP, NJ 07869

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/2/13	The business has a waste water recycling system that reduces the amount of clean water use.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	5/2/13	The business has a storm sceptor system to contain any possible spill on the grounds outside its facility. The sceptor has a series of containment tanks that would allow pumping out and cleaning up possible spills.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	5/2/13	
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	5/2/13

------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/27/15</p>	<p>General chemical HAZMART on site. All chemicals are checked out and returned from this main location to assure there is not duplication of chemicals throughout the site</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/27/15</p>	<p>Fleet cars are hybrids and security vehicles are electric</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/27/15</p>	<p>5 LEED certified buildings on site. Rain garden designed in new 600 building construction, 1/4 acre pervious pavement in building 2 lot.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/27/15</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/27/15</p>	<p>PEMS, Picatiny Environmental Management System and ISO 14000 certified</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/27/15</p>	<p>Several van pools run and there is an alternate work week schedule where employees are allowed to work from home.</p>

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/27/15</p>	
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>5/27/15</p>	<p>5 LEED certified buildings on site.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/27/15</p>	<p>solar panels installed at old burning ground</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/29/14</p>	<p>Veolia has an Env. Policy. Policy .</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/29/14</p>	<p>Veolia has an internal EMS. The EMS requires monthly review of the compliance calender to ensure all required facility operation tasks have been completed.</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/29/14</p>	<p>Veolia has vendor/supply chain requirements which they refer to as Third Party Facility Assessment Program. The Third Party Facility Assessment Program is in attachments.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/5/09</p>	<p>Veolia participates in Adopt-A-Highway . This organization, a part of the New Jersey Department of Transportation, has established an anti-litter program whereby volunteer groups adopt a section of a state highway in their community. Twice a year, Veolia participates in this program by picking up litter on a portion of State Route 206.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/5/09</p>	<p>Veolia Env. Services, Mt. Olive Facility, operates under a comprehensive written environmental policy. This policy focuses on a commitment to employee training, waste reduction, recycling, use of renewable natural resources, economy of energy usage, safe working practices, public education, and participation in Environmental Organizations. The policy is proactive and includes provisions to seek out information on new methods of waste reduction, maintain biological diversity on Company property, rectify compliance issues in a thorough and timely manner, and generally improve the environment.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/5/09</p>	<p>Veolia Env. Services, Mt. Olive Facility, utilizes a PACT Environmental Management System. PACT stands for Prevention, Assessment, Corrective Action, and Training. The facility uses software to track and assure compliance by creating a calendar and monthly task assignment forms related to compliance issues. Veolia uses both a self and peer group assessment program to assess Environmental Compliance. Veolia uses the software package, Dakota - Tracer, to track progress related to correcting compliance issues. Issue reports include due dates, root cause analysis, corrective and preventive actions, and assigned personnel. Tracer issues are transmitted to corporate directors on a monthly basis for review. Lastly, Veolia holds monthly training sessions dealing with compliance, safety, and policy issues, in addition to the required training for DOT, RCRA, and OSHA .</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/5/09</p>	<p>Veolia Env. Services, Mt. Olive Facility, purchases services from vendors under their outside facility assessment program establishing strict environmental standards for these vendors. Veolia Env. Services has a formalized vendor assessment program in which defined standards are required for vendors to supply Veolia ES with products or services</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>3/5/09</p>	<p>Veolia Env. Services provides hazmat training updates to vendor transportation companies. For example on October 31, 2008, Veolia Env. Services, Flanders, held a morning training meeting for outside companies addressing the changes in Electronic Recycling and the new RCRA Electronic Manifesting Program.</p>

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/16/15	Sensored lights go on and off with room activity.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	6/16/15	Collaborates with the Plastics Association and with other industry groups
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	6/16/15	A written policy was presented.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	6/16/15	In process of ISO140001. Should be completed by October 2015
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/16/15	Solar panels were installed about a year ago, but company has not gotten back with any information on the panels.

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	11/1/13	Pay for Performance Program Energy Reduction Plan, dated October 2010 and currently implemented to achieve a 15% energy reduction and energy savings measures. Prepared in accordance with the Pay for Performance Program Guidelines and NJ Clean Energy Program Protocols to Measure Resource Savings. (see Executive Summary)

WIGHTMANS FARMS

Site ID: WIGHTMANS FARMS
59969 1111 MT KEMBLE AVE, AKA RT 202
HARDING TWP, NJ 07940

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/2/17	This farm uses a drip irrigation system for water conservation on about 24 acres of the farm.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/2/17	To reduce pesticides use on the farm, the farmer has an integrated pest management(IPM) program where they are monitoring the pest to reduce the need for pesticide application and he cuts grass mechanically. Also, the farm sows at a gradient that allows the soil to be conserved. Finally, the soil is protected by the use of a cover crop with green manure which utilizes less fertilizer.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/2/17	To reduce pesticides, use, in the farm, the farmer has integrated management of pest and when is possible cut grass mechanically. To save energy the farm uses LED lighting and 5 star appliances.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/18/10</p>	<p>25% less water utilized than non LEED building due to low flow toilets, waterless urinals, faucets w/aerators and sensors.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/18/10</p>	<p>74% of equipment and appliances are Energy Star rated.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/18/10</p>	<p>The facility recycles electronic waste (Information Technology equipment) in addition to other required materials and thoroughly trains employees on recycling practices.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/18/10</p>	<p>Renewable materials (bamboo flooring) used on site. Energy efficient HVAC and lighting system. 16% energy savings in lighting and 18% energy savings from energy efficient HVAC system compared to traditional non-LEED building.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/18/10</p>	<p>Only native plantings were utilized for landscaping.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>2/18/10</p>	<p>Recycled plastic bottles are made into uniforms worn by on site receptionist at Parsippany location as well as many others at off site locations. http://www.wyndhamworldwide.com/media_center/pr/show_release.cfm?id=344 Regionally sourced materials utilized including furniture, carpet, metal studs and ceiling tiles.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/18/10</p>	<p>Green tours of the facility are conducted for businesses and student groups highlighting green building/LEED Certification.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/18/10</p>	<p>http://www.wyndhamworldwide.com/wyndham-green/about/</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>2/18/10</p>	
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>2/18/10</p>	<p>Preferred parking is made available for car pools. Bike Racks available for 40 bikes with changing rooms/showers. Shuttle van utilized for commuting between Parsippany locations. The facility is equipped with several on site amenities including food, dry cleaning and a gym which minimizes off-site vehicle trips.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>2/18/10</p>	<p>The Facility Env. Purchasing Policy requires the purchase of Env. friendly products including: Env. friendly Service ware products (napkins, plates, cups bowls, etc.) that are compostable and made from renewable sources, Green Seal Cleaning Products and office furniture containing a minimum of 30% recycled content.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>2/18/10</p>	<p>The facility has received the LEED (Commercial Interiors) Silver Certification.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/18/10</p>	<p>The facility purchases 100% wind power through Con Edison Solutions. ConEdison Solutions obtains the 100% wind-power certificates from Community Energy, Inc., a marketer and developer of pollution-free, wind-generated electricity.</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>2/18/10</p>	<p>All vendors are screened via a green checklist to ensure subcontractors adhere to env. sound business practices.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>2/18/10</p>	<p>The facility shares its env. best practices, particularly in the area of green building, by hosting green tours/information sessions for interested professionals. As an example, Wyndham hosted the USGreen Building Council annual gala in 2009, which drew 300 professionals, to their facility to learn about Whyndham's env. best practices/green building techniques.</p>

ZIMMER BIOMET TMT

Site ID: ZIMMER BIOMET TMT
 14284 10 POMEROY RD,
 PARSIPPANY, NJ 07054

Stewardship Activities	Date Acknowledged	Comments
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/20/18</p>	<p>Installed energy efficient LED lighting in 2016/2017.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/20/18</p>	<p>Zimmer Biomet Environmental Policy, which is used for all sites.</p>

 LAKEWOOD, NJ 087015944

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/25/12	Onsite program that reuses plastic bags for scanned documents. Incoming bagged documents are opened and scanned and processed documents are put back into reused bags for distribution and delivery.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/25/12	Three new, more fuel efficient sprinter vehicles were delivered and three less fuel efficient box trucks were taken out of fleet service. http://about.van.fedex.com/alternative-energy
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/25/12	More efficient lighting placed in bay with motion sensors in aisles
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	7/25/12	FedEx states they are champions of safe and healthy environments for the communities http://about.van.fedex.com/environmental-policy http://about.van.fedex.com/mission-strategy-values

ACCUPAC INC

Site ID: ACCUPAC INC
14578 1700 OAK ST,
LAKEWOOD, NJ 08701

Stewardship Activities	Date Acknowledged	Comments
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	11/12/12	The facility participates in the carbon disclosure project and all data for Accupac including calculations is listed at http://www.cdproject.net . A review of the data shows a total carbon usage in 2011 as 6033 metric tons of CO2e.

AQUATHERM INDUSTRIES @ LAKEWOOD IND COMPLEX

Site ID: AQUATHERM INDUSTRIES @ LAKEWOOD IND COMPLEX
29782 1940 RUTGERS BLVD,
LAKEWOOD, NJ 08701

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/3/12	Contact cooling water is filtered to allow for continual reuse throughout a production week. The installed filtering reduces the amount of water dumped from daily to weekly thereby conserving the amount of water used for contact cooling.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/3/12	The facility has implemented a program of Staggered Machine startup. The implementation of this process has significantly saved energy usage because of this staggered demand at start up. machines are started separate times.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	12/3/12	The facility reuses the scrap plastic through segmented sorting. Heat history determines use in the process. "First Heat" product reused with virgin material. "Second Heat" product is ground up and returned to manufacturer in reused Gaylords Containers and returned to Aquatherm as product resin. The reuse of the Gaylords for processed ground scrap is also material conservation. The majority of the plastic scrap is no longer disposed of as waste.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/3/12</p>	<p>Replaced 4 HVAC units with more energy efficient units.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>12/3/12</p>	<p>Facility has implemented a program to place and update installation manuals online as PDF files and also available through ebooks. In addition warranty cards and NCR forms are available online. The online resource access to manuals conserves materials by eliminating need to print manuals when issuing or updating manuals.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>12/3/12</p>	<p>Facility analyzes cost and location of materials bought for production. Location analysis takes into account carbon footprint for transportation of materials.</p>

ATLANTIC COASTAL WELDING

Site ID: ATLANTIC COASTAL WELDING
 27461 16 BUTLER BLVD,
 BERKELEY TWP, NJ 08721

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/9/18</p>	<p>Replaced all inefficient interior lights (36 fixtures) with efficient LED lights.</p>

BARNEGAT JERSEY COAST TERMITE & PEST CONTROL

Site ID: BARNEGAT JERSEY COAST TERMITE & PEST CONTROL
 368368 35 FLORAL AVE,
 BAYVILLE, NJ 08721

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/24/15	The business practices integrated pest management (IPM) with all structural pest management. This includes mechanical traps, exclusion practices (preventative meshing, especially with mammal pests), and instructing clients on sanitation practices. This is all done to prevent unnecessary application of chemical (pesticide), reducing the risk to human health and the environment from pesticide exposure.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/24/15	The business also recycles all pesticide containers, as opposed to dumping them in household waste. This requires particular cleaning practices and disposal in a designated recycling facility, and this practice also reduces the business's waste disposal.

BERKELEY TWP CEDAR CREEK GOLF COURSE

Site ID: BERKELEY TWP CEDAR CREEK GOLF COURSE

21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	11/25/09	Development of a Natural Resource Inventory and a Land Conservation Program .

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/25/15	Mr. Mathis stated that he uses integrated pest management techniques to reduce hazardous chemical (pesticide) application, and in fact has refused service in the past when a property was already chemically treated. He researches the property history whenever he performs a termiticide application to ensure he is not unnecessarily applying chemicals. He is a licensed inspector for home sales, and uses these techniques in both the pest control and realtor industries, to minimize the chemicals being applied. Further, he will do a "scouting" of the property, to first see if a chemical treatment is necessary. In this way, he reduces chemical applications and potential risk of harmful exposure to the public.

BRICK TWP MUA

Site ID: BRICK TWP MUA
3196 1551 RT 88,
BRICK TOWN, NJ 08724

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/26/18	Brick MUA has rain barrels around their facility. There are four rain gardens on the premises (administration building, operations building, parking area and pre-treatment building). Also, the facility uses drip irrigation (1 gallon per hour) and the irrigation shuts off if it begins to rain. Brick MUA continues to make progress on Watershed Plan implementation, to include storm water BMP retrofit/green infrastructure projects in Brick, Howell and Lakewood Townships.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/26/18</p>	<p>Brick MUA is changing over to LED lights as the other lights burn out and there are solar panels at the reservoir for the irrigation system. Another solar panel system will be installed at the storage area soon. There are four electric golf carts and one solar powered golf cart for employees to drive around the grounds. Sensor lights are used throughout the facility. Sonitube (solar tubes) are in the water pump house. An energy audit was conducted at Brick MUA in June 2017.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/26/18</p>	<p>Brick MUA has a dedicated full time employee to communicate and educate the community and work with schools. A 'how to make a rain barrel' presentation was given to the community. Brick MUA continues to expand their community outreach programs for water conservation and nonpoint source reduction. Brick MUA collaborates closely with the Barnegat Bay Partnership's (USEPA Nation Estuary Program) Communication and Education Committee. Also, Brick MUA has worked with an Eagle scout to complete a project that created bat houses. The bat houses will attract bats which will help with mosquito control.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/26/18</p>	<p>Brick MUA has an Environmental Management Program for Grounds Maintenance. Brick MUA uses biodegrading, integrated pest management (IPM), and Xeriscape. Biodegrading is the use of natural and organic fertilizers that enhance soil and totally biodegrades to useful nutrients. IPM is the integrated combination of biological and physical methods to control insects and their damage which excludes the use of chemical pesticides such as bats and mosquito eating birds. Xeriscape is a landscaping technique that uses plant life indigenous to the area that requires less care and water.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>6/26/18</p>	<p>Brick MUA has taken steps to coordinate with the Ocean County Parks and Recreation Department, specifically the Forge Pond Golf Course, to work actively in the prevention, abatement and the controlling of the point and non-point pollution of Ocean County and Brick Township Water and Land Resources. This partnership has allowed the exchanging of information, ideas and services that will benefit both groups environmental management goals. Brick MUA also has a partnership with the water shed community and they put together a water shed action plan. Also, Brick MUA is working with Brick Plaza to demonstrate green storm water infrastructure.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/19/17</p>	<p>Brick MUA has rain barrels around their facility. There are four rain gardens on the premises (administration building, operations building, parking area and pre-treatment building). Also, the facility uses drip irrigation (1 gallon per hour) and the irrigation shuts off if it begins to rain.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/19/17</p>	<p>Brick MUA is changing over to LED lights as the other lights burn out and there are solar panels at the reservoir for the irrigation system. Another solar panel system will be installed at the storage area soon. There are four electric golf carts and one solar powered golf cart for employees to drive around the grounds. Sensor lights are used throughout the facility. Sonitube (solar tubes) are in the water pump house. An energy audit was conducted at Brick MUA in June 2017.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/19/17</p>	<p>Brick MUA has a dedicated full time employee to communicate and educate the community and work with schools. A how to make a rain barrel presentation was given to the community, as well. Also, Brick MUA has worked with an Eagle scout to complete a project that created bat houses. The bat houses will attract bats which will help with mosquito control.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/19/17</p>	<p>Brick MUA has an Environmental Management Program for Grounds Maintenance. In support of the National Environmental Quality Improvement Act of 1970 and the New Jersey DEP urban and suburban landscaping policies which govern ground and surface water protection practices, Brick MUA uses biodegrading, integrated pest management (IPM), and Xeriscape. Biodegrading is the use of natural and organic fertilizers that enhance soil and totally biodegrades to useful nutrients. IPM is the integrated combination of biological and physical methods to control insects and their damage which excludes the use of chemical pesticides such as bats and mosquito eating birds. Xeriscape is a landscaping technique that uses plant life indigenous to the area that requires less care and water.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>7/19/17</p>	<p>Brick MUA has taken steps to coordinate with the Ocean County Parks and Recreation Department, specifically the Forge Pond Golf Course, to work actively in the prevention, abatement and the controlling of the point and non-point pollution of Ocean County and Brick Township Water and Land Resources. This partnership has allowed the exchanging of information, ideas and services that will benefit both groups environmental management goals. Brick MUA also has a partnership with the water shed community and they put together a water shed action plan. Also, Brick MUA is working with Brick Plaza to demonstrate green storm water infrastructure.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/14/16</p>	<p>Brick MUA has rain barrels around their facility. There are three rain gardens on the premises (administration building, operations building, and pre-treatment building). Also, the facility uses drip irrigation (1 gallon per hour) and the irrigation shuts off if it begins to rain.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/14/16</p>	<p>Brick MUA is changed over to LED lights as the other lights burn out. There are solar panels at the reservoir for the irrigation system. Another solar panel system will be installed at the storage area. There are four electric golf carts and one solar powered golf cart for employees to drive around the grounds. Sensor lights are used throughout the facility. Sonitube (solar tubes) are in the water pump house.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/14/16</p>	<p>Brick MUA has a dedicated full time employee to communicate and educate the community and work with schools. A how to make a rain barrel presentation was given to the community. Also, Brick MUA has worked with an Eagle scout to complete a project to create bat houses. The bat houses will attract bats that will help with mosquito control.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/14/16</p>	<p>Brick MUA has an Environmental Management Program for Grounds Maintenance. In support of the National Environmental Quality Improvement Act of 1970 and the New Jersey DEP urban and suburban landscaping policies which govern ground and surface water protection practices, Brick MUA uses biodegrading, integrated pest management (IPM), and Xeriscape. Biodegrading is the use of natural and organic fertilizers that enhance soil and totally biodegrades to useful nutrients. IPM is the integrated combination of biological and physical methods to control insects and their damage which excludes the use of chemical pesticides such as bats and mosquito eating birds. Xeriscape is a landscaping technique that uses plant life indigenous to the area that requires less care and water.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>6/14/16</p>	<p>Brick MUA has taken steps to coordinate with the Ocean County Parks and Recreation Department, specifically the Forge Pond Golf Course, to work actively in the prevention, abatement and the controlling of the point and non-point pollution of Ocean County and Brick Township Water and Land Resources. This partnership has allowed the exchanging of information, ideas and services that will benefit both groups environmental management goals. Brick MUA also has a partnership with the water shed community and put together a water shed action plan. Also, Brick MUA is working with Brick Plaza to demonstrate green storm water infrastructure.</p>

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>10/23/14</p>	<p>School has an IPM plan and Policy that they implement</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>10/23/14</p>	<p>Arbor Day tree planting, ROTC and Ocean Club conduct litter clean ups, and the school maintains natural areas including a vegetable garden.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/23/14</p>	<p>School has solar fields- 6000 panels</p>

CLAYTON BLOCK CO INC

Site ID: CLAYTON BLOCK CO INC

LAKEWOOD TWP, NJ 08701

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/8/12	The Claytons have used 648 tons of fly ash and 9288 tons of slag in the block production and 20,458 tons of fly ash in its concrete production. Both these waste products serve as a direct replacement for cement in its products. They have reduced cement usage by 30,394 tons.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/8/12	The claytons installed a solar system on the south facing side of the block plant in November 2009. The North facing side was completed in 2010. To date this system has generated 1800 mega watt hours of electricity, it should generate 800 mega watt hours of electricity each year. It represents approx 45 % of the electricity used at the Clayton site and is the most visible contribution to Environmental Stewardship.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/18/09	Clayton Block has installed 4 million dollars worth of solar panels on the roof of its block plant. Project completion January 2009, substantial energy savings have been achieved.

CLAYTON SAND CO

Site ID: CLAYTON SAND CO
126739 2011 LACEY RD,
LACEY TWP, NJ 08731

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/18/10	Clayton Sand Co. uses high-density polyethylene dredge pipe to feed material into the processing plant. When this pipe gets worn and can no longer be used, the pipe is cut up and transported to Carlton Industries, where the pipe gets ground down into pellets that are used to manufacture drainage pipe, which is used at Clayton facilities and/or sold at Clayton's supply stores.

DANCER FARMS

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/9/13	To kill weeds, the farmer uses cultivators. To eliminate pests, he rotates the crops. Both these practices reduce the need for herbicide/ insecticide applications.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/9/13	The farmer does not any irrigation system; he only uses rain water to irrigate the 500 acres of crops.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/19/18	This farm employs crop rotation, which they find drastically reduces their need for chemical control.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/19/18	This farm conserves water by relying on rain rather than using irrigation.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/19/18	This establishment is in the process of switching to all LED lighting.

DEWOLFS FARM

Site ID: DEWOLFS FARM

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/16/13	Farm has reduced its use of pesticides by using Integrated Pest Management (IPM) techniques.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/16/13	Employs drip irrigation to reduce water usage.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/16/13	1. Greenhouse flats are washed for reuse until physical integrity no longer suitable for further use. 2. Used greenhouse/potting soils cycled into field after no longer usable in greenhouse production.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	5/16/13	1. Students from a Tom's River school are brought to the farm to learn about vegetable and crop production using IPM methods. 2. Demonstrates/teaches young farmers the value of Integrated Pest Management (IPM) principles in vegetable crop production.

EAGLE RIDGE GOLF COURSE

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/10/15	VFD pumps
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/10/15	All golf carts are electric powered.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/10/15	All branches/trees are chipped onsite and used as mulch. Also the tree stumps are used as tee markers.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	8/10/15	40 acres of no mow grasses, wildflowers, bird houses, wood duck houses, Audubon Certified, low mow blue grass in tee boxes, tall and fine fescues.

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/19/14	Ecoterra and Plantohyd 4010 vegetable based hydraulic oils are used in the hydraulics for the dredge and also for the dredge bucket.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/19/14	All materials and/or equipment rendered unusable for production purposes are cut up and parts are reused on operational equipment.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	11/18/11	Facility has deed restricted 112 acres of its property for the habitat of the northern pine snake, Pituophis melanoleucus

EMERYS BLUEBERRY FARM

Site ID: EMERYS BLUEBERRY FARM

20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	12/3/08	Facility has solar panels that supply approximately 40% of the site's power needs

EXELON GENERATING CO INC @ OYSTER CREEK NUCLEAR GENERATING STATION

Site ID: EXELON GENERATING CO INC @ OYSTER CREEK NUCLEAR
 15856 GENERATING STATION
 741 RT 9,
 FORKED RIVER, NJ 08731

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/28/08	Oyster Creek implements a program of voluntary onsite energy use reduction during periods of peak electricity consumption. An Energy Conservation Measures audit was recently conducted to identify energy efficiency items.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/28/08	Oyster Creek's vehicle fleet has reduced in size by approximately 50% since 2000. Oyster Creek also employs the use of propane and electric powered vehicles.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	4/28/08	Oyster Creek has sponsored the following projects: - Donated over \$310,000.00 to Natural Resource Education of the Lighthouse Center in Waretown, NJ for Terrapin and Sea Turtle Studies, trail creation, learning station creation and various educational programs.
22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	4/28/08	Oyster Creek has adopted the following programs: - Sponsored the World Series of Birding OC Exelon team to improve positive public exposure to Oyster Creek's environmental programs through this birding competition - Installed a Peregrine Falcon and Osprey nest platform to provide a nest box for endangered species - Participated in the Diamondback Terrapin conservation program with the Marine Academy of Technology and Environmental Science to promote diamondback terrapin conservation in decline across their range, through active student and community participation in Ocean County. AmerGen has also sponsored the construction and distribution of several thousand terrapin by catch reduction devices made for insertion into recreational or commercial crab traps. These devices are designed to protect the local terrapin population by preventing the accidental entrapment of terrapins in crab traps.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	4/28/08	Oyster Creek has an educational/outreach program developed by their Communications Department. Speakers are regularly provided to address issues of interest, including environmental challenges, to local community leaders, schools and neighborhood groups. - Donated two Spectrophotometers and over \$4,000.00 to the Ocean County Marine Academy of Technology and Environmental Science High School for Terrapin and Sea Turtle curriculum.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/28/08</p>	<p>Oyster Creek, as a member of the Exelon family of companies adheres to the Exelon Corporation Environmental policy statement.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/28/08</p>	<p>Oyster Creek currently uses an Environmental Management System and is working to obtain an International Organization for Standardization 14001:2000 certification during 2008.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/28/08</p>	<p>Oyster Creek's Controlled Materials Program (CMP) is intended to encourage the use of environmentally friendly products and reduce the overall number of products used at the facility (procedure EN-MA-501).</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/28/08</p>	<p>The Oyster Creek facility computes it's greenhouse gas emissions utilizing the GHG Protocol Corporate Accounting and Reporting Standard developed by the World Resources Institute (WRI) and the World Business Council for Sustainable Development (WBCSD).</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/28/08</p>	<p>Oyster Creek has a supply chain initiative to purchase only from "green companies" and the service contracts contain clauses specifying environmental training, awareness, expectations and policy. Facility has a "Green supply plan".</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/25/12</p>	<p>Dining Hall implemented Tray less Dining which reduced the amount of water used to wash trays. All shower repairs are repaired with low flow shower heads. As part of the sustainable grounds initiative, a deep soil disruption device is used to enhance growth through mechanical aeration, reducing the amount of fertilizers and water used onsite.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/25/12</p>	<p>As part of the sustainable grounds initiative a deep soil disruption device is used to enhance growth through mechanical aeration, reducing the amount of fertilizers and water used onsite. Water bottle refilling stations saves on water bottle recycling by encouraging reuse.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/25/12</p>	<p>Purchased electric hybrid vehicle for security which gets approximately 400 miles to gallon.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/25/12</p>	<p>All project implementation committed to a minimum of LEED silver standard. Greenlights energy efficiency program implemented. Solar insulating film installed on windows to reduce heat and less demand for energy to cool within building. All shower repairs are repaired with low flow shower heads.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>7/25/12</p>	<p>Gravel Rain Garden Onsite; studied for denitrifying rainwater. Georgian Court University has implemented a Sustainable Landscaping Initiative. Invasive species are replaced with non-invasive species (usually native), and species that have shown themselves to be susceptible to drought and global climate change in our environment (e.g., Colorado blue spruce, balsam firs, Norway spruces) are replaced with more drought-tolerant native species such as shortleaf, pitch and Virginia pines, and Eastern cedar. Native plants are used for the majority of plantings in non-historic parts of the campus. When tree replacements are done on a one-for-one basis, generally the university uses native species grown from parents already growing on the campus. Typically, this amounts to 20-40 trees per year. In addition the university has established "No Mow" areas throughout the campus and all grass clippings are mulched into lawn.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>7/25/12</p>	<p>Water awareness sticker program. promotes the awareness of water use and wastefulness, promotes reporting of dripping faucets etc.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/25/12</p>	<p>Barnegat Bay Clean Up Blitz. Sustainability Living-Learning Community http://www.georgian.edu/living_learning/index.htm Georgian Court students participate with local high schoolers to study Lake Carasaljo water quality and other related issues.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>7/25/12</p>	<p>Also member of Resue of Industrial Material Recommendations and National Clean Diesel Campaign and Clean Construction USA. http://www.epa.gov/diesel/</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>7/25/12</p>	<p>LEEDS gold certification on the Wellness building awarded 2010</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>7/25/12</p>	<p>Approximately 1 megawatt generating solar panels onsite. 85% RECs purchased from green power. 2009 award winner for green power purchasing. 2010-2011 college and univeristy green power challenge winner. 100% green power used by the Georgian Court University. http://www.epa.gov/greenpower/documents/highed_challenge_2010-11.pdf http://www.epa.gov/greenpower/gpmarket/rec.htm</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>7/25/12</p>	<p>Energy driven analysis conducted under the Clean Air Cool Planet model http://rs.acupcc.org/ghg/2300/</p>

GRAND CAR WASH

Site ID: GRAND CAR WASH
127535 RT 88 & RICHMOND AVE,
POINT PLEASANT BORO, NJ 08742

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/4/12	All washwater filtered, recycled, and reused. There is no discharge of wash water to the environment.

GREENBRIAR II HOMEOWNERS ASSOC

Site ID: GREENBRIAR II HOMEOWNERS ASSOC
52472 1 GREENBRIAR BLVD,
BRICK TOWN, NJ 08724

Stewardship Activities	Date Acknowledged	Comments
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	4/2/12	For geese control, the facility has set up wooden cut out dogs on pivots and has also placed line across the stormwater basin as a deterrent for gathering geese.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	3/11/08	For geese control, the facility has set up wooden cut out dogs on pivots and has also placed line across the stormwater basin as a deterrent for gathering geese.

HALLOCKS U PICK FARM

Site ID: HALLOCKS U PICK FARM
128700 38 FISCHER RD,
PLUMSTED TWP, NJ 08533

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/16/13	Has converted to drip irrigation over past 10 years.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/16/13	1. Changed diesel engines on irrigation system to tier 3 engines -- saving ~1.0 gallon diesel fuel/hr.; Operation for 17 to 18 hrs./day results in significant fuel savings. Also, in one case, one of the new engines replaced two of the old engines. Replacement engines partially funded by Federal grant. 2. Updating to more efficient operating motors/compressors/fans of coolers for vegetable storage reducing electrical demand. 3. Maintains double-walled poly on greenhouses to retain more heat during winter months.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/16/13	1. Reuses pieces of obsolete equipment for repairs or new uses. 2. Empty and cleaned plastic pesticide containers are offered for recycling.

LAKWOOD COGENERATION PLANT

Site ID: LAKWOOD COGENERATION PLANT
14574 123 ENERGY WAY,
LAKWOOD, NJ 08701

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	4/8/08	The site is operated under Consolidated Edison, Inc.'s environmental, health and safety policy.

LAKEWOOD COUNTRY CLUB

Site ID: LAKEWOOD COUNTRY CLUB
369150 145 COUNTRY CLUB DR,
LAKEWOOD TWP, NJ 08701

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/30/12	Lakewood Country Club has installed new more efficient computerized upgraded watering control system and is in the process of replacing all heads with more efficient less water use watering heads. These Upgrades will result in more efficient water usage and reduce the overall amount of water used for irrigation.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/30/12	Lakewood Country Club uses 60 tons of Ocean Gro fertilizer each year on the fairways and greens. Thus reducing the amount of commercially available fertilizer used at the golf course.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	7/30/12	Facility has built and installed a variety of 16 bird houses to attract a variety of nesting birds including blue birds, barn swallows, martins, wrens, screech owls, and wood ducks. These bird houses are built to audonbon specifications for the particular varietal bird species. The bird houses are placed in various areas throughout the golf course. Many bird houses have attracted nesting pairs of birds. Golf course patrons have tracked and listed approximately 115 species of birds on the golf course of Lakewood Country Club.

LAVALLETTE BORO HALL

Site ID: LAVALLETTE BORO HALL
2907 1306 GRAND CENTRAL AVE,
LAVALLETTE, NJ 087350000

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	12/22/10	Dune grass planting is done each year to maintain the environmentally sensitive dune ecosystem.

MID ATLANTIC GROWERS INC

Site ID: MID ATLANTIC GROWERS INC
178168 6 MEADOW BROOK LN,
NEW EGYPT, NJ 08533

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/19/18	All walkways are paved or covered with landscape fabric. Weeds are removed by hand rather than being treated with herbicide.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/19/18	To conserve water, drip irrigation is used in almost the entire facility. Boom sprayers are employed in some of the greenhouses.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/19/18	High-efficiency heaters are used in all 65 greenhouses at this nursery. Automated and low-energy boom sprayers are employed in some greenhouses.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/19/18	All plastic used in the fields as well as any used drip-line tubing are recycled.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/19/18	This nursery has solar panels installed onsite.

MONMOUTH MEDICAL CENTER SOUTHERN CAMPUS

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	7/14/16	The hospital continues to use more environmentally favorable products. Example includes steam instead of hydrogen peroxide for cleaning process.
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	7/14/16	All of the hospitals plumbing includes water saving fixtures in showers, toilets, and sinks as well as urinals and commodes.
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	7/14/16	The hospital recycles scrap metal that in the past would have been thrown into the waste stream. This includes both light and heavy metal items and both ferrous and non-ferrous metals. They also recycle refrigerants from units they dispose of by reclaiming. Their kitchen recycles cooking oil, also. In addition, medical supplies such as the pulse oximeter probe is recycled by sending it out to a company for refurbishment.
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	7/14/16	The hospital continues to implement the replacement of all light bulbs in their facility and are changing them to LED bulbs. This allows them to stop using incandescent, fluorescent, CFL, halogen, mercury sodium, and metal halide bulbs as well as their associated ballasts. By doing this they not only reduce energy usage but also slow the input of potentially hazardous waste into the waste stream. At this point the hospital is about 25% complete. As renovations occur, the bulbs are changed.
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	10/26/12	The hospital has switched products to more environmentally favorable substances. Examples include the use of poly-glycol from ethyl-glycol, Para Clear for Xylene, various refrigerants for HFCs, and biodegradable fuels whenever possible as well as biodegradable cooking oil. The hospital has also stopped the use of ethylene oxide in their sterile cleaning process.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>10/26/12</p>	<p>The hospital has replaced 100 % of its plumbing with water saving fixtures in showers, toilets , and sinks. They have also installed water saving urinals as well as commodes.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>10/26/12</p>	<p>The hospital recycles scrap metal that in the past would have been thrown out into the waste stream. This includes both light and heavy metal items and both ferrous and non-ferrous metals. They also recycle refrigerants as well from units they are disposing of by reclaiming it. Their kitchen recycles cooking oil and uses a food digester which basically makes waste food into compost.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/26/12</p>	<p>All new projects must be Leed Certified. The architects and engineers hired are all LEED certified. Recent projects to meet these requirements include the renovation of Suite 214, 201 (500 Building), and the 1 South Project.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>10/26/12</p>	<p>The hospital has implemented the replacement of all light bulbs in their facility and are changing them to LED bulbs. This allows them to stop using incandescent, fluorescent, CFL, halogen, mercury sodium, and metal halide bulbs as well as their associated ballasts. By doing this they not only reduce energy usage but also slow the input of potentially hazardous waste into the waste stream. At this point the hospital is about 3% complete with a timetable of September, 2017 to complete.</p>

NJ STATE POLICE BARRACKS

Site ID: NJ STATE POLICE BARRACKS
13499 RT 9 S & COX AVE,
WEST CREEK, NJ 08092

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/24/14	In November 2012 replaced conventional 50 gallon domestic water heater with a high efficiency WEIL-McLAIN Aqua Plus indirect fired 40 gallon water heater.

OCEAN CNTY ATLANTIS GOLF COURSE

Site ID: OCEAN CNTY ATLANTIS GOLF COURSE
 49293 261 COUNTRY CLUB BLVD,
 LITTLE EGG HARBOR, NJ 08087

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	4/19/11	Facility has reduced the amount of synthetic fertizer application, by applying 40-50 tons of Oceangro residual fertilizer 5-5-0 as the first application of the year and saving on the use and expense of synthetic fertilizer applications, see http://www.ocua.com/OceanGro.html
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	4/19/11	Facility has received a State of New Jersey grant to plant five acres of wildflowers which provides additional habitat for butterflies, insects and wildlife.
22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	4/19/11	Facility has constructed 12 green head trap boxes which is a natural non chemical use trap. The box does not use chemicals or insecticides for pest management for <i>Tabanus nigrovittatus</i> . This box trap gives an ecologically safe, inexpensive, and effective means of greenhead fly control. http://www.rci.rutgers.edu/~insects/greenheads.htm

OCEAN CNTY COMMUNITY COLLEGE

Site ID: OCEAN CNTY COMMUNITY COLLEGE
 3149 1 COLLEGE DR, & HOOPER AVE
 TOMS RIVER, NJ 08754

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/6/12	There is a new building currently under construction on the college campus that is being constructed in accordance with LEED standards.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	3/6/12	Ocean County College is in partnership with the Barnegat Bay Estuary Program.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/6/12	Solar panels were recently installed on the roof of the college's Bartlett Building and windmill generators have been installed on the Science Building.

OCEAN CNTY FORGE POND GOLF COURSE

OCEAN CNTY UTIL AUTH CWPCF

Site ID: OCEAN CNTY UTIL AUTH CWPCF
 14575 501 HICKORY LN,
 BAYVILLE, NJ 08721

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/15/17	Treated effluent is used for lawn watering, sewer jetting, non-contact cooling water, seal water on pumps, in the heat exchangers, plant wash down & foam suppression. Total savings in potable water use in 2017 was 691.9 MG.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/15/17	One half of the plant's pumps in the Return Activated Sludge Building were replaced with Variable Frequency Drives(VFDs) which resulted in a 30% reduction in electrical usage. 3 waste activated sludge pumps, 4 heat pumps and 4 transfer pumps were replaced with VFDs in 2017.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	12/15/17	Facility recycles scrap metal. Approx. 65.6 tons of scrap metal were recycled in 2017.

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/15/17</p>	<p>9 hybrid vehicles available for employee use along with 5 Ford Green Vehicles with Eco-Boost.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/15/17</p>	<p>LED Lighting Replacement Project Phase I. In Phase I the facility replaced 199 (150W) high pressure sodium fixtures with 26W LEDs. This has resulted in a savings of 114,624 KW Hours/Year. Facility has also installed occupancy sensors on lighting inside office building & maintenance shops. 18 light fixtures were replaced with LEDs in 2014.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/15/17</p>	<p>Facility converted its storm water detention basin into a recharge basin/rain garden. This prevents approximately 1 million gallons of storm water from flowing off OCUA's property into local creeks & eventually the Barnegat Bay and instead the storm water is absorbed back into the soils on-site so that it can replenish the Barnegat Bay watershed's groundwater supplies. The water is also treated by the soil column to remove nutrients from the storm water run-off instead of discharging these nutrients directly into Barnegat Bay.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>12/15/17</p>	<p>Cogeneration system utilizes digester gas to produce electricity & heat. In 2017, 5.56 megawatt hours of electricity was produced. In addition, heat was produced for digesters, solids handling facility building & the boiler.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/15/17</p>	<p>College and high school students receive tours of the plant & presentations on wastewater education. 30 presentations for 587 people were conducted during 2017.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/15/17</p>	<p>Installed solar panels that generated 226 KW of energy in 2017.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/23/17</p>	<p>Treated effluent is used for lawn watering, sewer jetting, non-contact cooling water, seal water on pumps, in the heat exchangers, plant washdown & foam suppression. Total savings in potable water use in 2016 was 699.04 MG.</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/23/17</p>	<p>One half of the plant's pumps in the Return Activated Sludge Building were replaced with Variable Frequency Drives(VFDs) which resulted in a 30% reduction in electrical usage. No additional pumps were replaced during 2016.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/23/17</p>	<p>Facility recycles scrap metal. Approx. 62.4 tons of scrap metal were recycled in 2016.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/23/17</p>	<p>9 hybrid vehicles available for employee use along with 2 Ford Green Vehicles with Eco-Boost. 3 additional Ford Green Vehicles with Eco-Boost were purchased in 2016.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/23/17</p>	<p>LED Lighting Replacement Project Phase I. In Phase I the facility replaced 199 (150W) high pressure sodium fixtures with 26W LEDs. This has resulted in a savings of 114,624 KW Hours/Year. Facility has also installed occupancy sensors on lighting inside office building & maintenance shops. 18 light fixtures were replaced with LEDs in 2014. No additional lighting replacement occurred during 2016.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/23/17</p>	<p>Facility converted its stormwater detention basin into a recharge basin/rain garden. This prevents approximately 1 million gallons of stormwater from flowing off OCUA's property into local creeks & eventually the Barnegat Bay and instead the stormwater is absorbed back into the soils on-site so that it can replenish the Barnegat Bay watershed's groundwater supplies. The water is also treated by the soil column to remove nutrients from the stormwater run-off instead of discharging these nutrients directly into Barnegat Bay. There were no additional enhancement projects in 2016.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/23/17</p>	<p>College and high school students receive tours of the plant & presentations on wastewater education. 25 presentations for 478 people were conducted during 2016.</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/23/17</p>	<p>Installed solar panels that generate 180 KW of energy. No additional solar panels were installed in 2016.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/25/16</p>	<p>Treated effluent is used for lawn watering, sewer jetting, non-contact cooling water, seal water on pumps, in the heat exchangers, plant washdown & foam suppression. Total savings in potable water use in 2015 was 602.4 MG.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/25/16</p>	<p>One half of the plant's pumps in the Return Activated Sludge Building were replaced with Variable Frequency Drives(VFDs) which resulted in a 30% reduction in electrical usage No additional pumps were replaced during 2015.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/25/16</p>	<p>Facility recycles scrap metal. Approx. 26.3 tons of scrap metal were recycled in 2015.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/25/16</p>	<p>9 hybrid vehicles available for employee use along with 2 Ford Green Vehicles with Eco-Boost. 3 additional Ford Green Vehicles with Eco-Boost were purchased in 2015.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/25/16</p>	<p>LED Lighting Replacement Project Phase I. In Phase I the facility replaced 199 (150W) high pressure sodium fixtures with 26W LEDs. This has resulted in a savings of 114,624 KW Hours/Year. Facility has also installed occupancy sensors on lighting inside office building & maintenance shops. 18 light fixtures were replaced with LEDs in 2014. No additional lighting replacement occurred during 2015.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/25/16</p>	<p>Facility converted its stormwater detention basin into a recharge basin/rain garden. This prevents approximately 1 million gallons of stormwater from flowing off OCUA's property into local creeks & eventually the Barnegat Bay and instead the stormwater is absorbed back into the soils on-site so that it can replenish the Barnegat Bay watershed's groundwater supplies. The water is also treated by the soil column to remove nutrients from the stormwater run-off instead of discharging these nutrients directly into Barnegat Bay. There were no additional enhancement projects in 2015.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/25/16</p>	<p>Cogeneration system utilizes digester gas to produce electricity & heat. In 2015, 5.1 megawatt hours of electricity was produced. In addition, heat was produced for digesters, solids handling facility building & the boiler.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/25/16</p>	<p>College, high school students and scouts receive tours of the plant & presentations on wastewater education. 16 presentations were conducted during 2015.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/25/16</p>	<p>Installed solar panels that generate 180 KW of energy. No additional solar panels were installed in 2015</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>12/16/14</p>	<p>Treated effluent is used for lawn watering, sewer jetting, non-contact cooling water, seal water on pumps, in the heat exchangers, plant washdown & foam suppression. Total savings in potable water use equated to 800-1,000 gallons/minute in 2014.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/16/14</p>	<p>One half of the plant's pumps in the Return Activated Sludge Building were replaced with Variable Frequency Drives(VFDs) which resulted in a 30% reduction in electrical usage No additional pumps were replaced during 2014.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/16/14</p>	<p>Facility recycles scrap metal. 19.12 tons were recycled in 2014.</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/16/14</p>	<p>9 hybrid vehicles available for employee use & 2 Ford Green Vehicles with Eco-Boost are also available.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/16/14</p>	<p>LED Lighting Replacement Project Phase I. In Phase I the facility replaced 199 (150W) high pressure sodium fixtures with 26W LEDs. This has resulted in a savings of 114,624 KW Hours/Year. Facility has also installed occupancy sensors on lighting inside office building & maintenance shops. 18 light fixtures were replaced with LEDs in 2014.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/16/14</p>	<p>Facility converted its stormwater detention basin into a recharge basin/rain garden. This prevents approximately 1 million gallons of stormwater from flowing off OCUA's property into local creeks & eventually the Barnegat Bay and instead the stormwater is absorbed back into the soils on-site so that it can replenish the Barnegat Bay watershed's groundwater supplies. The water is also treated by the soil column to remove nutrients from the stormwater run-off instead of discharging these nutrients directly into Barnegat Bay. There were no additional enhancement projects in 2014.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>12/16/14</p>	<p>Cogeneration system utilizes digester gas to produce electricity & heat. In 2014, 4.0 million kilowatt hours of electricity was produced. In addition, heat was produced for digesters, solids handling facility building & the boiler.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/16/14</p>	<p>College, high school students, scouts receive tours of the plant & presentations on wastewater education. 17 presentations were conducted during 2014. In 2014, Richard Kunze of OCUA received a Public Education Award by the Association of Environmental Authorities for promoting awareness and understanding of water environment issues among the general public through the development and or implementation of public education programs. In addition, OCUA attended The Toms River Food Festival, Barnegat Bay Festival, Brick Green Fair and NJ Turf Grass Expo to promote the benefits of OCEANGRO (a fertilizer produced from sewage sludge) .</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/16/14</p>	<p>Installed solar panels that generate 180 KW of energy No additional solar panels were installed in 2014</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/23/14</p>	<p>Treated effluent is used for lawn watering, sewer jetting, non-contact cooling water, seal water on pumps, in the heat exchangers, plant washdown & foam suppression. Total savings in potable water use equated to 800-1,000 gallons/minute in 2013.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/23/14</p>	<p>One half of the plant's pumps in the Return Activated Sludge Building were replaced with Variable Frequency Drives(VFDs) which resulted in a 30% reduction in electrical usage No additional pumps were replaced during 2013.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/23/14</p>	<p>Facility recycles scrap metal. Approx. 39.866 tons of scrap metal were recycled in 2013.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/23/14</p>	<p>6 hybrid vehicles available for employee use 3 more hybrids were purchased in 2013 & 2 Ford Green Vehicles with Eco-Boost were purchased in 2013</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/23/14</p>	<p>LED Lighting Replacement Project Phase I. In Phase I the facility replaced 199 (150W) high pressure sodium fixtures with 26W LEDs. This has resulted in a savings of 114,624 KW Hours/Year. Facility has also installed occupancy sensors on lighting inside office building & maintenance shops. No additional lighting replacement occurred during 2013.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/23/14</p>	<p>Facility converted its stormwater detention basin into a recharge basin/rain garden. This prevents approximately 1 million gallons of stormwater from flowing off OCUA's property into local creeks & eventually the Barnegat Bay and instead the stormwater is absorbed back into the soils on-site so that it can replenish the Barnegat Bay watershed's groundwater supplies. The water is also treated by the soil column to remove nutrients from the stormwater run-off instead of discharging these nutrients directly into Barnegat Bay. There were no additional enhancement projects in 2013.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/23/14</p>	<p>Cogeneration system utilizes digester gas to produce electricity & heat. In 2013, 4.5 million kilowatt hours of electricity was produced. In addition, heat was produced for digesters, solids handling facility building & the boiler.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/23/14</p>	<p>College, high school students, scouts receive tours of the plant & presentations on wastewater education. 25 presentations were conducted during 2013. In March 2013 at the Wave Awards in Atlantic City, OCUA received a Public Education Award by the Association of Environmental Authorities for OCUA's Public Education efforts since the 1980s. OCUA gave a tour to Brownie Troop 520 on 12/6/13 which was posted in the Girl Scouts of the Jersey Shore Newsletter. .</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/23/14</p>	<p>Installed solar panels that generate 180 KW of energy No additional solar panels were installed in 2013</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/8/13</p>	<p>Treated effluent is used for lawn watering, sewer jetting, non-contact cooling water, seal water on pumps, in the heat exchangers, plant washdown & foam suppression. Total savings in potable water use equates to 1,400-1,800 gallons/minute.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/8/13</p>	<p>One half of the plant's pumps in the Return Activated Sludge Building were replaced with Variant Frequency Drives(VFDs) which resulted in a 30% reduction in electrical usage</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/8/13</p>	<p>facility recycles scrap metal. Approx. 37.95 tons of scrap metal were recycled in 2012.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/8/13</p>	<p>6 hybrid vehicles purchased for employee use</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/8/13</p>	<p>LED Lighting Replacement Project Phase I. In Phase I the facility replaced 199 (150W) high pressure sodium fixtures with 26W LEDs. This has resulted in a savings of 114,624 KW Hours/Year. Facility has also installed occupancy sensors on lighting inside office building & maintenance shops.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/8/13</p>	<p>Facility converted its stormwater detention basin into a recharge basin/rain garden. This prevents approximately 1 million gallons of stormwater from flowing off OCUA's property into local creeks & eventually the Barnegat Bay and instead the stormwater is absorbed back into the soils on-site so that it can replenish the Barnegat Bay watershed's groundwater supplies. The water is also treated by the soil column to remove nutrients from the stormwater run-off instead of discharging these nutrients directly into Barnegat Bay.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/8/13</p>	<p>Cogeneration system utilizes digester gas to produce electricity & heat. In 2012, 4.7 million kilowatt hours of electricity was produced. In addition, heat was produced for digesters, solids handling facility building & the boiler.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/8/13</p>	<p>College, high school students, scouts receive tours of the plant & presentations on wastewater education. 15-20 school presentations/ year are conducted. April 2, 2012 facility received thank you from Scout Pack leader for their tour & presentation.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/8/13</p>	<p>Installed solar panels that generate 180 KW of energy</p>

OCEAN CNTY UTIL AUTH NWPCF

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/14/19</p>	<p>Treated effluent is recycled for use in the following processes within the plant instead of using potable water: firefighting, wash down & cleaning of tanks, cooling water in Co-Gen facility, sludge thickening process and seal water for pumps. 1.2 billion gallons of process water was utilized in 2018 instead of potable water.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/14/19</p>	<p>Facility upgraded its biosolids process which resulted in an increase of approx. 15% solids in its sludge during 2015. The increase in solids dropped fuel consumption by 50% annually. At pump station #3 the impellers were changed from a three vane to two vane which resulted in the lag pump running less often. The two vane allow rags to pass and prevents clogs. This has resulted in a 10%/month reduction in electric usage.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/14/19</p>	<p>All scrap metal is recycled</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/14/19</p>	<p>Change in % solids for sludge resulted in the need for 60% less trips for disposal. In 2014 the maximum number of trips in any month to the disposal facility was 210 and in 2018 it was 88. Electric golf carts are used for traveling on the plant site. The facility has 6 electric golf carts used for this purpose only. Enforcement of the Authority's "No Idling" policy has resulted in a reduction of gasoline usage by 19%.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/14/19</p>	<p>HVAC system in Operations & Maintenance Building was changed from oil heat to natural gas. Also replaced furnace, AC and hot water heater with more energy efficient units. In 2017, two additional HVAC systems were changed from oil heat to natural gas. In 2018, replaced HVAC system in solids handling building with a more efficient unit.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/14/19</p>	<p>The facility has Co-Generation which utilizes the methane generated from the sludge during anaerobic digestion to heat the digesters. In 2018, this Co-Generation Process supplied 46% of the plant's electrical demand.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>10/12/17</p>	<p>Treated effluent is recycled for use in the following processes within the plant instead of using potable water: fire fighting, wash down & cleaning of tanks, cooling water in Co-Gen facility, sludge thickening process and seal water for pumps. 1.16 billion gallons of process water was utilized in 2016 instead of potable water.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>10/12/17</p>	<p>Facility upgraded its biosolids process which resulted in an increase of approx. 15% solids in its sludge during 2015. The increase in solids dropped fuel consumption by 50% annually. At pump station #3 the impellers were changed from a three vane to two vane which resulted in the lag pump running less often. The two vane allow rags to pass and prevents clogs and saved about 1,200/month in electricity since January.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>10/12/17</p>	<p>All scrap metal is recycled.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>10/12/17</p>	<p>Change in % solids for sludge resulted in the need for 60% less trips for disposal. Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/20/18	90-95% of water usage is with treated STP effluent (service water) instead of potable water. Service water is used for wash water, seal water packing for pumps, belt wash down water, process water, sewer jetting & cleaning, filling off-line aeration tanks, septage area wash down, digester cleaning, fire hydrants, etc. Approx. 301,800,000 gallons of service water was used instead of potable water during 2017.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/20/18	Piping modification allows the plant's final effluent to flow by gravity through the ocean outfall pipe. Prior to this modification the effluent had to be pumped through the ocean outfall pipe. Installed new energy efficient blowers & fine bubble diffusion in aeration tanks. The outfall & aeration tank upgrades equate to 146 KW hours/month in total energy savings.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	2/20/18	Facility recycled 25,900 lbs. of scrap metal during 2017.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/20/18	The facility has 3 electric golf carts for on-site transportation.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/20/18	Replaced 87 high pressure sodium light fixtures with LED light fixtures in 2012. Eighty 70 watt light fixtures were replaced with 13 watt LED fixtures. Seven 175 watt fixtures were replaced with 26 watt LED fixtures.

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>2/20/18</p>	<p>Received a Best Management Wave Award on 3/11/2015 for their intensive lockout/tag procedure. Since the facility moved toward equipment automation and remote control, the maintenance department realized that working on equipment safely had changed. Many motors, pumps or valves could now start or open automatically. Their new detailed program required that each piece of equipment and any associated valves, circuits & breakers needed to be clearly identified and tagged. After all equipment was tagged, written procedures were created not only for each piece of equipment but for the different tasks that you were performing on that equipment. This program which took 2 and 1/2 years to develop improves worker safety but in doing so also protects the environment by helping to avoid mishaps which could also cause environmental impacts.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/15/16</p>	<p>90-95% of water usage is with treated STP effluent (service water) instead of potable water. Service water is used for washwater, seal water packing for pumps, belt washdown water, process water, sewer jetting & cleaning, filling off-line aeration tanks, septage area washdown, digester cleaning, fire hydrants, etc. Approx. 301,896,000 gallons of service water was used instead of potable water during 2015.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/15/16</p>	<p>Piping modification allows the plant's final effluent to flow by gravity through the ocean outfall pipe. Prior to this modification the effluent had to be pumped through the ocean outfall pipe. Installed new energy efficient blowers & fine bubble diffusion in aeration tanks. The outfall & aeration tank upgrades equate to 146 KW hours/month in total energy savings.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/15/16</p>	<p>Facility recycled 31,700 lbs. of scrap metal during 2015.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/15/16</p>	<p>The facility has 3 electric golf carts for on-site transportation.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/15/16</p>	<p>Replaced 87 high pressure sodium light fixtures with LED light fixtures in 2012. Eighty 70 watt light fixtures were replaced with 13 watt LED fixtures. Seven 175 watt fixtures were replaced with 26 watt LED fixtures. No new replacements during 2015</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>3/15/16</p>	<p>Received a Best Management Wave Award on 3/11/2015 for their intensive lockout/tag procedure. <p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/13/13</p>	<p>Piping modification allows the plant's final effluent to flow by gravity through the ocean outfall pipe. . Prior to this modification the effluent had to be pumped through the ocean outfall pipe. Installed new energy efficient blowers & fine bubble diffusion in areation tanks.The outfall & aeration tank upgrades equate to 146 KW hours/month in total energy savings.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/13/13</p>	<p>Facility recycled 17,600 lbs. of scrap metal during 2012.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/13/13</p>	<p>The facility has one hybrid car & 3 electric golf courts for on-site transportation.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/13/13</p>	<p>Replaced 87 high pressure sodium light fixtures with LED light fixtures in 2012. Eighty 70 watt light fixtures were replaced with 13 watt LED fixtures. Seven 175 watt fixtures were replaced with 26 watt LED fixtures.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/9/11</p>	<p>There was a piping modification made that now allows the plant's final effluent to flow by gravity through the ocean outfall pipe and to its final discharge point in the Atlantic Ocean. Prior to this modification the effluent had to be pumped through the ocean outfall pipe. The most recent financial data available indicates that there has been a 30% reduction in the plant's electricity use as the ocean outfall pump usage went from 100% to 5% . The projected annual savings in dollars at the current cost of electricity is approximately \$231,000.00.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/28/16</p>	<p>Facility continues to not be a Hazardous Material Generator. In past years the facility would need to service their ammonia freezer compressor more frequently than now and would need to use Naphtha in the cleaning process. This servicing would yield waste oil that was contaminated with both Naphtha and ammonia. The contaminated oil would amount to several 55-gallon drums a year. The facility no longer utilizes the Naphtha in the servicing and generates far less waste oil each year (usually 1 drum per year).</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/27/12</p>	<p>Facility is no longer a Hazardous Material Generator. 16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/8/12	The Claytons have used 648 tons of fly ash and 9288 tons of slag in concrete block production and 20,458 tons of fly ash in concrete production. Both of these waste products serve as a direct replacement for cement in Clayton products and have reduced cement usage 30,394 tons.

SIX FLAGS GREAT ADVENTURE PARK & SAFARI

Site ID: SIX FLAGS GREAT ADVENTURE PARK & SAFARI
 14573 575 MONMOUTH RD, AKA RT 537
 JACKSON TWP, NJ 08527

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	11/19/09	Replacement of lights on historic ferris wheel with LED high efficiency bulbs, as well as other replacements throughout the site which has resulted in savings of 53,000 KWH annually
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	11/19/09	Retrofit of entire diesel fleet to use biodiesel fuel.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	11/19/09	Sections of the property have been reforested.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	11/19/09	Educate the public through school tours and media program about the rare and endangered species that are found on the property.

SOUTH LAND FARMS

Site ID: SOUTH LAND FARMS

 PLUMSTED TWP, NJ 08533

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/18/13	The farmer uses mechanical control for the weeds reducing hazardous material, reducing the need for pesticide/herbicide control.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/18/13	The farmer has 6 acres in drip irrigation system to conserve water.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/18/13	In this business high efficiency T5 lighting is used to save energy.

STAFFORD DRY CLEANERS @ STAFFORD SQUARE SHOPPING CENTER

Site ID: STAFFORD DRY CLEANERS @ STAFFORD SQUARE SHOPPING
 2794 CENTER
 297 RT 72,
 MANAHAWKIN, NJ 08050

Stewardship Activities	Date Acknowledged	Comments
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	6/24/08	Stafford Dry Cleaners has replaced its Perc based dry cleaning machine with an environmentally friendly isoparaffin hydrocarbon based machine.

3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	12/5/12	signed 7/9/12, implemented accordingly.

THE HINCKLEY CO

Site ID: THE HINCKLEY CO
3187 5 MANTOLOKING RD,
BRICKTOWN, NJ 08738

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/17/11	Winterizing shrink wrap recycled through dedicated springtime process. Dedicated dumpsters used and the shrink wrap is recycled.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	11/17/11	Hinckley Yacht Services provides 24 hour 7 day a week pump out services and toilet washdown services for free to any boater. The philosophy of the company is provide this free service to help protect the waters as a fundamental resource. Facility does assist the Army Corp or Engineers with providing docking services. Facility has also reached out to the Department to provide slip and marina services for Barnegat Bay studies and activities.

LAKEWOOD, NJ 087010000

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	7/25/12	http://www.community.ups.com/Environment/UPS+Environmental+Philosophy/Corporate+Policies
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	7/25/12	solar panels are on the roof and in use. 250kW system.

USDOD NAVAL AIR STATION LAKEHURST @ JB MDL

Performance Track.	1/14/08	
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/14/08	Hazardous Materials Control and Management Program http://www.lakehurst.navy.mil/envir/hazmat.htm Dedicated to a Performance Track commitment of reducing waste from 8.22 tons in 2006 to a goal of 7.4 tons for 2009, a 10% reduction.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/14/08	Through their EMS and Performance Track, the facility has committed and successfully reduced its water use through an ongoing maintenance program. The commitment achieved was 93.1 million gallons in 2003 to 79.6 million gallons in 2006.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/14/08</p>	<p>In the past wood debris would be sent off-site as garbage to a landfill. Recently, the facility has been grinding the wood into mulch used onsite. There is no longer a wood waste stream. http://www.lakehurst.navy.mil/envir/recycle.htm</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>1/14/08</p>	<p>All products manufactured onsite have life cycle assessments conducted. Magnetic aircraft launch systems will replace steam driven mechanism resulting in less energy demand, extension of shipboard nuclear reactors and reduction in nuclear waste.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/14/08</p>	<p>Facility has changed over its heavy machinery fuels from diesel to B-20 fuel. B-20 fuel contains twenty percent biodiesel.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/14/08</p>	<p>Facility has developed an Integrated Natural Resource Management Plan. The Navy is working with numerous stakeholders on an Atlantic White Cedar Restoration Project. In addition, the Navy has partnered with NJDEP's Green Acres Program to preserve a 250 acre parcel of cranberry bogs adjacent to the base.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/14/08</p>	<p>In cooperation with Ocean County and the Pinelands Commission, the Navy has established a MOA to identify ecologically significant habitats for future preservation.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/14/08</p>	<p>Lakehurst works with the local community on numerous initiatives. Examples include presentations to local schools and local planning boards as well as collaboration with the NJ Audubon Society facilitating bird tours. http://www.lakehurst.navy.mil/envir/conserv1.htm</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/14/08</p>	<p>Yes, Lakehurst's environmental policy can be viewed at the following link: https://www.cnic.navy.mil/navycni/groups/public/documents/document/cnic_057129.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/14/08</p>	<p>Lakehurst has been part of EPA's National Environmental Performance Track since 2001. Performance Track encourages continuous environmental improvement through environmental management systems. https://yosemite.epa.gov/oepi/ptrack.nsf/vaMembersSortPages/7EE0BB21A18F06838525737E0004D889?OpenDocument ISO 14001 Certified http://www.lakehurst.navy.mil/envir/iso.htm</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>1/14/08</p>	<p>Yes, see link https://yosemite.epa.gov/oepi/ptrack.nsf/vaMembersSortPages/7EE0BB21A18F06838525737E0004D889?OpenDocument</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>1/14/08</p>	<p>National Environmental Performance Track</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/14/08</p>	<p>Lakehurst has a SOP for Green Affirmative Procurement.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>1/14/08</p>	<p>Federal agencies work with the General Service Agency to ensure the supply chain subscribes to environmentally sound practices.</p>

WESTLAKE VILLAGE

Site ID: WESTLAKE VILLAGE
 122692 1 PINE LAKE CIR ,
 JACKSON TWP, NJ 08527

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/1/14	All stormwater drains into the pond which is used to irrigate the golf course. Golf course utilizes fescue grasses in the rough, which utilize less water. Approximately, 50% of the roughs are fescue. When re-seeding is required fescue grass is used.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/1/14	All pumps are VFDs (variable frequency drives) which use less electricity.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/1/14	All golf carts for the course are electric.

Number of Sites: 4

CLEAN HARBORS ENVIRONMENTAL SERVICE INC

Site ID: CLEAN HARBORS ENVIRONMENTAL SERVICE INC
39321 1501 WASHINGTON ST,
BRAINTREE, MA 02184

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/3/11	Installation of a 1.5 MW solar panel project (6,500 panels) to provide energy to run the pump and treat system at the site, with a minimal amount also used to power the offices located at the site.

DELAWARE RIVER & BAY AUTH DELAWARE RIVER MEMORIAL BRIDGE PLAZA

Site ID: DELAWARE RIVER & BAY AUTH DELAWARE RIVER MEMORIAL
171886 BRIDGE PLAZA
RT 9,
NEW CASTLE, DE 19720

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/15/15	All highway signage uses LED lighting.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/15/15	Recycling the following items is not mandated in DE, but they recycle cardboard, plastic, glass, electronics, and batteries. DRBA switched de-icing material to magic salt instead of just salt or sand, as it is more efficient and requires less salt to be applied.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/15/15</p>	<p>Lighting was switched from incandescent to Fluorescent, and DRBA is now in the process of switching to LED lighting.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>5/15/15</p>	<p>DRBA plants wildflowers along roadways. This has the added benefit of reducing mower fuel use and emissions.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>5/15/15</p>	<p>To reduce erosion in tidal waterways within their facility operations, and as a backup emergency plan to prevent a spill from leaving their premises, they installed waterway sized duckbills that close off to not let an influx of water in during high tide and open during low tide to let water out. They can also be controlled manually for further spill prevention from getting into the Delaware River.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/15/15</p>	<p>Provides educational materials to the public about the Water Pollution Control Act and the EPA Vessel General Permit.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/7/13</p>	<p>All Hwy signage now using LED bulbs</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/7/13</p>	<p>Change out of incandescent Bulbs to Fluorescent in Office Bldgs</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/7/13</p>	<p>using wildflower plantings on roadways to reduce grass cutting requirements and mower emissions</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/7/13</p>	<p>provides info to general public about Clean Water Act/The EPA Vessel General Permit</p>

DELAWARE RIVER JOINT TOLL BRIDGE COMM

Site ID: DELAWARE RIVER JOINT TOLL BRIDGE COMM
169553 110 WOOD ST,
MORRISVILLE, PA 19067

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/9/15</p>	<p>Cleaning products and degreasers have been replaced with environmentally-friendly versions.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/9/15</p>	<p>The facility completed a Recycle in Place asphalt project in 2013 . Nearly 100 percent of the old road surface gets recycled. The process eliminated an estimated 1,175 truck trips. https://www.drjtbc.org/default.aspx?pageid=3133</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/9/15</p>	<p>The facility completed a Recycle in Place asphalt project in 2013 . Nearly 100 percent of the old road surface gets recycled. The process eliminated an estimated 1,175 truck trips. https://www.drjtbc.org/default.aspx?pageid=3133</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/9/15</p>	<p>The commission has installed energy efficient lighting with motion detectors throughout.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/9/15</p>	<p>Ongoing tree planting program at toll bridge facilities. A program to replace grass with Wildflowers has also been implemented.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/9/15</p>	<p>Commission has implemented a formal policy prohibiting idling of commission vehicles and equipment that is more stringent than state law.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/9/15</p>	<p>Environmentally Preferable Purchasing Program has been established resulting in a wide range of purchases including: recycled carpet, unbleached/recycled paper products, green cleaning products and energy star products.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/14/11</p>	<p>Cleaning products and degreasers have been replaced with environmentally-friendly versions.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/14/11</p>	<p>~ 25 % of the passenger fleet are hybrid vehicles.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/14/11</p>	<p>The commission has installed energy efficient lighting with motion detectors throughout.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/14/11</p>	<p>Ongoing tree planting program at toll bridge facilities. A program to replace grass with Wildflowers has also been implemented.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/14/11</p>	<p>Commission has implemented a formal policy prohibiting idling of commission vehicles and equipment that is more stringent than state law.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/14/11</p>	<p>Set forth as part of the "Greening the Commission" Report</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/14/11</p>	<p>Environmentally Preferable Purchasing Program has been established resulting in a wide range of purchases including: recycled carpet, unbleached/recycled paper products, green cleaning products and energy star products.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/13/08</p>	<p>Traditional cleaning products and degreasers have been replaced with environmentally-friendly versions.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/13/08</p>	<p>Set forth as part of the the "Greening the Commission" Report.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/13/08</p>	<p>Environmentally Preferable Purchasing Program has been established resulting in a wide range of purchases including: recycleable carpets, unpleaced paper towels, recycled paper products, green cleaning products and energy star products.</p>

SAFETY KLEEN SYSTEMS INC

Site ID: SAFETY KLEEN SYSTEMS INC
39316 1 BRINKMAN WAY,
ELGIN, IL 60123

Stewardship Activities	Date Acknowledged	Comments
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/13/10</p>	<p>Safety Kleen has an Environmental Policy and Environmental Management System signed by both of its Executive Vice Presidents The Policy goes beyond basic compliance to relevant legislation and regulations and includes the pursuit of all available recycling and reclamation, waste minimization and source reduction opportunities.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/13/10</p>	<p>Safety Kleen employs a proprietary Environmental Management System utilizing ten key areas. The system conforms to ISO 14001:2004 EMS standards and US EPA EMS guidelines. These areas are Risk Analysis, Legal Requirements, Assignments of Roles and Responsibilities, Operational Controls and Procedures, Training Records, Monitoring and Verification, Env. Events Response and Reporting, Corrective Actions and Management Participation. Including in the program are both internal and external vendor audits.</p>

ACCURATE BOX CO

14485 86 5TH AVE,
PATERSON, NJ 07509

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/12/08	Inks have been switched to non-hazardous water based inks instead of hazardous inks.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/12/08	Water use has been reduced due to digital processing of plates is now conducted instead of the traditional plate processing which used water.

ACME ENGRAVING CO

Site ID: ACME ENGRAVING CO

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/7/15	Methyl Ethyl Ketone is no longer used to clean cylinders. A less hazardous industrial soap solution (sodium hydroxide based) is used instead to remove the ink.

ALL STATE OIL RECOVERY CO INC

Site ID: ALL STATE OIL RECOVERY CO INC
 37234 473 PATERSON HAMBURG TPKE, AKA RT 23
 WEST MILFORD, NJ 07480

Stewardship Activities	Date Acknowledged	Comments
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	11/14/08	ALLSTATE O. R. C., Inc., has provided at its expense, recycling containers and the associated transportation services to the Pequannock Little League to insure that the drink containers generated at their events are properly recycled. Prior to this, most of the plastic containers were disposed of as solid waste setting a bad example for the youth engaged in these athletic activities. Specifically, Allstate O.R.C., has purchased two containers for glass recycling, and two containers for plastic, at a cost of about \$60/ea. for placement at two Pequannock Township Athletic Fields. Allstate O. R. C. collects and transports the recyclables to IWS in Suffern, NY, when engaged in the commercial transportation to the facility.

National Partnership for Environmental Priorities.	1/12/11	National Partnership for Environmental Priorities (USEPA) partner recognized for their 75% reduction of naphthalene in their metal coil surface coating operation in 2008. Arrow continued to operate at or near the 75% level both in 2009 and 2010. http://www.epa.gov/epawaste/partnerships/npep/partners/arrow.pdf
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/12/11	Recognized by National Partnership for Environmental Priorities (USEPA) for their 75% reduction of naphthalene in their metal coil surface coating operation in 2008. Arrow continued to operate at or near the 75% level both in 2009 and 2010. http://www.epa.gov/epawaste/partnerships/npep/partners/arrow.pdf
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	1/12/11	

ASHLAND INC

Site ID: ASHLAND INC
2135 1361 ALPS RD, BLDG 1
WAYNE, NJ 07470

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/30/11	Eliminated personal printers. Obtained multifunctional devices and require double sided printing. Recycle glass, aluminum, and have a universal waste program.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/30/11</p>	<p>http://online1.ispcorp.com/en-US/ResponsibleCare/Pages/safety.aspx http://online1.ispcorp.com/en-US/ResponsibleCare/Pages/envpolicy.aspx (can also see in attachment list).</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/30/11</p>	<p>ISP?s EH&S management systems are based on written corporate-wide policies and procedures that are implemented by all company facilities,subject to oversight and review at thecorporate level. Strategic planning takes place annually, with a focus on integrating EH&S into the business decision-making process. ISP?s EH&S management systems incorporate elements of the American Chemistry Council (ACC) Responsible Care? program and the ISO 14001 standard. The ISP Environmental Management System is built upon two company initiatives to improve environmental performance: ISP?s Responsible Care? program, with its commitment to incorporate ISO 14001 principles, and ISP?s corporate environmental standards, developed to prevent adverse environmental impacts, reduce waste and emissions, and promote resource conservation throughout the life of ISP products.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>3/30/11</p>	<p>http://online1.ispcorp.com/en-US/ResponsibleCare/Documents/ISP%20Corporate%20Sustainability%20Presentation.ppt#952,1,Slide 1</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/30/11</p>	<p>GHG emissions are tracked and reported annually, as a member as the American Chemistry Council.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/11/09</p>	<p>See attached link to the Env. Policy posted online. http://online1.ispcorp.com/en-US/responsiblecare/Pages/envPolicy.aspx</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/11/09</p>	<p>ISP has implemented the Responsible Care Management System at all of its operating facilities in the United States. Responsible Care Management System certification is provided through the American Chemistry Council. See attached link. http://online1.ispcorp.com/en-us/responsiblecare/pages/default.aspx</p>

WasteWise.	6/5/12	Bayer Healthcare Pharmaceuticals is an EPA WasteWise Partner.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/5/12	Implemented a Certified Food Waste Generator recycling program, June 2010 and continues to utilize composting for its cafeteria food waste. A "no waste" cafeteria policy was established and continues to operate at this time.
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	6/5/12	Bayer Healthcare Pharmaceuticals is an EPA WasteWise Partner
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	6/5/12	The facility is implementing car-pooling and shuttle bus programs to reduce commuting miles for employees.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	6/5/12	The facility is only purchasing "eco-products" for use in the cafeteria. Eco-products are biodegradable and environmentally safe.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/5/12	Bayer Pharmaceuticals installed the first section of the rooftop solar power system in June 2006. The capacity is 274 kWh. In May of 2011, this system was expanded another 180 kWh. The combined systems provide approximately 8% - 10% of the facility electrical demand and has, in fact, contributed to a reduction of electrical use by about 30% from the base year of 2005. The system capacity totals 454 kW of solar power and is comprised of over 1800 panels over a rooftop surface area of over 30,000 square feet. In 2011, this system has generated over 400,000 kilowatt hours of power. Since inception, the system has generated 2,130,873 kWh of electrical power. Apart from the energy savings, there has also been a reduction in CO2, NOx, and SOx.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	4/9/08	The facility is implementing car-pooling and shuttle bus programs to reduce commuting miles for employees.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	4/9/08	The facility is only purchasing "eco-products" for use in the cafeteria. Eco-products are biodegradable and environmentally safe.

BAYER HEALTHCARE PHARMACEUTICALS INC

Site ID: BAYER HEALTHCARE PHARMACEUTICALS INC
2120 300 FAIRFIELD RD,
WAYNE TWP, NJ 07470

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/30/08	Installed a water cooling tower several years ago. They have reduced their dependency on well water by about 95%. In 2002 they used 181,000 gallons of well water/day or 66 million gal/day. In 2006 they used 6,500 gallons/day (make up water).
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/30/08	Lighting is all "green". Also installed automatic lighting where lights go out after areas are abandoned for periods of time and turn back on when someone returns. Currently redoing their heating system. One boiler eliminated and a second to be replaced by an as of yet unknown substitute, likely to be significantly more efficient.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/30/08	Passive solar panels covering a large portion of their roof. Gives 20% electricity during peak sunny days. Charted electronically as shown.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	1/30/08	Passive solar panels covering a large portion of their roof. Gives 20% electricity during peak sunny days. Charted electronically as shown.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/25/15</p>	<p>The Water Department is no longer printing and mailing its Consumer Confidence Report, as of 2015. This is a savings of materials and energy.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/14/14</p>	<p>Bloomingtondale is using an aqueous parts cleaning product, Safety Kleen Armakleen MPC Cleaning Solution, and is using a "green" product for cleaning shovels when doing asphalt work.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>4/14/14</p>	<p>Bloomingtondale conducted an energy audit and changed all light fixtures to more efficient ones at the Municipal Building.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/10/10</p>	<p>Most municipal departments operate 4 days per week so that less energy is used in the municipal building.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/10/10</p>	<p>Municipal building lights are on motion sensors.</p>

BOSTON SCIENTIFIC VASCULAR @ WAYNE MCBRIDE EXECUTIVE PK

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>12/21/12</p>	<p>In 2009, the company has installed a closed loop distillation unit on its compaction process to significantly reduce its use of methylene chloride. Methylene chloride usage has gone from 30 - 55 gallon drums per year to seven (7) - 55 gallon drums for a savings of approximately 300 gallons of methylene chloride per year. UPDATE: This is still in place and in compliance with regulatory rules in 2012.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>12/21/12</p>	<p>The company has reduced its irrigation water usage through Best Management Practices and a computerized system to save approx. 800,000 gallons of water per year beginning in 2006. The company has also installed automatic water saving fixtures in all restrooms throughout the facility. UPDATE: This is still in place in 2012.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/21/12</p>	<p>In 2012, the company changed their warehouse facilities from Chicago to NJ and the sterilization facilities from Texas to NJ significantly cutting down transportation use and reduced associated carbon emissions in 2012 by 92%.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/21/12</p>	<p>In 2009, the company has replaced a single 80 HP boiler with three (3) - 6 HP boilers to operate its autoclaves. The individual boilers are dedicated to each autoclave to eliminate running the single boiler. The company has a written policy as part of its Energy Audit that has identified 13 energy conservation opportunities to be implemented within 5 years. The company has also installed automatic water saving fixtures in all restrooms throughout the facility. UPDATE: Maquet has implemented 2 projects since 2009; one was to replace 3 HVAC units with more efficient ones saving 30 tons/yr CO2 and replaced the roof with double insulated roof saving 11 Tons/yr.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/21/12</p>	<p>Maquet Cardiovascular LLC was able to demonstrate that the company had an environmental policy that governs their environmental program (see attachment list). Can be found on their website, search for Environmental policy.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/21/12</p>	<p>Environmental Management System: Company is still ISO 14001 certified and conducts annual internal audits only. UPDATE: External audits are conducted by BSI.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>12/21/12</p>	<p>Carbon Footprint Analysis: Facility calculates carbon footprint analysis derived from annual utility consumption data. A report titled "Energy Audit Plus & Solar Screening" by Dome-Tech was published on 3/11/09 and reported 3,253 tons of CO2 for 2008. UPDATE: This activity is still in place and working on energy reduction projects. Maquet also had a target to reduce the CO2 emissions from transportation by 18% from 2010- 2015. Maquet was able to reduce it in 2012 by 92% by changing warehousing from Chicago to NJ and relocating sterilization from Texas to NJ]</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>12/21/12</p>	<p>Company has a Supplier Quality Audit Group that ranks suppliers according to company criteria for environmental soundness. Whenever possible, companies that are ISO certified are the preferred choice. UPDATE: This is still in place in 2012.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>10/26/09</p>	<p>Company has installed a closed loop distillation unit on its compaction process to significantly reduce its use of methylene chloride. Methylene chloride usage has gone from 30 - 55 gallon drums per year to seven (7) - 55 gallon drums for a savings of approximately 1300 gallons of methylene chloride per year.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>10/26/09</p>	<p>Company has reduced its irrigation water usage through Best Management Practices and a computerized system to save approx. 800,000 gallons of water per year beginning in 2006. Company has also installed automatic water saving fixtures in all restrooms throughout the facility.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/26/09</p>	<p>Company has replaced a single 80 HP boiler with three (3) - 6 HP boilers to operate its autoclaves. The individual boilers are dedicated to each autoclave to eliminate running the single boiler. The company has a written policy as part of its Energy Audit that has identified 13 energy conservation opportunities to be implemented within 5 years.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>10/26/09</p>	<p>Environmental policy is published on the parent company's website found here: http://www.getinge.com/sectionPage.aspx?sectionID=124585788891&m1=115028465220&m2=124585788891&languageID=1</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>10/26/09</p>	<p>Company is ISO 14001 certified and conducts annual internal and external audits. External audit is conducted by TUV, Inc.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>10/26/09</p>	<p>Facility calculates carbon footprint analysis derived from annual utility consumption data. A report titled "Energy Audit Plus & Solar Screening" by Dome-Tech was published on 3/11/09 and reported 3,253 tons of CO2 for 2008.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>10/26/09</p>	<p>Company has a Supplier Quality Audit Group that ranks suppliers according to company criteria for environmental soundness. Whenever possible, companies that are ISO certified are the preferred choice.</p>

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/7/16	LEED Certified building - Silver
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	12/7/16	
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	12/7/16	
11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.	12/7/16	LEED Certified building - Silver

COMUS INTERNATIONAL INC

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	11/13/14	Comus International manufactures switches. In the past the switches were made out of mercury. During the past 10 years Comus changed the design of their switch to a ball switch which does not require using mercury in the switch. Comus does manufacture some switches with mercury but a majority of the switches made are ball switches. As a result, Comus has greatly reduced the amount of mercury used in their operations.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/13/14	Comus International has stopped using styrofoam popcorn packaging and now uses plastic air bags that are reused.
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	11/13/14	National Partnership for Environmental Priorities. Received NPEP Achievement Award 2011.

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/29/17	The facility has solar power enhancement for its electricity usage.

CRYSTEX COMPOSITES CORP

Site ID: CRYSTEX COMPOSITES CORP
 2713 125 CLIFTON BLVD,
 CLIFTON, NJ 07011

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/27/14	The facility no longer uses lead in its processes.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/27/14	Crystex uses water with their cutting machines which generate slurry. The slurry is put through a filtration process and the filtered water is recirculated back into the process.
National Partnership for Environmental Priorities.	4/22/09	Since 2005 Crystex has been part of EPA's National Partnership for Environmental Priorities associated with EPA's National Waste Minimization Program and the Resource Conservation Challenge. This program prompted Crystex to reduce the amount of lead used on site as previously mentioned.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/22/09	Crystex Composites has reduced the amount of lead used on site by developing three unleaded products which replaced leaded products. Crystex has reduced the total amount of lead on site from 54,000 lbs. in 2004 to 12,000 lbs. in 2008.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/22/09	Crystex uses water with their cutting machines which generates a slurry. The slurry is put through a filtration process and the filtered water is recirculated back into the process.
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	4/22/09	

CYRUSONE INC

Site ID: CYRUSONE INC
15094 50 MADISON RD,
TOTOWA BORO, NJ 075121129

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	9/12/11	All pumps and motors are variable speed drive. Free cooling system (computer air quality controls for massive computerization operations) allows outdoor cold air to cool inside desired rooms rather than the use of standard air conditioning. Considering the number of large rooms within the huge building, energy savings is massive. New Lighting controls system includes motion detection. Building completely revamped in 2010 to accommodate this new company.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	9/12/11	Company encourages and practices a significant amount of remote access working.

DAMASCUS BAKERY

Site ID: DAMASCUS BAKERY
2636 65 INDUSTRIAL ST,
CLIFTON, NJ 07012

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	3/1/12	GlaxoSmithKline has an environmental policy that all members of the organization must support.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	3/1/12	GlaxoSmithKline uses a management system aligned with recognized international standards such as ISO 14001. It is based on a structured framework building on the vision and policies and supported by standards, guidance materials, tools, training, recognition and audits that help the businesses to manage these issues.
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	3/1/12	http://www.gsk.com/responsibility/downloads/GSK-CR-2011-Report.pdf#our-planet

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/1/09</p>	<p>GSK has initiated a process for re-validating expired raw materials for continued use passed expiration date. These efforts have generated less waste. GSK has a written policy detailing this process.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/1/09</p>	<p>As part of renovations to the building, GSK has installed a heat recovery system to compressors, new energy efficient chiller for chilled water, new energy efficient HVAC upgrades and highly reflective roofing & additional insulation on roof over administrative portion of the building.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/1/09</p>	<p>GSK has a Health Safety Environmental Policy posted in hallway outside cafeteria.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/1/09</p>	<p>GSK has an Environmental Management System in place as part of several confidential Standard Operating Procedures (SOP). GSK has a SOP for EHS Management implementation, internal environmental audits and performance tracking.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>12/1/09</p>	<p>GSK publishes an annual report on corporate site with data from manufacturing location including Clifton. See link below. http://www.gsk.com/responsibility/resources-build-report.htm</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>12/1/09</p>	<p>GSK's Corporate Responsibility Report describe GSK's Supply Chain policy. GSK does detailed assessments of new & existing suppliers to monitor their performance on environmental, health, safety and human rights issues.</p>

DUNDEE CANAL

Site ID: DUNDEE CANAL
82423 CHEEVER AVE,
CLIFTON CITY, NJ 07011

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	2/5/08	Dundee Water Power & Land Company recently constructed a park for the City of Garfield on the eastern side of Dundee Dam.

ETHAN ALLEN INC @ BIG APPLE IND PK

Site ID: ETHAN ALLEN INC @ BIG APPLE IND PK
13410 1 MARKET ST,
PASSAIC, NJ 07598

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/19/18	Ethan Allen is switching from oil based lacquers to water based lacquers. Currently about 90% of paints are water based. Additionally, majority of glues/adhesives that are used in Wall Decor production are also water based.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/19/18	Ethan Allen has purchased and has begun using a "PACKSIZE machine". The machine custom cuts boxes for the products they make. A properly sized box cuts down on additional packaging materials, reduces waste, and reduces transportation costs. Apart from our PACKSIZE machine, they also utilize Inflatable Packaging System with the machine that makes bubble wrap. This system is said to reduce packaging material usage for over 30%, and save floor space by avoiding storage of bulky material, save the cost of delivery and transportation and reduce air pollution by less transportation needed.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/19/18</p>	<p>Ethan Allen has completed relamping project. Facility was switching from T12 to more efficient T8 bulbs and have replaced 356 light fixtures on 1st and 2nd floor, where majority of operations are performed. The project was approved for NJ Clean Energy Program.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/19/18</p>	<p>Ethan Allen's policy is available on site signed by Ethan Allen's Chairman and CEO, Plant/Facility Manager, and EFEC Team Leader.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/19/18</p>	<p>The site has an EMS system that is certified by AHFA (American Home Furnishing Alliance) for furniture manufacturers.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>9/19/18</p>	<p>The company introduced an Annual Environmental Report which is available on their website as well as printed and distributed in our HQ/ manufacturing/distribution/retail locations as a brochures.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>9/19/18</p>	<p>15 people either walk or commute to work, this represents 30% of the overall work force. In addition, they often need to travel to the corporate office in Danbury, CT and when they do they attempt to ensure the truck is full or otherwise delay the trip until the truck or other people who need to go to corporate for other reasons ride in the van eliminating one car from the road. Ethan Allen travels to Corporate 2-3 times per month and have used this ride sharing about 75 % per month. In addition, Ethan Allen has instituted a no idling policy for their trailer truck that moves containers around the yard to the loading docs.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>9/19/18</p>	<p>They continue to use Environmentally Preferable New Material Purchasing form whenever working with new vendor and/or using new material.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>9/19/18</p>	<p>Carbon Footprint is calculated using Clean and Green Coalition Carbon Footprint Calculator</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>9/19/18</p>	<p>Ethan Allen maintains a chain of custody compliance program and vendors are required to inform Ethan Allen of their sustainability efforts on a yearly basis.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>9/19/18</p>	<p>They are active members of the AHFA and are registered in their Environmental Management System. Their participation in this program requires Ethan Allen to share environmental information and train or help other industries in their business sector. Ethan Allen achieves this requirements by attending conferences with the AHFA and providing presentations and training to other companies in the furniture sector. In addition, they have monthly EH&S calls with all of manufacturing and review environment, health and safety issues along and contribute to training and sharing of best practices as a standing rule.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/15/13</p>	<p>Ethan Allen is in the process of switching from oil-based lacquers to water-based lacquers.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/15/13</p>	<p>Ethan Allen has begun using "Packsize" machinery, which custom-cuts boxes for the products. A properly sized box cuts down on additional packing material, reduces waste, and reduces transportation costs. Recently, Ethan Allen purchased an "inflatable packaging system machine to produce bubble wrap packing material, which is said to reduce the use of packaging materials approximately 30%.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/15/13</p>	<p>Relamping from T12 to T8 bulbs and reducing energy use approximately 26% was conducted and was approved for NJ Clean Energy Program.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/15/13</p>	<p>Ethan Allan has an active environmental policy that is posted on site. A photo was provided in an email correspondence dated August 15, 2013.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/15/13</p>	<p>Ethan Allen has an EMS system and has obtained EFEC Enhancing Furniture Environmental Culture certification from the American Home Furnishing Alliance.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>8/15/13</p>	<p>Currently, 30% of the workforce (15 employees) walk or ride share during thier commute to work, If travel is required to the corporate office in Connecticut, ridesharing is encouraged and a van is used 75% of the time.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>8/15/13</p>	<p>Ethan Allen has an active Environmental Purchasing Program.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>8/15/13</p>	<p>Carbon Foot Print was calculated using Clean and Green Coalition Carbon Footprint Calculator (attached in the email dated August 15, 2013.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>8/15/13</p>	<p>Ethan Allen maintains a chain of custody compliance program and vendors are required to inform Ethan Allen of their sustainability efforts on a yearly basis.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>8/15/13</p>	<p>Ethan Allen is an active member of the AHFA and is registered in the Environmental Management system. This program requires Ethan Allen to share environmental information and train/assist other industries in the business sector. Ethan Allen achieved this by attending Environmental Summit Conferences in Charlotte, NJC in February 2013, at which time a presentation on how the environmental management system is sharing with their associates was presented. Known companies such as La-Z-Boy, Ikea, and others also attend and participate. Monthly EH&S calls regarding environmental health and safety are performed. Ethan Allen Director of Environmental Health & Safety received an AHA's Excellence Award for Corporate Leadership this year.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/7/12</p>	<p>Ethan Allen is switching from oil based lacquers to water based lacquers.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/7/12</p>	<p>Ethan Allen has purchased and has begun using a "Pack size machine" The machine custom cuts boxes for the products they make. A properly sized box cuts down on additional packaging materials, reduces waste, and reduces transportation costs.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/7/12</p>	<p>Ethan Allen has a relamping project. They are switching from T12 to T8 bulbs and reducing energy use 26%.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/7/12</p>	<p>Ethan Allen's policy is available on site.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/7/12</p>	<p>The site has an EMS system and is currently attempting to obtain EFEC (Enhancing Furniture's Environmental Culture) certification from the American Home Furnishing Alliance.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/7/12</p>	<p>Ethan Allen has recently implemented an Environmental Purchasing Program.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/7/12</p>	<p>Carbon Footprint was calculated using Clean and Green Coalition Carbon Footprint Calculator.</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/7/12</p>	<p>Ethan Allen maintains a chain of custody compliance program and vendors are required to inform Ethan Allen of their sustainability efforts on a yearly basis.</p>

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/20/17</p>	<p>Fisk has a vacuum distillation system (evaporators) that distills the treated rinse water and removes it from the filter press. The condensate (distilled water) from the evaporators is then collected and reused as cooling water and makeup water in the electroplating lines.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/20/17</p>	<p>Fisk has retrofitted the lighting systems throughout the building with sensors and energy efficient lighting.</p>

GAETA RECYCLING CO TRANSFER STATION

Site ID: GAETA RECYCLING CO TRANSFER STATION
2294 278 W RAILWAY AVE,
PATERSON, NJ 07501

Stewardship Activities	Date Acknowledged	Comments
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	1/21/15	Gaeta Recycling continues to provide recycling containers and pick up for free to Lenape School in Mahwah. There are also class trips to the facility throughout the spring and summer from local public schools and colleges.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	7/18/13	For the past few years, Gaeta has been providing recycling bins and collection to a public school in Mahwah, NJ for free. They have also had class trips to the facility from one of Paterson's charter schools for the past two years.

GRACE & MERCY EXTERMINATING

16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/12/13	The facility recycles the asphalt from paving projects. The asphalt is crushed and screened to remove rocks and soil. It is then brought to Tilcon to be recycled into new asphalt.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/12/13	The facility has installed solar panels on the roof of the main building.

Site ID: HOME DEPOT INC #HD0959
 385278 75 MCLEAN BLVD,
 PATERSON, NJ 07514

Stewardship Activities	Date Acknowledged	Comments
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	12/23/08	Provide recycling options for CFL's and rechargeable batteries.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	12/23/08	
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	12/23/08	Home Depot has a "Wood Purchasing Policy" where wood in their stores (lumber to broom handles) is from forests that are responsibly managed and not from endangered regions.
9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.	12/23/08	Routinely benchmark with other retailers regarding their hazardous waste and white goods recycling program.

KAY PRINTING & ENVELOPE CO INC

Site ID: KAY PRINTING & ENVELOPE CO INC
196188 220 ENTIN RD,
CLIFTON, NJ 07014

Stewardship Activities	Date Acknowledged	Comments
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	4/30/15	KM Media is part of group - RACG (http://pine.org/ ?) that is a member of the Forest Stewardship Council (FSC). The FSC mission is to promote environmentally sound, socially beneficial and economically prosperous management of the world's forests. KM Media has recently been audited for FSC Chain-of-Custody certification. (https://us.fsc.org/chain-of-custody-certification.201.htm)

KEARFOTT CORP

Site ID: KEARFOTT CORP
 15757 1150 MCBRIDE AVE,
 WEST PATERSON, NJ 07474

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/26/08	The facility has an ongoing program of installing programmable thermostats. The program, which started December 2005, modifies temperatures by 6 degrees F during non-working hours of 6 PM to 6 AM weekdays and 6 PM Friday to 6 AM Monday, culminating in the saving of electricity. Also the facility is replacing all incandescent light bulbs with compact fluorescent lamps to save additional energy.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/26/08	One central air conditioning unit inside the renovated main building has been replaced with a unit that uses ambient air rather than electric or steam for re-heat temperature adjustments. Other replacement units are scheduled.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	8/26/08	The facility recognizes its responsibility to provide and enforce a safe and healthy work place for its employees, and to protect the environment by means of compliance policies and procedures. A copy of the policy was given to NBWCE during the inspection.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	8/26/08	The facility has implemented a 9-day/ 80-hour work schedule with 100% participation. Site operates 9 hours Mon - Thurs (36 hours) and 8 hours on one Friday. 4 hours count toward current week and 4 hours count for following week totaling 80 hours over a 2 week span.

KEARFOTT CORP GUIDANCE & NAVIGATON DIV

Site ID: KEARFOTT CORP GUIDANCE & NAVIGATON DIV

3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	10/17/08	
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	10/17/08	The facility has implemented a 9-day/80-hr. work schedule during a two week span. This Kearfott site employs only one individual.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	10/17/08	Greenhouse Gas (GHG) Protocol - Calculations completed by World Resources Institute and World Business Council for Sustainable Development.

KIRKER ENTERPRISES INC

Site ID: KIRKER ENTERPRISES INC
 14290 1 E 11TH ST,
 PATERSON, NJ 075240000

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/30/17	Since the Department's last RCRA inspection, Kirker has not only reduced, but completely eliminated the following solvents from use onsite: xylene, toluene, and dibutylphthalate (DBP). After last RCRA inspection, in 2014, Kirker used up the inventory in the tanks onsite, and has had the tanks holding the material "cleaned closed".

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/30/17</p>	<p>Kirker continues to have a contracted agreement with a solvent reclamation company, Phoenix Environmental Services. They come onsite with a mobile distillation unit to distill, and recover large amounts of ethyl & butyl acetate from waste wash solvent material. This material is then re-used onsite. This continues to keep the amounts of hazardous waste generated offsite low.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/30/17</p>	<p>Kirker Enterprises was able to provide documentation showing that their environmental program was guided by an environmental policy.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/27/15</p>	<p>Kirker has reduced toluene, xylene and dibutylphthalate (DBP). This took affect 2013/2014. All Safety Data Sheets have been digitized.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/27/15</p>	<p>A solvent cleaning service (Phoenix Environmental) has been contracted which allows the cleaning solution solvent to be reclaimed and reused leaving just the still bottoms as a waste. This will significantly reduce the amount of hazardous waste generated.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/27/15</p>	<p>Changed out all lamps in office areas from T12-T8 and replacing all incandescent bulbs with CFL and LED.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/27/15</p>	<p>Kirker Enterprises Inc (Kirker) was able to provide documentation showing that their environmental program was guided by an environmental policy.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/31/12</p>	<p>Kirker Enterprises Inc (Kirker) was able to provide documentation showing that their environmental program was guided by an environmental policy.</p>

LAMART CORP

Site ID: LAMART CORP
19163 16 RICHMOND ST,
CLIFTON, NJ 07015

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>12/8/15</p>	<p>Lamart has continued to operate the one (1) water based coating reducing VOC emissions.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/8/15</p>	<p>Lamart Corp. has replaced the lighting in their building located at 162 Circle Ave. (14,000 sq. ft.) which is part of this Lamart site. T-5 fluorescent lights were installed due to being more energy efficient than what was used in the past.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/8/15</p>	<p>Lamart's Manager of Environmental, Health and Safety is a member of the Clifton Hazardous Materials Control Board (CHMCB), the Passaic County Brownfields Commission, and the Board of Directors of the Tri-County Chamber of Commerce. Lamart has also developed a working relationship with the Clifton Fire Department (CFD). In 2014, the CFD conducted its annual confined space training on a platform in Lamart's plant, specifically constructed for that purpose (see attached letter of recognition). In July 2015, the CFD selected the Lamart facility to conduct a hazardous materials pre-planning event as part of its training program for HAZMAT personnel. Lamart was selected by the CFD because of its commitment to good hazardous materials management practices, and its own emergency preparedness initiatives. November 2015, the CHMCB conducted a site visit at Lamart. to check the recently constructed flammable chemical storage room and review Lamart's operations & its emergency response capabilities. Following its site visit, the CHMCB provided Lamart with a letter recognizing its commitment to good management practices and to the local community (see attached letter). For the past three (3) years, Lamart has participated in Clifton High School's Career Exploration Day by hosting students who are interested in careers in environmental science, engineering, and other technical disciplines (See attached thank you letters for 2013, 2014, and 2015).</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/8/15</p>	<p>Lamart has a company policy that includes various sustainability initiatives such as climate change.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>12/8/15</p>	<p>Lamart is a member of the Pressure Sensitive Tape Council (PSTC). The PSTC, established in 1953, is a North American trade association representing pressure sensitive adhesive (PSA) tape manufacturers and their affiliate suppliers. The PSTC adopted a Responsible Tape Manufacturer (RTM) Program to certify PSTC member tape producers that have sustainable business practices in environmental management, manufacturing health and safety, and quality control standards. Each company that seeks certification under the RTM Program must include its own PSA tape manufacturing facilities in the United States and outside of the United States, as well as its PSA tape product contract manufacturing facilities (suppliers) inside and outside of the United States (See attached for detailed description of the RTM Program). In order to be certified as a Responsible Tape Manufacturer, Lamart had to complete an audit checklist and provide supporting documentation for the Clifton, NJ facility and collect completed audit checklists and supporting documentation from all of its suppliers of PSA tape products. The audit checklist is a comprehensive document that carefully examines each facility's environmental management, manufacturing safety and health, and quality standards. As part of the RTM certification process, a qualified third party auditor (Trinity Consultants) reviewed all of the completed checklists and supporting documentation for each facility. Following its review, the third party auditor approved Lamart for certification (see attached copy of the RTM certification letter from the PSTC & a list of all of the companies that achieved certification in the RTM program). http://www.pstc.org/i4a/pages/index.cfm?pageid=4744</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/1/13</p>	<p>Lamart Corp. has switched using a solvent based coating to a water based coating on one of their coating lines. It is estimated that this reduces VOC emissions by 1.9 tons per year.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/1/13</p>	<p>Lamart Corp. has replaced the lighting in their building located at 162 Circle Ave. (14,000 sq. ft.) which is part of this Lamart site. T-5 fluorescent lights were installed due to being more energy efficient than what was used in the past.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/1/13</p>	<p>Lamart Corp. has a sustainable initiatives document which covers environmental sustainability including climate change. This document is a company policy for Lamart.</p>

LITTLE FALLS ALLOYS INC

Site ID: LITTLE FALLS ALLOYS INC
19156 171 191 CALDWELL AVE,
PATERSON, NJ 07501

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>12/9/14</p>	<p>Little Falls Alloys has reduced the amount of lead used in their manufacturing by eliminating any lead used in their plating operation. Tin has replaced the use of lead in their plating operation. Only trace amounts of lead are currently used on site due to some raw materials used to make the wire have trace amounts of lead. Documentation was provided to the Department showing lead plating baths shipped off site as hazardous waste and lead anodes shipped off site for recycling.</p>

LITTLE FALLS TWP

Site ID: LITTLE FALLS TWP
 168801 225 MAIN ST,
 LITTLE FALLS, NJ 07424

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/7/17	Ballfield lights are being replaced with LED lighting.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	6/7/17	Little Falls conducts removal of fallen trees along the Peckman River before any predicted 1" storm event or thunderstorm in an effort to reduce the potential for flooding.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	5/6/14	Little Falls entered into a partnership with Passaic Valley Sewerage Commission and Rutgers Cooperative Extension's Water Resources Program and has committed to conduct 2 green infrastructure projects. In addition, Little Falls worked with the Passaic River Coalition and volunteers from Anheuser-Busch to transform vacant land into two new riverfront parks with a boat launch in June 2013 for World Environment Day.

LUBRIZOL ADVANCED MATERIALS INC

Site ID: LUBRIZOL ADVANCED MATERIALS INC
13434 1 INDUSTRIAL ST W, & STYERTOWNE RD
CLIFTON, NJ 070120997

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/24/10	Reduced water usage by 10,000 gal/month by changing procedure for flushing pH probe for effluent system. Instead of continuous flushing, the probe is flushed by hand after each shift.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	2/24/10	Increased product yields by enhancing esterification reaction. This reduces the amount of fatty acid that is neutralized which ultimately would become non-hazardous waste. The non-hazardous waste stream has been reduced from 850 gal/month to 250 gal/month. This has also produced a similar increase in product yield.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	2/24/10	American Chemical Council's Responsible Care Management System (RCMS). Company commitment to improve environmental performance through focus on reducing pollution, reducing energy consumption and complying with regulatory requirements.

MACYS DEPT STORE #183 @ PREAKNESS SHOPPING CENTER

WAYNE, NJ 07470

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/24/11	The facility is sending their waste fragrance containing ethanol alcohol for reclamation (under 40 CFR 261.2) via Chemtron Corp in Ohio to a licensed Distilled Spirit Plant (DSP). According to information reviewed, the ethanol-based products (perfumes/colognes) are sent for reclamation. The ethanol is then recovered and bulked from shredded perfumes and colognes. Material is collected from this activity is sent off-site from Chemtron to a licensed DSP site for reclamation as stated above. The material is run through a distillation column, then through a molecular sieve to remove water and impurities. Recovered ethanol is stocked and sold into the industrial market (See NJEMS SQG-INV report for details of the reclamation process). Based on the information gathered, Macy's East Preakness Center in Wayne has demonstrated stewardship efforts.

MACYS DEPT STORE @ WILLOWBROOK MALL

Site ID: MACYS DEPT STORE @ WILLOWBROOK MALL
47770 100 RT 46,
WAYNE, NJ 07470

Stewardship Activities	Date Acknowledged	Comments
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	9/11/08	Macy's is purchasing paper bags made from recycled paper.

MANCHESTER UTILITIES AUTH

Site ID: MANCHESTER UTILITIES AUTH
184441 510 BELMONT AVE,

LITTLE FALLS, NJ 07078

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/19/17	New Jersey American Water Little Falls Division initiated supplying its Consumer Confidence Report electronically, which provides a reduction in use of paper and ink.

NJ WILLIAM PATERSON UNIVERSITY

Site ID: NJ WILLIAM PATERSON UNIVERSITY
 14471 300 POMPTON RD,
 WAYNE, NJ 07470

Stewardship Activities	Date Acknowledged	Comments
ENERGY STAR.	3/28/08	Energy Star - March 11, 2008
WasteWise.	3/28/08	Wastewise Partner
Green Power Partnership.	3/28/08	New Jersey Consolidated Energy Savings Program & Green Power Partnership awarded in 2006.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/28/08	New construction is in design phase to build an addition with "green building" features under the American College & University Presidents Climate Commitment, 2007. WPU implemented a very aggressive energy conservation program. Several energy savings projects were implemented and with the use of effective building management systems, WPU achieved significant energy reductions.
22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	3/28/08	Member of the 2007 American College & University Presidents Climate Commitment
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	3/28/08	Policy entitled "Energy Use, Emissions, Conservation, Sustainability in Institutions of Higher Learning" by Lou Poandl, Director of Facilities Management, which targets WPU HVAC systems, lighting, motion sensors, food vending machines, etc.
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	3/28/08	
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	3/28/08	The university has participated in the Presidents Climate Commitment to Carbon Neutral Goals. A 21% reduction was achieved from 1990 to 2001 for greenhouse gases.

NORTH HALEDON BORO HALL

Site ID: NORTH HALEDON BORO HALL
62474 103 OVERLOOK AVE,
NORTH HALEDON, NJ 07508

21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	5/2/14	North Haledon constructed 2 rain gardens with assistance from Rutgers University's Water Resources Program. They are located at the Recreational Field and at the High Mountain School.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	5/2/14	North Haledon has a "Green Team" and this team encourages support of farmers' markets and has developed a 34-bed Community Garden for 2014 where organic practices are being employed.

NORTH JERSEY DIST WATER COMM FILTER PLANT

Site ID: NORTH JERSEY DIST WATER COMM FILTER PLANT

If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	7/12/12	PVWC Post Brook WS has added dechlorination equipment to its disinfectant residual analyzer discharge line. This line analyzes the amount of chlorine contained in the finished drinking water being provided from the treatment facility. The dechlorination equipment allows PVWC Post Brook to eliminate the discharge of chlorine onto the ground from water run through the analyzer. Dechlorination of this waste stream is not routinely practiced by other water utilities.

PETCO STORE #1865

Site ID: PETCO STORE #1865
488519 780 RT 3 W,
CLIFTON, NJ 07012

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	4/29/14	Building has solar panels and runs on solar energy.

POLY MOLDING CORP

Site ID: POLY MOLDING CORP
20303 94 4TH AVE,
WANAQUE, NJ 074200000

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/26/16	Facility reuses approximately 99% of scrap polystyrene back into their finished product. In addition, facility accepts used polystyrene from the public and compresses it through a cold fusion machine. This fused material is made into composite furniture. This reduces material that would be landfilled.

POMPTON LAKES BORO DPW MUNICIPAL BUILDING

Site ID: POMPTON LAKES BORO DPW MUNICIPAL BUILDING
30561 25 LENOX AVE,
POMPTON LAKES, NJ 07442

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	3/26/08	The facility does annual floodway cleanup at the confluence of the Ramapo, Wanaque & Pequannock Rivers (tributaries to the Passaic River). Piles of debris from storms create flooding conditions at the confluence.

PROSPECT PARK BORO

Site ID: PROSPECT PARK BORO
 42889 106 BROWN AVE,
 PROSPECT PARK, NJ 07508

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	6/23/16	Through assistance provided by a grant from the Passaic County Board of Chosen Freeholders' City Green initiative, Prospect Park created the Prospect Park Community Garden this Spring. The Garden provides an area where individuals and families can grow vegetable and flower gardens organically, share and expand gardening skills and build community friendships. Located in Hofstra Park, the Garden offers a very sunny plot, water facilities, deer and rodent fencing, and plenty of opportunities for community building.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	5/8/13	Rutgers University staff constructed a small rain garden in Prospect Park Borough's Hofstra Park in 2012.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/21/09	Prospect Park's municipal building has motion sensor technology incorporated into the lobby and stairwell lighting.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	8/21/09	Prospect Park's contract with its recyclable materials contractor requires the contractor to provide recycling education in the municipality's school district.

PSE&G PATERSON METERING & REGULATION

Site ID: PSE&G PATERSON METERING & REGULATION

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/9/08	The ventilation system (heating system) was modified (last 2 years) to reduce power consumption. Timers have also been installed to shut the lights off.

REEVES INTERNATIONAL INC

Site ID: REEVES INTERNATIONAL INC
 14478 34 OWENS DR,
 WAYNE, NJ 07470

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/19/09	Reeves altered its packaging dimensions to allow for less cardboard to be use. Moreover, Reeves no longer using expanded polystyrene in its packaging.

REH MACHINE CO

Site ID: REH MACHINE CO
19763 135 MONROE ST,
PASSAIC, NJ 07055

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/10/12	Changed from using petroleum oils to vegetable oils for manufacturing their stainless steel precision parts.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/10/12	Rehtek installed Schuco USA solar panels in 2011 and now has a system that provides over 30% of electrical usage. A 30 kilowatt system solar array is now installed on the roof and control panels are inside the manufacturing area.

RINGWOOD BORO

Site ID: RINGWOOD BORO
46506 60 MARGARET KING AVE,
RINGWOOD BORO, NJ 07456

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/15/13	Ringwood has installed LED lighting in the library and on the lower floors of the municipal building (upper floors had LED lights installed previously) and at some of the ball fields. In addition, Ringwood has installed motion detectors on the lower floors of the municipal building.

ROYAL ADHESIVES & SEALANTS

Site ID: ROYAL ADHESIVES & SEALANTS
2122 48 BURGESS PL,
WAYNE TWP, NJ 07234

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/15/08	Facility determined that non-contact cooling water did not need to run at full force all the time. Water pressure is now adjusted based on the process(es) running, so the facility uses less water.

SANDVIK PROCESS SYSTEMS INC

Site ID: SANDVIK PROCESS SYSTEMS INC
15145 21 CAMPUS RD,
TOTOWA BORO, NJ 075120000

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/28/09	As part of the Environmental objectives for 2009, Sandvik has switched over to low-flow toilets & better programming of the outside lawn sprinklers. Sandvik expects 3% reduction.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/28/09	As part of the Environmental objectives for 2009, Sandvik has installed programmable thermostats to decrease Natural Gas usage. Sandvik expects 3% reduction. Sandvik also has improved efficiency in production processes. For instance, in the past a single layer of metal belt was hot-pressed. Now, two (2) metal belts are hot pressed at a time.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	5/28/09	The link is listed below. http://www.smt.sandvik.com/environment
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	5/28/09	Sandvik is an approved ISO14001 facility. See link above.

Climate Leaders.	12/17/10	
WasteWise.	12/17/10	

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>12/17/10</p>	<p>Have contract with ink supplier to buy back unused uncontaminated ink. The ink that cannot be bought back gets recycled. Also, use soy based inks.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/17/10</p>	<p>Purchased a new Sheetfed press which uses fewer resources. When renovating the warehouse to include their new company Sandy Wide, the SA company set up the compressed air system with a closed loop to save on energy used to get air throughout the facility.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/17/10</p>	<p>SA has a contract with their ink supplier to buy back unused uncontaminated ink. The ink that cannot be bought back gets recycled. All inks are now soy based. We work closely with our recycler "Recycled Fibers" when new waste streams come about to find the best way to recycle every waste stream we have. Our goal is to become zero to landfill. All maintenance personnel are trained by "Recycled Fibers" on proper segregation and importance of recycling. Standard Operating Procedures are in place to help prevent operators from generating more waste than needed. Make ready times and paper usage on all presses are monitored to prevent lose of time and material.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/17/10</p>	<p>Participated in clean up of Memorial Park in Clifton, NJ. Publish educational material regarding protection of the environment (i.e. a brochure on greenwashing). Also, educate customers on environmentally friendly alternatives - sustainable paper, post consumer waste paper, 100% wind energy, vegetable inks, digital printing, etc.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/17/10</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/17/10</p>	<p>ISO 14001 certified and that helps drive Environmental Management System. Each process is evaluated and continuously monitored and defined in environmental aspects and impacts. Audited annually externally and internally. Processes and procedures are reviewed annually. Retraining takes place whenever a new revision of a procedure is activated. Pilgrim Smartsolve software to archive documents and training records.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>12/17/10</p>	

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>12/17/10</p>	<p>SA has implemented an environmental purchasing policy encouraging the purchase of more environmentally friendly products where possible - for example all promotional material is printed with FSC (Forest Stewardship Council) certified paper and where possible paper with up to 100% PCW (Post Consumer Waste) paper. We receive paper environmentally based on the FSC and PCW content.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/17/10</p>	<p>100% wind energy contracted for 7 years starting in 2005</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>12/17/10</p>	<p>Sandy Alexander has accounted for greenhouse gases measuring all direct and indirect CO2 emissions and has published their performance on an annual basis. Equation used to calculate: Equations for CO2e Propane # of pounds/44 x 3 x 44 / 2200(metric tons) = CO2e Electricity State # that year x # of MWh / 2200 = CO2e Natural gas cubic feet / 1000000 x 120,000 / 2200mt= CO2e</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>12/17/10</p>	<p>Encourage vendor/supply chain to utilize and implement environmentally friendly practices where possible.</p>
<p>Climate Leaders.</p>	<p>7/30/08</p>	<p>http://www.epa.gov/stateply/partners/partners/sandyalexander.html</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/30/08</p>	<p>The company has changed their standard for four-color "house ink" to low VOC inks. The company also offers clients "no" VOC inks as an option.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/30/08</p>	<p>A new energy efficient, state of the art, regenerative thermal oxidizer with the capacity to handle all three web presses was purchased and installed in 2006, replacing two existing oxidizers. Significant reduction in gas and electric usage has been achieved. Energy efficiency contractor was hired to determine areas where changes would result in energy savings. Requests for capital expenditures were submitted and suggestions for selected improvements are being implemented.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/30/08</p>	<p>Company purchased two new hybrid vehicles in 2007 for in-house messenger deliveries. The contract limo service used by the company provides a hybrid vehicle for servicing customers and staff.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>7/30/08</p>	<p>In 2007, Sandy Alexander volunteers worked with the Nature Conservancy to maintain trails at Muckshaw Pond.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/30/08</p>	<p>Company provides speakers to industry associates on sustainable printing. Employees are also allowed to volunteer for one day of work on a company approved environmental project, once a year. Director of Environmental Compliance sits on the local Hazardous Materials Control, Board.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/30/08</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/30/08</p>	<p>ISO 14001:2004 Certified by Bureau Veritas Certification (registrar). Additional certifications inc. ISO9001:2000 (for quality), and Forest Stewardship Council (FSC), Sustainable Forestry Initiative (SFI), Programme for the Endorsement of Forestry Certification (PEFC) all Chain of Custody certifications.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>7/30/08</p>	
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>7/30/08</p>	<p>100% of company electrical energy usage is from wind power. Power is purchased from Community Energy (a N.J. CleanPower supplier).</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>7/30/08</p>	<p>Through the company's ISO Supplier Management Program, primary suppliers are now required to publish environmental policies and develop environmental performance objectives.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>7/30/08</p>	<p>In order to implement the company's required environmental performance objectives, the company shares best environmental practices (renewable energy, recycling, etc.) with suppliers and offer them technical assistance. Sandy also offers training and consultation to their clients on sustainable practices. Business/(Contacts) include: American Bindery Depot; Nu-Ez and Summit Graphics.</p>

SELLING PRECISION INC

Site ID: SELLING PRECISION INC
23498 264 MARSHALL HILL RD,
WEST MILFORD TWP, NJ 07480

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/11/10	Facility is still collecting rainwater for use in making its coolant mix and for air compressor cooling.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/21/09	Facility is collecting rainwater for use in making its coolant mix and for air compressor cooling.

SHILOH BIBLE CAMP

Site ID: SHILOH BIBLE CAMP
177266 753 BURNT MEADOW RD,
HEWITT, NJ 07480

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/18/17	The camp replaced all toilets and shower heads with low flow devices in December 2016.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/18/17	The camp replaced all lighting with LED fixtures and bulbs.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/26/15	Low flow toilets are in use in the new gymnasium.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/26/15</p>	<p>Lights in new building are all on motion sensors.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/26/15</p>	<p>Under contract with Solar City to provide an estimated 2/3 of facility electricity as of September 2015.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>10/11/12</p>	<p>low flow toilets are in use in the new gymnasium</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/11/12</p>	<p>The facility added high R-value spray insulation to its new gymnasium. This is a newer addition to the Styrofoam construction for which Shiloh Bible Camp has already received stewardship recognition. In addition, this building uses compact fluorescent lighting.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/24/11</p>	<p>New gymnasium onsite is being built with Quad-Lock technology. Quad-Lock is a construction material used in place of cinder blocks and which has a high R value. http://www.quadlock.com/green_building/building_shell_superinsulation.htm is a link to the product's website.</p>

ST GOBAIN PERFORMANCE PLASTICS CORP

Site ID: ST GOBAIN PERFORMANCE PLASTICS CORP
13379 150 DEY RD,
WAYNE, NJ 07470

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	8/15/17	St. Gobain Performance Plastics is certified in ISO 14001.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	8/15/17	ISO14001

ST JOSEPHS HOME FOR THE ELDERLY

Site ID: ST JOSEPHS HOME FOR THE ELDERLY
16335 140 SHEPHERDS LN,
TOTOWA BORO, NJ 07512

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/21/14	Little Sisters recently upgraded its heating and water heating systems. Previous heating equipment dated from 1975 and was inefficient . In addition, Little Sisters changed its method of heating water from use of the boiler to 2 water heaters, which allows the heating system boilers to be turned off seasonally reducing energy use.

ST JOSEPHS REGIONAL MEDICAL CENTER

Site ID: ST JOSEPHS REGIONAL MEDICAL CENTER
15681 703 MAIN ST,
PATERSON, NJ 07503

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	6/25/18	St. Joseph's has a mercury free purchasing policy. St. Joseph's does not purchase mercury containing products when ever possible.
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	6/25/18	In 2017/2018, St. Joseph's installed new air handling system which now recovers the water from all the CCB air Handlers which returns the water from the air handling system to the cooling tower. This new air handling system has replaced 3 air conditioner systems and a medical vacuum system. The Hospital also installed a device in the kitchen and cafeteria which now recycles all the rinse water. The hospital also continues to install low flow shower heads and faucets in all the patient bathrooms. St. Joseph's is now roughly saving 19.5 million gallons of water per year.
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	6/25/18	St Joseph's replaced all their 182 existing 10 amp photo copiers with new 8 amp photo copiers to reduce the energy used from the copiers. St. Joseph's also participates in PSEG's energy curtailment program where upon request by PSEG, the hospital cuts back on power usage at the site. The Hospital has been tested twice and demonstrated the ability to reduce power usage by 500 kW per hour.
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	6/25/18	St. Joseph's recycles all wooden pallets that are delivered to the hospital. Previously, all wooden pallets were sent to the trash. A private company picks up all pallets multiple times a year. Roughly 300 pallets per year are recycled. Starting in 2017, the Hospital has now reduces the amount of printers at the Hospital through a program called "the Print Smart Campaign" Hospital has recycled many printers and the Departments are now printing to a nearby "Network" Printer.
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	6/25/18	St. Joseph's installed photo sensors in one of their main hallways which has a lot of windows. The lights in the hallway only turn on when there is a lack of natural light detected by the sensors. St. Joseph's is replacing their old windows in the hospital with newer more energy efficient windows. As of 2018, 25% of the old windows have been replaced. St. Joseph's replaced all the Mercury Vapor lights in the "Central Sterile Area" (40 Lights) to LED lights in April 2018. St. Joseph's replaced all the Flourescent Lights in the Basement to LED Lights in 2017 and 2018.

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/25/18</p>	<p>St. Joseph's continues to maintain the park across the street from the hospital. The park was constructed after the Hospital purchased and demolished three old homes on the lot to create more green space in Paterson. The hospital has since purchased another property to expand the park. The Hospital also maintains green space at the 102-108 Barclay St. Property that is located roughly 2 blocks away from the hospital which was purchased a few years ago. St. Joseph purchased Lot 14 on Barclay Street about 2 to 3 blocks from the hospital. This lot is now a new green space and park maintained by the Hospital.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/25/18</p>	<p>In 2017, St. Joseph's Hospital discovered that by changing the font in the letters and documents that they print out, they could save on the ink usage used in their printers. They use the font "Garamond" which reduces the amount of ink usage by the printers at the Hospital by 24%</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>6/25/18</p>	<p>Roughly 80 to 85 employees at St. Joseph's have signed up for the Meadowlink EZ ride program, a carpooling program offered through NJDOT.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/25/18</p>	<p>St. Joseph's has a written policy directing them to purchase CRC cleaners and spray through Grainger. Policy states the CRC cleaners are "Environmentally Friendly Products that have no VOC's or low VOC content. biodegradable, and not classified as a hazardous waste.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/27/10</p>	<p>NEW - St. Joseph's has a mercury free purchasing policy. St. Joseph's does not purchase mercury containing products when possible.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/27/10</p>	<p>NEW - 1) St. Joseph's now collects and reuses vacuum pump water from their turbin chiller in their cooling tower. This saves approximately 160,000 gallons of water per year. 2) All new bathrooms installed at St. Joseph's are built with low flow toilets, low flow faucets, and low flow shower heads.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/27/10</p>	<p>NEW - 1) St. Joseph's replaced their 182 existing 10 amp photo copiers with new 8 amp photo copiers to reduce energy use. 2) St. Joseph's participates in PSE&G's energy curtailment program where upon request by PSE&G they cut back on power usage at the site. They have been tested twice and demonstrated the ability to reduce power usage by 500 kW per hour. They started participating in the program in 2009 and have been asked to reduce power for the program on at least one occasion.</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/27/10</p>	<p>St. Joseph's security continues to use an electric vehicle to patrol the grounds. This vehicle replaced a Chevy Caprice gas powered vehicle.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/27/10</p>	<p>NEW - 1) "Daylight Harvesting" - St. Joseph's installed installed photo sensors in a hallway with a lot of windows. The lights in the hallway only turn on when there is a lack of natural light detected by the sensors. 2) St. Joseph's is replacing their old windows with newer more energy efficient models. 15% of the existing windows have been replaced so far.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>7/27/10</p>	<p>ST. Joseph's continues to maintain the park across from the hospital. The park was constructed after they purchased and demolished three houses to create more green space in Paterson. They also maintain green space at the 102-108 Barclay St. property they bought several blocks from the hospital. NEW - St. Joseph's bought a fourth property across the street from the hospital and demolished the house that was on it to expand the park they own and maintain.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>7/27/10</p>	<p>NEW - 81 of St. Joseph's employees have signed up for the meadowlink EZ ride program, a car pooling program, through NJDOT.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>7/27/10</p>	<p>Facility has written policy directing them to purchase CRC cleaners and spray through Grainger. Policy states the CRC cleaners are "environmentally friendly products that have no VOC's or low C\VOOC content, biodegradable, and not classified as a hazardous waste."</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/2/09</p>	<p>St. Joseph's continues to use the electric security vehicle originally documented in SCI080001.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/2/09</p>	<p>St. Joseph's has purchased a new property at 102-108 Barclay St and knocked down the existing building and created more green space in Paterson. They also continue to maintain the park they created across the street from their facility on Main St.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/17/08</p>	<p>St. Joseph's security used to use a Chevy Caprice to patrol the grounds. They have purchased and are using an electric vehicle for this purpose. Similar to a large golf cart this vehicle also contains a space for a stretcher so it can also be used to transport patients from helipad during emergencies.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>4/17/08</p>	<p>St. Joseph's purchased three houses directly across from the Hospital on Main St. These houses were knocked down and turned into a small park/green space in an otherwise urban environment. A fourth house may still be purchased and removed to expand this space. They also took steps to preserve existing trees at the site and to plant additional trees following removal of the houses.</p>

STONE INDUSTRIES INC

Site ID: STONE INDUSTRIES INC
14293 400 402 CENTRAL AVE,
HALEDON, NJ 07508

Stewardship Activities	Date Acknowledged	Comments
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/6/16</p>	<p>Braen Stone Industries has a Boy Scouts of America program for aiding scouts in earning Merit Badges in Geology and Mining.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/21/10</p>	<p>A timer was installed on the release agent dispenser so that overspray of the product was limited. This lowers both product consumption by truck drivers and limits the amount of material that can drip on the ground due to overspray.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/21/10</p>	<p>All lights in buildings are on motion sensor timers.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/21/10</p>	<p>Class field trips are sponsored where children are questioned about their recycling habits and are taught about construction debris recycling and how it reduces the amount of landfill waste.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/17/09</p>	<p>A timer was installed on the release agent dispenser so that overspray of the product was limited. This lowers both product consumption by truck drivers and limits the amount of material that can drip on the ground due to overspray.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/17/09</p>	<p>All lights in buildings are on motion sensor timers.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/17/09</p>	<p>Class field trips are sponsored where children are questioned about their recycling habits and are taught about construction debris recycling and how it reduces the amount of landfill waste.</p>

SUEZ WATER NJ

Site ID: SUEZ WATER NJ
37838 MORSETOWN RD,
WEST MILFORD TWP, NJ 07480

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/9/17	The system provided its Water Quality report (CCR) electronically for the first time in 2017. This provides a savings of paper and ink.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/16/10	Facility uses chlorinated non-potable water for in-plant cleaning activities, reducing use of potable water for these purposes.

TILCON NY INC POMPTON LAKES FACILITY

Site ID: TILCON NY INC POMPTON LAKES FACILITY
16416 BROAD ST, FT OF
POMPTON LAKES, NJ 07442

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/18/10	The site is capable of manufacturing Warm Mix Asphalt (WMA) at the Tilcon Pomptop Lakes facility, which is a product which uses less energy and generates less emission, resulting in additional health, safety and environmental benefits when compared with Hot Mix Asphalt. WMA is produced at lower temperatures than Hot Mix Asphalt yielding reduced emissions at both the Tilcon Pompton Lakes facility during manufacture of the product and also at the work sites where the WMA is placed. In 2009, Tilcon placed 783 tons of 12.5M64 Warm Mix Asphalt at the Grove Street paving project located in Ridgewood, NJ.

21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	4/29/16	In 2015, Totowa, along with Woodland Park, used grant money to de-snag the Passaic River.

TOTOWA BORO DPW GARAGE

Site ID: TOTOWA BORO DPW GARAGE
 45503 136 FURLER ST,
 TOTOWA BORO, NJ 075120000

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	11/1/13	Totowa Boro Water Dept issued its 2012 Water Quality Report electronically, reducing its use of paper and printing supplies.

UPPER MONTCLAIR COUNTRY CLUB

Site ID: UPPER MONTCLAIR COUNTRY CLUB
 43788 177 HEPBURN RD,
 CLIFTON, NJ 07012

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/17/13	The Upper Montclair Country Club installed a Washwater Recycle System. With this system, equipment wash water is collected in a sump. Solids are separated, the water goes through a clarifier, and then through granulated activated carbon. This wash water is then re-used for equipment washing. Grass clippings are used as mulch throughout the golf course. This Recycle System is located in the maintenance garage. The maintenance garage was spotless during the site visit. Mr. Brunelle stated that all the drains in the garage floor are connected to the recycling system, and any spill, if it occurred, would be contained within this recycling system. According to Mr. Brunelle, this equipment was installed because the Club wanted to be pro-active by reducing the amount of water usage.

UTZ TECHNOLOGIES INC

Site ID: UTZ TECHNOLOGIES INC
 2696 101 INDUSTRIAL E,
 CLIFTON, NJ 07012

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/25/09	Company has completely replaced its former chemical process with a laser etching process.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/25/09	Company is no longer a SIU because it has eliminated water usage for its industrial process and now discharges only sanitary wastewater.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/5/08	Utz's chemical etch process is slowly being replaced by laser etching with laser machines. As a result their D002 (ferric chloride) waste generation has decreased in the past few years. In addition, less ferric chloride is purchased for the etching machines since the laser machines are being used instead.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/5/08	A program has not been employed for water reduction, however, the decrease use of the etching machines has caused a reduced use in water. Water and ferric chloride are used in the etching machines.

VALBRUNA STAINLESS INC

Site ID: VALBRUNA STAINLESS INC
 2192 1000 CANNON BALL RD,
 POMPTON LAKES, NJ 074420000

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/8/13	The facility has replaced the mercury vapor and metal halide lights with compact fluorescents and installed motion sensors so lights will automatically turn off in unused areas.

VALTEK INC

Site ID: VALTEK INC
 2282 752 20TH AVE,
 PATERSON, NJ 07504

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/21/11	Valtek implemented a solvent recovery unit approximately one year ago that has enabled the company to minimize hazardous materials used on site and disposed of. The waste generated on site is placed in the solvent unit and is reused until they can no longer use it. Once they can not use the waste recovered, it is sent out as hazardous waste, which is much less than prior years.

VAN ORDEN SAND & GRAVEL OF RINGWOOD

Site ID: VAN ORDEN SAND & GRAVEL OF RINGWOOD
 2155 589 W BROOK RD,
 RINGWOOD, NJ 07456

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/11/14	The facility replaced its 8 - 12 cylinder haul trucks with 6 cylinder haul trucks. These new trucks are smaller and carry individually smaller loads to the crusher, enabling the crusher to work more consistently (less down time). This site improvement resulted from recommendations made by Caterpillar's efficiency program.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/31/13	Van Orden has installed 2 replacement generators with increased emissions control that operate via a load shedding computer program that shuts off a generator when the power requirements do not require its use. The prior generators did not have a load shedding capability.

VERIZON NJ INC PATERSON C O #43040

Site ID: VERIZON NJ INC PATERSON C O #43040
 2331 114 PATERSON ST,
 PATERSON, NJ 07505

Stewardship Activities	Date Acknowledged	Comments
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/27/08	Verizon through Meadowlink has a comprehensive Transportation Demand Management Program. This program includes: Carpool program: The program notifies commuters of carpooling matches and incentives like a free \$100 gas card and preferred parking spots. Commute Fairs: Hosts two Commute Fairs where commuter programs are explained and promoted. Transit Information Display: Transit schedules are posted. Emergency Ride Home: A free guaranteed ride for people who carpool, vanpool, or use mass transit. Vanpool Program: Encourages the formation of new vanpools. Commuter Advantage Program: A program that allows vanpools and transit commuters to use pre-tax salary to pay for monthly passes or bus tickets. As of January 2008 for the Paterson Site # of Carpoolers = 48 # of Transit Users = 2 Total employees in Paterson = 58

WANAQUE BORO WATER DEPT

Site ID: WANAQUE BORO WATER DEPT
47686 579 RINGWOOD AVE,
WANAQUE, NJ 074650000

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/16/13	Wanaque issued its 2013 Water Quality report in an electronic format, eliminating the printing and mailing of the document. Wanaque has also combined its water and sewer bills to combine 2 printings and mailings into one.

WAYNE TWP DPW MUNICIPAL GARAGE

Site ID: WAYNE TWP DPW MUNICIPAL GARAGE
40327 201 DEY RD,
WAYNE, NJ 07470

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/21/14	Wayne issued its 2014 Consumer Confidence Report electronically in June 2014. This reduces the amount of paper and ink used in producing this mandatory report.

WOODLAND PARK BORO DPW

Site ID: WOODLAND PARK BORO DPW
35644 1 BROWERTOWN RD,
WEST PATERSON, NJ 07424

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	4/18/13	Woodland Park is issuing its 2013 Consumer Confidence Report electronically instead of by mailing paper copies to all customers.

WOODLAND PARK BORO MUNICIPAL BUILDING

Site ID: WOODLAND PARK BORO MUNICIPAL BUILDING
19231 5 BROPHY LN,
WEST PATERSON, NJ 07424

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	5/4/17	Woodland Park conducted a desnagging project for a portion of the Passaic River in 2015. This project was not required by any permit or regulation and was intended to improve flow in the River and reduce the potential for flooding.

ADI FARMS

Site ID: ADI FARMS
525211 210 FORK BRIDGE RD ,
PITTSBURGH TWP, NJ 08318

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/25/14	The owners signed an affidavit stating pesticides are not applied at this farm. Instead, the owners use integrated pest management (IPM) practices to control pests. Weeds are pulled up mechanically and by hand. Insects are hand picked from the crops. Crops are rotated, which reduces the risk of pest infestations.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/25/14	All 12 acres in production utilize a drip irrigation system. This reduces the total amount of water necessary to sufficiently irrigate the crops.

ALDINE NURSERY

Site ID: ALDINE NURSERY
199262 658 FRIESBURG ALDINE RD,
ALLOWAY TWP, NJ 08318

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/13/15	This establishment hand-pulls weeds in order to reduce the need for herbicides.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/13/15	This establishment has installed drip irrigation for more efficient crop irrigation practices.

AUBURN ROAD VINEYARDS

Site ID: AUBURN ROAD VINEYARDS
492074 117 SHARPTOWN AUBURN RD,
PILESGROVE TWP, NJ 08098

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/16/18	The farm uses integrated pest management (IPM) techniques to reduce total pesticide applications. Weeds and grass are cut mechanically, fields are monitored for pests and traps are used for the insects.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/16/18	18 acres of crop has drip irrigation system.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/16/18</p>	<p>Empty pesticide containers are recycled.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/16/18</p>	<p>LED lighting is used.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>8/16/18</p>	<p>Solar panels</p>

BORRELLI FARMS

Site ID: BORRELLI FARMS
128921 220 PEDRICKTOWN WOODSTOWN RD,
OLDMANS TWP, NJ 08085

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/14/13	Farm employs the drip method for their crops. This allows them to use less water and have higher efficiency.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/14/13	Farm reuses fertilizer bags for trash bags.

BURLINGTON BEEF

Site ID: BURLINGTON BEEF
28793 30 BURLINGTON RD,
UPPER PITTSBORO TWP, NJ 08343

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/5/15	Facility has solar panels that provide 20% of the power used for the site, and T5 lights in the kill area.

BUSHMAN NURSERY

Site ID: BUSHMAN NURSERY
126526 596 598 SALEM QUINTON RD,
QUINTON TWP, NJ 08079

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/27/14	The farmer utilizes drip irrigation over three acres, conserving the total amount of water necessary to properly irrigate the crop.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/27/14	For this business, the air conditioner, heater, and refrigerator are all high efficiency energy products, reducing the business' total energy expenditure.

BYRNES FARM

Site ID: BYRNES FARM
 128223 230 SHARPTOWN AUBURN RD, A
 PILESGROVE TWP, NJ 08098

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/9/13	Farming best management practices are used to reduce the use of pesticides and herbicides and hazardous waste: 1) cultivation of fields is used to control weeds instead of herbicides. 2) Bug catchers are placed in all field to reduce the amount of pesticides used to control pests. 3) Empty pesticides containers are recycled via special recycling program rather than disposal in landfill.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/9/13	The farmer has installed 40 acres in drip irrigation system to save water.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/9/13	Empty pesticide containers are recycled.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/9/13	Energy efficient T5 fluorescents lights have been installed at the business facility.

CALPINE NJ GENERATION

Site ID:
 15873

Stewardship Activities	Date Acknowledged	Comments
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	4/9/14	4/17/14 - Planting flowers in Pennsville 4/22/14 - Planting trees in Vineland
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	4/9/14	www.calpine.com/about/oc_safe_position.asp
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	4/9/14	Calpine Deepwater Energy Center continues to operate under an EMS.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	6/24/13	Litter clean up in Middle Township on 4/19/13. Planted plants on Pennsville Twp. property on 4/26/13.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	6/24/13	http://www.calpine.com/about/oc_safe_position.asp
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	6/24/13	Calpine Deepwater Energy Center continues to operates under an EMS.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	5/10/11	Beach cleanup @ Stone Harbor on 4/30/11. Purchases tree seedlings for distribution to organizations.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/10/11</p>	<p>http://www.calpine.com/about/oc_safe_position.asp</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/10/11</p>	<p>Calpine Deepwater Energy Center operates under an EMS.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/12/10</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/12/10</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/12/10</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/12/10</p>	<p>same as noted on 4/9/08 inspection report</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/12/10</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/12/10</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/21/09</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/21/09</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/21/09</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/21/09</p>	<p>same as noted on 4/9/08 inspection report</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/21/09</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/21/09</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/21/09</p>	<p>same as noted on 4/9/08 inspection report</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/9/08</p>	<p>yes , this site has an active minimization program and pollution prevention program. Under Source Reduction, batteries-careful maintenance/recharge of batteries to extend the life of the battery. Fuel Specifications-Facilities monitor fuel specifications to provide optimal combustion efficiency within the process....many additional items noted and available for review under Source Reduction response from Conectiv</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/9/08</p>	<p>the site has actively participated in beneficial use determination for fly/ bottom ash reuse</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/9/08</p>	<p>Yes Conectiv Energy encourages community outreach through sponsorship and support for programs such as : working with/at the Brandywine Zoo, Water Resources Association of the Delaware River Basin, Jr. Achievement, Tri-State Bird Rescue & Research, Inc, Society of Women Environmental Professionals</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/9/08</p>	<p>yes. Conectiv Energy has a comprehensive written environmental policy, which is signed by the current senior officer of the parent company. The environmental policy includes: organizational roles and responsibilities, Environmental Compliance, Environmental Stewardship, and Environmental Risk Management</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/9/08</p>	<p>Yes..Conectiv Energy facilities operate under an EMS. Internal Environmental Compliance officers certify to adherence of the EMS.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>4/9/08</p>	<p>An Annual Environmental report is issued by the parent company, PHI</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/9/08</p>	<p>An environmental purchasing policy in place with "Green: " in procurement of environmentally friendly products as a organizational goal for 2008</p>

CARNEYS POINT TWP MUNICIPAL BUILDING

Site ID: CARNEYS POINT TWP MUNICIPAL BUILDING
 46805 303 HARDING HWY,
 CARNEYS POINT TWP, NJ 08069

Stewardship Activities	Date Acknowledged	Comments
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/4/15</p>	<p>Carney Pt installed high efficiency light bulbs on the interior and exterior of the municipal building</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/28/13</p>	<p>Carneys Point installed new compact fluorescent bulbs and daylight tubes in the interior and exterior of the municipal building.</p>

CASSADAY FARMS

Site ID: CASSADAY FARMS
 128894 82 DILKS RD,
 UPPER PITTSBORO TWP, NJ 08343

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/22/14	This farm recycles the pesticide containers. The pesticide containers are sent to state sponsored recycling program The farmer uses pesticide application equipment equipped with a computer and GPS system to save energy and pesticide, when pesticides are applied in the field. IPM is used in the farm to save pesticides. To save herbicides, weeds are cut mechanically.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/22/14	The farmer has 500 acres of vegetables with drip irrigation system to save water.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/22/14	High efficiency engine Tier 4 tractor is used in the field to save combustible.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/22/14	The business has high efficiency track lighting to save energy. High efficiency air and heater are used in the business.

CATALANO MARTIN J

Site ID: CATALANO MARTIN J
 44654 440 AUBURN RD,
 PILESGROVE TWP, NJ 08098

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/15/13	The farmer rotates which crops are grown in a particular field, an Integrated Pest Management (IPM) practice. This is a non-pesticidal method of controlling pests.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/15/13	40 acres of crop utilize a drip irrigation system, reducing the total amount of water necessary to properly irrigate the crop.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/15/13	The farmer recycles pesticide empty containers with Helena Chemical, reducing the amount of overall waste.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/15/13	Mr. Catalano uses T5 high efficiency lighting to save energy.

COOMBS & SONS FARM

Site ID: COOMBS & SONS FARM
 128148 20 RT 77,
 UPPER PITTSBORO TWP, NJ 08318

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>10/7/14</p>	<p>The farm also utilizes several integrated pest management (IPM) practices to reduce the overall input of chemical pesticides. The farmer rotates crops, reducing pests pressures. In addition, crop rotation reduces the need for fertilizer applications. On the farm, black lights are used to control insects, reducing the amount of insecticide necessary. The farmer also uses mechanical weed control, reducing the need for herbicides.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/7/14</p>	<p>The business utilizes Tier 5, high efficiency lighting to conserve energy.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>10/6/14</p>	<p>The farmer recycles empty pesticide empty containers, reducing waste. The business is more paperless now.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/6/14</p>	<p>The farm has high efficiency fluorescent lighting, and the farm has a building that utilizes natural light from a skylight.</p>

DANTE SPINA & SONS

Site ID: DANTE SPINA & SONS
128711 165 HAINES NECK RD ,
MANNINGTON TWP, NJ 08079

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/11/14	The farmer has 150 acres in drip irrigation system to save water.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/11/14	The farmer has a building designed to contain pesticide spill. This farm uses fluorescent lighting to save energy.

DUSTY LANE FARMS

Site ID: DUSTY LANE FARMS
125908 327 GARRISON RD,
ELMER, NJ 08318

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/24/18	The farmer mechanically controls weeds and grass and uses stones for the parking lot and others area around the main building to eliminate weeds and grass. Crops are rotated to avoid insects attack or another infestation crop.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/24/18	The farmer has 50 acres of drip irrigation system.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/24/18</p>	<p>The farm recycles all pesticide containers. The pesticide containers are sent to state sponsored facilities and Helena Company.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/24/18</p>	<p>The business has LED (s) and Fluorescent lighting and uses high efficiency refrigerator, air and heat systems.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/18/13</p>	<p>This farm recycles all pesticide containers. The pesticide containers are sent to state sponsored recycling program.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/18/13</p>	<p>Uses the energy efficiency T8 Fluorescent lighting and has installed an energy efficient air and heating system.</p>

EDGAR JOYCE NURSERY

Site ID: EDGAR JOYCE NURSERY
43928 111 COLEMAN RD,
ALLOWAY TWP, NJ 08079

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/16/15	This establishment uses mechanical control of the weeds on 120 acres of land. This reduces the amount of herbicides applied. They also use IPM to scout for insects in the egg stages in June - July every year, reducing the amount of insecticides they need to apply.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/16/15	This establishment has 6 acres in drip irrigation equipment, for more efficient use during the irrigation process.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/16/15	This establishment participates in a voluntary empty pesticides container recycling program with Helena Chemical and the County Partners. This reduces the amount of empty plastic containers that may have pesticide residues from winding up in the solid waste facilities.

EI DUPONT DE NEMOURS & CO

Site ID: EI DUPONT DE NEMOURS & CO
15645 67 CANAL RD , & RT 130
DEEPWATER, NJ 08023

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/29/17</p>	<p>They have reduced the amount of Dowtherm used and they are looking into finding alternatives for paracymine.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>6/29/17</p>	<p>Their life cycle assessments are conducted as a part of their "Product Stewardship."</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/29/17</p>	<p>DuPont has Safety-How and Environmental-How manuals. They are also ISO-1401 certified.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>6/29/17</p>	<p>Irene Stoss does their annual environmental report using the DuPont Global Environmental Tracking Tool.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>6/29/17</p>	<p>Their employee trip reduction program is conducted as a part of a policy known as cost reduction.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/29/17</p>	<p>There is a corporate-wide policy that requires Items being purchased to go through a sourcing group.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>6/29/17</p>	<p>They require their vendors/supply chains to meet environmentally sound business practices through ISO 9001 and 14001.</p>

ELMER BORO DPW

Site ID: ELMER BORO DPW
58994 120 S MAIN ST,
ELMER, NJ 08318

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/30/13	New energy efficient lighting in Adm buildings and new energy efficient natural gas heating systems.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	9/30/13	Organizes with Clean Communities litter pickups throughout town with organizations such as Boy Scouts & VFW

GOYA FOODS INC

Site ID: GOYA FOODS INC
420634 1 INDUSTRIAL WAY,
PEDRICKTOWN, NJ 08067

19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/14/17	The facility utilizes 18 tractor trailers and 2 straight trucks to deliver Goya products to various food chain retailers Monday through Friday. Goya has a refueling company, Crown Point Truck Stop/Weaver Oil, which comes out to the facility about 3 times/week to individually refuel the trucks so that they do not have to stop off during daytime deliveries. Refueling the trucks at the facility eliminates waiting to be fueled and reduces the amount of driving and idling normally required during refueling fueling stations.

HAZMAT ENVIRONMENTAL GROUP INC

WOODSTOWN, NJ 08098

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/20/13	Makes ground applications with minimum volumes of water, i.e., 12 to 15 gal/A as compared to former standard of 40 or greater gal/A.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/20/13	1. Operates as collection and compacting center for recycling of empty plastic and cardboard pesticide shipping cases and other agricultural chemical packaging under written agreement with NJ Department of Agriculture (and Karen Kritz). See Photographic Image Nos. 1-M through 6-M); 2. Delivers product (pesticides and fertilizers) in refillable bulk containers to agricultural producers who request bulk delivery eliminating pesticide packaging which requires disposal or recycling. 3. For agricultural producers not requesting bulk delivery, Business encourages them to use product formulations with high concentrations of active ingredients and commensurate label Directions for Use requiring reduced rates of product formulation to be delivered.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/20/13	Purchased replacement pick-up trucks are smaller and use flex fuel reducing fuel consumption.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/20/13</p>	<p>Has converted lighting to more efficient lamps and fixtures to lower electrical usage.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/20/13</p>	<p>Assists agricultural producers in development of deer food plots.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/20/13</p>	<p>Purchases copy paper with high recycle content.</p>

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/16/17	The farmer recycles the empty pesticide containers to reduce hazardous materials and mows weeds to use less herbicides in the field. Also, the farmer uses an integrated pest management (IPM) system to handle pests in the field.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/16/17	Fluorescent lighting is used in the business to save energy.

LACYS EXPRESS INC

Site ID: LACYS EXPRESS INC
 37241 26 E MILL ST,
 PEDRICKTOWN, NJ 08067

Stewardship Activities	Date Acknowledged	Comments
SmartWay Transport Partnership.	2/20/08	Lacys pursues a 'Fleet Fuel Efficiency Improvement Campaign' begun in 2007 and ongoing through the date of inspection. This includes careful measurement of fuel use for the 40 vehicle fleet, driver education, route planning, replacement and upgrades including auxillary power units in 2007 to reduce idling on 6 vehicles. This has earned them an EPA Smartway rating of .75 out of 1.25. See EPA website - http://www.epa.gov/otaq/smartway/transport/partner-list/index.htm
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/20/08	Lacys pursues a 'Fleet Fuel Efficiency Improvement Campaign' begun in 2007 and ongoing through the date of inspection. MANNINGTON MILLS INC

Site ID: MANNINGTON MILLS INC
15871 75 MANNINGTON MILLS RD, & RT 45
MANNINGTON TWP, NJ 08079

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/7/18	Mannington continues to evaluate and pursue recycling and material conservation opportunities for its products. The Society of Plastics Engineers (SPE) is one of the largest professional technical organizations in the plastics industry and has recognized Mannington's environmental leadership and innovation for our VCT recycling efforts. At SPE's annual Global Plastics Recycling Conference in March 2010, Mannington received an Environmental Stewardship Award for this industry-first recycling effort.

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/7/18</p>	<p>Mannington is a long-standing member of the Partnership for the Delaware Estuary's Corporate Environmental Stewardship Program, corporations which supports outreach to the public. Starting in 2013, Mannington participated in a joint recycling effort with the Partnership for the Delaware Estuary (PDE) and NJ Audubon Society. This group of volunteers collected recyclables during a Phillies Red Goes Green event. Similar Phillies Red Goes Green events have occurred each year since and continues to be supported by Mannington Associates. Additionally the company participated in a 2016 cleanup of Tinicum Island with other groups including PDE.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/13/16</p>	<p>Mannington has developed, tested and has been a recycler of post-consumer products since 2008. This initially included drywall materials from construction projects, was further developed into a VCT (commercial resilient tile) back into our VCT manufacturing operation (until 2015) and now continues with just drywall. We currently incorporate post-consumer recycled drywall into several premium tile product categories, typically at a steady rate of 0.5%. We have recycled millions of pounds of post-consumer materials since inception. This has helped to keep millions of pounds of post-consumer materials out of landfills and given a second use. The Society of Plastics Engineers (SPE) is one of the largest professional technical organizations in the plastics industry and has recognized Mannington's environmental leadership and innovation for our VCT recycling efforts. At SPE's annual Global Plastics Recycling Conference in March 2010, Mannington received an Environmental Stewardship Award for this industry-first recycling effort.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>12/13/16</p>	<p>Mannington uses Life Cycle Assessment LCA to measure the life cycle environmental impact of existing manufacturing processes and new product design. We conducted our first LCA in 2003. We performed these LCAs in accordance with the requirements of ISO 14040. We are expanding our internal competencies regarding life cycle thinking, which is part of considering environmental improvement within product design. In addition, Mannington has been actively involved with the flooring industry's work to develop and finalize a North American Floorcovering Product Category Rule (PCR) to help assure more uniform LCAs And EPD's (Environmental Product Declarations). Our internal LCA work that has been used for publicly transparent ISO 14044 compliant EPD's.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/13/16</p>	<p>Truck transport efficiency is maximized by careful logistical analysis of product shipment routes and timing. The system employs web-based info and phone technologies. Actual impact not calculated. Rail delivery of raw materials was recently discontinued at Mannington due to rail delivery pricing. Mannington is open to future rail delivery of specific raw materials pending pricing changes as compared to truck delivery. Roughly 3.3 % of sales force vehicles (5 of approximately 150 total) are hybrids. Mannington will contribute to EPA SmartWaySM Transport Partnership's goal to reduce 33 to 66 million metric tons of carbon dioxide and up to 200,000 tons of nitrogen oxide per year by 2012 by improving the environmental performance of our freight operations. Launched in February 2004, the SmartWay Transport Partnership aims to achieve fuel savings of up to 150 million barrels of fuel per year. The Partnership currently has over 2550 Partners. EPA Award - 2013 Mannington Mills was honored with a SmartWay® Excellence Award from the U.S. Environmental Protection Agency as an industry leader in freight supply chain environmental performance & energy efficiency. Mannington has been a SmartWay partner since 2010. Over the past few years, Mannington has shown a steady increase in use of SmartWay carriers and in 2013, nearly all carriers used by Mannington are in the SmartWay program. Click here to read more about Mannington's EPA award.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/13/16</p>	<p>Riparian/Shrub-scrub project May and November 2009 with Phase 3 completed in May 2010: Mannington partnered with the NJ Audubon Society, US Fish and Wildlife Service, and the Partnership for the Delaware Estuary to significantly improve a local, Riparian habitat by restoring 12 acres of low grade agricultural land to an improved riparian buffer. By planting this riparian buffer with native trees & shrubs, the area will be established as a shrub-scrub habitat with a life expectancy of over 30 years (eventually succeeding to forest). During the first 30+ years of establishment, the project will provide habitat for bird species of concern: blue-winged warbler, eastern kingbird, brown thrasher, prairie warbler, eastern towhee & field sparrow. Additional projects have most recently been completed during December 2016. Honeybee Project: To help improve the local honeybee population, Mannington Mills starting in 2009 became home to honeybee colonies. Experienced beekeepers have helped establish & maintain new hives to the Salem property. Each hive houses upwards to 10 to 60 thousand bees and ultimately help local farmers within a 2-mile radius to more efficiently pollinate crops and help reestablish a declining honeybee population. Purple martin project:</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/13/16</p>	<p>Mannington was one of three recipients of the 2010 Friends of Education award by the New Jersey Association for Supervision & Curriculum Development (NJASCD). This award recognizes individuals and corporations outside of education that have played a critical role in contributing toward leadership or quality in education by impacting upon the lives of the children in NJ schools. This acknowledgment was for Mannington's "Going Green - It's a Journey - Salem County Schools" project. This program was active for at least 5 years with a volunteer teacher group, Mannington associates, and at times students participating in projects. The relationships built by this project have extended into one-off projects. An example was a recent large tree planting project that included over 15 local school Science students. Mannington is a long-standing member of the Partnership for the Delaware Estuary's Corporate Environmental Stewardship Program which supports outreach to the public. Starting in 2013, Mannington participated in a joint recycling effort with the Partnership for the Delaware Estuary (PDE) and NJ Audubon Society. This group of volunteers collected recyclables during a Phillies Red Goes Green event. Similar Phillies Red Goes Green events have occurred each year since and continues to be supported by Mannington Associates. Additionally, the company participated in a 2016 cleanup of Tinicum Island with other groups including PDE.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>12/13/16</p>	<p>Carpooling is encouraged by providing premium parking to carpool participants. Many of these premium spaces are used daily. However, the program is not tracked or measured for actual passenger-mileage reductions and policing of spaces is generally left to the honor system. Bicycle commuting directly to specific work areas within the site is allowed. Bike racks are provided. In June 2008, Mannington Mills began using "icarpool", a web-based car pool facilitation service which has been made available to Mannington's New Jersey Associates. In recognition of Earth Day 2010, Mannington hosted a trip reduction activity and during April 27th and 28th, we verified that 58 Associates either carpooled, biked, or walked to work.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/13/16</p>	<p>We have installed 3,900 solar panels on seven rooftops of various buildings throughout our New Jersey facility. This solar array covers 3.3 acres and is one of the largest solar arrays in the flooring industry. Nearly 1,000,000 kWh of clean energy is generated annually by this solar system, helping power our Salem site. The total kWh clean energy output of the two distinct solar systems since 2009 is well over 5 million kWh. The link below directs you to our Energy and Climate web page where you can observe the energy output for each of our 2 solar array systems.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/24/14</p>	<p>Mannington has developed, tested and has been recycling post-consumer VCT (commercial resilient tile) back into our VCT manufacturing operation since 2008. We currently incorporate post-consumer recycled VCT into several premium tile product categories, typically at a steady rate of 2%. We have recycled well over 20 million pounds since inception. This is helping to keep millions of pounds of post consumer tile out of landfills and given a second use. The Society of Plastics Engineers (SPE) is one of the largest professional technical organizations in the plastics industry and has recognized Mannington's environmental leadership and innovation for our VCT recycling efforts. At SPE's annual Global Plastics Recycling Conference in March 2010, Mannington received an Environmental Stewardship Award for this industry-first recycling effort.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>6/24/14</p>	<p>Mannington uses Life Cycle Assessment LCA to measure the life cycle environmental impact of existing manufacturing processes and new product design. We conducted our first LCA in 2003. We performed these LCAs in accordance with the requirements of ISO 14040. We are expanding our internal competencies regarding life cycle thinking, which is part of considering environmental improvement within product design. In addition, Mannington has been actively involved with the flooring industry's work to develop a North American Floorcovering Product Category Rule (PCR) to help assure more uniform LCAs. Our internal LCA work that has been used for publicly transparent EPD's (Environmental Product Declarations) are shown here: http://www.mannington.com/commercial/EPD.aspx</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/24/14</p>	<p>Truck transport efficiency is maximized by careful logistical analysis of product shipment routes and timing. The system employs web-based info and phone technologies. Actual impact not calculated. Rail delivery of raw materials was recently discontinued at Mannington due to rail delivery pricing. Mannington is open to future rail delivery of specific raw materials pending pricing changes as compared to truck delivery. http://www.mannington.com/global/products/environment/manufacturing/efficient.asp Roughly 3.3 % of sales force vehicles (5 of approximately 150 total) are hybrids. Mannington will contribute to EPA SmartWaySM Transport Partnership's goal to reduce 33 to 66 million metric tons of carbon dioxide and up to 200,000 tons of nitrogen oxide per year by 2012 by improving the environmental performance of our freight operations. Launched in February 2004, the SmartWay Transport Partnership aims to achieve fuel savings of up to 150 million barrels of fuel per year. The Partnership currently has over 2550 Partners. http://www.mannington.com/Corporate/Sustainability/Environment/Energy%20and%20Climate.aspx EPA Award - 2013 Mannington Mills was honored with a SmartWay® Excellence Award from the U.S. Environmental Protection Agency as an industry leader in freight supply chain environmental performance & energy efficiency. Mannington has been a SmartWay partner since 2010. Over the past few years, Mannington has shown a steady increase in use of SmartWay carriers and in 2013, nearly all carriers used by Mannington are in the SmartWay program. Click here to read more about Mannington's EPA award.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/24/14</p>	<p>Riparian/Shrub-scrub project May and November 2009 with Phase 3 completed in May 2010: Mannington partnered with the NJ Audubon Society, US Fish and Wildlife Service, and the Partnership for the Delaware Estuary to significantly improve a local, Riparian habitat by restoring 12 acres of low grade agricultural land to an improved riparian buffer. By planting this riparian buffer with native trees & shrubs, the area will be established as a shrub-scrub habitat with a life expectancy of over 30 years (eventually succeeding to forest). During the first 30+ years of establishment, the project will provide habitat for bird species of concern: blue-winged warbler, eastern kingbird, brown thrasher, prairie warbler, eastern towhee & field sparrow. Honeybee Project: To help improve the local honeybee population, Mannington Mills is now home to 5 new honeybee colonies. One of Mannington's Associates is an experienced beekeeper and helped establish 5 new hives to the Salem property which hopefully will grow upwards to 10 to 60 thousand bees and ultimately help local farmers within a 2-mile radius to more efficiently pollenate crops and help reestablish a declining honeybee population. Purple martin project: http://www.mannington.com/global/products/environment/neighborhood/purple-martins.asp</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/24/14</p>	<p>Mannington was one of three recipients of the 2010 Friends of Education award by the New Jersey Association for Supervision & Curriculum Development (NJASCD). This award recognizes individuals and corporations outside of education that have played a critical role in contributing toward leadership or quality in education by impacting upon the lives of the children in NJ schools. This acknowledgment is for Mannington's "Going Green - It's a Journey - Salem County Schools" project. Mention of the award is at the NJASCD site here: http://www.njascd.org/njascd/cwp/view.asp?A=3&Q=274844 For details of the Going Green - Salem County Program, go to this site: http://www.goinggreensalem.com/indexb.html Member of the Partnership for the Delaware Estuary's Corporate Environmental Stewardship Program http://www.delawareestuary.org/onthegroundactivities/cesp_members.asp which supports outreach to the public. During 2013, Mannington participated in a joint recycling effort with the Partnership for the Delaware Estuary and NJ Audubon Society. This group of volunteers collected recyclables during a Phillies Red Goes Green event.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/24/14</p>	<p>Public commitment to "Eight Values" http://www.mannington.com/Corporate/Sustainability/EnvironmentalPolicy/OurEightValues.aspx Environmental Policy http://www.mannington.com/Corporate/Sustainability/EnvironmentalPolicy.aspx</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/24/14</p>	<p>EMS fundamentals applied to entire site. ISO 14001 3rd party certifications have been obtained for both Commercial and Residential Manufacturing Operations at Salem. http://www.mannington.com/Corporate/Sustainability/Environment/CertificationandRecognition.aspx</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>6/24/14</p>	<p>Carpooling is encouraged by providing premium parking to carpool participants. Many of these premium spaces are used daily. However, the program is not tracked or measured for actual passenger-mileage reductions and policing of spaces is generally left to the honor system. Bicycle commuting directly to specific work areas within the site is allowed. Bike racks are provided. In June 2008, Mannington Mills began using "icarpool", a web-based car pool facilitation service which has been made available to Mannington's New Jersey Associates. This service is described at www.icarpool.com. In recognition of Earth Day 2010, Mannington hosted a trip reduction activity and during April 27th and 28th, we verified that 58 Associates either carpooled, biked, or walked to work.</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/24/14</p>	<p>We have installed 3,900 solar panels on seven rooftops of various buildings throughout our New Jersey facility. This solar array covers 3.3 acres and is one of the largest solar arrays in the flooring industry. Nearly 1,000,000 kWh of clean energy is generated annually by this solar system, helping power our Salem site. The total kWh clean energy output of the two distinct solar systems since 2009 is nearly 4,600,000 kWh. The link below directs you to our Energy and Climate web page where you can observe the energy output for each of our 2 solar array systems. http://www.mannington.com/Corporate/Sustainability/Environment/Energy%20and%20Climate.aspx</p>
<p>Carpet America Recovery Effort.</p>	<p>6/21/10</p>	<p>http://www.carpetrecovery.org/partnerships.php</p>
<p>WasteWise.</p>	<p>6/21/10</p>	<p>Mannington is an active, voluntary EPA Wastewise participant. Mannington report their waste and recycling data annually to the EPA and routinely participate in meetings and seminars. Click to learn more about the WasteWise Program: http://www.epa.gov/osw/partnerships/wastewise/about.htm</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/21/10</p>	<p>Mannington continues to implement a change from using VOC based inks to very low VOC inks. The site claims a 92% reduction.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/21/10</p>	<p>Mannington has developed, tested and has begun to recycle post-consumer VCT (commercial resilient tile) back into their VCT manufacturing operation. 25% post-consumer recycled content is being implemented in Mannington's resilient tile business. This is helping to keep millions of pounds of post consumer tile out of landfills and given a second use. The Society of Plastics Engineers (SPE) is one of the largest professional technical organizations in the plastics industry and has recognized Mannington's environmental leadership and innovation for our VCT recycling efforts. At SPE's annual Global Plastics Recycling Conference in March 2010, Mannington received an Environmental Stewardship Award for this industry-first recycling effort.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>6/21/10</p>	<p>Assessments done for Inlaid Sheet flooring and Carpet Modular Tile products. Participating in an industry-wide effort to systematize an LCA approach with a tool called Building for Environmental and Economic Sustainability (BEES) http://www.bfrl.nist.gov/oe/software/bees/bees.html Also participating in, and certified for a new ANSI flooring standard NSF 140 about the NSF 140 std: http://www.nsf.org/business/newsroom/pdf/nsf-sustainability.pdf third party certification under NSF 140 stds: http://www.scscertified.com/ecoproducts/sustainablecarpet.html</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/21/10</p>	<p>Truck transport efficiency is maximized by careful logistical analysis of product shipment routes and timing. System employs web-based info and phone technologies. Actual impact not calculated. Repair of old rail line allowed for efficient transport of heavy limestone raw material from Connecticut (site estimates 290,000 gallons of fuel saved per year). The switch to rail was made more than 5 years ago but is currently being expanded by increases in unloading capacity. http://www.mannington.com/global/products/environment/manufacturing/efficient.asp Roughly 3.3 % of sales force vehicles (5 of approximately 150 total) are hybrids.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/21/10</p>	<p>Significant lighting upgrades done reducing energy demand. Active member of USGBC & GBI.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/21/10</p>	<p>Riparian/Shrub-scrub project May and November 2009 with Phase 3 completed in May 2010: Mannington partnered with the NJ Audubon Society, US Fish and Wildlife Service, and the Partnership for the Delaware Estuary to significantly improve a local, Riparian habitat by restoring 12 acres of low grade agricultural land to an improved riparian buffer. By planting this riparian buffer with native trees & shrubs, the area will be established as a shrub-scrub habitat with a life expectancy of over 30 years (eventually succeeding to forest). During the first 30+ years of establishment, the project will provide habitat for bird species of concern: blue-winged warbler, eastern kingbird, brown thrasher, prairie warbler, eastern towhee & field sparrow. Honeybee Project: To help improve the local honeybee population, Mannington Mills is now home to 5 new honeybee colonies. One of Mannington's Associates is an experienced beekeeper and helped establish 5 new hives to the Salem property which hopefully will grow upwards to 10 to 60 thousand bees and ultimately help local farmers within a 2-mile radius to more efficiently pollenate crops and help reestablish a declining honeybee population. Purple martin project: http://www.mannington.com/global/products/environment/neighborhood/purple-martins.asp</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/21/10</p>	<p>Several products manufactured by Mannington Mills have recently been re-certified by NSF, a non-profit organization promoting products that are healthy and/or safe. This certification indicates compliance with: "NSF/ANSI 332 Sustainability Assessment Standard for Resilient Floor Coverings." The listing can be found at http://www.nsf.org/Certified/Sustain/Listings.asp?Company=4R450&Standard=332</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/21/10</p>	<p>Mannington was one of three recipients of the 2010 Friends of Education award by the New Jersey Association for Supervision & Curriculum Development (NJASCD). This award recognizes individuals and corporations outside of education that have played a critical role in contributing toward leadership or quality in education by impacting upon the lives of the children in NJ schools. This acknowledgment is for Mannington's "Going Green - It's a Journey - Salem County Schools" project. Mention of the award is at the NJASCD site here: http://www.njascd.org/njascd/cwp/view.asp?A=3&Q=274844 For details of the Going Green - Salem County Program, go to this site: http://www.goinggreensalem.com/indexb.html Member of the Partnership for the Delaware Estuary's Corporate Environmental Stewardship Program http://www.delawareestuary.org/onthegroundactivities/cesp_members.asp which supports outreach to the public.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/21/10</p>	<p>Public commitment to "Eight Values" http://www.mannington.com/Corporate/Sustainability/EnvironmentalPolicy/Our%20Eight%20Values.aspx Environmental Policy http://www.mannington.com/Corporate/Sustainability/EnvironmentalPolicy.aspx</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/21/10</p>	<p>EMS fundamentals applied to entire site. ISO 14001 3rd party certifications have been obtained for both Commercial and Residential Manufacturing Operations at Salem. http://www.mannington.com/Corporate/Sustainability/Environment/Certification%20and%20Recognition.aspx</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>6/21/10</p>	
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>6/21/10</p>	<p>Carpooling is encouraged by providing premium parking to carpool participants. Typically all ten premium spaces are being used daily. However, the program is not tracked or measured for actual passenger-mileage reductions and policing of spaces is generally left to the honor system. Bicycle commuting allowed directly to specific work areas with the site. Bike racks are provided. In June 2008, Mannington Mills began using "icarpool", a web-based car pool facilitation service which has been made available to Mannington's New Jersey Associates. This service is described at www.icarpool.com. In recognition of Earth Day 2010, Mannington hosted a trip reduction activity and during April 27th and 28th, we verified that 58 Associates either carpooled, biked, or walked to work.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/21/10</p>	<p>No written policy. There is a concerted effort to purchase recycled content and environmentally responsible products including Energy Star certified appliances and equipment. Number or percentage of products was not noted.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/21/10</p>	<p>Solar Energy System installed on site and operational on 12/29/2008. Roof mounted photovoltaic system (2,870 panels) with a capacity of 700 MWH converts the sun's energy directly into electricity. That electricity is routed through Mannington's power connections within the Mannington campus. Estimated Annual reduction of CO2 is 217 MT/Year. http://www.mannington.com/Corporate/Sustainability/Environment.aspx</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>6/21/10</p>	<p>Standard set of criteria applied to all vendors assessing their compliance, environmental liabilities and beyond-compliance approaches (environmental policy, EMS, Design for Environment, etc). Vendors audited at their sites. Results of this assessment are used in purchase decisions.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>6/21/10</p>	<p>Offering assistance to other businesses mostly in relation to LEED & green buildings but may provide some general information or assistance regarding EMS &/or other environmental program elements Contact Dave Kitts (856) 339-5871 Significant assistance offered to customers seeking to achieve green building certification.</p>
<p>Carpet America Recovery Effort.</p>	<p>8/14/07</p>	<p>http://www.carpetrecovery.org/sponsors.php</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/14/07</p>	<p>site claims a 92% reduction from 2000 to 2007</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/14/07</p>	<p>Active efforts to reduce waste from internal operations aiming for a commitment of being a net user of waste (waste in / wastout >1) http://www.mannington.com/global/products/environment/manufacturing/conservative.asp</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>8/14/07</p>	<p>Assessments done for Inlaid Sheet flooring and Carpet Modular Tile products. Participating in an industry-wide effort to systematize an LCA approach with a tool called Building for Environmental and Economic Sustainability (BEES) http://www.bfrl.nist.gov/oe/software/bees/bees.html Also participating in, and certified for a new ANSI flooring standard NSF 140 about the NSF 140 std: http://www.nsf.org/business/newsroom/pdf/nsf-sustainability.pdf third party certification under NSF 140 stds: http://www.scs-certified.com/ecoproducts/sustainablecarpet.html</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/14/07</p>	<p>Truck transport efficiency is maximized by careful logistical analysis of product shipment routes and timing. System employs web-based info and phone technologies. Actual impact not calculated. Repair of old rail line allowed for efficient transport of heavy limestone raw material from Connecticut (site estimates 290,000 gallons of fuel saved per year). The switch to rail was made more than 5 years ago but is currently being expanded by increases in unloading capacity. http://www.mannington.com/global/products/environment/manufacturing/efficient.asp Roughly 3.3 % of sales force vehicles (5 of approximately 150 total) are hybrids.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/14/07</p>	<p>Significant lighting upgrades done reducing energy demand. Active member of USGBC & GBI.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>8/14/07</p>	<p>pruple martin project http://www.mannington.com/global/products/environment/neighborhood/purple-martins.asp riparian buffer project including new 12 acre tract acquired in 2007 http://www.mannington.com/global/products/environment/neighborhood/riparian.asp</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>8/14/07</p>	<p>Member of the Partnership for the Delaware Estuary's Corporate Environmental Stewardship Program http://www.delawareestuary.org/onthegroundactivities/cesp_members.asp which supports outreach to the public. Also participates with Mannington Township School to train teachers and students on remediation and monitoring and to conduct tree planting: http://www.mannington.com/global/products/environment/neighborhood/home.asp</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/14/07</p>	<p>Public commitment to "Eight Values" http://www.mannington.com/global/products/environment/eight-values.asp and Good Neighbor Policies http://www.mannington.com/global/products/environment/good-neighbor.asp</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/14/07</p>	<p>EMS fundamentals applied to entire site. Roughly half of operations (commercial prod manufacturing side) is currently ISO 140001 certified. http://www.mannington.com/global/products/environment/manufacturing/iso.asp Currently pursuing ISO 14001 certification for residential product manufacturing operations</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>8/14/07</p>	<p>Carpet America Recovery Effort supporter</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>8/14/07</p>	<p>Carpooling is encouraged by providing premium parking to carpool participants. Typically all ten premium spaces are being used daily. However, the program is not tracked or measured for actual passenger-mileage reductions and policing of spaces is generally left to the honor system. Bicycle commuting allowed directly to specific work areas within the site. Bike racks are provided.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>8/14/07</p>	<p>No written policy. There is a concerted effort to purchase recycled content and environmentally responsible products including Energy Star certified appliances and equipment. Number or percentage of products was not noted.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>8/14/07</p>	<p>standard set of criteria applied to all vendors assessing their compliance, environmental liabilities and beyond-compliance approaches (environmental policy, EMS, Design for Environment, etc). Vendors audited at their sites. Results of this assessment are used in purchase decisions.</p>

<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>8/14/07</p>	<p>Offering assistance to other businesses mostly in relation to LEED & green buildings but may provide some general information or assistance regarding EMS &/or other environmental program elements Contact Dave Kitts (856) 339-5871 Significant assistance offered to customers seeking to achieve green building certification.</p>

37291 108 E LAKE RD,
PILESGROVE TWP, NJ 08098

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/6/14</p>	<p>Water collected from Tank #1 is used to wash/rinse out tanks and tankers prior to their next usage or removal from site.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/11/08</p>	<p>Water from Tank 1 is used to wash the inside of tankers.</p>

MONROEVILLE VINEYARD & WINERY

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/23/13	The farmer uses mechanical control for weeds, reducing the total amount of herbicides applied. This is an integrated pest management (IPM) practice.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/23/13	The farmer utilizes drip irrigation. This reduces the amount of water necessary to properly irrigate the crop.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/23/13	Mr. Martin stated he recycles empty pesticide containers through the Helena Chemical recycling program, reducing the total amount of waste generated by the farm.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/23/13	The business uses T5 high efficiency lighting.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/30/14	The farm uses integrated pest management (IPM) practices to reduce pesticide applications. The farmer monitors the greenbean fields for pests before any application takes place. To control weeds, the farmer cuts them mechanically. He also practices crop rotation. This not only control weeds, it also eliminates other pest infestations.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/30/14	He disposes of empty pesticide containers with Helena Chemical Company through the NJ Department of Agriculture's container recycling program, reducing waste.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/30/14	Mr. Olbrich uses high-efficiency, fluorescent lighting to conserve energy.

OLDMANS TWP BD OF ED

Site ID: OLDMANS TWP BD OF ED

20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	6/4/18	Geothermal heating & cooling.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	6/3/15	Entire building is heated and cooled geothermally. School has begun changing out all fourcescent bulbs to LEDs. They are 20% complete.

PALLET SERVICES INC

Site ID: PALLET SERVICES INC
 499985 66 PENNSGROVE PEDRICKTOWN RD,
 OLDMANS TWP, NJ 08067

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	2/24/14	There is no disposal of scrap wood or scrap pallets. All scrap wood is processed through the facility's small tubgrinder. Resulting wood chips are sent to Cape May County Conservation for further usage.

PARVIN FARMS

Site ID: PARVIN FARMS
 525647 712 ALVINE RD,

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/30/14	Soil conservation practices are used to avoid applied fertilizer. They have a machine to avoid soil disturbance, reducing erosion while increasing water holding and capacity nutrient holding. The business uses crop rotation to reduce infestation and uses cover crops to control weeds. They also use brush hog and sickle mower to manage weeds along road ways and water ways. This reduces the need for pesticide applications.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/30/14	In the irrigation system, the hard hoses were replaced by a pivot irrigation system. This increases efficiency and the water is applied with more precision.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/30/14	The farmer uses high efficiency lighting, including LEDs and fluorescents, to conserve energy. Grain dryers for the corn use high efficiency natural gas to save energy.

12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/28/17	The Board of Education building has installed solar panels to service the facility.

PRAXAIR INC

Site ID: PRAXAIR INC
 14617 554 SHELL RD, AKA RT 130
 CARNEYS POINT, NJ 08069

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/27/17	The company switched from a solvent-based parts cleaner/degreaser to a (green) environmentally friendly non-solvent cleaning agent: Armakleen MPC.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/27/17	The company recycled used oils. Safety Kleen picks up the used oils and transports them offsite for proper recycling. Metal Recycling is also conducted where waste scrap metal is taken to scrapyards for recycling.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/27/17	The company switched CFL lighting to LED lights throughout the plant and buildings/grounds using a gradual replacement process: as the old CFL bulbs burn out, they are replaced with new energy-efficient LED lights.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	7/27/17	The staff create and maintain a small landscaped flowerbed on the facility grounds for beautification..

PSE&G NUCLEAR CORP

Stewardship Activities	Date Acknowledged	Comments
WasteWise.	8/15/11	PSEG is a member of the USEPA Wastewise program since 1993. PSEG is also a WasteWise Hall of Fame Company, and is among the first companies accorded that honor in 2003. All recycling and waste prevention activities from the site are rolled up into a corporate report, which is provided to the USEPA annually. PSEG was one of the first utilities in the Wastewise program and has served to mentor and promote the Wastewise waste prevention and recycling message to other members of our industry. http://www.epa.gov/epawaste/partnerships/wastewise/pubs/utilfact.pdf PSEG is also a member of the National Partnership for Environmental Priorities (NPEP) focused on reducing the use of potentially hazardous chemicals from products and processes. http://www.epa.gov/osw/partnerships/npep/
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/15/11	PSEG has implemented numerous equipment upgrades over multiple years to improve the efficiency of its plants. Turbines, transformers and other equipment have been replaced with components that are more efficient. For example, in May 2008, Hope Creek implemented an Extended Power Upgrade which resulted in 120 additional megawatts of generation with the same basic reactor plant configuration. In addition, all three units on Artificial Island are generating at higher output levels [MWe] than originally anticipated during plant design and construction.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/15/11	In 2010, PSEG Information Technology rolled out multifunction network printers, capable of duplex printing and scanning paper document to electronic format for distribution to multiple users. To this end, PSEG Nuclear has almost completely decommissioned individual desktop printers, greatly reducing the demand for power consumption copy toner and cut sheet paper usage (30% post consumer content) company wide. PSEG Nuclear has established an aggressive waste performance indicator for reduction of the overall percentage of landfilled waste. As part of the achievement of this goal, PSEG Nuclear monitors its performance monthly and works with personnel to determine opportunities to reduce waste in routine and project-related activities. PSEG Nuclear has reduced its landfill waste disposed from 2010 levels and continues to evaluate new recycling opportunities.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/15/11	PSEG Nuclear uses battery powered vehicles in various Departments. On average, we have 25 vehicles which estimated to travel approximately two miles per day and therefore are driven up to 18,250 miles per year. Using an average of 15 miles per gallon for a diesel powered vehicle, these battery powered/electric vehicles save approximately 1,120 gallons of fuel per year, resulting in a CO2 savings of 11.80 tons.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/15/11</p>	<p>PSEG Nuclear has installed several energy reducing improvements and all have yielded positive environmental results. The Nuclear LLC Headquarters and Administration Building (NAB), the Security Center, the Nuclear Operations Support Facility (NOSF), the Material Center and the Processing Center have been retrofit with new energy efficient light fixtures with T8 fluorescent lamps. This lighting is 40% more efficient than the old T12 lamps. Motion sensors and timers are used to control the lighting. Daylight sensors are also used to turn lights off near windows when there is sufficient daylight. These changes resulted in a 50% reduction of electrical power. Also, new high efficiency rooftop HVAC units were installed at the Processing Center, the Security Building and the NOSF. The Processing Center was placed on a schedule that adjusts the heating and cooling systems based upon when the building is occupied. A 43% reduction in electrical power consumption can be directly attributed to the changes implemented by this energy efficient project. A Solar PV system was installed on the roof of the Processing Center and has provided a significant portion of this building's power needs. Finally, as noted above, the rooftop solar array and onsite wind turbine at the EERC has supplied nine percent of the building's power needs.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>8/15/11</p>	<p>PSEG Nuclear has created a Nuclear Green Team!. This voluntary team is in the formative stages and will focus on developing innovative ideas, communications, education and community outreach. In addition, the Nuclear Green Team! will work on developing methods to further evaluate stewardship improvements and provide visibility to the NJDEP Stewardship program.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>8/15/11</p>	<p>PSEG Nuclear has an ongoing internship for teachers providing educational opportunities regarding the EEP and its environmental benefits to the Delaware Estuary. PSEG works with environmental groups to support the overall maintenance of several restored sites along the Delaware Estuary. This includes The Nature Conservancy's NJ Chapter which conducts site inspections, and oversight of public access improvements and infrastructure such as boardwalks and coordinates educational programs regarding the estuary and the EEP with local organizations of all kinds. Lastly, PSEG repurposed an existing company facility to house the Energy & Environmental Resource Center (EERC), a LEED certified learning center focused on building a greater understanding of energy, environmental challenges, and strategies for balancing energy demand with environmental stewardship. In addition to 6,500 square feet of interactive exhibit space, the facility includes a multi-purpose room, classroom, and wet lab that are available for the community's use, free of charge. Since opening in January 2010, the facility has hosted more than 8,000 visitors for briefings, tours and functions</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/15/11</p>	<p>PSEG Environmental Policy http://www.pseg.com/info/environment/health.jsp</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/15/11</p>	<p>The site has completed planning for implementation of the Environmental Management Information System (EMIS). The system is a web based comprehensive system that integrates the management of compliance actions, regulatory reporting, and oversight of environmental programs.</p>

<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>8/15/11</p>	<p>A corporate-wide Sustainability Report is published annually which focuses on PSEG's strong commitment to social, economic and environmental initiatives as a component of corporate citizenship. This report is available on-line only through a website dedicated to PSEG's sustainability efforts, in support of our desire to minimize impact on material resources. http://www.pseg.com/info/environment/sustainability/2011/SustainabilityReport_2011/index.html#/24/</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>8/15/11</p>	<p>PSEG is a member of the USEPA Wastewise program since 1993. PSEG is also a WasteWise Hall of Fame Company, and is among the first companies accorded that honor in 2003. All recycling and waste prevention activities from the site are rolled up into a corporate report, which is provided to the USEPA annually. PSEG was one of the first utilities in the Wastewise program and has served to mentor and promote the Wastewise waste prevention and recycling message to other members of our industry. http://www.epa.gov/epawaste/partnerships/wastewise/pubs/utilfact.pdf PSEG is also a member of the National Partnership for Environmental Priorities (NPEP) focused on reducing the use of potentially hazardous chemicals from products and processes. http://www.epa.gov/osw/partnerships/npep/</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>8/15/11</p>	<p>Since 2008 PSEG Nuclear has implemented a 4 day work-week, from Memorial Day to Labor Day annually, which serves to reduce employee trips and thus saving fuel and improving air quality. Using a very conservative estimated 50 mile round trip for each of the total of 700 employees, the resultant savings is 35,000 miles and assuming an average of 22 miles per gallon the resultant savings is 1,590 gallons of gasoline, which equates to a CO2 equivalent reduction of 15.42 tons.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>8/15/11</p>	<p>The Energy & Environmental Resource Center (EERC) is a Gold-level LEED certified facility designed and built with water efficiency, CO2 emissions reduction, improved indoor environmental quality, and stewardship of resources. In designing and constructing the facility, PSEG installed high-efficiency lighting fixtures and occupancy sensors; selected furnishing made from recycled content material; chose cork flooring as an alternative to hard wood; and installed dual flush toilets and low flow faucets in the restrooms to reduce water usage. A 75 kW rooftop photovoltaic solar panel array and a 2.3 kW wind turbine provide nine percent of the building's power.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>8/15/11</p>	<p>PSEG Nuclear has installed a Solar PV System on the roof of the Processing Center and this has provided a significant portion of the Processing Center's power needs. Of the 200,531 kW hours used at the Processing Center during 2011 through the end of May, a total of 115,231 kW hours were generated by the Solar PV System. Based upon this data, for the first five months of 2011 as compared to the same period last year prior to the system installation, the Solar PV System generated 76% of power used at the Processing Center. Of the 492,600 kW hours used at the EERC during 2011 through the end of May, a total of 46,091 kW hours and 431 kW hours were generated by the rooftop Solar PV system and onsite wind turbine, respectively. Based upon this data, the solar panels and wind turbine generated 9.4 percent of the power used at the EERC</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>8/15/11</p>	<p>In action, PSEG Nuclear sets specific environmental requirements as part of the equipment design and procurement process. In these cases, PSEG Nuclear expects vendors to have in place the capability to meet business needs that meet environmentally sound business expectations. For example, combustion support equipment such as air compressors, generators and portable tanks (i.e. fuel tanks) are procured with secondary containment as part of the delivery of the product and put into purchase orders. Large tanks (i.e. FRAC tanks, Baker tanks) are procured with secondary containments. This is standard practice for this type of equipment and PSEG Nuclear is looking to expand this as a standard practice to ensure businesses in their supply chain subscribe to environmentally sound business practices.</p>

QUINTON NURSERY

Site ID: QUINTON NURSERY
191768 842 SALEM QUINTON RD,
QUINTON TWP, NJ 08079

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/13/14	The water used in the field is recycled to conserve water. The farmer is currently utilizing a tailwater management system which captures the runoff from rainfall and irrigates the nursery.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/13/14	The farmer recycles the pesticides empty containers. The pesticide containers are sent to state Sponsor recycling program. The plastics used in the greenhouses and the nursery containers are recycled. The farmer recycles cartridges from laser and ink jet printers, computers and laptops. Ms. Vansciver reuses the shopping bags in her business.

ROSS FOGG & SON OIL CO INC

Site ID: ROSS FOGG & SON OIL CO INC
1982 182 HANCOCKS BRIDGE RD,
LOWER ALLOWAYS CREEK, NJ 080790000

Stewardship Activities	Date Acknowledged	Comments
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/16/08	The facility has installed Fleetmatics GPS units on all of their delivery trucks and service vehicles. Fleetmatics has been known to decrease fuel consumption by as much as 10%. Vehicles can be dispatched effectively with better and direct routing, which will reduce emissions.

SALEM CITY

Site ID: SALEM CITY
163338 17 NEW MARKET ST,
SALEM, NJ 08079

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/6/12	Salem City installed 6 new, high efficiency motors (two 30 hp and four 15 hp) for the oxidation disks at the sewage treatment plant (operating 24/7).
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/6/12	Salem City replaced its old light fixtures with high efficiency/low wattage fixtures in City Hall, Streets Department Building, Wastewater Treatment Plant and the Public Library.

SALEM CNTY

Site ID: SALEM CNTY
 171246 94 MARKET ST, 2ND FLR
 SALEM, NJ 08079

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/23/13</p>	<p>All light iron materials picked up on roadways is segregated out and recycled as well as onsite waste materials/old hwy signage</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/23/13</p>	<p>Has replaced majority of existing lighting in Maintenance Bldg with more energy efficient T-12 thin fluorescent lightbulbs</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/23/13</p>	<p>Continues to conduct a 4-5 day Environmental Education booth at Salem Cty Fair.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/14/09</p>	<p>Provides a annual Environmental Educational Booth at the Salem County Fair, providing Environmental Educational Games for the children as well as literature and info</p>

SCHEESE FARM

Site ID: SCHEESE FARM
560774 369 COHANSEY FRIESBURG RD,
ELMER, NJ 08343

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/30/15	This business uses high efficiency pesticide application equipment, reducing the overall amount of pesticide used.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/30/15	Mr. Scheese conserves water by using natural irrigation over his 300 acres of vegetables. He uses rain water to irrigate the crops.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	7/30/15	Mr. Schesse uses electronic mailing for business matters, reducing total amount of paper used.

SIEGFRIED USA INC

Site ID: SIEGFRIED USA INC
14535 33 INDUSTRIAL PARK RD,
PENNSVILLE, NJ 08070

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/11/15	Recycling of non-contact cooling water.

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/11/15</p>	<p>Installed VFDs on blowers.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/11/15</p>	<p>Installed motion sensor light switches in low traffic areas of facility.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/11/15</p>	<p>http://www.siegfried.ch/about-siegfried/corporate-responsibility/safety-health-and-environment/</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/11/15</p>	<p>http://www.siegfried.ch/about-siegfried/corporate-responsibility/safety-health-and-environment/</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>12/11/15</p>	<p>http://www.siegfried.ch/about-siegfried/investor-relations-media/annual-reports/</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>12/11/15</p>	<p>Facility performs audits on suppliers.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/1/12</p>	<p>Recycling of non-contact cooling water</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/1/12</p>	<p>Installed Variable Frequency Drives on blowers</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/1/12</p>	<p>Installed motion sensor light switches in low traffic areas of facility.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/1/12</p>	<p>See PI NJD064344575, activity STW100001 for details.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/1/12</p>	<p>See PI NJD064344575, activity STW100001 for details.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/1/12</p>	<p>See PI NJD064344575, activity STW100001 for details.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>5/1/12</p>	<p>See PI NJD064344575, activity STW100001 for details.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/9/10</p>	<p>Recycling programs to reuse solvents xylene and acetic acid.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/9/10</p>	<p>Redirecting waste sludge to more local waste treatment facility. The facility initiated the local waste transfer program in May 2008</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>3/9/10</p>	<p>Siegfried has established a process development program to evaluate and select the "greenest" solvents at the onset of a new chemical process.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/9/10</p>	<p>Safety Health Environment and Security Document http://www.siegfried.ch/en/generics/compliance-drug-products/sicherheit-drug-products/</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/9/10</p>	<p>Synthetic Organic Chemical Manufacturers Association (SOCMA) Chemical Stewards Program. CHEM STEWARDS - Tier 2.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>3/9/10</p>	<p>The annual report which include environmental performance is posted on the following website: www.siegfried.ch/siegfried/publikationen-events/aktuelle-publikationen/</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/9/10</p>	<p>Facility performs audits on suppliers.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/8/08</p>	<p>Recycling programs to reuse solvents xylene and acetic acid.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/8/08</p>	<p>Redirecting waste sludge to more local waste treatment facility. The facility initiated the local waste transfer program in May 2008.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>4/8/08</p>	<p>Siegfried has established a process development program to evaluate and select the "greenest" solvents at the onset of a new chemical process.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/8/08</p>	<p>Safety Health Environment and Security Document # DPO-000024.02</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/8/08</p>	<p>Synthetic Organic Chemical Manufacturers Association (SOCMA) Chemical Stewards Program. CHEM STEWARDS - Tier 2.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>4/8/08</p>	<p>Questionnaire Corporate SHE Report for CY-2007, Siegfried USA. Submitted 2/2008. The annual report is posted on the following website: www.siegfried.ch/siegfried/publikationen-events/aktuelle-publikationen/</p>
<p>8) Vendor/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/8/08</p>	<p>Facility performs audits on suppliers.</p>

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/21/18</p>	<p>To reduce the use of pesticides, they control weeds mechanically and have stone driveways. They also participate in Rutgers IPM and have scouts help them determine when to spray. This facility recycles their pesticide containers with Helena Chemical. Additionally, their pesticide storage building is specially built with nonporous concrete, sealants, and a trap to contain spills.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/21/18</p>	<p>This establishment has significantly reduced water use by switching to center pivot irrigation. They are also using no-till practices on about 2000 acres of their farm.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/21/18</p>	<p>To reduce energy use, they are in the process of switching from propane to natural gas. They also have 5-star waste-oil heaters.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/21/18</p>	<p>The facility uses LED lighting.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/22/14</p>	<p>This establishment uses mechanical control of the weeds, as opposed to applying an herbicide as the primary method of weed control. The action of mechanical weed control cuts down on the use of herbicides, ultimately reducing the use of a hazardous chemical.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/22/14</p>	<p>This establishment has drip irrigation equipment installed to make crop irrigation practices more efficient.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/22/14</p>	<p>This establishment has implemented a worker carpool to reduce the amount of fuel necessary to get all workers to the farm every working day.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/22/14</p>	<p>This establishment has installed T5 fluorescent lighting bulbs as opposed to incandescent lighting.</p>

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/25/14	This establishment uses cultivation methods to kill and control weed growth on 500 acres of crops. The weeds are also hand pulled, reducing the amount of herbicides used.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	9/25/14	This establishment recycles empty pesticide containers with Helena Chemical Company and the County offices. These containers would otherwise be disposed of in landfills.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/5/16</p>	<p>In 2016 the township replaced an old air conditioner in the twp. building with a new high efficiency air conditioner. The township also uses high efficiency light bulbs for all municipal parking lots.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/5/16</p>	<p>The township environmental commission constructed a rain garden at a township park in 2016. Township Shade Tree Commission/ Organization conducts tree plantings along Township lake to prevent erosion.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/10/14</p>	<p>Woodstown Boro has changed all lighting with new energy efficient flourescent lighting and motion sensors for lighting shutdown</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/10/14</p>	<p>The Shade Tree Commission project to place plants along the Township's lake to prevent erosion has been completed.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/10/14</p>	<p>Shade Tree Commission plants along Township lake to prevent erosion and coordinates with Girls Scouts for cleanup/litter pickup along banks of Chestnut Run Stream</p>

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>2/10/14</p>	<p>No formal policy but Maintenance Dept purchases Eco-friendly cleaning products</p>

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/18/12	Facility was converted from dry cleaning with perchlorethylene to a 100% wet cleaning operation.

300 DAVIDSON AVENUE

Site ID: 300 DAVIDSON AVENUE
344307 300 DAVIDSON AVE,
SOMERSET, NJ 08873

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/27/08	The site produces an energy consumption report and has implemented changes on lighting in order to lower energy consumption.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	3/27/08	The site is attempting to become LEED certified. In order to accomplish this the site had replaced 90% of bulbs, implemented energy conservation practices and installed waterless urinals and low flow toilets.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	3/27/08	The site encourages trip reduction with available literature of public transportation schedules and car pooling availability.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/27/08	The site purchases renewable energy.

AGFA CORP

Site ID: AGFA CORP
15924 50 MEISTER AVE,
BRANCBURG TWP, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/10/17</p>	<p>The facility has reformulated its coating to reduce HAP emissions. The facility also eliminated nitric acid usage, increased usage of aqueous based coatings and continuously performs projects for beneficial reuse and waste reduction.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/10/17</p>	<p>AGFA implemented a water reduction effort in 2014 through the introduction of a cascade rinse system in the electrochemical graining process. Process rinse waters that were previously discarded to the sanitary sewer are recycled and reused as production rinses, resulting in a substantial reduction in the volume of purchased city water. AGFA estimates that a savings of approximately \$264,000 per year will be realized through the reduction of purchased water. Additionally, the facility discharges less process wastewater to the sewer.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/10/17</p>	<p>ISO certification 50001, Energy Management System was achieved by AGFA in May 2016 and included in the overall Business System Policy & Manual. AGFA establishes, documents, implements, and maintains a business management system and continually improves its effectiveness in accordance with the requirements of the ISO 9001 (quality), ISO 14001 (environmental), ISO 50001 (energy) and OHSAS 18001 (health & safety).</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/10/17</p>	<p>Yield improvement projects are in place to decrease scrap/trim loss during manufacturing. There are several projects related to this task. These projects are mainly line operating efficiencies and improvements in production.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>7/10/17</p>	<p>Corporate R&D conducts these assessments.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>7/10/17</p>	<p>In 2017, AGFA initiated a project to replace the Regenerative Thermal Oxidizer (RTO) with a new, more efficient environmental control device. This new unit will include the ability to capture and reuse heat in the manufacturing plant.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/10/17</p>	<p>AGFA has a written Environmental Policy dated July 2014. The policy is reviewed regularly; most recently updated in June 2016. The Policy is currently under revision to be updated to the new ISO 14001: 2015 standards. Updated certification is expected during next external auditing cycle.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/10/17</p>	<p>AGFA's Business Management System conforms with the International Quality Standard ANSI/ISO/ASQ 9001:2008, ANSI/ISO/ASQ E14001:2004 and BS OHSAS 18001:2007. AGFA's Business Management System is driven by means of management reviews to analyze performance and review, and establish objectives to determine if the facility is achieving continuous improvement. Management at all levels supports and is involved in the Business Management System. Senior management accepts the authority as well as the responsibility in achieving the objectives of the Business Management Policy and communicating objectives to all levels within the organization. Updated certification to new ISO 14001:2015 standards is expected during next external auditing cycle.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>7/10/17</p>	<p>The sustainability reports are internal documents sent to corporate in Morsel, Belgium. The documents are assessed and captured in AGFA Annual Reports on a corporate basis.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>7/10/17</p>	<p>AGFA uses an EH&S checklist for all capital expenses at the facility. This checklist requires that all purchases of capital goods and equipment are evaluated for environmental and energy impacts including the control of wastes generated, emissions to water, land and air and impact on energy use. The policy was updated in 2016.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>7/10/17</p>	<p>AGFA has initiated a project to develop an on-site combined heat and power (CHP) plant; an electricity generation system that captures the heat that would otherwise be wasted to provide useful thermal energy such as steam or hot water that can be used for space heating, cooling, domestic hot water and industrial processes. CHP systems offer considerable environmental benefits when compared with purchased electricity and thermal energy produced on site. By capturing and utilizing heat that would otherwise be wasted from the production of electricity, CHP systems require less fuel to produce the same amount of energy. Because less fuel is combusted, greenhouse gas emissions, such as carbon dioxide (CO2), as well as other air pollutants like nitrogen oxides (NOx) and sulfur dioxide (SO2), are reduced.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/11/14</p>	<p>Facility has reformulated it's coating to reduce HAP emissions. Eliminated nitric acid usage. Increased usage of aqueous based coatings. Continuous projects for beneficial reuse and waste reduction.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/11/14</p>	<p>Agfa implemented a water reduction effort in 2014 through the introduction of a cascade rinse system in the electrochemical graining process. Process rinse waters that were previously discarded to the sanitary sewer are "recycled" and reused as production rinses, resulting in a substantial reduction in the volume of purchased city water. Agfa estimates that approximately \$264,000 per year savings will be realized in through the reduction in purchased water. Additionally, the facility discharges less process wastewater to the sewer.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/11/14</p>	
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/11/14</p>	<p>Yield improvement projects in place to decrease scrap/trim loss from manufacturing. There are several projects around this task, mainly line operating efficiencies, improvements in production etc.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>7/11/14</p>	<p>Corporate R&D conducts these assessments; refer to environmental policy.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/11/14</p>	<p>Agfa has a written Environmental Policy dated July 2014</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/11/14</p>	<p>Agfa's Business Management System conforms with the International Quality Standard ANSI/ISO/ASQ 9001:2008, ANSI/ISO/ASQ E14001:2004 and BS OHSAS 18001:2007. AGFA's Business Management System is driven by means of Management Reviews, to analyze performance and review, establish objectives to determine if the facility is achieving continuous improvement. Management at all levels supports and is involved in the Business Management System. Senior management accepts the authority as well as the responsibility in achieving the objectives of Business Management Policy and communicating objectives to all levels within the organization.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>7/11/14</p>	

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>7/11/14</p>	
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/13/11</p>	<p>Facility has reformulated it's coating to reduce HAP emissions. Eliminated nitric acid usage. Increased usage of aqueous based coatings. Continuous projects for beneficial reuse and waste reduction.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/13/11</p>	<p>Facility has monthly meetings, project evaluations to reduce water usage. Currently working on projects to reuse water. Facility conducting speed increase project and our desmut project upgrade. For the desmut project they now measure, dose and calculate how much they have and adjust the bath accordingly. For our speed increase project, we were able to speed up the line, and cascade the rinse water so that it is reused. In 2008, they were using about 21 liters water /m2 of aluminum and in 2009 they were using about 17 liters water/m2 or a savings of 19%. Now they are using about 5 liters water/m2 of aluminum.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/13/11</p>	<p>Yes. 2009 average electric/gas usage 3.51 kwh/m2. 2010 average electric/gas usage 3.09 kwh/m2. 2011 average electric/gas usage 3 kwh/m2. Lighting replacement with LEDs, turning off equipment, thermal oxidizers, etc when not in use. Making process improvements. In process of installing dry chiller; savings of 640,000 kwh/yr.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/13/11</p>	<p>Yield improvement projects in place to decrease scrap/trim loss from manufacturing. There are several projects around this task, mainly line operating efficiencies, improvements in production etc.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>9/13/11</p>	<p>Corporate R&D conducts these assessments; refer to environmental policy.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/13/11</p>	<p>AGFA Environmental Policy http://www.agfa.com/global/en/main/about_us/our_company/environment/environmental_policy/index.jsp</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/13/11</p>	<p>The company web site indicates that as a Responsible Care member they do operate a management system that sets, reviews and continues to develop targets for improvement in the areas of product stewardship, environmental protection, plant safety, hazard prevention, occupational safety and health. Stated in error during last stewardship review that ISO 14001 certified. In the process of being certified.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>9/13/11</p>	<p>AGFA Corp 2010 Sustainability Report http://www.agfa.com/global/en/binaries/Agfa_SustainRep_update2010_DEF_0209_tcm582-90456.pdf</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>9/13/11</p>	<p>In contracts, required to meet regulatory requirements.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>7/9/09</p>	<p>Facility has reformulated it's coating to reduce HAP emissions. Eliminated nitric acid usage. Increased usage of aqueous based coatings.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/9/09</p>	<p>Facility has monthly meetings, project evaluations to reduce water usage. Currently working on projects to reuse water. Currently have a goal of 10% water reduction. Facility conducting speed increase project and our desmut project upgrade. For the desmut project we now measure, dose and calculate how much we have and adjust the bath accordingly. For our speed increase project, we were able to speed up the line, and cascade the rinse water so that it is reused. In 2008, we were using about 21 liters water /m2 of aluminum, now we are using about 17 liters water/m2 or a savings of 19%. Based on our current projected production for 2010, this will amount to a savings of 17,500,000 gallons of water saved in 2010.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/9/09</p>	<p>Facility now turns off equipment and gas when not in use for manufacturing. Lighting has been changed to LED lights in packaging areas.</p>

<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	7/9/09	Corporate R&D conducts these assessments; refer to environmental policy.
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	7/9/09	http://www.agfa.com/en/co/about_us/our_company/environment/environmental_policy/index.jsp
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	7/9/09	AGFA is ISO 14001 certified.
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	7/9/09	http://www.agfa.com/en/co/about_us/our_company/environment/environmental_reports/index.jsp
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	7/9/09	In contracts, required to meet regulatory requirements.

AIR LIQUIDE ADVANCED MATERIALS

Site ID: AIR LIQUIDE ADVANCED MATERIALS
1805 197 MEISTER AVE,
BRANCHBURG TWP, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	7/19/17	The facility has a written Environmental Policy dated 5/17/17 which recognizes that outstanding safety, security, environmental and health performance for employees, visitors, contractors, customers and the public is a critical component of business excellence. The goal of Zero accidents, illness, environmental incidents, notices of violation, and significant security incidents is a strategic company objective.

AMERICAN SPRAYTECH CORP

Site ID: AMERICAN SPRAYTECH CORP
214457 205 MEISTER AVE,
NORTH BRANCH, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/13/10	American SprayTech has been re-lamping and instituting other energy efficiency programs under the NJ Clean Energy Program - NJ SmartStart Buildings.

AMWELL MALL CLEANERS @ AMWELL MALL

Site ID: AMWELL MALL CLEANERS @ AMWELL MALL
1611 450 AMWELL RD, STE 12
BELLE MEAD, NJ 08853

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/16/08	The Co. has removed old perchloroethylene dry cleaning machine and has installed and now operates a wet cleaning machine which uses soap and water.

ASHLAND INC ANALYTICAL DEPT

Site ID: ASHLAND INC ANALYTICAL DEPT
501859 1005 RT 202/206 , BLDG N
BRIDGEWATER, NJ 08807

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	12/3/13	See attached link to the Env. Policy posted online. http://www.ashland.com/commitments/responsible-care
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	12/3/13	Ashland has implemented the Responsible Care Management System at all of its operating facilities in the United States. Responsible Care Management System certification is provided through the American Chemistry Council.

BEDMINSTER TWP MUNICIPAL BUILDING

Site ID: BEDMINSTER TWP MUNICIPAL BUILDING
46566 130 HILLSIDE AVE,
BEDMINSTER, NJ 07921

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/11/08	rainwater is collected from the DPW building roof drains, the water is collected in an underground storage tank, this water is used for vehicle washing via pressure hose

BERNARDS TWP MUNICIPAL COMPLEX

Site ID: BERNARDS TWP MUNICIPAL COMPLEX
46918 1 COLLYER LN,
BASKING RIDGE, NJ 07920

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/25/09</p>	<p>The municipality has eliminated the use of all pesticides and only utilizes organic fertilizer.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/25/09</p>	<p>Installation of water barrels on township property as well as the installation of motion sensors for sinks, urinals and toilets.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/25/09</p>	<p>The Township has 4 hybrid vehicles within the fleet.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/25/09</p>	<p>All incandescent lights have been switched to Compact Florescent. Exit signs have been switched to LED. Some sensor lighting installed. Solotubes/Skylights installed within the DPW maintenance buildings.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/25/09</p>	<p>Naturalization of Township property. The Township has transformed grass and concrete traffic islands and other Township owned areas into landscape gardens with wild flowers and native plantings. In addition, the Township has been designated a Tree City by the Arbor Day Foundation.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/25/09</p>	<p>Environmental Education including the distribution of Eco Bags and Compact Florescent (energy star) lights to community members during Charter Day event.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/25/09</p>	<p>Set forth in the Introduction of the Township of Bernard's Sustainable Planning Document (August 2007).</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>11/25/09</p>	<p>The Township offers a 4 day work week program.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>11/25/09</p>	<p>Members of the Rutgers Green Purchasing Cooperative.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>11/25/09</p>	<p>A 2006 baseline Greenhouse Gas Analysis was conducted as part of the Township's Sustainable Energy Master Plan (May 2008). Includes direct and indirect Carbon Dioxide and Nitrous Oxide emissions for all facilities owned and operated by the Township.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/14/09</p>	<p>The municipality has eliminated the use of all pesticides and only utilizes organic fertilizer.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/14/09</p>	<p>The Township has 4 hybrid vehicles within the fleet.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/14/09</p>	<p>All incandescent lights have been switched to Compact Florescent. Exit signs have been switched to LED. Some sensor lighting installed. Solotubes/Skylights installed within the DPW maintenance buildings.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>5/14/09</p>	<p>The Township has transformed grass and concrete traffic islands and other Township owned areas into landscape gardens with wild flowers and native plantings. In addition, the Township has been designated a Tree City by the Arbor Day Foundation.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/14/09</p>	<p>Environmental Education including the distribution of Eco Bags and Compact Florescent (energy star) lights to community members during Charter Day event.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/14/09</p>	<p>Set forth in the Introduction of the Township of Bernard's Sustainable Planning Document (August 2007).</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/14/09</p>	<p>The Township offers a 4 day work week program.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/14/09</p>	<p>Members of the Rutgers Green Purchasing Cooperative.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>5/14/09</p>	<p>A 2006 baseline Greenhouse Gas Analysis was conducted as part of the Township's Sustainable Energy Master Plan (May 2008). Includes direct and indirect Carbon Dioxide and Nitrous Oxide emissions for all facilities owned and operated by the Township.</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/4/08</p>	<p>The Township has 2 hybrid vehicles in the fleet and have 2 more on order. All vehicles purchased are scrutinized to ensure that they are as fuel efficient as possible for their intended use.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/4/08</p>	<p>All incandescent lights have been switched to Compact Fluorescent . Exit signs have been switched to LED.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/4/08</p>	<p>The Township has transformed grass and concrete traffic islands and other Township owned areas into landscape gardens with wild flowers and native plantings. In addition, the Township has been designated a Tree City by the Arbor Day Foundation. http://www.bernards.org/Default1.aspx?Item=Shade%20Tree%20Commission</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/4/08</p>	<p>Environmental Education including the distribution of Eco Bags and Compact Florescent (energy star) lights to community members during Charter Day event.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/4/08</p>	<p>Set forth in the Introduction of the Township of Bernard's Sustainable Planning Document (August 2007).</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>6/4/08</p>	<p>The Township offers a 4 day work week program.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/4/08</p>	<p>Member of the Rutgers Green Purchasing Cooperative</p>

<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>6/4/08</p>	<p>A 2006 baseline Greenhouse Gas Analysis was conducted as part of the Township's Sustainable Energy Master Plan (May 2008). BERNARDS TWP SEWER AUTH HARRISON BROOK STP

Site ID: **BERNARDS TWP SEWER AUTH HARRISON BROOK STP**
37385 **726 MARTINSVILLE RD,**
LIBERTY CORNER, NJ 07938

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/21/12</p>	<p>Only Green cleaning products are utilized.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/21/12</p>	<p>Rain water harvesting and low flow water fixtures are employed.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/21/12</p>	<p>Energy efficient Variable Frequency Drive pumps have been installed for the oxidation ditches, Return sludge pumps and raw sewage pumps. The facility also uses less electricity by alternating the aeration pumps in the lagoons without a loss in treatment.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/21/12</p>	<p>Administration Building Green Building components Include: Solar, Low VOC paints & construction materials, low flow water fixtures, energy efficient lighting and rain water harvesting.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/21/12</p>	<p>Regular plant tours conducted to educate community and school groups about wastewater treatment, solar and green building.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>6/21/12</p>	<p>The Administration building for the Sewage Treatment Plant is LEED certified http://www.kimmerle.com/pdf/green%20bldg%20-%20BTSA.pdf</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/21/12</p>	<p>The facility has installed a 1.05 megawatt ground and roof mounted solar photovoltaic system.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>6/21/12</p>	<p>Real time carbon footprint analysis calculated via a Noveda system (electricity use only).</p>

BERNARDSVILLE BORO STP

Site ID: BERNARDSVILLE BORO STP
 1851 166 MINE BROOK RD,
 BERNARDSVILLE, NJ 07924

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/15/11	Bernardsville Borough passed a Green Building Policy in 2010 that promotes green building at the municipal, residential and commercial level. In an effort to educate Bernardsville Residents and provide information to facilitate the incorporation of Green Building Elements into residential projects, The Borough of Bernardsville has developed a menu of best practices and reference to technical guides to assist all residents and contractors in Green Remodeling guidelines. The Borough has conducted an energy audit on 98% of their buildings and has made related energy efficiency upgrades in the area of HVAC and lighting.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	9/15/11	Bernardsville Borough has a Tree Protection Ordinance, a Shade Tree Commission, a Community Forestry Management Plan and a Community Garden
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/15/11	The Bernardsville Borough Council passed an anti-idling resolution (No. 10-33) on February 8, 2010 that contains provisions beyond those required by state law.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	9/15/11	The Bernardsville Borough Green Team has sponsored or participated in four education events during 2010 to provide community outreach and education in the following areas: energy conservation, natural resource management, the high school green team, anti-idling, local food production and storm water management.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	9/15/11	Bernardsville Borough offers a four day work week during the summer months.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	6/6/08	The Borough has implemented a four day work week program during summer months.

BRADDOCK HEAT TREATING CO INC

Site ID: BRADDOCK HEAT TREATING CO INC
 1760 123 CHIMNEY ROCK RD,
 BRIDGEWATER TWP, NJ 08807

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/19/11	Braddock has an onsite recycling system to reclaim the spent quench oil generated from the heat treatment process. The recycling system uses paper filters to remove the solids from the spent quench oil. The reclaimed quench oil is then re-used in the process. Zicchelli stated that 90% of the quench oil is recovered. This has reduced the amount of new quench oil needed.

BRANCHBURG TWP

Site ID: BRANCHBURG TWP
 58498 1077 RT 202,
 BRANCHBURG TWP, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/2/15	Waterless urinals and water efficient fixtures employed in DPW Annex building.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/2/15	The Township has four plug-in hybrid vehicles in the fleet.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/2/15</p>	<p>Green Building components of DPW Annex Building include: Insulated the exterior walls and roofs to achieve higher R-values than required, resulting in a Building envelope nearly 10% better than required by code. High-performance glazing was used throughout, to help minimize heating and cooling costs. Ductwork is concentrated, helping minimize the total amount of ductwork and the energy required to deliver conditioned air. The majority of the plumbing was concentrated in one area of the building, helping minimize the amount of piping and the energy required for the hot water. Waterless urinals were provided, to reduce water usage. Occupancy sensors are provided in various rooms, to help assure that the lights are off when the rooms are unoccupied, saving energy.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/2/15</p>	<p>Township has a Tree Ordinance requiring tree preservation and replanting and the Township has planted ~ 150 trees in 2014. The Township has abandoned mowing at three fields in the Township allowing them to return to natural areas.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/2/15</p>	<p>The Township conducts regular inspections and requires maintenance on all stormwater basins/systems in the Township. The Township is only required to conduct this activity for stormwater basins/systems that were approved after the implementation of the 2004 stormwater regulations.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/2/15</p>	<p>The Township installed a solar array that will supply roughly 280 kilowatts of electricity, which is about 85% of the electricity needed for the Township municipal building. A smaller solar array has also been installed on the Township Annex building.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/26/12</p>	<p>Waterless urinals and water efficient fixtures employed in DPW Annex building.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/26/12</p>	<p>Green Building components of DPW Annex Building include: Insulated the exterior walls and roofs to achieve higher R-values than required, resulting in a building envelope nearly 10% better than required by code. High-performance glazing was used throughout, to help minimize heating and cooling costs. Ductwork is concentrated, helping minimize the total amount of ductwork and the energy required to deliver conditioned air. The majority of the plumbing was concentrated in one area of the building, helping minimize the amount of piping and the energy required for the hot water. Waterless urinals were provided, to reduce water usage. Occupancy sensors are provided in various rooms, to help assure that the lights are off when the rooms are unoccupied, saving energy.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>6/26/12</p>	<p>Township has a Tree Ordinance requiring tree preservation and replanting. The Township has abandoned mowing at three fields in the Township allowing them to return to natural areas more suitable for wildlife.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/26/12</p>	<p>The Township conducts regular inspections and requires maintenance on all stormwater basins/systems in the Township. The Township is only required to conduct this activity for stormwater basins/systems that were approved after the implementation of the 2004 Stormwater regulations.</p>

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/15/15</p>	<p>The facility has started using ECO crates (reusable bins) that result in less usage of cardboard boxes and packaging materials. Reusable Masonite floor protection is also utilized during moves instead of cardboard boxes.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/15/15</p>	<p>New Modular system developed and used by the facility allows for more efficient packing resulting in less trips/vehicle miles travelled. The facility also utilizes a system to automatically control highway truck speeds and they have increased their fleet of "straight trucks" which avg. ~ 7 mpg above their tractor trailer fleet.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>7/15/15</p>	<p>The facility supports a Flexible work program that includes working from home opportunities. There is also an informal employee run carpool program. Facility promotes teleconferencing/webinars in an effort to reduce business travel.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>7/15/15</p>	<p>The facility completed a lighting upgrade in 2013 going from T12 to T8 in the office area and the warehouse. Motion sensors were also added in the warehouse. The lighting upgrade resulted in a ~15 -20% efficiency improvement.</p>

CARGO XPRESS INC

Site ID: CARGO XPRESS INC

GREEN BROOK TWP, NJ 088120145

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	12/14/11	Cargo has installed Energy-Efficient Lighting system in the office and loading dock areas.

CHOICE CABINETRY CORP

Site ID: CHOICE CABINETRY CORP
1509 61 5TH ST,
SOMERVILLE, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/20/14	Starting within the last year, the Company is now buying pre-finished wood products. So by doing this, the machines at the facility do not have to operate as much as they used to because certain steps in the production of the cabinets at the facility have been removed because of the ordering of the pre-finished wood products. This has cut down tremendously on the amount of time the woodworking machines at the facility operate which is saving on the total electricity used at the site.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/20/14	Starting 4 months ago, the Company has started to change out all their T-12 Lighting Fixtures with T-5 more energy efficient and brighter lighting fixtures. Company is continuing on doing this and to date has changed out roughly 30 % of the lighting fixtures at the facility.

CIP II/AR BRIDGEWATER HOLDINGS

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/13/12	See entry dated 3/19/10
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/13/12	See entry dated 1/25/08
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/13/12	See entry dated 1/25/08
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	8/13/12	See entry dated 3/19/10
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	8/13/12	See entry dated 1/25/08
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	8/13/12	See entry dated 1/25/08

<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>8/13/12</p>	<p>See entry dated 1/25/08</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>8/13/12</p>	<p>See entry dated 3/19/10</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>8/13/12</p>	<p>See entry dated 1/25/08</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>8/13/12</p>	<p>See entry dated 1/25/08</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/19/10</p>	<p>The following is in addition to entry dated 3/20/09: Reviewed the entire site irrigation systems and schedules for sprinklered landscape areas and reduced the sprinklered areas near building Jr2 by over 99,000 square feet (2.3 acres) which is equivalent to a sprinklered lawn area reduction of approximately 33%.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/19/10</p>	<p>See entry dated 3/20/09</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/19/10</p>	<p>See entry dated 3/20/09</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/19/10</p>	<p>The following is In addition to entry dated 3/20/09: The facility received on 10/27/09 "River Friendly Business Certification" from the Watershed Programs, New Jersey Water Supply Authority, for outstanding efforts to protect water resources in the Raritan River basin. The facility ensures that its landscape contractor takes adequate number of soil samples throught the property on a routine basis to ensure that all fertilizer applications are performed in accordance with the soil test results. The facility has increased the "no-mow" zone lawn areas on site by approximately 450,000 square feet (16.5% of its sites lawn area). Installed a 33,000 square feet wildflower area near the front entrance of the site. Created a vegetated buffer along Peter's brook in Area A (by area marked as 46,979 sq.ft, approx. 1.1 acres) and designated this area as a no-mow zone and have stopped all fertilization. Created a vegetated buffer along Peter's brook in Area B (by area marked as 67,338 sq.ft, approx. 1.5 acres) and designated this area as a no-mow zone and have stopped all fertilization. Created a vegetated buffer along Peter's brook in Area C (1by area marked as 50,920 sq.ft, approx. 3.5 acres) and designated this area as a no-mow zone and have stopped fertilization. More than 60 trees were also planted in this area. All areas along Peter's Brook have been designated as no-mow zones and have also stopped all fertilization.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/19/10</p>	<p>The adopt a highway program has been eliminated by the State and therefore Sanofi-Aventis was unable to continue its participation in the program. Sanofi-Aventis participates in Spring "Days of Caring". Across the country in 2009, 1,342 Sanofi-Aventis U.S. employee volunteers contributed 7,314 hours to 123 charitable projects. The volunteers cooked, painted and landscaped; helped run summer camps; picked up hammers and saws; fed the hungry; and provided opportunities for children that they otherwise might not have had. Sanofi- Aventis do volunteer work at various locations throughout New Jersey. Below is a list of some of the places that the Bridgewater facility assisted: 1. Anderson House 2. Midland School 3. Land Conservancy of New Jersey at Lord Stirling Environmental Center 4. Land Conservancy of New Jersey, Upper Raritan River Water Shed Association 5. Duke Farms Environmental Center.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/19/10</p>	<p>See entry dated 3/20/09</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/19/10</p>	<p>See entry dated 3/20/09</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/19/10</p>	<p>See entry dated 3/20/09</p>

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/19/10</p>	<p>1. In 2009 Sanofi-Aventis started using 30% recycled paper for all printers and copiers. 2. Below is a list of the environmental friendly products that Sanofi-Aventis have started using over the last two to three years. 3M 1L glass cleaner 3M 3H Neutral cleaner Georgia Pacific EPA Roll Hand Towels GoJo Green Certified Foam Hand Cleaner (wall & counter mount)</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/19/10</p>	<p>See entry dated 3/20/09</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/19/10</p>	<p>See entry dated 3/20/09</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/20/09</p>	<p>In the first quarter of 2008 the facility implemented a program to substantially reduce or reuse water. This project is the steam driven chiller surface condenser atmospheric relief valve water project. This project reduces the water consumption by 1/2 million gallons per year.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/20/09</p>	<p>See entry dated 1/25/2008</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/20/09</p>	<p>See entry dated 1/25/2008</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/20/09</p>	<p>In 2008 the facility planted several hundred plants and trees on site and decreased its mowed lawn areas to promote a more natural look. Improvements to the environment include improvement of water quality and promotion of wildlife habitat. The project will continue to be improved upon and remains ongoing. The project size is as follows: Approximately 10 acres of manicured lawns returned to the natural state. Approximately 10 less acres of fertilized lawns. Approximately 5 acres of newly planted areas.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/20/09</p>	<p>See entry dated 1/25/2008</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/20/09</p>	<p>See entry dated 1/25/2008</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/20/09</p>	<p>See entry dated 1/25/2008</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/20/09</p>	<p>See entry dated 1/25/2008</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/20/09</p>	<p>See entry dated 1/25/2008</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/20/09</p>	<p>See entry dated 1/25/2008</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/20/09</p>	<p>See entry dated 1/25/2008</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/25/08</p>	<p>Utilize cleaner energy sources. Site operation with cogeneration reduces CO2 by about 13.2 %.</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/25/08</p>	<p>i.e. Bought 200 hybrid vehicles</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/25/08</p>	<p>Adopt highway clean-up. Cleaned park</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/25/08</p>	<p>Sanofi-aventis uses a combination of policies, procedures and initiatives to address issues identified as being very important for the Pharmaceutical sector. Policies pertain to: Influence and impact on suppliers. Impact on the air quality and atmosphere Use of medicine End of a product life cycle Ethics in Research Labor conditions Influencing lawmakers, prescribers and consumers.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/25/08</p>	<p>Sanofi-aventis adopts procedures that make it possible to disseminate and oversee the application of policies by using various management systems.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>1/25/08</p>	<p>i.e. Do video conferences to reduce travel</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/25/08</p>	<p>In 2006, more than 200 Sanofi-aventis purchasing employees received training on how to incorporate sustainable development principles into the purchasing function. A supplier evaluation interview program was initiated in 2006. Trained employees meet with suppliers and discuss their corporate social responsibility practices. Audits are conducted that assess suppliers social and environmental practices. Depending on the results, an improvement plan may be developed and discussed with the supplier.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>1/25/08</p>	<p>The primary impacts on air quality and atmosphere in connection with business include: Carbon dioxide emissions VOCs emissions in connection with the use of solvents Ozone-depleting emissions and NOx and SOx from boilers. CO2 direct emissions are calculated (fuel emission factors). Indirect emissions on (specific emissions from other energy sources purchased off-premises). Other greenhouse gas emissions are not significant compared to that of CO2. Emissions from sales fleet vehicles used by medical representatives were estimated based on fuel consumption.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>1/25/08</p>	<p>Adopted an action plan to ensure that its suppliers comply with social, ethical and environmental standards.</p>

CORDIS CORP

Site ID: CORDIS CORP
 40514 7 POWDER HORN DR,
 WARREN TWP, NJ 07059

Stewardship Activities	Date Acknowledged	Comments
Performance Track.	4/8/08	Cordis Warren is a member of the USEPA Performance Track program.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/8/08	Almost all water use at the site is associated with sanitary needs. Water conservation includes the use of ultra low flow, automatic fixtures in rest rooms.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/8/08	The sales fleet for Cordis is offered fuel-efficient cars such as the Toyota Prius. Currently, the sales fleet is not included in any energy consumption metrics monitored by the Cordis Corporation, though there are activities at the J&J corporate parent level to account for fleet energy efficiency.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/8/08	Cordis installed a 65kW (AC) solar panel grid on the roof of 7 Powder Horn Drive. Other opportunities that have been pursued include complete lighting upgrades, office misers, use of Chem-free boiler water treatment, and retro-commissioning studies.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	4/8/08	The company-wide policy specifically states that Cordis Corporation strives for "sustainability" and that EHS shall be "managed...similarly to... quality, productivity and financials."
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	4/8/08	The site has been operating with ISO 14001 certification since 2002.

23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	4/8/08	
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	4/8/08	Chemicals used by researchers cannot be purchased unless approved by EH professionals; evaluation includes aspects like GHG equivalents and impacts on waste generation. Corporate purchasers provide FSI-certified office paper.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	4/8/08	The site installed its own 65kW solar panel system in 2002. It also purchases Renewable Energy Credits. For example, in 2007, it purchases 1300 MT from a company called 3 Degrees.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	4/8/08	Greenhouse Gas Emissions are calculated using WRI methodology based on quantity of fuel and electricity consumed, and purchase of RECs.

DUKE FARMS FOUNDATION

Site ID: DUKE FARMS FOUNDATION
49113 1112 DUKES PKWY W,
HILLSBOROUGH, NJ 08844

Stewardship Activities	Date Acknowledged	Comments
WaterSense.	5/20/15	http://www.epa.gov/watersense/meet_our_partners.html
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/20/15	Pesticide use has been reduced on site; pesticides are used only as a last resort. For example, DF uses Diatomaceous earth for tick control. DF uses only green cleaning products on site and low or non VOC paints.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/20/15	Orientation Center has waterless urinals, low flow toilets and rain water harvesting. Seven composting/waterless toilets have been installed throughout the site.

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/20/15</p>	<p>Energy efficient lighting is used throughout the facility. Energy Star appliances/products are used where applicable. DF utilizes a computer program to track preventive maintenance on all equipment to maintain operational efficiency. DF also utilizes solar powered aerators in the on-site ponds.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/20/15</p>	<p>A portion of the wood from fallen trees is used for on-site building materials and wood chips are utilized at the on-site community garden. Flatware, glasses and food waste are collected for composting. Compost is utilized at the on-site community garden. Salvaged wood from old barns were re-used for on-site projects.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>5/20/15</p>	<p>DF has developed a policy to conduct Life Cycle Assessments (LCA) on certain products used on site. The initial item that Duke Farms has conducted a Life Cycle Assessment on is plastic cutlery/utensils used in the cafeteria. The LCA included an evaluation of raw materials, extraction, production, distribution and disposal. As a result of the LCA, DF has elected to use a specific biodegradable cutlery that is composted on site.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/20/15</p>	<p>DF offers a Ride Bike Share program for visitors: http://dukefarms.org/bikeshare DF Has a fleet of electric vehicles/golf carts and bikes for staff for on campus transportation. DF has a fleet of hybrid vehicles for off site transportation. Preferred parking offered for carpool and fuel efficient/hybrid vehicles at the orientation center.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/20/15</p>	<p>Rain water harvesting, green roof, day lighting, solar power, geothermal, bioswales, fly ash concrete and limited impervious cover are some of the components of the green building implementation.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>5/20/15</p>	<p>520 acres along the Raritan River preserved for wetland conservation and flood control. Large sections of land converted from lawns to native meadows. There is an ongoing program to remove invasive species from property: http://dukefarms.org/Documents/Images/Stewardship/Research/Final_Invasive_Plan_August_2008.pdf</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>5/20/15</p>	<p>DF negotiated with Somerset County Recycling Center to expand the plastics accepted for recycling. As a result of these negotiations, Somerset County Recycling Center began accepting a greater variety of plastics from all county residents and businesses. DF has incorporated floating plant islands into their ponds that naturally reduce Total Phosphorous.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/20/15</p>	<p>Self Guided lesson plans on sustainability/nature offered. Professional Development offered for teachers on sustainability/nature. Duke Farms installed a webcam on a tree adjacent to the nest to provide a live look at the daily lives of the eagles. In partnership with The Conserve Wildlife Foundation of New Jersey, lesson plans were created to facilitate place based educational opportunities for students. See the eagle here: http://www.dukefarms.org/en/Stewardship/WildlifeCams/eagle-cam/ More Lesson Plans Here: http://dukefarms.org/en/Programs/educators/Classroom-Resources/ A Solar Dashboard has also been published on the Website: http://live.deckmonitoring.com/?id=duke_farms_foundation</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/20/15</p>	<p>http://dukefarms.org/Documents/Images/Stewardship/DF%20Environmental%20Policy%202014.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/20/15</p>	<p>The facility has established a comprehensive EMS as of 2015</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/20/15</p>	<p>2014 Environmental Report: http://dukefarms.org/Documents/Images/Stewardship/Annual%20Environmental%20Report%202014.pdf</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>5/20/15</p>	<p>Water Sense</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/20/15</p>	<p>A portion of the staff participate in a work from home program and there is an active employee carpool program. The facility is also a Platinum member of Ride Wise of Raritan Valley: http://www.ridewise.org/display.php?sc=es&adid=381</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/20/15</p>	<p>Env. Purchasing Policy requires DF and their contractors to purchase: cleaning products, paint, paper, cups, utensils, plates and more that meet established green standards.</p>

<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>5/20/15</p>	<p>The Orchid Range and Visitors Center building have received LEED Platinum Certification.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/20/15</p>	<p>A 640 kw solar array on site provides most of the electricity for operations. There is also a Geothermal system for the orientation building.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>5/20/15</p>	<p>In 2014, operations at DF produced 549 metric tons of carbon emissions. DF calculated the greenhouse gas emissions using EPA's Greenhouse Gas Equivalent Calculator available here: http://www.epa.gov/cleanenergy/energy-resources/calculator.html The solar array, geothermal wells and electric vehicles offset 1,523.73 metric tons of carbon emissions in 2014.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>5/20/15</p>	<p>Contracts require vendors to adherence to DF Env. Standards prior to conducting any work at the facility.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>5/20/15</p>	<p>DF operates a Farm incubator program - mentoring new farmers in organic and sustainable agriculture. DF has mentored local businesses in the Somerset Business Partnership program on various sustainable technologies.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/6/14</p>	<p>Pesticide use has been reduced on site; pesticides are used only as a last resort. Only green cleaning products are used on site and low or now VOC paints.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/6/14</p>	<p>Orientation Center has waterless urinals, low flow toilets and rain water harvesting</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/6/14</p>	<p>Energy efficient lighting is used throughout the facility. Energy Star appliances/products used where applicable. DF utilizes a computer program to track preventive maintenance on all equipment to maintain operational efficiency.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/6/14</p>	<p>A portion of the wood from fallen trees is used for on site building materials. Compostable flatware and glasses used in cafeteria. Salvaged wood from old barns that were on the property is re-used for on-site projects. Food waste is collected for composting.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>3/6/14</p>	<p>DF has developed a policy to conduct Life Cycle Assessments (LCA) on certain products used on site. The initial item that Duke Farms has conducted a Life Cycle Assessment on is plastic cutlery used in the cafeteria. The LCA includes an evaluation of raw materials, extraction, production, distribution and disposal. As a result of the LCA, DF has elected to use a specific plant based cutlery.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/6/14</p>	<p>DF offers a Free Ride Bike Share program for visitors http://www.dukefarms.org/en/Visit/Plan-Your-Visit/Free-Ride-Bikeshare/ DF Has a fleet of electric vehicles and golf carts for staff for on campus transportation. DF has a fleet of hybrid vehicles for off site transportation. Preferred parking offered for fuel efficient/hybrid vehicles at the orientation center.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/6/14</p>	<p>Rain water harvesting, green roof, day lighting, solar power, geothermal, fly ash concrete and limited impervious cover are some of the components of the green building implementation.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/6/14</p>	<p>520 acres along the Raritan River preserved for wetland conservation and flood control. Large sections of land converted from lawns to wildflowers. Invasive species removed from property.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>3/6/14</p>	<p>DF negotiated with Somerset County Recycling Center to expand the plastics accepted for recycling. As a result of these negotiations, Somerset County Recycling Center began accepting a greater variety of plastics from all county residents and businesses. DF operates an all organic community garden. As a requirement for participation in the program, members must donate a portion of the organic produce to local soup kitchens or food pantries.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/6/14</p>	<p>Self Guided lesson plans on sustainability/nature offered. Professional Development offered for teachers on sustainability/nature. In 2008, Duke Farms installed a webcam on a tree adjacent to the nest to provide a live look at the daily lives of the eagles. In partnership with The Conserve Wildlife Foundation of New Jersey, lesson plans were created to facilitate place based educational opportunities for students. See the eagle here: http://www.dukefarms.org/en/Stewardship/WildlifeCams/eagle-cam/</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/6/14</p>	<p>The Env. Policy is located here: http://www.dukefarms.org/Documents/Images/Stewardship/DF%20Environmental%20Policy%202014.pdf</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>3/6/14</p>	<p>The Annual Report is Located here: http://www.dukefarms.org/Documents/Images/Stewardship/Annual%20Environmental%20Report%202014.pdf</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/6/14</p>	<p>A portion of the staff participate in a work from home program.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/6/14</p>	<p>Env. Purchasing Policy requires DF and their contractors to purchase: cleaning products, paint, paper, cups, utensils. plates and more that meet established green standards.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>3/6/14</p>	<p>The Orchid Range and Visitors Center building have received LEED Platinum Certification.</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/6/14</p>	<p>A 640 MW solar array on site provides most of the electricity for operations. There is a Geothermal system for the orientation building.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/6/14</p>	<p>In 2013, operations at DF produced 628.7 metric tons of carbon emissions. DF calculated the greenhouse gas emissions using EPA's Greenhouse Gas Equivalent Calculator available here: http://www.epa.gov/cleanenergy/energy-resources/calculator.html</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/6/14</p>	<p>Contracts require vendors to adherence to DF Env. Standards prior to conducting any work at the facility.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>3/6/14</p>	<p>DF operates a Farm incubator program - mentoring new farmers experimenting with organic crops. DF hosts the Rutgers Environmental Stewardship Program. DF partners with academic and conservation groups on studies relating to the following: invasive species, Blue Bird nest monitoring, grass land restoration and the American Chestnut.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/9/13</p>	<p>Pesticide use has been reduced on site; pesticides are used only as a last resort. Only green cleaning products are used on site and low or now VOC paints.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/9/13</p>	<p>Orientation Center has waterless urinals, low flow toilets and rain water harvesting</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/9/13</p>	<p>Energy efficient lighting is used throughout the facility. Energy Star appliances/products used where applicable. DF utilizes a computer program to track preventive maintenance on all equipment to maintain operational efficiency.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/9/13</p>	<p>A portion of the wood from fallen trees is used on site. Compostable flatware and glasses used in cafeteria. Salvaged wood from old barns that were on the property is re-used for on-site projects. Food waste is collected for composting.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/9/13</p>	<p>DF offers a Free Ride Bike Share program for visitors http://www.dukefarms.org/en/Visit/Plan-Your-Visit/Free-Ride-Bikeshare/ DF Has a fleet of electric vehicles and golf carts for staff for on campus transportation. DF has a fleet of hybrid vehicles for off site transportation. Preferred parking offered for fuel efficient/hybrid vehicles at the orientation center.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/9/13</p>	<p>Rain water harvesting, green roof, day lighting, solar power, geothermal, fly ash concrete and limited impervious cover are some of the components of the green building implementation.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>4/9/13</p>	<p>520 acres along the Raritan River preserved for wetland conservation and flood control. Large sections of land converted from lawns to wildflowers. Invasive species removed from property.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>4/9/13</p>	<p>DF negotiated with Somerset County Recycling Center to expand the plastics accepted for recycling. As a result of these negotiations, Somerset County Recycling Center began accepting a greater variety of plastics from all county residents and businesses. DF operates an all organic community garden. As a requirement for participation in the program, members must donate a portion of the organic produce to local soup kitchens or food pantries.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/9/13</p>	<p>Self Guided lesson plans on sustainability/nature offered. Professional Development offered for teachers on sustainability/nature. In 2008, Duke Farms installed a webcam on a tree adjacent to the nest to provide a live look at the daily lives of the eagles. In partnership with The Conserve Wildlife Foundation of New Jersey, lesson plans were created to facilitate place based educational opportunities for students. See the eagle here: http://www.dukefarms.org/en/Stewardship/WildlifeCams/eagle-cam/</p>

<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>4/9/13</p>	<p>A portion of the staff participate in a work from home program.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/9/13</p>	<p>Env. Purchasing Policy requires DF and their contractors to purchase: cleaning products, paint, paper, cups, utensils. plates and more that meet established green standards.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>4/9/13</p>	<p>Orientation Center is built to LEED Platinum standard (certification pending) Orchid Conservatory is built to LEED Gold standard (certification pending)</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/9/13</p>	<p>A 640 MW solar array on site provides most of the electricity for operations. There is a Geothermal system for the orientation building.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/9/13</p>	<p>Contracts require vendors to adherence to DF Env. Purchasing Policy and Env. Standards.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>4/9/13</p>	<p>DF operates a Farm incubator program - mentoring new farmers experimenting with organic crops. DF hosts the Rutgers Environmental Stewardship Program. DF partners with academic and conservation groups on studies relating to the following: invasive species, Blue Bird nest monitoring, grass land restoration and the American Chestnut.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/6/09</p>	<p>There are several landscapes/habitat types currently being regenerated at Duke Farms. Link: http://www.dukefarms.org/page.asp?pageld=559</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/6/09</p>	<p>On February 2, 2007 Duke Farms received "Alliance For New Jersey Environmental Education - Outstanding Environmental Educator Award". Duke Farms in cooperation with Rutgers New Jersey Agricultural Experiment Station offers a program to equip New Jersey residents throughout the state with training and experience that enables them to find solutions to environmental problems in their own community. Links: http://www.anjee.net/awards/07.html http://envirostewards.rutgers.edu/AND2005</p>

ETHICON INC EHS&S

Site ID: ETHICON INC EHS&S
 14467 RT 22 W,
 BRIDGEWATER, NJ 088760151

Stewardship Activities	Date Acknowledged	Comments
Climate Leaders.	7/11/13	JnJ/Ethicon is part of the EPA Climate Leaders Program http://www.epa.gov/climateleadership/supplychain/company.html#andj http://www.epa.gov/climateleadership/documents/partnerlist.pdf
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	7/11/13	<p>1) Facility has an approved Integrated Pest Management Plan for the site, utilizing pesticides as a last resort. 2) Facility utilizes only environmentally friendly cleaning products. 3) Facility uses only low VOC paints.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	7/11/13	<p>1) The facility has ten waterless urinals in place. 2) Facility has a rain garden that allows stormwater to infiltrate on site. 3) The vacuum furnace system was modified to recycle 100% of the Non-Contact Cooling Water.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	7/11/13	<p>Facility conducted a energy efficient steam trap upgrade of ~ 200 steam traps that will reduce energy loss in the system. Project will result in a \$150,000 energy savings.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	7/11/13	<p>Facility implements a take back program for writing utensils and foil coffee packages.</p>

<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>7/11/13</p>	<p>Ethicon has conducted lifecycle assessments via the Earthwords process for three products. Information on the Earthwords process can be found here: http://www.jnj.com/responsibility/environment/product-stewardship/earthwords</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>7/11/13</p>	<p>The facility has two electric vehicles used by onsite maintenance staff.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/11/13</p>	<p>Roof Mounted solar array; ongoing LED lighting upgrade; Low VOC Paints used throughout; Waterless urinals; stormwater rain garden.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>7/11/13</p>	<p>The facility has received a River Friendly Certification from the New Jersey Water Supply Authority and has completed env. enhancements required for Certification. http://www.raritanbasin.org/Projects/riverfriendly/business.html Ethicon recently built and installed ten nest boxes in an open meadow on the campus. http://www.raritanbasin.org/News/Raritan%20Headwaters%20Association%20and%20Ethicon%20Create%20Bluebird%20Trail.pdf</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>7/11/13</p>	<p>1) The facility sponsored a Rain Barrel Workshop for employees. 2) Facility maintains a population of honey bees on site and serves the honey in the cafeteria. 3) Vegetables and herbs are grown in an onsite garden and used in the cafeteria.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/11/13</p>	<p>1) Participated in the Bridgewater Eco Blitz (May 2013) highlight green initiatives at Ethicon. http://www.bridgewaternj.gov/applications/assets/Eco-Blast%20Flyer2013.pdf 2) In October 2012, Ethicon Employees volunteered at Fairview Farm to mark six miles of trails http://www.urwa.org/join/volunteer.html 3) Ethicon works with the NJ Water Supply Authority to share experiences and promote the "River Friendly" program to interested parties.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/11/13</p>	<p>Env. Policy can be found here: http://www.jnj.com/sites/default/files/pdf/EHS%2BPolicy%2BUpdate%2B082312.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/11/13</p>	<p>Ethicon operates under an Env., Health and Safety Management System and is ISO 14000 certified. ERM CVS Cert # 078</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>7/11/13</p>	<p>Ethicon Env. data is incorporated into the JnJ Corporate Env. Report found here (See page 32): http://www.jnj.com/sites/default/files/pdf/2012-JNJ-Citizenship-Sustainability-ANNUAL-REPORT-June2013-FINAL062413.pdf</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>7/11/13</p>	
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>7/11/13</p>	<p>Ethicon offers Flex time and Work from home programs. Ethicon received the 2012 NJ Smart Workplace silver award (for sustainable commuting practices): http://www.ridewise.org/display.php?sc=es&adid=381</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>7/11/13</p>	<p>Purchases are governed by Env. Purchasing Policies. An example of a Forestry Related Products Purchasing Policy was submitted as an example.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>7/11/13</p>	<p>The facility has a 350kw solar roof top array.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>7/11/13</p>	<p>Ethicon accounts for Green House Gases and data is incorporated into the JnJ Corporate Env. Report found here (See page 28): http://www.jnj.com/sites/default/files/pdf/2012-JNJ-Citizenship-Sustainability-ANNUAL-REPORT-June2013-FINAL062413.pdf JnJ Corporate's Healthy Future 2015 goal is to achieve a 20 percent absolute reduction of facility carbon dioxide emissions by 2020 from a baseline of 2010 without voluntary offsets or renewable energy credits. In 2012, a 2.1 percent reduction in CO2 emissions, from 1,201 metric tons in 2011 to 1,176 metric tons in 2012, while realizing a 3.4 percent increase in sales. https://www.cdproject.net/en-US/Results/Pages/Company-Responses.aspx?company=9829</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>7/11/13</p>	<p>Facility conducts audits at vendors to ensure compliance with Ethicon/JnJ Env. Standards. Responsibility Standards for Suppliers can be found here: http://www.jnj.com/sites/default/files/pdf/JJ%2BSupplier%2BResponsibility%2BStandards.pdf</p>
<p>Climate Leaders.</p>	<p>7/8/08</p>	
<p>Performance Track.</p>	<p>7/8/08</p>	
<p>SmartWay Transport Partnership.</p>	<p>7/8/08</p>	
<p>Green Power Partnership.</p>	<p>7/8/08</p>	
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/8/08</p>	<p>All Johnson & Johnson facilities are required to develop a water conservation plan and perform an assesemnt to identify ways to reduce water use. Process changes or improvements, and controlling cooling in energy efficient ways (reuse of cooling water) has reduced water use at facilities. 2008 Sustainability Report link provided below - see page 20 for Water Use Reduction activities http://www.jnj.com/wps/wcm/connect/ad9170804f55661a9ec3be1bb31559c7/2008+Sustainability+Report.pdf?MOD=AJPERES</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>7/8/08</p>	<p>Johnson & Johnson companies review new products, processes and packaging for environmental impacts using an internal Design for Environment tool. Evaluating a product's lifecycle enables developers to identify and reduce environmental impacts introduced by raw materials selection, product use and product disposal.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>7/8/08</p>	<p>Environmental Enhancement Projects include: Ethicon employees in coordination with the Upper Raritan Watershed Assoc.planted 100 native shrubs in a nature preserve.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/8/08</p>	<p>Ethicon has had several Community Outreach programs. On 10/11/07, Ethicon held a Household Hazardous Waste day for employees at the site. Ethicon also donates subscriptions of an environmental awareness newsletter to elementary schools in the Bridgewater School District.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/8/08</p>	<p>Ethicon's Environmental Policy is posted throughout the facility.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/8/08</p>	<p>Ethicon is a registered ISO 14001 facility.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>7/8/08</p>	<p>Ethicon is part of Johnson & Johnson. J&J publishes an annual sustainability report. See pages 18 to 25 of the 2008 Sustainability Report to view the Environmental Performance section of the report. http://www.jnj.com/wps/wcm/connect/ad9170804f55661a9ec3be1bb31559c7/2008+Sustainability+Report.pdf?MOD=AJPERES</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>7/8/08</p>	<p>Participation in Climate Leaders, Green Power Partnership, Performance Track and SmartWay Transport Partnership</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>7/8/08</p>	<p>Ethicon has a corporate Environmental Purchasing Policy.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>7/8/08</p>	<p>Ethicon has installed solar panels on the roof of its main building.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>7/8/08</p>	<p>Johnson & Johnson (Ethicon is part of J&J) utilizes guidance established by EPA's Climate Leaders program and the World Resource Institute's Greenhouse Gas Protocol to calculate greenhouse gas emissions.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>7/8/08</p>	<p>Ethicon is part of the Somerset County Business Alliance and has use the forum to mentor other businesses in the area.</p>

FIDDLERS ELBOW COUNTRY CLUB

Site ID: FIDDLERS ELBOW COUNTRY CLUB
 37551 811 RATTLESNAKE BRIDGE RD, AKA RT 523 SPUR
 BEDMINSTER, NJ 079210000

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/13/17	The facility upgraded the electrical system and associated lighting. Ballroom lights were upgraded to either compact fluorescent or LED. A new irrigation pump station with variable frequency drives (VFDs) has been installed. VFDs controls the motor to reduce energy use and the motors are of premium efficiency, operating at 94%.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	3/13/17	In an effort to preserve the natural habitat, they identified areas unused and allowed the existing ground covers to grow. These areas provide cover for animals and birds as well as filtering ground water runoff. The facility obtained the required Land Use permit and conducted habitat creation/enhancement activities along the Lamington River which bisects the property. Activities included deepening the channel and narrowing the width of the channel at various points. This will help keep the water temperature cooler in the summer months and enhance fish habitat. Additional riffles were constructed to provide areas for insects and other macroinvertebrates to live, spawn, and hatch.

FISHER SCIENTIFIC CO INC

Site ID: FISHER SCIENTIFIC CO INC
 24318 755 RT 202,
 BRIDGEWATER TWP, NJ 088760000

20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	1/19/16	Solar panels installed and in use on National Distribution Center warehouse roof. In 2015 additional solar panels installed on lawn outside security office and Bridgewater Packaging Facility area startup expected during the 2nd quarter 2016.

18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/5/11	The Township has converted all traffic lights to LED
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	1/5/11	Environmental Enhancement Projects completed on township open space include trail construction, bat box construction, barn swallow nesting structure and a butterfly garden.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	1/5/11	The township has contracted with the New Jersey Audubon society to provide interpretive walks to educate the citizens about the wildlife habitate areas maintained by the township. Also, the township has worked with the Boy Scouts of America and as a result, over 20 Eagle Scout projects have been completed on township open space areas.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/10/08	The Township has converted all traffic lights to LED
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	6/10/08	Franklin Township has been designated as a Tree City by the National Arbor Day Association http://www.franklintwpnj.org/tree_city_0408.html

3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	9/23/08	http://solutions.3m.com/3MContentRetrievalAPI/BlobServlet?locale=en_US&univid=1180581671127&fallback=true&assetType=MM_Image&blobAttribute=ImageFile&placeId=7BC6E48B1800BAE180A88E492700005E&version=current
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	9/23/08	http://solutions.3m.com/wps/portal/3M/en_US/global/sustainability/?WT.mc_id=www.3m.com/about3m/sustainability
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	9/23/08	under GHG Management Standard see details at: http://solutions.3m.com/wps/portal/3M/en_US/global/sustainability/?WT.mc_id=www.3m.com/about3m/sustainability

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/25/18	Waste Min Plan that describes all of the efforts to reduce hazardous chemicals and waste.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/25/18</p>	
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/25/18</p>	<p>The site is governed by their environmental policy and SOPs particularly for sharps and safety in the environment.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/25/18</p>	<p>GSK has an environmental system (EHS) that tracks their waste outputs. The data is entered by GSK and TEI (Triumvant Environmental) hauler that is onsite 3x a week preparing waste for transportation and disposal monthly and tracking the quantity of hazardous waste, non-hazardous waste and landfill wastes being disposed.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>9/25/18</p>	<p>An annual report is printed for the monitoring of hazardous material and waste flow.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>9/25/18</p>	<p>All chemicals used on the premises from the labs to the maintenance of the building (i.e. cleaning products) are environmentally safe.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>9/25/18</p>	<p>The building in Warren, NJ is currently a LEED Gold building.</p>

<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>9/25/18</p>	<p>Waste Min Plan for the reduction on carbon foot print (25%)</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>9/25/18</p>	<p>They require that the vendors in their supply chain have environmentally sound products.</p>

GREEN BROOK TWP

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/11/13	New Jersey American Water has installed a system in the clarifier for surface area spray that reuses process water in place of the potable water that was previously used.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/11/13	New Jersey American Water has installed Variable Frequency Drives on all equipment suitable for this type of reduction and implemented the process control recently patented known as NPX which is Nitrogen and Phosphorus removal through finite control of dissolved oxygen in the process tanks. This process controls the blower speed based on a preset level for DO; this relieves the plant blowers from running at higher speeds during the overnight hours when flows are low and oxygen demand is down. This also reduces the amount of carbon addition required and Total Phosphorus production.

10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	9/23/08	Provide recycling options for CFL's and rechargeable batteries.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	9/23/08	
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	9/23/08	Home Depot has a "Wood Purchasing Policy" where wood in their stores (lumber to broom handles) is from forests that are responsibly managed and not from endangered regions.
9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.	9/23/08	Routinely benchmark with other retailers regarding their hazardous waste and white goods recycling program.

II VI OPTOELECTRONIC DEVICES INC

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/26/13</p>	<p>Anadigics has been able to minimize on the following two hazardous waste streams on-site: 1) IPA (isopropyl alcohol) has been reduced by 50% by using more water in their solution. Approximately, (10) 55-gallon of IPA is being sent to Anchor Chemicals in Rhode Island for reuse at their facility instead of (20) 55-gallon drums that used to go out in the past. 2) NMP (n-methyl-2-pyrrolidone) was eliminated from their hazardous waste generation by 100%. This material goes out of the facility as a non-hazardous waste material. Mr. Ehasz reported that the (D001) flammability characteristic in the material (acetone) was re-piped and re-directed to an above ground storage tank (AST) containing acetone instead of the NMP collection tank. The NMP material was then retested and found to be a non-hazardous material.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/26/13</p>	<p>Optimized idle water flow from grinders/polishers and optimized makeup water for scrubbers which resulted in a reduction ~ 15,000 gallons of water per day. Project completed.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/26/13</p>	<p>HVAC upgraded to Variable Frequency Drive system for Fabrication area resulting in an 8% overall decrease in total electricity usage for the facility. New 2012 Project: Reduction of electric consumption of return air unit by 20% resulting in overall reduction of 1%.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>11/26/13</p>	<p>Anadigics participates in a waste exchange as follows: After Isopropyl alcohol, NMP (n-methyl-2-pyrrolidone) and acetone are utilized by Anadigics, they are sold to another company that uses them as raw materials.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/26/13</p>	<p>The facility has established a no-mow area (~.3 acres) adjacent to the building creating a natural meadow.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/26/13</p>	<p>Anadigics conducted an on site educational outreach session with students from Raritan Valley Community College (April 2013) highlighting wastewater treatment technology and general Env., Health and Safety responsibilities.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/26/13</p>	<p>Located here: http://www.anadigics.com/company/quality_environment/environmental_policy</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>11/26/13</p>	<p>The facility is an ISO 14001 company and was able to provide an environmental management system manual that includes the following topics: * Environmental aspects * Legal and other requirements * Environmental objectives and targets * Environmental management programs * Organizational structure and responsibility * Training, awareness and competence * Environmental communication * Document Control * Operational Control * Emergency preparedness and response * Monitoring and measurements * Nonconformance and Corrective and Preventive Action * Records * Environmental Management System Audits * Management Review According to the manual, it is designed to cover significant environmental aspects which ANADIGICS can directly manage and control. Those items that the company can not control or manage, the manual will help employees have an influence to quality environmental control. ISO14001 Certificate http://www.anadigics.com/company/quality_environment/iso_14001_certificate</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>11/26/13</p>	<p>200 production employees work 3 and 4 day compressed work weeks.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>11/26/13</p>	<p>Env. Health and Safety Dept. reviews/signs off on significant company expenditures to ensure that they are consistent with company environmental standards.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>11/26/13</p>	<p>The analysis employed the calculation spreadsheet developed by the Greenhouse Gas Protocol (GHG Protocol) electronic Excel spreadsheet calculation tool, which has been developed by a partnership between the World Resources Institute and the World Business Council for Sustainable Development, and by following ISO-14000 standards. These calculations take into account all emissions, both indirect & direct emissions from the facility. Anadigics Inc. has three (3) general categories of data inputs that were used to make the Carbon Footprint Analysis: High Quality - which includes the consumption of electricity & natural gas Intermediate - refrigerant release; consumption of fleet fuels; commuting vehicle miles traveled; and consumption of wafer production gases Low Quality - company business miles traveled.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>11/26/13</p>	<p>Anadigics requires all contractors to sign-off on their environmental policy. All materials suppliers are required to comply with Anadigics environmental standards. Anadigics conducts Environmental Health & Safety audits of selected suppliers.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>1/27/12</p>	<p>Anadigics has been able to minimize on the following two hazardous waste streams on-site: 1) IPA (isopropyl alcohol) has been reduced by 50% by using more water in their solution. Approximately, (10) 55-gallon of IPA is being sent to Anchor Chemicals in Rhode Island for reuse at their facility instead of (20) 55-gallon drums that used to go out in the past. 2) NMP (n-methyl-2-pyrrolidone) was eliminated from their hazardous waste generation by 100%. This material goes out of the facility as a non-hazardous waste material. Mr. Ehasz reported that the (D001) flammability characteristic in the material (acetone) was re-piped and re-directed to an above ground storage tank (AST) containing acetone instead of the NMP collection tank. The NMP material was then retested and found to be a non-hazardous material.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/27/12</p>	<p>Optimized idle water flow from grinders/polishers and optimized makeup water for scrubbers which resulted in a reduction ~ 15,000 gallons of water per day. Project completed.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/27/12</p>	<p>HVAC upgraded to Variable Frequency Drive system for Fabrication area resulting in an 8% overall decrease in total electricity usage for the facility. New 2012 Project: Reduction of electric consumption of return air unit by 20% resulting in overall reduction of 1%.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/27/12</p>	<p>After Isopropyl alcohol and acetone are utilized by Anadigics, they are sold to another company that uses them as a raw materials.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/27/12</p>	<p>The facility is currently following an environmental policy that governs their work and efforts to maintain the environment safe and clean. The policy covers all environmental activities on-site at the facility and includes a commitment to continual improvement and prevention of pollution and quality control.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/27/12</p>	<p>The facility is an ISO 14001 company and was able to provide an environmental management system manual that includes the following topics: * Environmental aspects * Legal and other requirements * Environmental objectives and targets * Environmental management programs * Organizational structure and responsibility * Training, awareness and competence * Environmental communication * Document Control * Operational Control * Emergency preparedness and response * Monitoring and measurements * Nonconformance and Corrective and Preventive Action * Records * Environmental Management System Audits * Management Review According to the manual, it is designed to cover significant environmental aspects which ANADIGICS can directly manage and control. Those items that the company can not control or manage, the manual will help employees have an influence to quality environmental control.</p>

<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>1/27/12</p>	<p>200 production employees are on a 3 day (week 1) 4 day (week 2) compressed work week.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>1/27/12</p>	<p>All purchases go through an environmental review process to meet company environmental standards.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>1/27/12</p>	<p>The analysis employed the calculation spreadsheet developed by the Greenhouse Gas Protocol (GHG Protocol) electronic Excel spreadsheet calculation tool, which has been developed by a partnership between the World Resources Institute and the World Business Council for Sustainable Development, and by following ISO-14000 standards. These calculations take into account all emissions, both indirect & direct emissions from the facility. Anadigics Inc. has three (3) general categories of data inputs that were used to make the Carbon Footprint Analysis: High Quality - which includes the consumption of electricity & natural gas Intermediate - refrigerant release; consumption of fleet fuels; commuting vehicle miles traveled; and consumption of wafer production gases Low Quality - company business miles traveled.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>1/27/12</p>	<p>Anadigics requires all contractors to sign-off on their environmental policy. All materials suppliers are required to comply with Anadigics environmental standards. Anadigics conducts Environmental Health & Safety audits of selected suppliers.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/9/10</p>	<p>Chloroform use was eliminated due to a process change and phosphorous based wafer etch/polish was replaced with phosphate free compound. Isopropyl alcohol was replaced with Di-Ionized water for 50% of the processes.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/9/10</p>	<p>Optimized idle water flow from grinders/polishers and optimized makeup water for scrubbers which resulted in a reduction ~ 15,000 gallons of water per day.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>11/9/10</p>	<p>HVAC upgraded to Variable Frequency Drive system for Fabrication area resulting in an 8% overall decrease in total electricity usage for the facility.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>11/9/10</p>	<p>After Isopropyl alcohol and acetone are utilized by Anadigics, they are sold to another company that uses them as a raw materials.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/9/10</p>	<p>The policy is located here: http://anadigics.eu/company/quality_environment/environmental_policy</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>11/9/10</p>	<p>EMS info can be found here: http://www.eetasia.com/ARTICLES/2004DEC/A/2004DEC03_PM_AN.PDF?SOURCES=DOWNLOAD</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>11/9/10</p>	<p>200 production employees are on a 3 day (week 1) 4 day (week 2) compressed work week.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>11/9/10</p>	<p>All purchases go through an environmental review process to meet company environmental standards.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>11/9/10</p>	<p>The analysis employed the calculation spreadsheet developed by the Greenhouse Gas Protocol (GHG Protocol) electronic Excel spreadsheet calculation tool, which has been developed by a partnership between the World Resources Institute and the World Business Council for Sustainable Development, and by following ISO-14000 standards. These calculations take into account all emissions, both indirect & direct emissions from the facility. Anadigics Inc. has three (3) general categories of data inputs that were used to make the Carbon Footprint Analysis: High Quality - which includes the consumption of electricity & natural gas Intermediate - refrigerant release; consumption of fleet fuels; commuting vehicle miles traveled; and consumption of wafer production gases Low Quality - company business miles traveled.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>11/9/10</p>	<p>Anadigics requires all contractors to sign-off on their environmental policy. All materials suppliers are required to comply with Anadigics environmental standards. Anadigics conducts environmental audits of their suppliers to ensure compliance.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>1/22/08</p>	<p>Chloroform use was eliminated due to a process change and phosphorous based wafer etch/polish was replaced with phosphate free compound.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/22/08</p>	<p>After IPA and acetone are utilized by Anadigics, they are sold to another company that uses them as a raw materials.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/22/08</p>	<p>The Policy is available at the following link: http://www.anadigics.com/company/quality_environment/environmental_policy</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>1/22/08</p>	<p>The EMS and ISO 14001 Certification are available at the following link: http://www.anadigics.com/company/quality_environment/iso_14001_certificate</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>1/22/08</p>	<p>Anadigics requires all contractors to sign off on their environmental policy. All materials suppliers are required to comply with Anadigics environmental standards. Anadigics conducts environmental audits of their suppliers to ensure compliance.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>1/22/08</p>	<p>Developed training/seminars with New Jersey Water Environment Association on Industrial Wastewater Management topics including the chemiadsorption for metals removal.</p>

IMCLONE SYSTEMS @ BRANCBURG CORP PK

Site ID: IMCLONE SYSTEMS @ BRANCBURG CORP PK

 BRANCBURG TWP, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	9/16/13	-Company participates in Ride Wise Program as a Gold Level Member and is a member of Drive Less Somerset-----managed and operated by the TMA---Transportation Management Authority of Somerset (County, NJ) -----see www.ridewise.org -There are 5 or 6 car pools per day & facility operates with flexible work hours. Company has internal car pool database that unites commuters from similar path to the facility in Branchburg. 825 employees involved in program as of 7/18/14
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/16/13	-Company installed approximately 40,000 individual solar panels (each approx 2 ft x 6 ft) on approximately 50 acres of land and began using the solar panels on May 8, 2014 -location = south bound side of route 202 -amount of energy produced per year = 10 megawatts

IQE RF CORP

3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	11/12/15	IQE RF LLC has a formal Environmental Policy, which has been put into place in November 2008. Company is ISO 14001:2004 certified. It can be found on IQE's website: http://www.iqep.com/about-iqe/environment/
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	11/12/15	IQE RF LLC has a current Certification of registration (certificate number US007912-1) for an Environment Management System - ISO 14001:2004 for the "...manufacture of compound semiconductor epitaxial structures..." An audit was conducted, and completed by Bureau Veritas Certification North America, Inc., in Houston, Texas on 5/12/15, which expires on 5/11/18.
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	11/12/15	The annual audit is published on the company's website. http://www.iqep.com/about-iqe/environment/

JANSSEN PHARMACEUTICAL CO OF J&J

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	5/17/11	<p>Facility installed waterless urinals throughout the building in 2006. J&J also has a corporate water management program described here: http://www.investor.jnj.com/2009sustainabilityreport/environment/water.html</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	5/17/11	<p>All efforts are made to donate unneeded goods to charitable groups in lieu of disposal. Pharmaceutical promotional materials, excess furniture, etc. are donated to Convoy of Hope and NJ Cares. All cafeteria products (plates, plasticware, etc.) have been switched to compostible materials.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	5/17/11	<p>Company has installed solar panels that generate 3 Mega Watts of electricity. Facility installed waterless urinals throughout the building in 2006.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	5/17/11	<p>Facility has a comprehensive biodiversity plan to improve flora on site. Completed projects maintained at the site include installation of bluebird boxes and approximately 1 acre of native species grasses and a nature trail.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	5/17/11	<p>An onsite Cogen unit installed in 2008 generates 3 Mega Watts.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/17/11</p>	<p>Company has an employee volunteer program which provides assistance to the following groups: Clean Ocean Action (Beach Sweeps), Somerset County Parks, Sierra Club, and Duke Farms. Facility also has installed a nature trail on the premises which is open to the public.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/17/11</p>	<p>Company operates under J&J's comprehensive Environmental, Health and Safety Policy signed by senior management. J&J also publishes a Sustainability website with all Environmental achievements located here: http://www.investor.jnj.com/2009sustainabilityreport/index.html</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/17/11</p>	<p>Site is operated under ISO 14001 certification.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/17/11</p>	<p>Annual Environmental Report is available on J&J's sustainability website located here: 2010 Responsibility Report http://www.jnj.com/wps/wcm/connect/f9f1148046e763e7b0b4bae02a8d6552/110421_FINAL_J%26J_2010_ResponsibilityReport.pdf?MOD=AJPERES</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/17/11</p>	<p>Company operates a Rideshare program to encourage carpooling. 30% of employees participate in a Flexible Workweek program and 30% of employees participate in a work from home program.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/17/11</p>	<p>See the corporate environmental purchasing policy located here: http://www.investor.jnj.com/2009sustainabilityreport/environment/index.html</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/17/11</p>	<p>Solar panels generate 3 Mega Watts of electricity.</p>

JER HERRING ORCHARD CORP

Site ID: JER HERRING ORCHARD CORP

SKILLMAN, NJ 08558

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/24/12	The facility recently completed a 1.25 megawatt solar project that will power between 30/40 percent of the building.

JOHNSON & JOHNSON INC CONSUMER PRODUCTS

Site ID: JOHNSON & JOHNSON INC CONSUMER PRODUCTS
15664 199 GRANDVIEW RD,
MONTGOMERY TWP, NJ 08558

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/11/16	They upgraded their chillers which save significantly on water use. In addition, they upgraded their bathrooms to inc. a variety of water-saving devices 2014-2015 and continuing into 2016.
13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.	2/11/16	They launched "Earthwards" in 2010 which addresses the impacts of their products throughout their lifespan. The approach encourages improvements inc. materials, packaging, energy, water and waste. The Earthwards process is audited and continues to guide our product developers in making environmentally conscious choices.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	2/11/16	They employ 2 green roofs and use what would be rainwater runoff to water these trees and shrubs. More similar projects are in the works.

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/11/16</p>	<p>They lease 127 acres of what would be lawn to farmers for sunflowers and hay harvesting. Also two acres are for the employees to operate an organic garden. They partner with Montgomery Friends of Open Space to construct open space areas. Also partners with US Fish & Wildlife & NJ Audubon to conduct Spring Plantings on its property.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/11/16</p>	<p>They have a global policy. http://www.jnj.com/sites/default/files/pdf/EHS+Policy+Update+082312.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/11/16</p>	<p>J&J is ISO 14001 certified and it is required to have an EMS manual. Under ISO 14001, the facility either has a full certification audit or a surveillance audit every year by a certified third party and a report.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>2/11/16</p>	<p>Although this site does not publish a report, it is published on a corporate level.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>2/11/16</p>	<p>They operate a shuttle bus from Hoboken/Jersey City to this site for their employees.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/11/16</p>	<p>Solar arrays were installed from 2005-2011. This includes an open field and two on the South Building roof generating 3,370,000 kWh of electricity annually. Electric charging ports for employee vehicles are also provided.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>2/11/16</p>	<p>They calculate and track greenhouse emissions from electrical power consumption and NG usage. CO2 calculations have been calculated since 2008 or before.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>2/11/16</p>	<p>They partner with outside contractors/vendors to drive EH&S behaviors and outcomes. This inc. contractors/vendors screenings; inclusion of contractors/vendors in site EH&S activities such as recycling, chemical waste management & waste reduction with a robust supply chain review and monitoring process which are periodically audited.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/6/13</p>	<p>J&J policy requires that all new renovations must follow green building principles. Entry dated 10/2/2008 - The roof replacement on the south building was performed using the criteria for a green project, i.e. materials and construction. The new roof installation followed green building principles without applying for LEED certification. The roof replaced project was 275, 000 sq. ft.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/6/13</p>	<p>The facility is Stony Brook Watershed River Friendly certified for the site (increase natural habitat, reduce pesticides and fertilizers application etc.). The project certification was achieved in 2006 and certification continues to be maintained.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/6/13</p>	<p>J&J Environmental Policy http://www.jnj.com/sites/default/files/pdf/EHS+Policy+Update+082312.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>11/6/13</p>	<p>J&J is ISO 14001 certified and it is required to have an EMS manual. Under ISO 14001, the facility either has a full certification audit or a surveillance audit every year by a certified third party and a report.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>11/6/13</p>	<p>Johnson and Johnson publishes an annual sustainability report which includes the company's environmental performance information. http://www.jnj.com/sites/default/files/pdf/2012-JNJ-Citizenship-Sustainability-ANNUAL-REPORT-June2013-FINAL062413.pdf</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/6/13</p>	<p>Solar panels - A 505 kW (power capacity 252 KWp) ground mounted solar photovoltaic tracking system was installed at the site. It covers three acres and is connected to/feeds the building's electrical distribution panel. The solar panel system supports 6-8% of the building's electrical supply needs.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>11/6/13</p>	<p>CO2 emissions data for the site is sent up to Corporate and is available to the public via the J & J Sustainability Report. http://www.jnj.com/sites/default/files/pdf/2012-JNJ-Citizenship-Sustainability-ANNUAL-REPORT-June2013-FINAL062413.pdf</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/10/12</p>	<p>See entry dated 10/21/10. Follow green building principles for all new renovations.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/10/12</p>	<p>See entry dated 10/21/10. The facility is Stony Brook Watershed River Friendly certified for the site (increase natural habitat, reduce pesticides and fertilizers application etc.). The project is currently maintained. It was completed in 2006, maintained since.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/10/12</p>	<p>See entry dated 10/21/10</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/10/12</p>	<p>See entry dated 10/21/10. ISO 14001 certified and it is required to have an EMS manual. Under ISO 14001, the facility either has a full certification audit or a surveillance audit every year by a certified third party and a report.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/10/12</p>	<p>See entry dated 10/21/10. Solar panels</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>12/10/12</p>	<p>See entry dated 10/21/10. Carbon emissions for the site are rolled up to Corporate and public available via the J & J Sustainability Report.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/21/10</p>	<p>See entry dated 10/2/2008</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>10/21/10</p>	<p>See entry dated 10/2/2008</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>10/21/10</p>	<p>See entry dated 10/2/2008</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>10/21/10</p>	<p>See entry dated 10/2/2008</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/21/10</p>	<p>See entry dated 10/2/2008</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>10/21/10</p>	<p>See entry dated 10/2/2008</p>
<p>Performance Track.</p>	<p>10/6/09</p>	<p>See entry dated 10/2/2008</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/6/09</p>	<p>See entry dated 10/2/2008</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>10/6/09</p>	<p>See entry dated 10/2/2008</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>10/6/09</p>	<p>See entry dated 10/2/2008</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>10/6/09</p>	<p>See entry dated 10/2/2008</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>10/6/09</p>	<p>See entry dated 10/2/2008</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/6/09</p>	<p>See entry dated 10/2/2008</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>10/6/09</p>	<p>See entry dated 10/2/2008</p>
<p>Performance Track.</p>	<p>10/2/08</p>	<p>EPA Performance Track https://yosemite.epa.gov/opei/ptrack.nsf/vaMembersSortPages/faMembersBYState#nj The facility does notify public that they are part of EPA Performance Track but does not share data.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/2/08</p>	<p>The roof replacement on the south building was performed using the criteria for a green project, ie materials & construction. Followed green building principles for new roof installations w/o applying for a certification. Sq. footage replaced was 275,000.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>10/2/08</p>	<p>River-Friendly Certification, Stony - brook Watershed Association. Wastewater Treatment Plant discharges to a stream which is in the Stony Brook Watershed. In 2002, the site was given a set of organizational goals to enhance the wildlife and habitat, water conservation, water quality management and community outreach. The facility has been certified River-Friendly in 2005. Created a Pesticide usage plan: Reduced application by 68 % between 2002-2005, created buffers at several places, increased natural areas by 4 acres and more. The project was completed in 2005. The facility is maintaining its goals.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>10/2/08</p>	<p>Environmental Policy was first adopted in 2001. It was subsequently modified in 2007. It is reviewed annually. This policy was signed in March, 2008 by Richard D' Souza, Chief Technology Officer and Susan Netteshiem, Vice President of Product Stewardship. It is posted throughout the site and is provided during new employee orientation.. It meets ISO 14001 requirements; Policy refers to J&J Standards-these standards include EMS requirements.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>10/2/08</p>	<p>EMS system meets ISO 14001 EMS requirements. It has ISO 14001 Certification. J&J does not publish an Annual Environmental Report but provides annual updates to Corporate's J&J 2010 Health Planet Goals- these are roll-up for all sites and made publicly available through J&J website: http://www.jnj.com/connect/caring/environment-protection/?flash=true</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>10/2/08</p>	
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/2/08</p>	<p>505 kW (power capacity 252 kWp) ground mounted solar photovoltaic tracking system. The system is connected/feeds to building's electrical distribution panel and supports building's electrical usage. It was commissioned in October 2005. The system has produced in excess of 2.14 GWh of energy during its life with an associated utility cost savings of \$250,000.00 and renewable energy credit (REC) revenue of \$400,000.00. 505 magawatt solar power system covers 3 acres. Will offset 7,000 tons of carbon emissions during its 25 year life. When the sun is shining, the solar energy system produces about 6-8 % of the power needed.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>10/2/08</p>	<p>The site has calculated its green house gas emissions. Electric usage (kWh) is obtained and indirect emissions are calculated: fuel use (therms) is obtained and direct emissions are calculated; CO2 offsets are also calculated (solar panels and REC's) resulting in a total CO2 emission. Emissions are calculated for North and South buildings, the Child Development Center and the Wastewater Treatment Plant. http://www.jnj.com/connect/caring/environment-protection/?flash=true J&J rolls-up all emissions and it is reported in an annual J&J Sustainability Report. Emission sources are: Boilers and Emergency Generators.</p>

JOHNSON & JOHNSON STERILE PROCESS TECHNOLOGY

Site ID: JOHNSON & JOHNSON STERILE PROCESS TECHNOLOGY
 14725 1003 RT 202,
 RARITAN, NJ 08869

Stewardship Activities	Date Acknowledged	Comments
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	9/30/09	Company only purchases paper products (copy, printer, bath tissue, paper towels) with a >60% post-consumer recycling content.
11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.	9/30/09	The facility is "Energy Star Green Building" certified.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/30/09	Facility purchases up to 50% of its electricity needs from "GDF Suez Energy North America", a CleanPower supplier that generates renewable energy from wind, biomass and hydro sources.

LABCORP OF AMERICA RARITAN DIV

 RARITAN, NJ 08869

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/29/09	1. Lab Corp has almost eliminated the amount of reagents containing thermisol, this has reduced the mercury discharge to the sewage authority. Lab Corp was discharging 10 55 gallon drums a month into the sewage authority. Currently there is only a very small amount. 2. Lab Corp is using vitech on their formalin which renders it non hazardous. 3. Lab Corp is recycling their alcohol and xylene.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/29/09	Lab Corp has installed some sensor faucets within the building. Any new renovations made will have sensor faucets. And there are 2 waterless urinals.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/29/09	Lab Corp has retro-fitted their existing lights with energy efficient ballast and bulbs. This includes green bulbs, buying compact fluorescents. And using motion sensors in rooms to save electricity. Lab Corp has designed a "Green Committee" to implement "going green".
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	1/29/09	During my inspection Lab Corp showed me their supply room which had several green cleaning products. I observed the various floor, window and other disinfectants that were "green products".

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/23/10</p>	<p>Reuse of plastic shipping bags as trash bags has eliminated the purchase of trash bags and resulted in a savings of \$9,000 for the lipstick packaging department.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/23/10</p>	<p>The recent expansion of the L'Oreal facility included an energy efficient lighting system that has a centralized database for monitoring and management of the lighting in the area, occupancy sensors and night harvesting capabilities. Lighting has also been upgraded in the pre-existing portion of the facility.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/23/10</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/23/10</p>	<p>ISO 14001 certified</p>

MANVILLE BORO MUNICIPAL COMPLEX

Site ID: MANVILLE BORO MUNICIPAL COMPLEX
 56684 325 N MAIN ST,
 MANVILLE, NJ 08835

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/24/13	The Borough has completed an energy audit and has addressed several audit recommendations including: 1) Upgrading to more efficient lighting. 2) Adding lighting motion detectors. 3) Replacing the heating system in the maintenance garage with a more efficient system.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	5/24/13	Manville Borough has an active Shade Tree Commission and has planted 131 trees in the last few years.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/24/13	Manville Borough has added solar arrays at the public library, Weston School and Manville High School

MEADOWBROOK INVENTIONS INC

BERNARDSVILLE, NJ 07924

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	2/21/14	The facility continues to produce decorative products that utilize recycled materials, specifically, recycled PET film and Aluminum foil. The recycling of PET film and Aluminum foil reduces demand for virgin material and the associated carbon emissions of their manufacturer.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	2/21/14	The facility continues to develop/adopt biodegradable plastic films. The flakes made are compostable.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	1/9/09	The facility is the leading manufacturer of glitter in the world since the last fifty years. The facility has developed/adopted innovative programs that improve/reduce the facility's environmental impact and promotes environmental excellence within its organization. The facility has initiated development and promotion of decorative products utilizing biodegradable plastic films based on poly lactic acid (PLA), a derivative of corn, and also water soluble starch and/or cellulose based polymers. The flakes made from biodegradable PLA film are marketed separately from the polyester (PET) based or Aluminum foil based flakes. The flakes made from biodegradable PLA are compostable. The facility has also initiated development and promotion of decorative products utilizing recycled PET film and Aluminum foil. The recycling of PET film and Aluminum foil reduces demand for virgin material and the associated carbon emissions of their manufacturer.

MICRO STAMPING CORP

Site ID: MICRO STAMPING CORP

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	1/11/18	
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	1/11/18	
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	1/11/18	

Site ID: MICRO STAMPING CORP
14731 100 BELMONT DR,
FRANKLIN TWP, NJ 08873

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/29/14	Micro Corp has conducted tests on a PEM machine they have been developing for the past two years and have been able to reduce hazardous material and therefore minimize on hazardous waste. They were able to reduce chromium in the waste, which changed it from hazardous waste to non-hazardous wastewater.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	7/29/14	The facility has an environmental policy that governs how they manage all of their environmental affairs.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	7/29/14	Micro Corp is operating the company using an Environmental Management System to manage all of the environmental data collected.

MORGAN STANLEY DATA CENTER

Stewardship Activities	Date Acknowledged	Comments
ENERGY STAR.	8/17/16	
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/17/16	The Morgan Stanley Site in Somerset NJ has the following water conservation items at its facility: 1) Waterless Urinals in all 17 bathrooms at the facility. 2) Motion Sensor Faucets in all 17 bathrooms at the site. 3) Dual Flush Toilets in all 17 bathrooms at the facility.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	8/17/16	Company has installed within the last year new VFD's (Variable Frequency Drives), on the following equipment to increase efficiency and lower energy usage/costs: 1) Water Chilled Condensers and Chillers - VFD allowing the motor pump to speed up or down based on valve control which allows for very precise control of both heating and chilled water systems. The pump will only circulate the required flow called for from the system, rather than over flowing based on heating/chilled water valve positions. This allows for more control related to the actual amount of heat and/or cooling provided to building spaces and increases human comfort levels within the building. 2) HVAC Systems/Pumps - VFDs have successfully been installed on exhaust fans and pump motors at Morgan Stanley. Energy savings vary from 35 to 50 percent over conventional constant speed applications, resulting in a return on investment of six months to two years.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	8/17/16	The Company in 2016 changed all lighting in buildings at the site from fluorescent lighting to LED Lighting. LED Lighting: 1) Reduces energy costs - uses at least 75% less energy than incandescent lighting, saving on operating expenses. 2) Reduces maintenance costs - lasts 35 to 50 times longer than incandescent lighting and about 2 to 5 times longer than fluorescent lighting. No bulb-replacements, no ladders, no ongoing disposal program. 3) Reduces cooling costs - LEDs produce very little heat. 4) LED Light at the facility have sensors on them and will go on and off depending on if area in building is being used.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	8/17/16	Company does have an Environmental Policy that is signed off by Senior Management for Morgan Stanley and reviewed annually.
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	8/17/16	Company publishes an Annual Environmental Report (CDP or Climate Change Report) Report discusses both Annual Environmental and Financial Aspects of the Company's Organization for all facilities around the world.

<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>8/17/16</p>	<p>The Morgan Stanley Site in Somerset NJ has been a member of EPA's Voluntary Program Energy Star since 2011.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>8/17/16</p>	<p>Supplies were documented as environmentally responsible and observed at the site: 1) Recycled Paper Products 2) Cleaning Chemicals used to clean flooring/countertops and windows 3) Sustainable Coffe Each of the above was certified with "Green Seal Certification"</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>8/17/16</p>	<p>Company has received certification from LEED and is considered LEED GOLD for their site in Franklin Township, Somerset NJ.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>8/17/16</p>	<p>Company (as a Corporate entity) records annually the Greenhouse Gas Emissions from their facilities all around the world. Company breaks down these Greenhouse Gas emissions in metric tons and lists them in the following categories (Data Center, Office, Travel) Company also breaks down the Greenhouse Gas Emissions as CO2 Emissions, CH4 Emissions, N2O Emissions and HFCs Emissions.</p>

MOUNT ST JOHN ACADEMY

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/27/09	By the end of 2008 the facility transitioned from standard toilets, faucets & spigots to flow-restricted replacement units.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/27/09	By the end of 2008 the facility transitioned from standard, incandescent light bulbs to all CFL replacement units.

NESHANIC STATION, NJ 08853

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/10/09	The facility operates a washwater recycling system that filters and recycles water used for cleaning of equipment.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/10/09	All replacement passenger vehicles are hybrids pursuant to Park Commission resolution.

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/10/09</p>	<p>The golf Course has been designated as "River-Friendly" by the NJ Water Supply Authority http://docs.google.com/viewer?a=v&q=cache:1wVtKYN7hwgJ:www.eifg.org/portal/portal/item_download.aspx%3Fitem_id%3D386+Neshanic+Valley+Golf+Course+River+Friendly+Audubon+certification&hl=en&gl=us&pid=bl&srcid=ADGEESh54DqB7tU-MDRcNknNleh51SRsf4c6aVZH_NccD4g8ddEvFwLE2UKszLJnGcXJbxMWd02gP-cxSzg6mGNrk5Agm_OnIczfUTZhMvHn5xXFalVOir6ypiK10ckuWy2hgwr6lVn&sig=AHIEtbTpcLUNoy84R6hi62sm5LI6U06_gQ The course is a "Certified Audubon Cooperative Sanctuary" http://www.somersetcountyparks.org/parksFacilities/nvgc/PressReleases/AudubonScantuary.html</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. <p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/8/08</p>	<p>Annual use of 1200 liters of methanol and 240 liters of petroleum ether have been eliminated from use recently with the introduction of a new extraction process. These two waste streams have now been completely eliminated from use on site.</p>

NJ AMERICAN WATER CO

Site ID: NJ AMERICAN WATER CO
 15917 CHIMNEY ROCK RD S,
 BRIDGEWATER TWP, NJ 08807

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/19/08</p>	<p>The facility removed UST for gasoline storage and eliminated gasoline storage onsite in August 2006. The facility also substituted sodium hypochlorite for chlorine gas in their treatment operations.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/19/08</p>	<p>The facility has established a water use reduction program named "Unaccounted for Water/Water Conservation Strategy". The objective of the program is to reduce quantity of water lost during treatment operations in order to improve plant efficiency and to promote conservation of natural water resources.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/19/08</p>	<p>The facility successfully reuses their water treatment residuals (WTR) by having the waste blended into topsoil at the Glen Gery Quarry in Hillsborough.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/19/08</p>	<p>The facility's fleet include hybrid vehicles. Also, two solar powered carts are available for use onsite.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/19/08</p>	<p>Wildlife and Habitat Enhancement activities at the facility include provisions for bird nesting boxes, duck nest boxes, osprey platform, and nesting boxes for American bluebird. The facility has also completed such tasks as placing bird nesting boxes on site to attract beneficial insect eating birds, and is in the process of procuring two Bat roosting boxes. The facility is currently working on achieving River-Friendly Business certification (New Jersey Water Supply Authority - NJWSA).</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/19/08</p>	<p>Community outreach on Water Quality and Supply - Bound Brook and the surrounding communities. Environmental Education Showcase at Green Brook Middle School - Green Brook Environmental Commission's Green Design Group (GDG) Community outreach on "The Water You Drink" - Spring Town Meeting. Other community outreach projects: http://www.amwater.com/njaw/About-Us/community-project.html</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/19/08</p>	<p>A copy the facility's written Environmental Policy was made available. The policy is also available on the facility's website: http://129.41.243.229/awpr1/njaw/pdf/NJA Environmental Policy 5.04.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/19/08</p>	<p>The facility operates under a written Environmental Management Plan covering both regulatory and non-regulatory aspects of environmental management. The facility is ISO 14001 certified. However, the documentation provided at the time of this inspection is for certification period covering 12/11/2002 to 12/10/2005 under ISO 14001:1996.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/19/08</p>	<p>The facility has installed solar panels to generate renewable power for onsite operations and reduce energy demand.</p>

NJ NATIONAL GOLF CLUB

Site ID:
144488

NJ NATIONAL GOLF CLUB
579 ALLEN RD,
BASKING RIDGE, NJ 07920

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/22/15</p>	<p>Implemented changes that resulted in reduced water usage. Irrigating during night. Watering during the day by hand with hoses during the extreme weather conditions rather than through the sprinkler heads. All sprinkler heads and pipes that are no longer needed have been removed and there aren't any drinking fountains on the property. On-course restrooms only require a couple ounces of water for the foam toilet flushing unit to activate and there are liquid anti bacterial soaps for hands. Wetting agents are applied to greens, tees and fairways to better utilize water and lengthen watering intervals. Roughs are allowed to grow or dry out and limit water requirements. Along with eliminating sprinkler heads and pipes, some sections of the irrigation system have been altered to move sprinklers and eliminate too much overlapping of water. All runoff water from rain and irrigation will flow back into supply pond via an intricate drainage system.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/22/15</p>	<p>The golf course restrooms are 100% solar powered with an organic waste disposal process. The irrigation pumps are operated by a VFD system. Maintenance vehicles are gasoline powered, but only run when the pedal is pressed to move. Electrical outlets and light bulbs are being changed to desired green technology.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/22/15</p>	<p>All around the clubhouse are herb and vegetable gardens which are used in the restaurant or taken home for consumption by employees. On any given day you will find deer, foxes, rabbits and evidence of numerous other animals roaming the golf course property. There is a large area that has a bird sanctuary which has different species of birds. There are also numerous birdhouses throughout the golf course which are checked and maintained as needed or replaced if required. Throughout the club property there are acres of environmentally sensitive designated wetlands which are marked with signage.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/22/15</p>	<p>The facility is a certified Audubon Cooperative Sanctuary. Program For Golf Courses. Goal is to provide a level of aesthetics that pleases members and guests while doing so in an efficient yet sustainable manner. Provide water, nutrients and chemical treatments to the property on an as needed basis. Maintain the grass to the driest level of acceptability. Make business profitable by reducing irrigation water, fertilizers and chemicals and fuel usage (use electric golf carts). Recycle cooking oil and used motor oil.</p>

NORTH BRUNSWICK TWP

Site ID: NORTH BRUNSWICK TWP
1670 782 CANAL RD, & SUYDAM RD
SOMERSET, NJ 08873

Stewardship Activities	Date Acknowledged	Comments
Partnership for Safe Water.	2/26/13	Partnership for Safe Water program member.
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	2/26/13	

ORTHO CLINICAL DIAGNOSTICS

Site ID: ORTHO CLINICAL DIAGNOSTICS
14466 1001 RT 202, ROOM 135
RARITAN, NJ 08869

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/21/16	90 % of hazardous waste was reduced from their out going loads since their waste methanol stream was reclassified from a (D001) hazardous waste to a non-hazardous waste.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/21/16	Water consumption has been reduced by over 20 % from 2011-2016, conserving over 48 million gallons of water in total.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/21/16	Overall energy reduction of 7 % in 2015 and 2016 vs 2014.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/21/16</p>	<p>Enhanced recycling within the manufacturing operations which has resulted in the recycling of an additional 26 tons of material.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/21/16</p>	<p>Generated 21 million Kw/hrs of clean energy in 2015 and 2016 from on-site solar panels (9.2 % of the site's energy demand and enough to power 210,000 avg homes).</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>12/23/10</p>	<p>In 2007, the Ortho Diagnostics Systems Inc. completed a significant combined heat and power (CHP) project that included a 1.5 MW gas-fired turbine and heat recovery steam generator. Combined heat and power, or "Cogeneration". Their Cogeneration equipment supplies forty percent (40%) of the facility's electricity and seventy-five percent (75%) of its steam demand. The project was endorsed by the New Jersey Board of Public Utilities' Clean Energy Program, and supports New Jersey's goals of enhancing energy efficiency and reducing existing and new demands to the electric power grid. The project was also designed to satisfy the criteria for the US Environmental Protection Agency's ENERGY STAR CHP Award.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/23/10</p>	<p>Ortho Diagnostics has reused and recycled more than 65% of the waste stream.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>12/23/10</p>	<p>Ortho Diagnostics utilizes Johnson & Johnson Design for the Environment analysis tool for all new product development and substantial product reformulation to ensure that environmentally preferable materials are used in both the manufacturing process, finished goods, and packaging, to the extent feasible.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/23/10</p>	<p>Ortho Diagnostics Systems Inc. partners with a community organization to complete at least one environment-related project per year. Organizations they have partnered with recently include the Upper Raritan Watershed Authority, The Nature Conservancy, Somerset County 4-H, and Clean Ocean Action.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/23/10</p>	<p>http://www.orthoclinical.com/OCD%20Pdfs/Global%20Environmental%20Health%20and%20Safety%20Policy.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/23/10</p>	<p>The Ortho Diagnostics System Inc. is ISO 14001 certified.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>12/23/10</p>	<p>http://www.jnj.com/connect/caring/environment-protection/</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>12/23/10</p>	<p>"Ortho Clinical Diagnostic System Inc. has committed to increase the percent of its office paper that is at least 30% post-consumer recycled content or derived from a certified forest. In calendar 2007, greater than 98% of the office paper used by the facility was either 30% post-consumer recycled content and/or derived from a certified forest. This is accomplished through a master sourcing agreement for office paper that many J&J affiliates are party to.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/23/10</p>	<p>Ortho Clinical Diagnostics has a 1.7 megawatt solar array of over 7,300 ground-mounted panels</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>12/23/10</p>	<p>The facility has calculated its greenhouse emissions. This is a metric that has been captured and monitored by Johnson & Johnson since 1990. Their GHG emissions information included both direct fuel consumption at the site and indirect emissions from transmitted electricity.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>12/23/10</p>	<p>Suppliers and external manufacturers are required to submit information to the Ortho Diagnostics Systems Inc. on their health, safety, and environmental performance. Critical suppliers and external manufacturers are subject to audits.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>12/23/10</p>	<p>Ortho Clinical Diagnostics attends the Somerset County Business Partnership and encourages other companies to contact their energy team and EHS department to learn about their programs.</p>

Performance Track.	3/24/08	The permittee is a charter member of the US EPA's Performance Track program. More information is available at https://yosemite.epa.gov/opei/ptrack.nsf/vaMembersSortPages/474FD185B529BBE1852573EE00445A98?OpenDocument .
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/24/08	The direct link to Ortho Diagnostics Systems Inc. facility/products is currently http://www.newmoa.org/prevention/mercury/imerc/notification/orgdetails.cfm?org=3475&filing=888 Alternatively, any interested member of the public wishing to view them could simply select Ortho Clinical Diagnostics from the list of reporting manufacturer's on IMERC's Database Search page http://www.newmoa.org/prevention/mercury/imerc/Notification/search.cfm
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/24/08	In 2007, the Ortho Diagnostics Systems Inc. completed a significant combined heat and power (CHP) project that included a 1.5 MW gas-fired turbine and heat recovery steam generator. Combined heat and power, or "Cogeneration". Their Cogeneration equipment supplies forty percent (40%) of the facility's electricity and seventy-five percent (75%) of its steam demand. The project was endorsed by the New Jersey Board of Public Utilities' Clean Energy Program, and supports New Jersey's goals of enhancing energy efficiency and reducing existing and new demands to the electric power grid. The project was also designed to satisfy the criteria for the US Environmental Protection Agency's ENERGY STAR CHP Award.
13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.	3/24/08	The permittee utilizes Johnson & Johnson Design for the Environment analysis tool for all new product development and substantial product reformulation to ensure that environmentally preferable materials are used in both the manufacturing process, finished goods, and packaging, to the extent feasible.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	3/24/08	Ortho Diagnostics Systems Inc. partners with a community organization to complete at least one environment-related project per year. Organizations they have partnered with recently include the Upper Raritan Watershed Authority, The Nature Conservancy, Somerset County 4-H, and Clean Ocean Action. http://www.jnj.com/wps/wcm/connect/d1dd6a0049bf96cda56de7e59ccdca48/2007-sustainability-report.pdf?MOD=AJPERES
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	3/24/08	This is the revised link to our global policy: http://www.orthoclinical.com/en-us/localehome/whoweare/Pages/OurPolicies.aspx
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	3/24/08	The Ortho Diagnostics System Inc. is certified to ISO 14001 by ERM-CVS. Can verify their status as follows: Tiffany C. Morisset, Client Coordinator ERM Certification & Verification Services, Inc. 239 US Highway Route 22 East, 2nd Fl. Green Brook, NJ 08812 T: +1 732 968 8641 F: +1 732 968 8645 tiffany.morisset@ermcvs.com www.ermcvs.com

<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>3/24/08</p>	<p>Ortho Clinical Diagnostics does not publish an Annual Environmental Report, however, Johnson & Johnson does publish such a report that includes the impacts of all its businesses throughout the world. OCD represents a subset of that data. The reports are available for review by the public at http://www.jnj.com/wps/wcm/connect/d1dd6a0049bf96cda56de7e59ccdca48/2007-sustainability-report.pdf?MOD=AJPERES</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>3/24/08</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/24/08</p>	<p>"Ortho Clinical Diagnostic System Inc. has committed to increase the percent of its office paper that is at least 30% post-consumer recycled content or derived from a certified forest. In calendar 2007, greater than 98% of the office paper used by the facility was either 30% post-consumer recycled content and/or derived from a certified forest. This is accomplished through a master sourcing agreement for office paper that many J&J affiliates are party to.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/24/08</p>	<p>The facility has calculated its greenhouse emissions. This is a metric that has been captured and monitored by Johnson & Johnson since 1990. Their GHG emissions information included both direct fuel consumption at the site and indirect emissions from transmitted electricity.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/24/08</p>	<p>Suppliers and external manufacturers are required to submit information to the Ortho Diagnostics Systems Inc. on their health, safety, and environmental performance. Critical suppliers and external manufacturers are subject to audits.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>3/24/08</p>	<p>Ortho Clinical Diagnostics attends a minimum of approximately 25% of the monthly meetings of the Somerset County Business Partnership. The most recently attended meeting was June 10, 2008.</p>

PAVILIONS @ PRINCETON

Site ID: PAVILIONS @ PRINCETON
38886 75 ORCHARD RD,
MONTGOMERY TWP, NJ 08540

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/6/13	The facility is located at 75-85 Orchard Street, Skillman, New Jersey. The facility has two buildings (Pavilion Building #1 and Pavilion Building #2). Currently, Pavilion Building #1 is unoccupied. Each building has been provided with 77 KW roof-mounted photovoltaic (solar energy) system totaling 154 KW. The energy produced is used to cover the energy needs of the buildings while conducting business. These energy needs include HVAC, refrigeration, lighting, office and laboratory equipment.

PFIZER INC

Site ID: PFIZER INC
14732 100 RT 206,
PEAPACK, NJ 07977

Stewardship Activities	Date Acknowledged	Comments
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	3/10/16	Environmental Enhancement Project: Pfizer is a member of the New Jersey Corporate Wetlands Restoration Partnership (NJCWRP). The NJCWRP is a public-private initiative aimed at restoring, preserving, enhancing and protecting aquatic habitats throughout New Jersey. Bringing together corporations, federal and state agencies, non-governmental organizations and academia, the NJCWRP allows participants to contribute in a fundamental way to projects involving New Jersey's coastal and island wetlands and aquatic habitats. Please see the link below for completed, approved and under review projects. http://www.njcwrp.org/

PIM BRANDS

Site ID: PIM BRANDS
443665 500 PIERCE ST,
SOMERSET, NJ 08873

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/7/14	Several plans have been implemented to reduce the use of water. • Low flow toilets have been installed • Procedures to limit the use of water used during routine cleanings have been implemented • A water treatment system has been installed to insure that all water leaving the building is as clean as when it entered

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/7/14</p>	<p>Energy uses have been lowered by implementing small changes to our processes - Processes have been altered to use gravity as a means to move liquid product rather than pumps</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/7/14</p>	<p>PIM Brands LLC have put in place several ways that reduce disposal of materials • Food waste is sent to a processing facility where it is either turned into animal feed or used as compost • Metal and Plastic drums, scrap metal and wooden pallets are recycled rather than discarded</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>2/7/14</p>	<p>Energy uses have been lowered by implementing small changes to our facility - 1) Lights throughout the production areas have been changed to energy efficient bulbs 2) Sky lights are also maintained so that less artificial lighting is needed</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/7/14</p>	<p>Small changes in our landscaping have made improvements to our facility and the environment • The runoff water collection pond is now being more efficiently utilized by allowing native plant species to return, such as cattails. This helps to filter the runoff and increases percolation</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>2/7/14</p>	<p>PIM Brands encourages all employees to car pool to work • More than 60% of PIM Brands contracted employees car pool to work or take public transportation</p>

RANDOLPHS NURSERY

Site ID: RANDOLPHS NURSERY
53831 GROUSER RD,
SOMERSET, NJ 08873

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/4/15	The nursery employs drip irrigation on hanging baskets to reduce water consumption.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/4/15	The nursery uses skylights and natural lighting to reduce energy consumption.

RARITAN VALLEY COMMUNITY COLLEGE

Site ID: RARITAN VALLEY COMMUNITY COLLEGE

NORTH BRANCH, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
WasteWise.	4/10/12	Raritan Valley Community College is an active WasteWise Partner.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/10/12	The college has eliminated the use of herbicides and uses only organic fertilizers as of July 1, 2009.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/10/12	A rain water harvesting system installed at the garage facility collects water that is used for landscape watering, thereby reducing the use of potable water.

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/10/12</p>	<p>Raritan Valley Community College is a participant in the Energy Curtailment program offered by PJM Interconnection, which is the regional transmission organization for electric. When called upon, RVCC shuts down certain equipment (air conditioning) for short periods of time to help reduce load demand on the northeast grid. RVCC has also installed an air-to-air heat exchanger at the Science building which captures the waste heat from exhaust fans and preheats the fresh air coming into the building.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/10/12</p>	<p>Raritan Valley Community College sends all bio-degradable kitchen waste to an off-site composting facility.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/10/12</p>	<p>The college provides preferred parking for faculty, staff and students with hybrid or alternative fuel vehicles. The college is currently installing four electric charging stations with preferred parking to encourage students and faculty to consider electric vehicles.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/10/12</p>	<p>Raritan Valley Community College has implemented many lighting upgrades and retrofit projects designed to save energy. Occupancy sensors have been installed in a large number of classrooms and all exit sign lighting has been replaced with LED signs.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>4/10/12</p>	<p>Raritan Valley Community College has been certified as a River-Friendly Business by New Jersey Water Supply Authority due to numerous environmental improvements on campus. Activities included rain barrel capture of storm water, reduction of lawn mowed area by 24% and seeded with wildflowers to improve water quality and animal habitat</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>4/10/12</p>	<p>Raritan Valley Community College installed and operates a 1.4 MW Combined Heat & Power Cogeneration Plant at the college. The plant saves the college an estimated \$400,000 a year in energy cost.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/10/12</p>	<p>Raritan Valley Community College hosted a River Friendly seminar.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/10/12</p>	<p>In 2009 Raritan Valley Community College pledged to reduce its environmental impact and raise environmental awareness within its academic community and the surrounding community by signing an agreement of environmental stewardship with the EPA.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>4/10/12</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/10/12</p>	<p>Green cleaning products are used in several campus facilities. Green cleaning products include glass cleaner, all-purpose cleaner and floor cleaner.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>4/10/12</p>	<p>Raritan Valley Community College Student Center is under construction and is register with the LEED certification program. The building will be a LEED certified gold building that will include a rain water harvesting system that will provide water for all toilets throughout the building.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>4/10/12</p>	<p>Vanguard Energy constructed a 453 kW solar array on canopies over a parking lots on the north end of the campus. The array will supply 90% of the power required for two buildings (Arts Building and Child Care Center) and offset energy cost by approx. 50%.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/10/12</p>	<p>Total greenhouse gas emissions for Raritan Valley Community College during fiscal year 2011 were 13,828.1 metric tons of CO₂ Eq.</p>

RB MFG

Site ID: RB MFG
15634 799 RT 206,
HILLSBOROUGH, NJ 08844

Stewardship Activities	Date Acknowledged	Comments
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	5/8/08	Vans pick up employees.

REBTEX

Site ID: REBTEX
15919 40 INDUSTRIAL PKWY,
BRANCBURG TWP, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	1/23/18	They recently installed exterior LED lighting replacing very old inefficient lighting. Also replaced old florescent lighting in some of their building with more efficient smaller florescent recent lighting.

RISDON CORP CALUMET DIV

Site ID: RISDON CORP CALUMET DIV
 1675 1100 RANDOLPH RD, & SCHOOLHOUSE RD
 SOMERSET, NJ 08873

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	1/14/11	Company provided a copy of their "Environmental Policy Statement" to the Department.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	1/14/11	Company is ISO 14001:2004 compliant - Manufacture of Printed Material Based on Customer Specifications.

ROCHE MOLECULAR SYSTEMS INC

Site ID: ROCHE MOLECULAR SYSTEMS INC
 1834 1080 RT 202, & OLD YORK RD
 BRANCBURG TWP, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/16/16	The site has an active program in which it is changing out faucets and toilets to low flow fixtures. In 2015, facility installed a heat exchanger to recover heat from boiler blowdown which eliminated the need to quench the temperature of the blowdown prior to discharge. This process used several hundred gallons of city water per day to cool discharge to comply with the sewer permit. Therefore, this heat exchanger saves hundreds of gallons of water per day.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	5/16/16	The site utilized Swiss protocols known as Ecobalance. Ecobalance is intended as a tool for the better utilization of resources resulting in reduced environmental impact.

<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/16/16</p>	<p>The site operates under Roche "Group Directive K 15." The Directive provides the policy and protocols in dealing with 3rd party manufacturers and service providers. The Directive is based on the International Chamber of Commerce's Policy on supply chain responsibility and the Pharmaceutical Industry Principles for Responsible Supply Chain Management. Under the K 15 Directive, the permittee evaluates the supplier's social and environmental performance and considers the supplier's performance as part of the selection process.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/16/16</p>	<p>The site utilizes solar power at its manufacturing facility located at 1080 US Highway 202 and its warehouse at 2 Millennium Way. The solar panels are owned by Sunpower Corporation and the power is purchased from MMA Renewable Ventures. Based on reported 2008 data, the manufacturing building utilized 3 percent solar power and the warehouse (PI# 443393) utilized 25 percent solar power. In 2015, the facility entered into a contract with the utility provider to purchase 100% renewable electricity for site. This contract is still active today.</p>
<p>Climate Leaders.</p>	<p>5/27/09</p>	<p>Roche Group U.S. Affiliates pledged to reduce total US GHG emissions by 15% from 2001 to 2010.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/27/09</p>	<p>The site has an active program in which it is changing out faucets and toilets to low flow fixtures.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>5/27/09</p>	<p>The site utilized Swiss protocols known as Ecobalance. Ecobalance is intended as a tool for the better utilization of resources resulting in reduced environmental impact. Information relative to the site's use of Ecobalance can be found on the web @ http://www.roche.com/fact-sheet-eco-efficiency-ecobalance.pdf.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/27/09</p>	<p>The site is operated under a written environmental policy that meets the stewardship criteria.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>5/27/09</p>	<p>The site participates in Climate Leaders.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/27/09</p>	<p>The site operates under Roche "Group Directive K 15." The Directive provides the policy and protocols in dealing with 3rd party manufacturers and service providers. The Directive is based on the International Chamber of Commerce's Policy on supply chain responsibility and the Pharmaceutical Industry Principles for Responsible Supply Chain Management. Under the K 15 Directive, the permittee evaluates the supplier's social and environmental performance and considers the supplier's performance as part of the selection process.</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/27/09</p>	<p>The site utilizes solar power at its manufacturing facility located at 1080 US Highway 202 and its warehouse at 2 Millennium Way. The solar panels are owned by Sunpower Corporation and the power is purchased from MMA Renewable Ventures. 1713 187 DAVIDSON AVE,
FRANKLIN TWP, NJ 08873

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	9/26/18	Rotor Clip Co. has an environmental policy that governs and manages all of their environmental affairs.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/22/08	Rotor Clip developed a state-of-the-art wastewater treatment system to pre-treat its production wastewater to higher standards than required by law prior to discharge to a POTW
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	7/22/08	From www.rotorclip.com It is the policy of the Rotor Clip Company to explore and establish all possible means to minimize and eventually eliminate all forms of pollution created by operations at our facilities. Methods currently under study or now in operation include: - Recycling and re-use of process materials - Creating and adopting new techniques in production processes to eliminate the use of hazardous materials - Improve efficiencies in production to minimize waste - Educate and encourage all employees to look for pollution prevention methods In the past the management of Rotor Clip has demonstrated a commitment to environmentally responsible business practices by dedicating significant resources to correcting and/or eliminating sources of pollution. This has been and will continue to be the manner in which Rotor Clip conducts business.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	7/22/08	Rotor Clip strongly encourages its employees to car pool as much as possible and rewards them with better parking spaces.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/29/15</p>	<p>The facility continues to maintain a water management/conservation program to minimize water use at the golf course.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/13/14</p>	<p>The facility continues to maintain a water management/conservation program to minimize water use at the golf course.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/11/13</p>	<p>See entry dated 2-6-09 (PI # 2449P).</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>12/10/10</p>	<p>See entry dated 1-5-09</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>12/10/10</p>	<p>See entry dated 1-5-09</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>1/5/09</p>	<p>In June 2007 the facility initiated "Water Conservation Activities" as follows: 1. Trained employees to conserve water. 2. Staff trained to identify the water sources used for irrigation and drinking water. 3. Correctly operate and manage the system. 4. No uncontrolled release of water out of water retention structures. 5. Irrigation system has been properly designed, correctly installed, and performance has been tested. 6. Check irrigation system for proper water distribution at least once a year. 7. Adjust rotation speed and operating pressure to match sprinkler spacing to nozzle performance. 8. Check irrigation equipment daily and regularly maintain the system on a regular schedule. 9. Fix leaks in a timely manner 10. Eliminated all non-target watering (e.g., side walks, ponds, habitat areas). 11. Pump station is regularly maintained and checked for efficiency. 12. Upgraded irrigation system (e.g., valves, sprinke heads, nozzles, computer software etc) 13. Installed part-circle irrigation heads where possible to save water. 14. Incorporate evapotranspiration rates or weather data into daily irrigation decisions 15. Avoid running irrigation system at peak evaporation times 16. Water hot spots to target needed areas only. 17 Reduce runoff and evaporation by improving soil cover and drainage 18. Eliminated irrigation on all unused portions of the property 19. Monitor daily water use, tally monthly usage and set targets 20. Maintain for local climate and growing conditions. Reduced irrigated areas by 74 acres which will result in tremendous savings of irrigation water and also energy costs associated with pumping and distribution. On November 26, 2008 Audubon International provided certificate of achievement in "Water Conservation" to Royce Brook Golf Club.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/5/09</p>	<p>In June 2007 the facility initiated (Wildlife and Habitat Management" activities to enhance the natural areas and landscaping on the golf course to protect and sustain native habitats and the wildlife that depend on them for survival. Continually expand general knowledge of the plants, wildlife species, and habitats found on the golf course. Improved minimally used and landscaped areas to provide habitat for a variety of wildlife species. Preserve the rich biological diversity of their region by protecting existing native habitats and species, and landscaping primarily with indigenous (native) plants. Project involved protection of 165 acres of woodland habitat and use of native plants in landscaping provide valuable food and habitat for local and migratory wildlife on the property, while also reducing the water, labor and other inputs needed for maintenance and upkeep. On November 26, 2008 Audubon International reported that "Royce Brook Golf Club" had achieved certification in "Wildlife and Habitat Management" to protect endangered/threatened species, plant native vegetation when landscaping, provide extensive habitat along streams and lakes to provide for food and shelter for wildlife, protecting vast acres of wetland and educate golfers about the importance of natural areas.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/5/09</p>	<p>In June 2007 the facility initiated an outreach program to strengthen local community connections, and extend participation in environmental conservation activities. The facility provides opportunities for patrons, staff, decision makers, and community members to contribute to environmental projects on the golf course. The facility provides education about programs and projects which improve environmental quality. Activities are: 1. Contacted six local community organizations to participate in project planning or implementation. 2. Formed a Resource Advisory Group to help plan and implement environmental projects and educational efforts on the golf course. 3. Provide information regarding Audubon International and Audubon Cooperatave Sancturay Program (ACSP). 4. Communicate environmental goals, objectives, and projects. 5. Invite employees, patrons, and community members to be involved in facility's Resource Advisory Group and help with stewardship projects. 6. Maintain a display that describes involvement in the ACSP and highlights stewardship projects taking place on the course. 7. Written materials available on the course: brochures, regular newsletter articles, signs, posters, Audubon Newsletter etc. 8. Communicate with neighboring property owners, home owners association to explain involvement in the ACSP. On December 23, 2008 Audubon International reported that "Royce Brook Golf Club" had achieved certification in "Outreach Education" and has now been designated as a "Certified Audubon Cooperative Sanctuary"</p>

RUSTOLEUM CORP

Site ID: RUSTOLEUM CORP
15928 173 BELMONT DR, AKA 39 BELMONT DR
SOMERSET, NJ 08873

Stewardship Activities	Date Acknowledged	Comments
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/24/13	Innovative Program - Rust-Oleum Green Team, a group of associates representing departments throughout the company, continually audit their work environment and make recommendations that lead to a greener workplace. The Green Team provides education and information on the company's intranet site to increase awareness.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	9/24/13	Environmental Policy – Rust-Oleum has a written policy that is posted in the lobby of the building and internet page. http://www.rustoleum.com/about-rust-oleum/corporate-responsibility/sustainability/

RUTGERS PREPARATORY SCHOOL CORP

Site ID: RUTGERS PREPARATORY SCHOOL CORP
23837 1345 EASTON AVE,
FRANKLIN TWP, NJ 08873

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/19/11	Rutgers Prep has received a grant from the Resource Renewal Group. Rutgers Prep has transitioned its dining facility to composting and recycling which allowed for a 40% reduction overall of campus output to the landfill with an overall goal for 55% reduction.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/19/11</p>	<p>New energy management installations reduced air conditioning usage this summer by over 20%. Occupancy sensors in rooms have been installed to automatically turn off lighting when unoccupied.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>10/19/11</p>	<p>Participant in the "River-Friendly School Certification" program. http://www.raritanbasin.org/Projects/riverfriendly/school.html</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>10/19/11</p>	<p>Rutgers Preparatory School participates in "Rutgers Green Purchasing" http://greenpurchasing.rutgers.edu/about_us.html</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>10/19/11</p>	<p>A new building on campus has received LEED Certification.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>10/19/11</p>	<p>All outside vendors doing business with Rutgers Preparatory School must adhere to the policies established under "Rutgers Green Purchasing".</p>

19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	1/21/09	IBA has 1 hybrid vehicle, and may have an additional other.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	1/21/09	IBA uses recycled office products such as recycled toilet paper and paper towels.

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/2/14	Facility is operated under an Integrated Pest Management Policy that limits the use of herbicides.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/2/14	Facility has a new washwater system to clean golf equipment that utilizes recycled water.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/2/14	Somerset County has a policy to purchase hybrid vehicles for their fleet.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	4/2/14	Facility is Certified as a River Friendly Golf Course http://www.raritanbasin.org/Projects/riverfriendly/golf.html
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/13/08	Replacement vehicles are hybrids. The policy is in effect and is being implemented.

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/17/13</p>	<p>http://www.energysmartsomerset.org/council/2011Progress.pdf Traffic Signal Optimization. The final report for the signal optimization was September 27, 2011. The project was considered complete at that time. Green Fleet Traffic Light LED Conversion Raritan Valley Community College Co-Generation Power Plant Energy Conservation Initiatives</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>6/17/13</p>	<p>http://www.co.somerset.nj.us/cms/service/NJSOMER/NJSOMER_38/NJSOMER_38_20120110_en.pdf Environmentally Friendly Recycling Trucks Somerset County continued its commitment to "go green" with the purchase of four replacement trucks for the Somerset County Recycling Division's fleet in 2011. These trucks are the cleanest, most efficient recycling trucks available on the market at this time. Somerset County worked with the vendor to design a drive train that burns the least amount of fuel and produces the fewest exhaust emissions despite the required stops and starts of the trucks while collecting recyclables." The new trucks reduce the carbon footprint by taking more particles of soot out of the air than the trucks emit, as well as getting two miles more per gallon of diesel fuel.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/17/13</p>	<p>William Amann, P.E. reported that the County has built several buildings that were designed to LEED Standards, but they did not submit for certification. Mr. Amann has personally reviewed the sustainability attributes of the new Social Services Building, which just had its groundbreaking. Mr. Amann indicated that this building would achieve LEED Silver or better if it was submitted. The design team certainly addressed the 5 areas of LEED (site, water, energy, materials, and IEQ) in a pretty comprehensive manner. This was done on the basis of them following the "Green Building tool kit" which was published by the Somerset County Business Partnership as a guide for the County and its schools and municipalities to follow</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/17/13</p>	<p>According to the Somerset County Energy Smart Progress report 2011, the Somerset County Board of Chosen Freeholders established this program in 2010 which involves the design, permit, acquisition, construction, installation, tax ownership, commissioning, operation, and maintenance of solar systems to be located at county, municipal and school district facilities. The goal of this program, which is administered by the Somerset County Improvement Authority in three "Tranches", is to implement renewable energy projects that are both environmentally responsible (reduce carbon emission) and economically beneficial (reduce energy costs). Tranche 1: Commenced in 2010 and involves 31 local entity - public facilities. The total size (kW dc) of the solar systems at the Tranche 1 facilities was estimated to be 7.047 MW and would generate solar renewable energy that will offset approximately 26% of the current electric power usage at those facilities. The participating local entities will realize, in aggregate, an annual energy cost savings of approximately \$932,651 in the first year and these savings are expected to grow to approximately \$1,528,159 in the last year of the PPA. Tranche 2: Commenced in 2011 and involves 32 local entity-public facilities. The total size (kW dc) of the solar systems at the Tranche 2 facilities was estimated to be 7.056 MW and would generate solar renewable energy that will offset approximately 26% of the current electric power usage at those facilities. The participating local entities will realize, in aggregate, an annual energy cost savings of approximately \$684,291 in the first year and these savings are expected to grow to approximately \$1,020,883 in the last year of the PPA. The County Solar Capacity for Government entities is 292 KW according to the aforementioned report.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/17/13</p>	<p>http://www.nj.com/messenger-gazette/index.ssf/2013/03/eco-rally_urges_residents_to_minimize_their_carbon_footprint_april_1_to_april_15.html The County Planning Board has sponsored numerous topic-specific events and programs. The most recent event was on September 16, 2013. Such programs urges residents to minimize their carbon footprint. In the continuing effort to educate the public sector on methods of saving energy and reducing the individual "carbon footprint," the Somerset County Park Commission Environmental Education Center organizes its "Eco-Rally." Events have involved more than 1,000 participants each year. Participating individuals, families, and social, or school groups have an opportunity to maintain a daily log of everyday tasks that serve to reduce the use of energy and promote a greener lifestyle. Recommended actions include turning off lights when leaving a room, cycling or walking instead of driving, utilizing reusable bags when shopping, planting a native garden or tree, carrying lunch in reusable containers, and other methods of saving energy.</p>

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/17/13</p>	<p>The Somerset County Solar Program has installed just under 14 MW of photovoltaic solar panels on County facilities, as well as municipal buildings and schools (local units).</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/9/14</p>	<p>South Bound Brook Borough in collaboration with the New Jersey Water Supply Authority (NJWSA) installed several Manufactured Treatment Devices (MTDs) on the storm sewers contributory to Outfall #21 on the D&R Canal. Outfall #21 is located at the easterly end of Barber Blvd. The D&R Canal is a potable water supply, with Middlesex Water Company having an intake on the Canal downstream of South Bound Brook. It was an effort to reduce the amount of sediment entering the D&R Canal from existing storm sewers. MTDs are on the storm system upstream of Outfall #21. The MTDs consisted of the following: 1. Filterra Bioretention Systems, commonly known as vegetated inlets to replace certain existing inlets 2. Nutrient Separating Baffle Box on the storm sewer line just before Outfall #21 The combination of the vegetated inlets and baffle box greatly reduce the amount of sediment entering the D&R Canal, thereby improving the quality of raw water in the Canal, and also reducing water treatment costs.</p>

15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/16/08	This facility uses recycled storm water for dust control. monthly reports are prepared.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/16/08	Per Mr. Tom Branch, the company purchased 3 vehicles that are equipped with flex fuel reduction of the cylinders, whereby after reaching certain speeds the 6 cylinders are reduced to 4. Two vehicles were purchased in '06 and one in '08.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	4/16/08	This facility provides on annual basis recycled aggregate for civil service projects, that includes improving a nature trail in Bridgewater Twp.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	4/16/08	This facility purchases office supplies that are from recycled products.

ST GOBAIN PERFORMANCE PLASTICS

Site ID: ST GOBAIN PERFORMANCE PLASTICS
189547 460 MILLTOWN RD,
BRIDGEWATER TWP, NJ 08807

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	10/8/15	The facility has a written Environmental Policy
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	10/8/15	ISO 14001:2004 Certification. Original certification date: September 24, 2014. Certification expiration date: September 23, 2017.

SYMRISE INC @ MEDWAY IND PK

Site ID: SYMRISE INC @ MEDWAY IND PK
15925 170 180 INDUSTRIAL PKWY,
BRANCBURG TWP, NJ 08876

Stewardship Activities	Date Acknowledged	Comments
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	6/27/17	Symrise has been awarded several certifications and awards regarding its sustainability projects.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	6/27/17	Environmental policy is posted online.
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	6/27/17	Annual Report for 2016 is posted online.

<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>6/27/17</p>	<p>Carbon Footprint Analysis – Carbon Footprint data is posted online within the Annual Report (page 15).</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>6/27/17</p>	<p>Symrise has implemented various initiatives regarding sourcing of our raw materials and their supply chains sustainably.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/8/14</p>	<p>Facility implemented a new water efficient "Clean In Place" technology for cleaning tanks that resulted in a 4% reduction in water usage for the Branchburg facility.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/8/14</p>	<p>Energy Efficient lighting upgrade completed with motion sensors.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/8/14</p>	<p>Symrise Environmental Policy reviewed during inspection.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>7/8/14</p>	<p>2013 Annual Report: http://cr2013.symrise.com/our-performance/environment</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>7/8/14</p>	<p>Carbon Footprint data is outlined in this document: http://cr2013.symrise.com/our-performance/environment</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>7/8/14</p>	<p>Company has implemented an initiative to purchase sustainable raw materials More Information on this can be found here: http://www.symrise.com/sustainability/progress/sourcing/</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/12/08</p>	<p>The environmental policy is referenced in the following webpage: http://www.symrise.com/en/our-company/corporate-social-responsibility/ecology-quality-safety.html</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/16/08</p>	<p>The Environmental Policy is set forth in their 2007 Corporate Social Responsibility Report (not online) and referenced online at the following link: http://www.symrise.com/en/our-company/corporate-social-responsibility/ecology-quality-safety.html</p>

THE ALBROOK SCHOOL

Site ID: THE ALBROOK SCHOOL
 39054 361 SOMERVILLE RD, & SHANNON HILL RD
 BASKING RIDGE, NJ 07920

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/5/10	The facility has adopted the use of environmentally friendly cleaning solutions. Solutions are prepared on-site by staff.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	1/5/10	The facility has installed low flow toilets and faucet aerators. The kitchen uses a low flow dishwasher.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	1/5/10	The facility has landscaped with flora that is native to New Jersey. The facility participates in the Integrated Pest Management Program to reduce the use of pesticides.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	1/5/10	The facility conducts on-site composting in each classroom. The facility's newsletter and website offer environmental information. The facility has expanded its library resources to support its environmental curriculum.
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	1/5/10	The facility encourages employees to reduce its commuting trips as part of its environmental goals. Currently 2 to 4 employees are carpooling.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	3/10/09	The permittee utilizes composting bins in each of its classrooms. Composting is also conducted on a school-wide basis in an effort to reduce the volume of off-site solid waste disposal.

THE WILLOW SCHOOL

Site ID: THE WILLOW SCHOOL
 118758 1150 POTTERSVILLE RD,
 BEDMINSTER TWP, NJ 07921

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/25/09</p>	<p>This facility uses only "green" cleaning supplies. Annual Total Volatile Organic analyses of the facility's wastewater reveal nearly negligible amounts of hazardous waste in the effluent stream.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/25/09</p>	<p>This facility harvests rainwater from the roof, stores it in a 100% recycled plastic underground storage tank, and uses it to flush the toilets.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>11/25/09</p>	<p>All sanitary wastewater generated at this facility is treated on-site using a natural vegetation system.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>11/25/09</p>	<p>This facility has used recycled & salvaged construction materials including the use of "Forest Stewardship Council" certified lumber. All artificial lighting is controlled by sensors & the HVAC system is computer-controlled.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>11/25/09</p>	<p>The 8th grade social studies class planted a Native garden (with educational display) at the Township of Bedminster municipal office.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>11/25/09</p>	<p>The school's founder is a frequent guest speaker at ecologically-friendly conferences.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/25/09</p>	<p>This facility operates under an integrated ecological approach in building construction & operations and in ecologically based educational programs.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>11/25/09</p>	<p>Most of the school construction materials (lumber stone), school supplies (paper, pencils, art) & furniture are either from directly-recycled sources or are made out of recycled products.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>11/25/09</p>	<p>This facility's new school building has been awarded the "LEED Gold Certification". The barn structure has been awarded the "LEED Platinum Certification" - the first of its kind in the State of New Jersey.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/25/09</p>	<p>This facility installed & utilizes energy collected from photovoltaic panels.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>11/25/09</p>	<p>This facility generally only does business with companies that have established environmentally sound business practices.</p>
<p>ENERGY STAR Product Certification</p>	<p>5/6/08</p>	

Clean Water Act Recognition Programs (OWM).	5/6/08	
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/6/08	This facility uses only "green" cleaning supplies. Annual Total Volatile Organic analyses of the facility's wastewater reveal nearly negligible amounts of hazardous waste in the effluent stream.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/6/08	This facility harvests rainwater from the roof, stores it in a 100% recycled plastic underground storage tank, and uses it to flush the toilets.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/6/08	All artificial lighting is controlled by sensors & the HVAC system is computer-controlled.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/6/08	All sanitary wastewater generated at this facility is treated on-site using a natural vegetation system.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	5/6/08	This facility has used recycled & salvaged construction materials including the use of "Forest Stewardship Council" certified lumber.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	5/6/08	The school's founder is a frequent guest speaker at ecologically-friendly conferences.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/6/08</p>	<p>This facility operates under an integrated ecological approach in building construction & operations and in ecologically based educational programs.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>5/6/08</p>	
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>5/6/08</p>	<p>Most of the school construction materials (lumber stone), school supplies (paper, pencils, art) & furniture are either from directly-recycled sources or are made out of recycled products.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>5/6/08</p>	<p>This facility's new school building has been awarded the "LEED Gold Certification". The barn structure has been awarded the "LEED Platinum Certification" - the first of its kind in the State of New Jersey.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/6/08</p>	<p>This facility installed & utilizes energy collected from photovoltaic panels.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>5/6/08</p>	<p>This facility generally only does business with companies that have established environmentally sound business practices.</p>

TRAP ROCK INDUSTRIES

20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	11/24/14	The facility has installed solar panels to generate renewable energy for onsite operations as follows: 1. Roof Solar Panels System: Installed 2684 solar panels which generate 630.74 KW of DC power. This results in the reduction of 36204 Tons of Carbon Dioxide. The system is functional since 9/22/11. 2. Ground Solar Panels System:: Installed 15,849 solar panels which generate 4715.10 KW of DC power. This results in the reduction of 9588 Tons of Carbon Dioxide. The system is functional since 7/8/14.

TRUMP NATIONAL GOLF CLUB

Site ID: TRUMP NATIONAL GOLF CLUB

21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	2/14/08	Vast areas of exposed shale have been vegetated. This activity was intended to significantly reduce erosion. Endangered bird habitat has reportedly been expanded.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	2/14/08	The facility samples ground water and surface water at 16 locations in order to assess potential impacts from golf course activities. Reportedly, one (1) area of impact was identified via stream sampling. A heavily vegetated 50 foot stream buffer was planted in an effort to eliminate potential fertilizer impact. There are plans to add buffers to other potential areas of concern.

UNIPLEX PROFILE INC @ MURRAY IND PK

10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	5/23/14	Facility provided facilities and coordination with Veteran's groups, Boy Scouts, and Sussex County Utility Authority for the proper disposal of worn American flags. Rather than the traditional open burning, the Unites States flags are disposed of using the facility's crematoria.
7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.	5/23/14	Facility is in the business of recovery and cremation of deceased pets. All "removal bags" are now made of bio-degradable materials and provided to veterinarians.

BENTLEY ASSISTED LIVING

Site ID: BENTLEY ASSISTED LIVING
 37988 PHILLIPS RD,
 FRANKFORD TWP, NJ 078269549

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	3/7/13	This site is a 51 room senior facility that uses low flow shower heads, faucets and toilets in all of their bathrooms
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	8/21/08	This facility has low flow toilets and controls on each shower.

ECONO LODGE

Site ID: ECONO LODGE
40023 448 RT 206,
ANDOVER TWP, NJ 07860

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/20/13	Reduces pesticide usage through practice of Integrated Pest Management (IPM) and consultations with his commercial pesticide applicator business and restricted use pesticide dealer.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/20/13	Practices no-till/minimum tillage to reduce fuel usage.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	5/20/13	1. Has been recognized by the County Soil Conservation Agency for construction of soil conserving field contours and structures leading to reduced soil erosion/soil conservation and controlled surface water run-off. His practice of no-till/minimum till crop production methods contributes further to soil conservation objectives. 2. Farm has also been recognized by New Jersey Audubon Society as a farmer who has grown S.A.V.E. (Supports Agriculture Viability and the Environment) sunflower seed. Such program also requires farm to devote several acres to permanent grassland.

22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	8/4/11	1. Sussex County offers paper shredding to county residents, businesses, schools and municipalities in Sussex County every month since July 2006 to encourage recycling. 2. The methane gas generated from the landfill is converted to electricity. "Sussex Landfill Energy".
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	8/4/11	The facility provides tours to schools and scout groups to instruct them in recycling issues. The facility also presents an Earth Day recycling demonstration.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	12/23/10	Sussex Co. MUA offers paper shredding to county residents, businesses, schools and municipalities in Sussex County every month since July 2006 to encourage recycling.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	5/27/09	The facility provides tours to schools, and scout groups to instruct them in recycling issues. The dates of these activities can be provided. They also presented an Earth Day recycling demonstration on 4/22/09.

TENNESSEE GAS PIPELINE CO

Site ID: TENNESSEE GAS PIPELINE CO
 14493 164 LIBERTYVILLE RD,
 WANTAGE TWP, NJ 07461

Stewardship Activities	Date Acknowledged	Comments
Natural Gas STAR Program.	9/3/09	Excerpt from the company: "Compressor Station 325 participates in the EPA Natural Gas Star program as part of the El Paso Corporation commitment to this program. Membership status for El Paso Corporation can be found at: http://www.epa.gov/gasstar/partners/index.html ."
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	9/3/09	
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	9/3/09	Excerpt from the company states: "The Pipeline Group's Environmental, Health and Safety Management System (EMS) establish a framework for identification and implementation of environmental compliance measures. Additionally, the EMS includes monitoring and auditing measures to provide senior management with feedback on environmental performance and the effectiveness of the EMS. Implementation of the EMS requires various groups and departments within the Pipeline Group to provide technical support, resources and improvement recommendations."
23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	9/3/09	Excerpt from the company: "Compressor Station 325 participates in the EPA Natural Gas Star program as part of the El Paso Corporation commitment to this program. Membership status for El Paso Corporation can be found at: http://www.epa.gov/gasstar/partners/index.html ."
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	9/3/09	Excerpt from the company: Yes, greenhouse gas (GHG) emissions from Tennessee Gas Pipeline (TGP) Station 325 located in New Jersey were calculated as part of company-wide emission inventories conducted since 2005. The emission inventories in the most recent years were submitted to the California Climate Action Registry (CCAR) and followed methodologies described in the applicable version of the CCAR General Reporting Protocol (GRP). El Paso Corporation is the first natural gas company to submit certified emissions to CCAR and obtain the "climate action leader" status.

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/10/11</p>	<p>The Company has installed Automatic Faucets and Automatic Flush Switches in all the bathrooms at their facility. (Water Saving Fixtures)</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/10/11</p>	<p>The Company conserves the following material at its site: 1) Coffee Cups - totally eliminated from the site. The Employees at the Company must bring in and use their own coffee mugs (cuts down on paper and Styrofoam coffee cups). 2) Ink Cartridges from Xerox Machines - The spent ink cartridges in the Xerox Machines at the site are turned into crayons which are then sent to the elementary schools in Morristown to be used. 3) The Company donates all their computers and IT equipment to "Urban Renewal Corp" to be re-used by other organizations. The Company has no computer e- waste. 4) The coffee sachets used at the facility are recycled and sent to "Terra-Cycle" to be made into flooring. (See www.terracecycle.net) for further information. 5) The Company recycled 15,468 lbs. of Fiber Drums in 2010.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/10/11</p>	<p>Energy Use Reduction - Company recently has placed a film on all their windows to reduce the amount of UV lighting coming through the windows. All light bulbs at the site were changed to more energy efficient lightbulbs (from T-12 to T-8 lightbulbs).</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/10/11</p>	<p>The Company has an Environmental Policy signed by Upper Management including the Vice President of the Company.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/10/11</p>	<p>The Company operates under an Environmental Management System called: "Environmental Management Program" The Environmental Management Program deals with some waste minimization and energy conservation initiatives. Policy's refer to the Environmental Management Program, Waste Minimization Program, and the Energy Management Program;</p>

ALL STATE LEGAL SUPPLY CO

Site ID: ALL STATE LEGAL SUPPLY CO
13258 1 3 COMMERCE DR,
CRANFORD, NJ 07546

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/3/15	Allstate Legal participates every summer with its electrical provider in a Energy Curtailment Program to reduce energy. The facility has set times that they shut down completely, all machines are off, production processes shift which allows more energy to the electric grid.

API FOIL INC

Site ID: API FOIL INC
13176 329 NEW BRUNSWICK AVE,
RAHWAY, NJ 08827

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	11/2/12	The Company within the last 2 years is re-using their process water from their cooling towers. By re-using the process water, the Company saves water from being sent to the city Sewer System.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	11/2/12	Company within the last 4 years has installed motion sensors to all the lights at their facility. These sensors will detect motion and will turn on when someone enters the area and turn-off roughly 60 seconds later when a person leaves the area to conserve electrical energy.

ARNOLDS PEST CONTROL INC

Site ID: ARNOLDS PEST CONTROL INC
95632 9 QUINE ST,
CRANFORD, NJ 07016

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/20/13	Applies less pesticides by relying more on IPM. This is achieved by the use of rosemary oil and cedar oil. Also, the business uses mechanical methods involving the use of fly traps.

BALTUSROL COUNTRY GOLF CLUB

Site ID: BALTUSROL COUNTRY GOLF CLUB
44568 201 SHUNPIKE RD,
SPRINGFIELD, NJ 07081

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/14/15	Facility has self contained pesticide storage building. All pesticide containers kept inside secondary containment and building has floor drains dedicated to capturing any spills or leaks. These spills would then be put back into the drums. No waste of pesticides.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	10/14/15	VFD pump on storage pond pump house, this pump is the only pump that distributes to the irrigation system. The irrigation system is controlled via a Toro system, the wells are turned on via the computer system and only when needed. There is a sensor on the pond spillway, if pond goes about the 6" mark on the spillway the well pumps shut off so they dont waste water over the spillway. There is also a cart washwater reclamation system. All washwater is collected via a pad with a drain, any unused water is sprayed back onto the course.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	10/14/15	All golfer golf carts are electric. ~75 carts.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>10/14/15</p>	<p>All trees and debris is mulched and contained onsite to be dispersed back onto the course for landscaping purposes.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>10/14/15</p>	<p>Bird houses, Audubon Certified, ~100 acres of no mow/low mow, fine fescues grasses.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>10/14/15</p>	<p>Forestry Management Program initiated to remove invasive tree species and replace them with native oaks and others.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	8/12/14	<p>Recycles sulfuric acid by removing dissolved aluminum, discharged as aluminum sulfate. Small quantity. Chromic acid recycled by removing dissolved aluminum, discharged as aluminum chromate, small quantity. Acetone reclamation system installed last year to recycle and reuse acetone used to strip paint from metal. Paint residue removed and disposed of, acetone reused leading to more than a 75% reduction in new acetone purchases.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	8/12/14	<p>Plant layout of process tanks were rearranged to effectuate water use reduction. Streamline tanks for less dragout, typically the metal is dragged from tank to tank and the water is wasted on the ground, with this layout the water is carried over from tank to tank. Counter current rinse tank make up with subsequent tank rinse tank to reduce the addition of fresh water.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	8/12/14	<p>Timers are set up on rectifiers to shut off when the oxidation process is complete, saving electricity. High efficiency lighting installed throughout the building.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	8/12/14	<p>The acetone recycling system removes the paint residue from stripping paint off the material, this acetone is then reused leading to more than a 75% reduction in new acetone purchases. Facility went from purchasing 15+ 10L jugs of acetone to about 2 fresh 10 L jug purchases a month.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	8/12/14	<p>Facility has a written policy on efficient and quality operations and sound environmental practices.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	8/12/14	<p>Exchanged process control procedures with competitor to prolong use of Reverse Osmosis in process water.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/28/09</p>	<p>Recycle sulfuric acid by removing dissolved aluminum, discharged as aluminum sulfate Small quantity. Chromic acid recycled by removing dissolved aluminum, discharged as aluminum sulfate, small quantity.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/28/09</p>	<p>Plant layout of process tanks were rearranged to effectuate water use reduction. Streamline tanks for less dragout. Counter current rinse tank make up with subsequent tank rinse tank.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/28/09</p>	<p>Timers are set up on rectifiers to shut off when the oxidation process is complete. Saving on electrical consumption.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/28/09</p>	<p>Written policy on efficient and quality operation and sound environmental practices.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>4/28/09</p>	<p>Exchanged process control procedures with competitor to prolong use of Reverse Osmosis in process water</p>

BODYCOTE THERMAL PROCESSING INC ROSELLE

Site ID: BODYCOTE THERMAL PROCESSING INC ROSELLE
 773 304 COX ST,
 ROSELLE, NJ 07203

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/3/13</p>	<p>The facility has four electric vacuum furnaces that normally operate at around 1,550 degrees F. The vacuum furnaces have to be cooled down with water and each of the furnaces have a water jacket coiled system that cools down the furnace. The Company installed a Hydrothrifit closed loop water cooling system so that the water that is used to cool down these furnaces is recirculated through the closed loop system and is not sent to the sewer system, thus saving the Company thousands of gallons of water use a year. Water used to cool down furnaces is 300 gallons/minute.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/3/13</p>	<p>The facility installed a Dibalog device that measures the amount of electrical draw on the furnaces at their site. Each electrically heated item (such as the vacuum furnace, or the temper furnaces) is connected with dibalog modules which constantly monitor electrical demand and feed the information back to the dibalog central controller. Based upon this total demand the central processor will make very small adjustments in the heat up rate of the furnaces to prevent them from ever reaching their peak electrical peak. The dibalog system works intelligently, extremely quickly and only regulates power during the heat up portion of a cycle, which is not critical to quality. The Dibalog system will lower the electric bill from these electrical furnaces by up to 40% and therefore saves the Company money.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/3/13</p>	<p>Within the last 2 years, the facility has switched over all their light fixtures from mercury vapor lighting fixtures to T-5 bulbs. T5 fluorescent lamps have a higher luminous efficacy than T8 or T12 lamps. Luminous efficacy indicates how much light a lamp generates from the energy it consumes. The higher the value, the more energy efficient the lamp is. The luminous efficacy of T5 lamps is about 100 lm/W, while those of T8 and T12 lamps are only about 80 lm/W and 70 lm/W respectively.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/3/13</p>	<p>Company has an Environmental Policy that is signed by the General Manager of the site (Robert Lobell). The Company's Environmental Policy includes: 1) Training is provided to the employees at the site so employees are empowered to be responsible for the environmental aspects of their jobs. 2) The Company strives to comply with all environmental laws and regulatory requirements as well as those guidelines set out by corporate directors and customers. 3) The Company establishes objectives and targets to prevent and mitigate pollution to the air, water and land through accidental releases in day-to-day operations; and, to annually, or more frequently as needed, review these objectives and targets. 4) The Company states that they will strive to continually improve. Environmental Policy is posted at the site in various places.</p>

BUCKEYE PIPELINE CO

Site ID: BUCKEYE PIPELINE CO
 37398 2650 MARSHES DOCK RD, AKA 1001 LOWER RD
 LINDEN, NJ 07036

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	11/21/08	The company minimizes waste generation by what is purchased and used onsite to test their samples for analysis.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	11/21/08	This facility has a written policy on site that governs their environmental management practices. The policy addresses their mission and guiding principles. These principles include safety-environmental goals to continually improve safety and environmental performance.

CELGENE CORP

Site ID: CELGENE CORP
 689 86 MORRIS AVE,
 SUMMIT, NJ 07901

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	6/17/10	Celgene has installed water savings fixtures at their site. - The Company has installed automatic flush toilets in all their restrooms. The Company also makes their own De-ionized water (pure water) instead of purchasing de-ionized water from an outside firm and having it trucked into the site. There is a 65 gallon drum of de-ionized water in Building I and two 200 gallon de-ionized water drums located in Building C & D.

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/17/10</p>	<p>The Company does have an Environmental Policy (called the Celgene Global Environmental Health and Safety Mission) that is signed by the senior officer. The Principles of this Mission are: 1) To integrate Environmental, Health and Safety Objectives and Targets into the Company's business strategies and plans. 2) To comply with Environmental, Health and Safety Laws, Regulations, Standards and Ordinances in each of the countries in which the Company conducts business. 3) To educate employees with respect to Environmental, Health and Safety Performance and provide training to assist employees in performing their responsibilities. 4) To strive for an injury-free and environmentally sustainable workplace by building on the belief that incidents, injuries and environmental releases are potentially preventable and by implementing appropriate risk control measures. 5) To foster Environmental, Health and Safety ethics among management by setting management performance targets into the Company's business strategies. 6) To act responsibly and communicate openly with the Company's customers, neighbors, employees, government officials and other stakeholders relative to the safety profile of the Company's products and operations.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>6/17/10</p>	<p>The Company has an active commuter program. At least 78 people that work at the Company use a shuttle service (Van Pool) to go from their home to work. This shuttle service seems to only cover the people who live in the areas of Summit, Warren and Basking Ridge NJ. The Company also has at least 30 Active Carpools for their employees. The Company also states that 20 employees commute to their site daily using the train.</p>

Site ID: **CELGENE CORP**
14453 **556 560 MORRIS AVE,**
SUMMIT CITY, NJ 07901

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/17/18</p>	<p>Starting in 2018, Summit West Celgene Facility's cafeteria offers new containers for food take out containers. These new food storage containers are orange in color and if used by the employees at the Company can be brought back to the cafeteria, washed and be re-used by the cafeteria. These containers are helping eliminate the plastic take out food storage containers that are not recyclable or re-usable which is eliminating plastic containers going out as trash and eventually ending up in Landfills. Roughly 2 thirds of the employees at the Company are using the new containers.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>12/17/18</p>	<p>1) Summit West Celgene uses a Landscaping Company called "Bright View" that uses only electric powered leaf blowers and equipment to maintain the landscaping at the facility. 2) Summit West Celgene has also installed electric charging stations at their site for electric cars as an incentive for their employees to purchase electric vehicles. This has been done at most of the Celgene Facilities.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/17/18</p>	<p>Summit West Celgene hosts an Earth Day Vendor Fair at their site every April of each year for the Community. The Company provides vendors and speakers that talk and educate the Community about recycling, creating a smaller carbon footprint, using alternative energy that will save not only the world but also save us money. Summit West Celgene also has speakers that talk about local organic farmer's markets and summer activities that the entire family can participate in within the various cities and counties in NJ.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/17/18</p>	<p>Summit West Celgene does have a written Environmental Policy (POL-CORP-ADM10) that is signed by current Senior Vice President that establishes Celgene's commitment to the health and safety of its people and the protection of the environment. It describes the framework for Global EHS directives and the integration into company processes and activities.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/17/18</p>	<p>Celgene has established a Global Environmental, Health and Safety Management System, which serves as a roadmap and an organizational tool to help meet the commitments efficiently and effectively. It consists of the corporate policies, mission and mandate, service model, roles and responsibilities, goals and objectives and directives which together with Celgene's values, drives the Company's EHS performance.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>12/17/18</p>	<p>Celgene (as a Company) puts out an Annual Environmental Sustainability Report that can be found on their webpage.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>12/17/18</p>	<p>Summit West Celgene Offers the following Employee Trip Reduction Opportunities at their site: 1) The Company offers shuttles between their NJ Sites - employees can take shuttles to the 2 other Celgene Sites in NJ from their site instead of using their own cars to travel to the other sites. 2) The Company offers a shuttle to the train station in Summit to help reduce the amount of cars on the road. 3) The Company offers a Car Pool Incentive at their site - there are parking spaces in the parking lot that are designated as "Carpool Spots" - employees can go on the Company website and sign up to car pool with co-workers that live in the area to them. About 20 % of the Company carpools to work. 4) The Company offers Video Conferencing and "Webinars" where their employees now no longer have to travel to other sites to have meetings or conferences.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/17/18</p>	<p>Summit West Celgene has solar panels on the rooftops of 7 of the buildings at the site. The solar panels produce 1.7 megawatts of electricity which is about 12% of the energy need for the site.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>12/17/18</p>	<p>Celgene (as a Company) participates in the CDP (Carbon Disclosure Project), an independent process that helps companies measure, disclosure, manage, and share environmental performance strategies and information. Celgene has been an active participant in this reporting activity since 2009 to demonstrate their transparency and completeness on proper environmental management.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/26/17</p>	<p>1) Summit West Celgene uses a Landscaping Company called "Bright View" that uses only electric powered leaf blowers and equipment to maintain the landscaping at the facility. 2) Summit West Celgene has also installed electric charging stations at their site for electric cars as an incentive for their employees to purchase electric vehicles.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/26/17</p>	<p>Summit West Celgene hosts an Earth Day Vendor Fair at their site every year for the Community. The Company provides vendors and speakers that talk and educate the Community about recycling, creating a smaller carbon footprint, using alternative energy that will save not only the world but also save us money. Summit West Celgene also has speakers that talk about local organic farmer's markets and summer activities that the entire family can participate in within the various cities and counties in NJ.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/26/17</p>	<p>Summit West Celgene does have a written Environmental Policy (POL-CORP-ADM10) that is signed by current Senior Vice President that establishes Celgene's commitment to the health and safety of its people and the protection of the environment. It describes the framework for Global EHS directives and the integration into company processes and activities.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/26/17</p>	<p>Celgene has established a Global Environmental, Health and Safety Management System, which serves as a roadmap and an organizational tool to help meet the commitments efficiently and effectively. It consists of the corporate policies, mission and mandate, service model, roles and responsibilities, goals and objectives and directives which together with Celgene's values, drives the Company's EHS performance.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>6/26/17</p>	<p>Celgene (as a Company) puts out an Annual Environmental Sustainability Report that can be found on their webpage.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>6/26/17</p>	<p>Summit West Celgene Offers the following Employee Trip Reduction Opportunities at their site: 1) The Company offers shuttles between their NJ Sites - employees can take shuttles to the 2 other Celgene Sites in NJ from their site instead of using their own cars to travel to the other sites. 2) The Company offers a shuttle to the train station in Summit to help reduce the amount of cars on the road. 3) The Company offers a Car Pool Incentive at their site - there are parking spaces in the parking lot that are designated as "Carpool Spots" - employees can go on the Company website and sign up to car pool with co-workers that live in the area to them. About 20 % of the Company carpools to work. 4) The Company offers Video Conferencing and "Webinars" where their employees now no longer have to travel to other sites to have meetings or conferences.....they can now just go to a conference room and attend a web conference through a webinar.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>6/26/17</p>	<p>Summit West Celgene has solar panels on the rooftops of 7 of the buildings at the site. The solar panels produce 1.7 megawatts of electricity which is about 12% of the energy need for the site.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>6/26/17</p>	<p>Celgene (as a Company) participates in the CDP (Carbon Disclosure Project), an independent process that helps companies measure, disclosure, manage, and share environmental performance strategies and information. Celgene has been an active participant in this reporting activity since 2009 to demonstrate their transparency and completeness on proper environmental management.</p>

ENERGY STAR.	12/18/14	Merck Sharp & Dohme Corp has been a member of EPA's Energy Star Program since 2004 and the Company has a whole has received ENERGY STAR Sustained Excellence Awards multiple times since 2009. Merck & Co., Inc. (Merck) is a global, research-based pharmaceutical and healthcare company with a vision to be the most energy-efficient company in the pharmaceutical industry and a leader among FORTUNE 500 companies. Merck has a successful energy and sustainability program that reaches high levels of performance. For 2014 Merck is receiving ENERGY STAR Partner of the Year Sustained Excellence recognition for its continued leadership in energy management and strategic focus on helping others achieve world class status for energy management. Key 2013 accomplishments include: Achieving a 7.4-percent energy intensity reduction for its U.S./Puerto Rico operations and an 8.3-percent reduction globally compared to 2012. These reductions contributed to Merck reducing its greenhouse gas emissions by 10.4 percent from 2009 to 2012, and achieving its climate goal three years ahead of schedule. Increasing the size of Merck's portfolio of ENERGY STAR certified facilities by earning ENERGY STAR certification at a new building, while maintaining certification for three manufacturing sites and four office buildings. Registering all Merck manufacturing sites in EPA's ENERGY STAR Challenge for Industry, and meeting the Challenge at four sites in Europe. Investing over \$12.4 million in energy efficiency projects through the Merck energy efficiency capital fund. Promoting energy efficiency by mentoring other ENERGY STAR partner companies in conducting energy treasure hunts; actively participating in EPA's ENERGY STAR Focus on Energy Efficiency in Pharmaceutical Manufacturing; and engaging suppliers, customers, employees, and local communities through social media, events, and other communication tools.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	12/18/14	Merck Sharp & Dohme/Summit Facility is involved in R&D (Research and Development) activities and is constantly trying to find ways to reduce the amount of solvents used in the R&D activities which then reduces the amount of Hazardous Wastes that are generated from the R&D activities at the site. The Company purchased Ultra Performance Liquid Chromatography instruments (UPLCs) instead of purchasing High Performance Liquid Chromatography instruments (HPLCs). In purchasing UPLCs instead of HPLCs instruments, the Company estimates that they reduced their solvent usage by 70 to 90%. Thus, less hazardous waste is produced in the R&D activities and is shipped off-site. The Company is also actively involved with Sustainable (Green) Chemistry at the R&D level. Sustainable chemistry is the design of chemical products and processes that reduce or eliminate the use or generation of hazardous substances by offering environmentally friendly alternatives to the more hazardous chemicals and process that are often used in both consumer and industrial applications. Green chemistry is promoting pollution prevention at the molecular level early on in the development of chemicals produced at the R&D level.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	12/18/14	Merck Sharp & Dohme/Summit Facility Energy Team installed an innovative water treatment skid for the condenser water loop for a building at their site in Summit NJ. The water treatment skid consists of a bio cell and side stream filter that can filter particles up to 1 micron. This project has helped reduce water usage by roughly 900,000 gallons annually.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	12/18/14	The Site Energy Team at Merck Sharp & Dohme in Summit has implemented the following energy efficiency measures: 1) Laboratory hood face velocity reduction 2) Laboratory hood sash program (educating the scientists about the importance of keeping hood sashes closed).

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>12/18/14</p>	<p>Merck Sharp & Dohme/Summit Facility investigates reuse opportunities whenever possible. The Company was successful in the implementation of the re-use of Dimethyl Sulfoxide (DMSO). High purity DMSO is used in one of the processes in the R&D operations at their facility. After the process is completed, the DMSO could not be re-used by the facility because of the reduction in purity of the DMSO after the process. The residual DMSO had to be sent out as waste to the Company's waste disposal Company (Clean Harbors). Summit Property/Merck with the help of the Company's waste disposal Company (Clean Harbors), was able to identify a vendor that is able to resell the used DMSO as is from Schering-Plough to facilities that do not have stringent requirements on the purity of the DMSO that they use in their processes. On a monthly basis, roughly four 55-gallon drums of DMSO from Schering-Plough are diverted from the waste stream and re-used by other Companies.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstrable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>12/18/14</p>	<p>Merck Sharp & Dohme/Summit Facility completed the construction of a building (in early 2009, that was designed with green design concepts from LEED. The following green concepts were incorporated into this new building: 1) daylight harvesting 2) solar shading 3) clear story for transmitting light 4) optimized air handling systems (CO2 monitoring and control of air handling system) 5) Lighting control system. Here is also a list of projects the Site Energy Team at the facility has implemented at the site that has resulted in the annual reduction of approximately 8,000 MWH of electrical usage and 55 Billion BTU's. The Energy Use Reduction activities at Schering-Plough Summit facility include: 1) The installation of roof-top solar panels. 2) Chiller Plant optimizations (conversion from primary-secondary flow to variable primary flow, improved pump sequencing, adaptive control, preferential chiller loading and installation of high performance air handling units). 3) Building lighting controls - (projects include daylight harvesting; installation of Square D Powering lighting control systems that function on the breaker level and controls lighting circuits based on the time of day; and the retrofitting of T12 lamp fixtures with energy efficient T8 and T5 lamp fixtures). 4) Boiler pressure reduction and steam distribution system optimization.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>12/18/14</p>	<p>Merck Sharp & Dohme/Summit Facility each year invites classes from local elementary schools (Summit Washington Elementary School and children from Rutgers 4H Extension Program), the employees own children during "Take your Child to Work Day", as well as members of the NJ Chapter of the League of Woman Voters to come visit the Company's "Green Room." The Green Room provides an educational interactive display with first hand knowledge of how Solar Power works. Presentations are given to the students (5th graders and below), and adults by the Company about renewable resources, energy conservation, water conservation, alternate energy other than fossil fuels, greenhouse gas effects on the environment and recycling initiatives.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>12/18/14</p>	<p>Merck Sharp and Dohme/Summit Location does have a comprehensive written environmental policy at their site that is signed by their current senior officer. The Environmental Policy can be found under the following website: http://www.merck.com/responsibility/environment/home.html or www.merck.com/responsibility/merck-english-manufacturing-lr.pdf The environmental policy covers such areas as: Merck commits to: 1) Comply with the letter and spirit of all applicable laws, regulations, and other requirements designed to protect safety, health and the environment. 2) Create and maintain a safe and healthy working environment for all employees, contractors, and guests. 3) Protect our environment and the communities in which we operate; conserve resources, promote recycling, reduce hazardous material use, and prevent pollution. 4) Promote a global standard of care that minimizes EHS impacts from our operations, products and partnerships. 5) Foster a culture of EHS excellence built upon integrity, accountability, collaboration, and the active participation of all. 6) Continuously improve our systems, processes, and performance and integrate EHS throughout our global operations. 7) Engage stakeholders and communicate our progress and performance. 8) Provide appropriate resources and build the individual knowledge and capabilities to achieve these commitments.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>12/18/14</p>	<p>Merck Sharp and Dohme/Summit Location has established an Environmental, Health and Safety (EHS) Management System which consists of corporate policy, standards, procedures, plans, expectations, organizational structures and reward systems that, together with values, attitudes, and individual day-to-day actions drives the Company's EHS performance. EHS Standards are built upon the corporate policy, and establish specific administrative and technical expectations for EHS management and communicates the required elements of the corporate management system to the Merck/Summit Property facility. Merck Sharp and Dohme/Summit Location has developed a management system that incorporates site specific EHS procedures and plans to ensure compliance with both external and internal EHS requirements.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>12/18/14</p>	<p>The Company does have an Annual Environmental Report that addresses Safety, Health and Environmental concerns at the Merck Sharp and Dohme/Summit Property Site. The report is sent to all their stake holders as well as can be given out to public in the form of booklets. The 2013 Annual Environmental Report can be found under the corporate website at: www.merck.com/responsibility/environment/</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>12/18/14</p>	<p>Merck Sharp & Dohme Corp as a whole is a participant since 2004 in EPA's Energy Star Program (see below).</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>12/18/14</p>	<p>Merck Sharp & Dohme Summit Facility has teamed up with Meadowlink (A Transportation Management Association), to assist employees with setting up carpools, vanpools and mass transit pre-tax benefits. Free shuttle service is provided to and from the local train stations for employees using public transportation to many of the main campuses. For vanpools, Merck Sharp & Dohme Summit Facility also contributes towards the lease of a van to help defray the costs of the vanpool. For carpools, on-site preferred parking is used to encourage carpooling. In order to reduce the amount of traveling of employees between the various Merck NJ sites, Merck Sharp & Dohme Summit Facility provides video conferencing and increasing web conferencing capabilities to conduct meetings. There is also both an inter-campus shuttle between Merck Sites in NJ and an intra-campus shuttle service for getting employees around the Merck Sharp & Dohme Summit Facility.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>12/18/14</p>	<p>Merck Sharp & Dohme/Summit Facility uses solar energy at the site. The Company installed a solar photovoltaic system on the rooftops of seven buildings at the site. The solar photovoltaic system produces 1.7 megawatts of energy which is roughly 12% of the sites peak energy needs.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>12/18/14</p>	<p>Merck Sharp & Dohme/Summit Property has been a participant of the Carbon Disclosure Project since 2003. Information about Merck Sharp & Dohme/Summit Property can be obtained at the following link: http://www.merck.com/responsibility/environment/home.html or www.merck.com/about/views-and-positions/Climate_Change_Statement.pdf (Page 2) Merck Sharp & Dohme/Summit Property uses the World Resources Institute Greenhouse Gas Protocol to calculate and report greenhouse gas emissions to the Carbon Disclosure Project.</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>12/18/14</p>	<p>Merck Sharp & Dohme/Summit Facility does have a Vendor Supply Chain Requirement: Please refer to the attached link: http://www.merck.com/corporate-responsibility/basics/supply-chain-management/supply-chain-quality/ This link provides information about Merck's Corporate Responsibility (the Corporate Responsibility Report is available at this link too - which talks about Merck's commitment to UN Global Compact). Please note that Merck is a founding member of PSCI - Pharmaceutical Supply Chain Initiative, and has implemented programs to support this work. Specifically, EHS components of the vendor supply chain can be found under the "Promoting Responsible Environmental, Labor and Human Rights Standards among External Manufacturers" under the "Approach" tab of the web page for which the link was provided above.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>12/18/14</p>	<p>Merck Sharp & Dohme/Summit Facility formed an Energy Team (which is down to 4 members now since the facility will be closing very soon), whose members deliver several presentations of their energy conservation program at their site to other Company representatives at conferences organized by the Chemistry Council of NJ; The Pharmaceutical Maintenance Operations Network; The Union County 'Go Green' Conference; and The NJ Pharma and Food Energy Committee. The presentations given by the Energy Team from Merck Sharp & Dohme/Summit Facility to their peers at these conferences emphasized the need to conserve as the most effective way to reduce emissions and to apply renewable energy sources. Through these conferences, the Energy Team was able to relay energy conservation ideas and promote green house gas reduction ideas to their peers. Also, Summit Property/Merck's Energy Team arranges on-site tours for their peers from Astra Zeneca and NJ Pharma and Food Energy Committee to come to the site and to take a tour of the Company's Chiller Plant Optimization Project.</p>
<p>WasteWise.</p>	<p>3/16/11</p>	<p>Summit Property/Merck is part of the Wastewise voluntary program sponsored by EPA.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/16/11</p>	<p>Summit Property/Merck is involved in R&D (Research and Development) activities and is constantly trying to find ways to reduce the amount of solvents used in the R&D activities which then reduces the amount of Hazardous Wastes that are generated from the R&D activities at the site. The Company purchased Ultra Performance Liquid Chromatography instruments (UPLCs) instead of purchasing High Performance Liquid Chromatography instruments (HPLCs). In purchasing UPLCs instead of HPLCs instruments, the Company estimates that they reduced their solvent usage by 70 to 90%. Thus, less hazardous waste is produced in the R&D activities and is shipped off-site. The Company is also actively involved with Sustainable (Green) Chemistry at the R&D level. Sustainable chemistry is the design of chemical products and processes that reduce or eliminate the use or generation of hazardous substances by offering environmentally friendly alternatives to the more hazardous chemicals and process that are often used in both consumer and industrial applications. Green chemistry is promoting pollution prevention at the molecular level early on in the development of chemicals produced at the R&D level.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/16/11</p>	<p>Summit Property/Merck's Energy Team installed an innovative water treatment skid for the condenser water loop for a building at their site in Summit NJ. The water treatment skid consists of a bio cell and side stream filter that can filter particles up to 1 micron. This project has helped reduce water usage by roughly 900,000 gallons annually.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/16/11</p>	<p>The Site Energy Team at Summit Property/Merck has implemented the following energy efficiency measures: 1) Laboratory hood face velocity reduction 2) Laboratory hood sash program (educating the scientists about the importance of keeping hood sashes closed).</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/16/11</p>	<p>Summit Property/Merck investigates reuse opportunities whenever possible. The Company was successful in the implementation of the re-use of Dimethyl Sulfoxide (DMSO). High purity DMSO is used in one of the processes in the R&D operations at their facility. After the process is completed, the DMSO could not be re-used by the facility because of the reduction in purity of the DMSO after the process. The residual DMSO had to be sent out as waste to the Company's waste disposal Company (Clean Harbors). Summit Property/Merck with the help of the Company's waste disposal Company (Clean Harbors), was able to identify a vendor that is able to resell the used DMSO as is from Schering-Plough to facilities that do not have stringent requirements on the purity of the DMSO that they use in their processes. On a monthly basis, roughly four 55-gallon drums of DMSO from Schering-Plough are diverted from the waste stream and re-used by other Companies. New Organic Food Waste Recycling Program (Started in Late 2009), Summit Property/Merck facility initiated an Organic Food Waste recycling program in mid-2009. Here are the tonnages of food waste recycled: 2009 - 7.4 Tons 2010 - 13.7 Tons 2011 (through June) - 3.7 Tons</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/16/11</p>	<p>Summit Property/Merck completed the construction of a building (in early 2009), that was designed with green design concepts from LEED. The following green concepts were incorporated into this new building: 1) daylight harvesting 2) solar shading 3) clear story for transmitting light 4) optimized air handling systems (CO2 monitoring and control of air handling system) 5) Lighting control system. Here is also a list of projects the Site Energy Team at the facility has implemented at the site that has resulted in the annual reduction of approximately 8,000 MWH of electrical usage and 55 Billion BTU's. The Energy Use Reduction activities at Schering-Plough Summit facility include: 1) The installation of roof-top solar panels. 2) Chiller Plant optimizations (conversion from primary-secondary flow to variable primary flow, improved pump sequencing, adaptive control, preferential chiller loading and installation of high performance air handling units). 3) Building lighting controls - (projects include daylight harvesting; installation of Square D Powering lighting control systems that function on the breaker level and controls lighting circuits based on the time of day; and the retrofitting of T12 lamp fixtures with energy efficient T8 and T5 lamp fixtures). 4) Boiler pressure reduction and steam distribution system optimization.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/16/11</p>	<p>Summit Property/Merck each year invites classes from local elementary schools (Summit Washington Elementary School and children from Rutgers 4H Extension Program), the employees own children during "Take your Child to Work Day", as well as members of the NJ Chapter of the League of Woman Voters to come visit the Company's "Green Room." The Green Room provides an educational interactive display with first hand knowledge of how Solar Power works. Presentations are given to the students (5th graders and below), and adults by the Company about renewable resources, energy conservation, water conservation, alternate energy other than fossil fuels, greenhouse gas effects on the environment and recycling initiatives.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/16/11</p>	<p>The Company does have a comprehensive written environmental policy at their site that is signed by their current senior officer. The Environmental Policy can be found under the following website: http://www.merck.com/responsibility/environment/home.html or www.merck.com/responsibility/merck-english-manufacturing-lr.pdf The environmental policy covers such areas as: Merck commits to: 1) Comply with the letter and spirit of all applicable laws, regulations, and other requirements designed to protect safety, health and the environment. 2) Create and maintain a safe and healthy working environment for all employees, contractors, and guests. 3) Protect our environment and the communities in which we operate; conserve resources, promote recycling, reduce hazardous material use, and prevent pollution. 4) Promote a global standard of care that minimizes EHS impacts from our operations, products and partnerships. 5) Foster a culture of EHS excellence built upon integrity, accountability, collaboration, and the active participation of all. 6) Continuously improve our systems, processes, and performance and integrate EHS throughout our global operations. 7) Engage stakeholders and communicate our progress and performance. 8) Provide appropriate resources and build the individual knowledge and capabilities to achieve these commitments.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/16/11</p>	<p>Merck/Summit Property has established an Environmental, Health and Safety (EHS) Management System which consists of corporate policy, standards, procedures, plans, expectations, organizational structures and reward systems that, together with values, attitudes, and individual day-to-day actions drives the Company's EHS performance. EHS Standards are built upon the corporate policy, and establish specific administrative and technical expectations for EHS management and communicates the required elements of the corporate management system to the Merck/Summit Property facility. Merck/Summit Property has developed a management system that incorporates site specific EHS procedures and plans to ensure compliance with both external and internal EHS requirements.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>3/16/11</p>	<p>The Company does have an Annual Environmental Report that addresses Safety, Health and Environmental concerns at the Merck/Summit Property Site. The report is sent to all their stake holders as well as can be given out to public in the form of booklets. The 2009 Annual Environmental Report can be found under the corporate website at: www.merck.com/responsibility/environment/ Note: Summit Property/Merck does not have much information for 2010 on the Merck Website since the site was still changing from Summit Property/Schering to Summit Property/Merck, 2011 and years beyond Environmental Management Information will be under the Merck Annual Report for Summit Property.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>3/16/11</p>	<p>Summit Property/Merck is part of the Wastewise voluntary program sponsored by EPA.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/16/11</p>	<p>Summit Property/Merck has teamed up with Meadowlink (A Transportation Management Association), to assist employees with setting up carpools, vanpools and mass transit pre-tax benefits. Free shuttle service is provided to and from the local train stations for employees using public transportation to many of the main campuses. For vanpools, Summit Property/Merck also contributes towards the lease of a van to help defray the costs of the vanpool. For carpools, on-site preferred parking is used to encourage carpooling. In order to reduce the amount of traveling of employees between the various Merck NJ sites, Summit Property/Merck provides video conferencing and increasing web conferencing capabilities to conduct meetings. There is also both an inter-campus shuttle between Merck Sites in NJ and an intra-campus shuttle service for getting employees around the Summit Property/Merck Site.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/16/11</p>	<p>Summit Property/Merck uses solar energy at the site. The Company installed a solar photovoltaic system on the rooftops of seven buildings at the site. The solar photovoltaic system produces 1.7 megawatts of energy which is roughly 12% of the sites peak energy needs. Note: This project is one of the largest rooftop solar power installations in the United States according to Company officials.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/16/11</p>	<p>Merck/Summit Property has been a participant of the Carbon Disclosure Project since 2003. Information about Merck/Summit Property can be obtained at the following link: http://www.merck.com/responsibility/environment/home.html or www.merck.com/about/views-and-positions/Climate_Change_Statement.pdf (Page 2) Merck/Summit Property uses the World Resources Institute Greenhouse Gas Protocol to calculate and report greenhouse gas emissions to the Carbon Disclosure Project.</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/16/11</p>	<p>Summit Property/Division of Merck does have a Vendor Supply Chain Requirement: Please refer to the attached link: http://www.merck.com/corporate-responsibility/basics/supply-chain-management/supply-chain-quality/ This link provides information about Merck's Corporate Responsibility (the Corporate Responsibility Report is available at this link too - which talks about Merck's commitment to UN Global Compact). Please note that Merck is a founding member of PSCI - Pharmaceutical Supply Chain Initiative, and has implemented programs to support this work. Specifically, EHS components of the vendor supply chain can be found under the "Promoting Responsible Environmental, Labor and Human Rights Standards among External Manufacturers" under the "Approach" tab of the web page for which the link was provided above.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>3/16/11</p>	<p>Summit Property/ Merck formed an Energy Team whose members deliver several presentations of their energy conservation program at their site to other Company representatives at conferences organized by the Chemistry Council of NJ; The Pharmaceutical Maintenance Operations Network; The Union County 'Go Green' Conference; and The NJ Pharma and Food Energy Committee. The presentations given by the Energy Team from Summit Property/Merck to their peers at these conferences emphasized the need to conserve as the most effective way to reduce emissions and to apply renewable energy sources. Through these conferences, the Energy Team was able to relay energy conservation ideas and promote green house gas reduction ideas to their peers. Also, Summit Property/Merck's Energy Team arranges on-site tours for their peers from Astra Zeneca and NJ Pharma and Food Energy Committee to come to the site and to take a tour of the Company's Chiller Plant Optimization Project.</p>
<p>WasteWise.</p>	<p>5/21/09</p>	<p>The Company is part of the Wastewise voluntary program sponsored by EPA.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/21/09</p>	<p>Schering-Plough's Summit facility is involved in R&D (Research and Development) activities and is constantly trying to find ways to reduce the amount of solvents used in the R&D activities which then reduces the amount of Hazardous Wastes that are generated from the R&D activities at the site. The Company recently purchased Ultra Performance Liquid Chromatography instruments (UPLCs) instead of purchasing High Performance Liquid Chromatography instruments (HPLCs). In purchasing UPCLs instead of HPLCs instruments, the Company estimates that they reduced their solvent usage by 70 to 90%. Thus, less hazardous waste is produced in the R&D activities and is shipped off-site. The Company is also actively involved with Sustainable (Green) Chemistry at the R&D level. Sustainable chemistry is the design of chemical products and processes that reduce or eliminate the use or generation of hazardous substances by offering environmentally friendly alternatives to the more hazardous chemicals and process that are often used in both consumer and industrial applications. Green chemistry is promoting pollution prevention at the molecular level early on in the development of chemicals produced at the R&D level.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/21/09</p>	<p>Schering-Plough's Energy Team installed an innovative water treatment skid for the condenser water loop for a building at their site in Summit NJ. The water treatment skid consists of a bio cell and side stream filter that can filter particles up to 1 micron. This project has helped reduce water usage by roughly 900,000 gallons annually.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/21/09</p>	<p>The Site Energy Team at the facility has implemented the following energy efficiency measures: 1) Laboratory hood face velocity reduction 2) Laboratory hood sash program (educating the scientists about the importance of keeping hood sashes closed).</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/21/09</p>	<p>Schering-Plough's Summit facility investigates reuse opportunities whenever possible. The Company was successful in the implementation of the re-use of Dimethyl Sulfoxide (DMSO). High purity DMSO is used in one of the processes in the R&D operations at their facility. After the process is completed, the DMSO could not be re-used by the facility because of the reduction in purity of the DMSO after the process. The residual DMSO had to be sent out as waste to the Company's waste disposal Company (Clean Harbors). Schering-Plough with the help of the Company's waste disposal Company (Clean Harbors), was able to identify a vendor that is able to resell the used DMSO as is from Schering-Plough to facilities that do not have stringent requirements on the purity of the DMSO that they use in their processes. On a monthly basis, roughly four 55-gallon drums of DMSO from Schering-Plough are diverted from the waste stream and re-used by other Companies.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/21/09</p>	<p>Schering-Plough's Summit facility recently completed the construction of a building that was designed with green design concepts from LEED. The following green concepts were incorporated into this new building: 1) daylight harvesting 2) solar shading 3) clear story for transmitting light 4) optimized air handling systems (CO2 monitoring and control of air handling system) 5) Lighting control system. Here is also a list of projects the Site Energy Team at the facility has implemented at the site that has resulted in the annual reduction of approximately 8,000 MWH of electrical usage and 55 Billion BTU's. The Energy Use Reduction activities at Schering-Plough Summit facility include: 1) The installation of roof-top solar panels. 2) Chiller Plant optimizations (conversion from primary-secondary flow to variable primary flow, improved pump sequencing, adaptive control, preferential chiller loading and installation of high performance air handling units). 3) Building lighting controls - (projects include daylight harvesting; installation of Square D Powering lighting control systems that function on the breaker level and controls lighting circuits based on the time of day; and the retrofitting of T12 lamp fixtures with energy efficient T8 and T5 lamp fixtures). 4) Boiler pressure reduction and steam distribution system optimization.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/21/09</p>	<p>The Company each year invites classes from local elementary schools (Summit Washington Elementary School and children from Rutgers 4H Extension Program), the employees own children during "Take your Child to Work Day", as well as members of the NJ Chapter of the League of Woman Voters to come visit the Company's "Green Room." The Green Room provides an educational interactive display with first hand knowledge of how Solar Power works. Presentations are given to the students, children and adults by the Company about renewable resources, energy conservation, greenhouse gas effects on the environment and recycling initiatives.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/21/09</p>	<p>The Company does have a comprehensive written environmental policy at their site that is signed by their current senior officer (Ian McInnes - Senior Vice President and Fred Hassan - Chairman & Chief Executive Officer). The Report is called " Report on Safety, Health and Environment" and a copy of the report (booklet) is available to the public. The environmental policy covers many areas such as: 1) The policy covers safety, health and environmental excellence as an essential element of every activity and as a shared business value for the Company. 2) The policy covers how to provide a safe, healthy workplace for employees, contractors and visitors at the Schering-Plough Facility. 3) The policy covers how to minimize adverse environmental impacts from company activities, products and services by using processes, practices, materials, and products that avoid, reduce or control pollution. 4) The policy covers how to comply with applicable laws, regulations, and other requirements designed to protect safety, health, and the environment. 5) The policy covers how to ensure that employees are qualified to perform their duties and encourages the active participation of all employees in safety, health and environmental efforts and initiatives. 6) The policy covers how to promotes the responsible and efficient use of energy and natural resources and other sustainable business practices within the Company as well as creates an atmosphere where safety, health, environmental excellence, stewardship, and coaching among employees are encouraged and valued. 7) The policy covers how to identify the occupational safety and health hazards as well as the environmental hazards of Schering-Plough products and materials and communicates this information to the employees and customers. 8) The policy covers how to establishes a Corporate Environmental and Safety Council to establish corporate safety, health and environmental policies and standards and to address safety, health and environmental compliance and management issues throughout the company. 9) The policy covers how to develop global safety, health and environmental standards that apply to Schering-Plough facilities worldwide and how to communicate the required elements of the management system to the employees of these facilities. 10) The policy covers how employees/management participates in the development of external safety, health and environmental laws, regulations, standards and guidelines for the company. 11) The policy covers how to regularly measure and communicate safety, health and environmental performance to key stakeholders for the Company and identifies ways to continually improve safety, health and environmental performance at the facility. 12) The policy covers how to hold management and employees accountable for their performance in implementing this environmental policy.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/21/09</p>	<p>Schering-Plough has established a Safety, Health and Environmental (SHE) Management System which consists of corporate policy, standards, procedures, plans, expectations, organizational structures and reward systems that, together with values, attitudes, and individual day-to-day actions drives the Company's SHE performance. SHE Standards are built upon the corporate policy, and establish specific administrative and technical expectations for SHE management and communicates the required elements of the corporate management system to the Schering-Plough facilities. Schering-Plough's Summit facility has developed a management system that incorporates site specific SHE procedures and plans to ensure compliance with both external and internal SHE requirements.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/21/09</p>	<p>The Company does have an Annual Environmental Report that addresses Safety, Health and Environmental concerns at the Schering-Plough facilities. The report is sent to all their stake holders as well as can be given out to public in the form of booklets. The most recent Annual Environmental Report can be found under the corporate website at: http://www.ksg3.com/2009_S-P_SHE_Annual_Report/safety_health_and_environmental_programs/page.php?id=41</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>5/21/09</p>	<p>The Company is part of the Wastewise voluntary program sponsored by EPA.</p>

<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/21/09</p>	<p>Schering-Plough has teamed up with Meadowlink (A Transportation Management Association), to assist employees with setting up carpools, vanpools and mass transit pre-tax benefits. Schering provides free shuttle services to and from the locate train stations for employees using public transportation to many of the main campuses. for vanpools, Schering-Plough also contributes towards the lease of a van to help defray the costs of the vanpool. For carpools, on-site preferred parking is used to encourage carpooling. In order to reduce the amount of traveling of employees between the various Schering -Plough NJ sites, Schering-Plough provides video conferencing and web conferencing capabilities to conduct meetings, and intra-campus shuttle service.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/21/09</p>	<p>The Company uses solar energy at the site. The Company installed a solar photovoltaic system on the rooftops of seven buildings at the site. The solar photovoltaic system produces 1.7 megawatts of energy which is roughly 12% of the sites peak energy needs. Note: This project is one of the largest rooftop solar power installations in the United States according to Company officials.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>5/21/09</p>	<p>Schering-Plough Corporation (including the Summit facility) has been a participant of the Carbon Disclosure Project since 2003. Information about Schering-Plough can be obtained at the following link: https://www.cdproject.net/en-US/Results/Pages/Responses.aspx?Search=True&Keyword=Schering-Plough Schering-Plough uses the World Resources Institute Greenhouse Gas Protocol to calculate and report greenhouse gas emissions to the Carbon Disclosure Project.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>5/21/09</p>	<p>Schering-Plough's Summit facility formed an Energy Team whose members deliver several presentations of their energy conservation program at their site to other Company representatives at conferences organized by the Chemistry Council of NJ; The Pharmaceutical Maintenance Operations Network; The Union County 'Go Green' Conference; and The NJ Pharma and Food Energy Committee. The presentations given by the Energy Team from Schering-Plough to their peers at these conferences emphasized the need to conserve as the most effective way to reduce emissions and to apply renewable energy sources. Through these conferences, the Energy Team was able to relay energy conservation ideas and promote green house gas reduction ideas to their peers. Also, Schering-Plough's Energy Team arranges on-site tours for their peers from Astra Zeneca and NJ Pharma and Food Energy Committee to come to the site and to take a tour of the Company's Chiller Plant Optimization Project.</p>

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	1/11/11	Chemetail has reformulated products to make them more environmentally friendly (i.e. reformulated chrome containing products to non-chrome products).
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	1/11/11	Recycling of scrap metal, fluorescent light bulbs and spent batteries.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	1/11/11	
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	1/11/11	Chemetail US Inc utilizes a Safety,Health and Environmental Management System required by parent company Rockwood Holding Inc.

------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/16/16</p>	<p>The facility modified its effluent treatment such that more environmentally friendly materials are used.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/16/16</p>	<p>The facility implemented a Water Conservation and Drought Management Plan. It has taken several steps to reduce water use.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/16/16</p>	<p>The facility has taken action to order less chemicals to reduce disposal.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/16/16</p>	<p>The facility has implemented a Responsible Care Policy.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/16/16</p>	<p>The facility has a comprehensive Environmental, Safety and Health Plan. This plan incorporates monitoring safety incidents, environmental releases, etc. Performance is evaluated annually.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>8/16/16</p>	<p>The facility mentors other businesses through phone consultations and on-site visits.</p>

CITGO HOLDINGS TERMINALS

Site ID: CITGO HOLDINGS TERMINALS
14454 4801 S WOOD AVE,
LINDEN, NJ 07036

Stewardship Activities	Date Acknowledged	Comments
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	8/12/14	Kinder Morgan implements an Environmental Management System (EMS) which applies to the maintenance/operation of this terminal in an environmentally sensible manner. Kinder Morgan uses a permit management software system where they deconstruct all permit/regulatory requirements into action items, assign a responsible party and manager and prescribe a required interval/due dates. This system then sends reminders to the assigned responsible party via email in the weeks leading up to the required due date (i.e. 30 days out, 2 weeks out, 1 week out, 72 hours, 48 hours, 24 hours), until the assigned user logs into the system and manually certifies that he/she addressed the item accordingly.

COGEN TECHNOLOGIES INC LINDEN VENTURE

Site ID: COGEN TECHNOLOGIES INC LINDEN VENTURE
32509 RAILROAD AVE & CHEMICO AVE,
LINDEN, NJ 07036

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/19/16	In 2005, the facility upgraded the demineralization system (used to produce high quality water for steam production) with the addition of a reverse osmosis (RO) system. This resulted in a significant reduction in hazardous materials used to regenerate the resins in the primary cation and anion units. The project reduced the amount of hazardous materials stored on site for water treatment (sulfuric acid, sodium hydroxide) by over 60%. The reduction in chemical usage eliminated about 300 trucks delivering chemicals to the facility per year. Additionally, the project resulted in a reduction in the concentration of total dissolved solids (TDS) of about 80%. In 2014, due to reduced hazardous waste generation, the plant qualified as a conditionally exempt small quantity generator (CESQG). The plant continues to operate as a CESQG. Beginning in 2016, the plant began a program to replace the Selective Catalytic Reactor catalysts on each of the 5 units, Linden 100 through 500. Unit 100's SCR was replaced in April 2016. The replacement catalyst was manufactured and installed by Cormetech and consisted of 20 replacement modules. The new catalyst is a more efficient design than the existing catalyst, resulting in an ammonia slip and usage reduction. Operational data collected since the installation of the new catalyst has indicated an approximately 20% reduction of ammonia consumption. Emissions continue to be monitored to determine the reductions.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/19/16	In 2012, the facility has installed an auto-flush system on the Unit 6 combustion turbine to minimize cooling water use. Additionally, high temperature sump pumps were installed to minimize the use of quenching water.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/19/16</p>	<p>The site has identified a beneficial use for its spent resin. Instead of disposing of this material by landfill, the spent resin is sold as an additive to be used in the drilling process.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>7/19/16</p>	<p>Linden Cogen has implemented a comprehensive site wide recycling program (paper, cardboard, glass, plastic, aluminum, etc.) significantly reducing the amount of material being disposed of. Employees benefit from this program by being reminded to recycle on a daily basis, thus increasing environmental awareness which is carried through to home and family. Waste disposal costs at the facility have since been reduced.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/19/16</p>	<p>Linden Cogen provides training and career development to students in the community through its Advanced Careers in Energy (ACES) program. The program provides participants with hands on training in power plant operations including pollution control systems, waste management and water treatment. The environmental program includes training pertaining to state and federal environmental regulations including acid rain, ozone depletion and global warming. Students completing the program demonstrate a good understanding of the creation of electricity and steam, while meeting NJ and federal air pollution regulations. There were four (4) ACE Students that graduated in 2015/2016. We are currently in the process of interviewing candidates for the 2016/2017 program. Linden Cogen is also an active member of the Bayway Complex Community Advisory Panel and Linden Industrial Association where meetings are held regularly to keep the Linden and surrounding communities informed of planned activities and relevant environmental, health and safety items. Additionally, the plant participated in the 2015 and 2016 Junior Achievement Mentoring Program for empowering young women to their own economic success.</p>

CONSOLIDATED CONTAINER CO

Site ID: CONSOLIDATED CONTAINER CO
95441 26 36 SLATER DR,
ELIZABETH, NJ 07206

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/29/14</p>	<p>Facility has a closed loop plastic cooling process: They use a Polypropylene Glycol solution circulated through a non-contact system using a chiller that cools the molds for the machines. No waste water is produced from this system unless an upset that requires disposal. This disposal is done with permission from the POTW (Publically Owned Treatment Works). The water is recirculated and reused which reduces the facility's water use.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/29/14</p>	<p>Facility recycles 97.5% of materials and scrap plastic from the blow molding process. Any plastic material or scrap rendered not reusable by their process is sent to a plastic recycler. At all Consolidated Container plant locations, any trim/flashing that is removed during the manufacturing process is ground back to resin and fed back into the blow molding process. Also noteworthy, the facility recycles all the resin at their facilities, even contaminated materials that they cannot use are containerized and shipped to a company that can clean it and sell it to be used in non-food bottles, like motor oil, antifreeze, etc. When possible, the facility will use post-consumer resin in the non-food manufacturing process, which includes containers for motor oil, anit-freeze, bleach, etc. In 2013 more than 430 million pounds of resin were processed, of which 52 million pounds were eligible for postconsumer (PCR) resin. This translates to 12% of the total resin used in the manufacturing process was PCR and 88% was virgin resin; only 28.49% (>14 MM pounds) of the total PCR could be used in the actual manufacturing process. This is due to customer specifications.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/29/14</p>	<p>Facility is participating in the Project Thunderbolt Initiative, an electrical savings directive, which implements reduced energy fixtures, bulbs, and auto-off features as just a few features.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/29/14</p>	<p>Environmental Mission Statement: Consolidated Container Company (CCC) considers the protection of the environment is every employee's responsibility. We strive to minimize the use of hazardous substances that could become pollutants. The strategy of product development is to create processes that have minimal impact on the environment and to minimize emissions of any type. This strategy employs the use of proper design, engineering, controls, and competent personnel to ensure no harm to people or the environment occurs. Regulatory compliance is a must, it is not considered the end to the process and methods will be employed that strive for continuous improvement and best practices. While regulatory compliance is a must, CCC strives to continuously improve and share best practices. We do this by recycling of post-consumer materials back into our products and recycling of other materials such as oil, plastic film and fiberboard. In addition, we strive to optimize energy consumption at each facility to decrease the use of fossil fuels.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>4/29/14</p>	<p>Consolidated Container has an annual environmental report for 2013 that will be uploaded to their website shortly, the report was sent to corporate to be uploaded. http://www.cccllc.com/sustainability.php</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/29/14</p>	<p>Consolidated Container Company calculated greenhouse emissions using the US EPA Greenhouse Gas Equivalencies Calculator. Over the past 5 years the facility has reduced its greenhouse emissions/ consumption by 21%. The total decrease in carbon emissions versus 2009 is more than 80,000 tons. This is equivalent to removing 3,410 automobiles from the highways each year or total annual household energy use of 817 homes. It would require 2,098,559 tree seedlings grown for 10 years to consume the equivalent amount of carbon. These four years culminate in a total of 82,000 tons of carbon savings. That is equivalent to more than 17,051 automobiles and the combined annual sequestration of 67,085 acres of U.S. forests. (information directly off of facility's Environmental Sustainability Report for 2013).</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/29/13</p>	<p>Covanta installed a reverse osmosis system that enabled to the site to discontinue the use of caustics and acids for water treatment.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/29/13</p>	<p>Water that used to be discharged from boilers is now put back into a holding tank for the water's reuse back into the boilers. This saves Covanta 20,000 gallons for each boiler drain and refill.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/29/13</p>	<p>The residual ash which is classified as ID27, is being used as cover material at GROWS Landfill in Pa. This material was previously disposed into the landfill as waste material.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>5/29/13</p>	<p>Covanta recovers ferrous and non-ferrous metals. Although Covanta did have to get approval to do this, the recovery of metals was not a requirement of the original permit. Covanta did this on their own initiative, to recover metals from the waste stream. Covanta has reduced power usage by having computers that go into hibernate mode when inactive. Employees are required to shut down computers overnight. Covanta has made a reduction in paper usage, by having certain documents in read-only mode and these documents cannot be printed out nor faxed, but emailed instead.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/29/13</p>	<p>Covanta provides tours, presentations, lectures and literature to schools and to the community in order to encourage recycling, reduce waste, conserve energy, and to reduce greenhouse emissions. Examples include tours to Crestview School in Cranford, and to professional organizations, regulators, and legislators. Covanta offers Summer programs for High School Students and Rutgers University Students. Covanta also has a Webpage that has information about facility tours.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/29/13</p>	<p>Covanta maintains a written policy that was developed by the corporate management back in 2002, to save energy and reduce waste.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/29/13</p>	<p>The development and deployment of the Environmental Management Information system (EMIS) will further enhance their environmental performance. Through the EMIS, Covanta is committed to achieving and maintaining among the best performance in their industry". Also Re: their EMIS goals: EMIS goals which are designed to improve our environmental compliance performance. These goals are as follows: 1. Minimize the potential for NOV's through task tracking/notifications 2. Replace our weekly reports and compliance tracking spreadsheets through incident tracking/notifications 3. Centralize compliance data gathering for ease of use/analysis.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/29/13</p>	<p>Annual reports are prepared which will measure their progress and indicate ways to improve. Covanta 2012 Sustainability Report: http://www.covantaenergy.com/pdf/Covanta_2012_CSR.pdf</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/23/08</p>	<p>Covanta installed a reverse osmosis system that enabled to the site to discontinue the use of caustics and acids for water treatment.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/23/08</p>	<p>Water that used to be discharged from boilers is now put back into a holding tank for the water's reuse back into the boilers. This saves Covanta 20,000 gallons for each boiler drain and refill.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/23/08</p>	<p>The residual ash which is classified as ID27, is being used as cover material at GROWS Landfill in Pa. This material was previously disposed into the landfill as waste material.</p>

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/23/08</p>	<p>Covanta recovers ferrous and non-ferrous metals. Although Covanta did have to get approval to do this, the recovery of metals was not a requirement of the original permit. Covanta did this on their own initiative, to recover metals from the waste stream. Covanta has reduced power usage by having computers that go into hibernate mode when inactive. Employees are required to shut down computers overnight. Covanta has made a reduction in paper usage, by having certain documents in read-only mode and these documents cannot be printed out nor faxed, but emailed instead.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/23/08</p>	<p>Covanta provides tours, presentations, lectures and literature to schools and to the community in order to encourage recycling, reduce waste, conserve energy, and to reduce greenhouse emissions. Examples include tours to Crestview School in Cranford, and to professional organizations, regulators, and legislators. Covanta offers Summer programs for High School Students and Rutgers University Students. Covanta also has a Webpage that has information about facility tours.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/23/08</p>	<p>Covanta has a written policy. It was developed by corporate management in 2002. It is Covanta's environmental policy, a written document approximately five pages long. The policy can be summarized as follows: Covanta's policy is to recycle, reduce waste and conserve energy. Covanta is constantly observing, evaluating its operation and planning ways to reduce waste and to conserve energy as for example- Covanta recently changed operations to reduce waste water. Covanta recently began removing non-ferrous metal from the waste stream. These changes are described in other items of the check list.</p>

CYCLE CHEM CORP

Site ID: CYCLE CHEM CORP
 1169 217 S 1ST ST,
 ELIZABETH, NJ 07206

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/3/08</p>	<p>Facility actively investigates markets for the recycling of metals and has found recycling alternatives for some metal-containing wastes received at the facility in the past year (including silver, tungsten and zinc) that would otherwise have been sent for disposal, thus conserving raw material and saving landfill space. These are wastes that are not required to be recycled or disposed of.</p>

DUREX INC

Site ID: DUREX INC
 14709 5 STAHUBER AVE,
 UNION, NJ 070835086

------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/1/17</p>	<p>In 2012, The Company installed a new Powder Coating Line which replaced an older Powder Coating Line. The new Powder Coating Line included a 5 Stage Wash Unit. The Wash Unit (1st Stage) uses a Caustic Solution (Sodium Hypochlorite), solution to remove dirt and soil from the metal parts that are to be painted. Because Company installed the new 5 Stage Wash Unit as part of their Powder Coating Line, with the new Sodium Hydroxide Degreasing Section of the Wash Unit, the old Vapor Degreaser became obsolete and eventually the Vapor Degreaser was removed in 2015. The old Vapor Degreaser used N-Propyl Bromide (which can cause cancer by harming both the liver and kidney and can cause dizziness, nausea, clumsiness, drowsiness, dermatitis and can cause issues with the nervous system). Company also used to order 6 to 10 drums of N-Propyl Bromide a year with each drum weighting 500 lbs. or 3,000 to 5,000 lbs. of n-propyl bromide were used a year. In 2014 the last drums of n-propyl bromide were ordered and used. Now, the Company no longer uses n-propyl bromide and all n-propyl bromide has been removed from site since sometime in 2015.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/1/17</p>	<p>In 2012, Durex installed the new Powder Coating Line and 5 Stage Wash System which uses a lot less water than the older Powder Coating Line that has been removed since 2013/2014. The older coating line used to use 2 million gallons of water each month or 60,000 gallons per day. The new Powder Coating Line with 5 Stage Wash System uses roughly 200,000 gallons of water per month and 6,000 gallons/day of water.....so a lot less water is used now with the new powder Coating Line/5 Wash Spray Line.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/1/17</p>	<p>Company constantly replaces their motors to their process equipment for more efficient motors (800 kW to 600 kW motors). The motors on the pumps and feed drives for the cooling towers, Powder Coating Exhaust Fan, and Grinding Equipment all had their motors replaced to more efficient motors. 10% more motors for process equipment were changed in 2016.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/1/17</p>	<p>Durex has been replacing all their old Florescent Lightbulbs F40 and F-96 Lights to T-5 and T-8 Lights (more efficient florescent lights with less amounts of mercury), since 2012. An additional 100 to 150 lights have been changed at the facility within the last 2 years. Energy Bill prior to 2012 ranged around \$28,000 to \$30,000 dollars but now as of 2016, the Company's Energy Bill is now \$ 15,000 dollars (so Company has reduced their Energy Bill by 1/2 over the last 4 to 5 years). Durex has also installed LED Lighting in the Powder Coating Paint Area. In 2014/2015 Durex covered their entire roof with an aluminum type covering which now reflects the sun and the heat of the sun making the building cooler, thus the facility does not have to operate their HVAC System as much in the summer months to cool down the building. Company also recently purchased and installed 5 new Moline Space Heaters in their production areas of the building. The space heaters were installed in February of 2017. Company personnel state that by installing and using the new smaller space heaters, they will not have to operate their larger 8.4 MMBTU Boilers and that will conserve natural gas usage.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/2/12</p>	<p>Company recently (within the last year), replaced most of their motors to their process equipment to more efficient motors (800 kW to 600 kW motors). The motors on the pumps and feed drives for the cooling towers, Powder Coating Exhaust Fan, and Grinding Equipment all had their motors replaced to more efficient motors.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/2/12</p>	<p>Durex recently (within the last year), replaced 150 lights at their facility from F48 and F-96 Lights to T-5 and T-8 Lights (more efficient florescent lights with less amounts of mercury).</p>

EF KENILWORTH COGENERATION FACILITY

Site ID: 440649 EF KENILWORTH COGENERATION FACILITY
 2000 GALLOPING HILL RD,
 KENILWORTH, NJ 07033

Stewardship Activities	Date Acknowledged	Comments
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/11/17</p>	<p>Site added Variable Speed Electric Motors to various pieces of equipment to improve the site's efficiency and lower it's production cost, but this investment also positively impacted Kenilworth's goal of reducing it's environmental impact by reducing the site's emission tonnage as well as the site's carbon footprint.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>1/11/17</p>	<p>EF Kenilworth is operated under a comprehensive written environmental policy, signed by current senior officer. "Environmental, Health, & Safety Policy" signed by Jim Moore, CEO of Atlantic Power (parent company of EF Kenilworth).</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/28/15</p>	<p>RO (reverse osmosis) reject water goes to the cooling tower as make-up.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/28/15</p>	<p>5 VFDs added to site to reduce energy use</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/28/15</p>	<p>Statement from the facility: Environment and Safety We place priority on the environment and safety. We: are committed to ensuring operations are conducted in a manner that is safe and responsible for employees, neighbours and the environment. feature generation assets that use a mix of environmentally responsible fuels. implement practices that meet or exceed all of the regulatory and environmental policies governing plant operations. Safety is of key importance to the operations of the plants. owns generation assets that utilize natural gas, waste heat, wood waste and hydro-power.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/28/15</p>	<p>The Partnership has implemented environmental, health and safety management programs designed to continuously improve environmental, health and safety performance and is working towards alignment with the requirements of the ISO 14001 Environmental and the ISO 18000 Health and Safety Management Systems, a set of industry guidelines to achieve effective environmental, health and safety policies and procedures.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/7/11</p>	<p>RO (reverse osmosis) reject water goes to the cooling tower as make-up.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/7/11</p>	<p>Statement from the facility: Environment and Safety We place priority on the environment and safety. <p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/7/11</p>	<p>The Partnership has implemented environmental, health and safety management programs designed to continuously improve environmental, health and safety performance and is working towards alignment with the requirements of the ISO 14001 Environmental and the ISO 18000 Health and Safety Management Systems, a set of industry guidelines to achieve effective environmental, health and safety policies and procedures.</p>
<p>Combined Heat and Power Partnership (CHP).</p>	<p>5/19/09</p>	<p>February 4, 2008 - The United States Environmental Protection Agency (EPA) has recognized 13 U.S. power plants operated by EPCOR Utilities Inc's American division EPCOR USA, which includes EF Kenilworth for environmental efficiency. The EPA's Combined Heat and Power Partnership issued a Greenhouse Gas Reduction Report for 2007 to EPCOR USA recognizing its lower-emission operations.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>5/19/09</p>	<p>RO (reverse osmosis) reject water goes to the cooling tower as make-up.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/19/09</p>	<p>Corporate Environmental Policy: http://www.epcor.ca/SiteCollectionDocuments/Corporate/pdfs/EnvdocExternalFINAL.pdf</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>5/19/09</p>	

ELECTROID CO

Site ID: ELECTROID CO
13170 45 FADEM RD,
SPRINGFIELD, NJ 070810175

Stewardship Activities	Date Acknowledged	Comments
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/23/14</p>	<p>Electroid participates in the Environmental Management System. Electroid received a certificate of Registration for Operating a Quality Management System which complies with the requirements of ISO 9001:2008 + AS9100C. This registration covers the Quality Management System for the design, manufacture and test of electro/magnetic clutches and brakes and air separation modules for aircraft fuel tank inerting. The Certificate NO: CERT-0056469 Issued Date: April 4, 2012 Certificate Expiration Date: May 9, 2015</p>

EPICOR INC

Site ID: EPICOR INC
1074 1414 E LINDEN AVE,
LINDEN, NJ 07036

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/10/11</p>	<p>The facility reuses all potable city water used in their manufacturing process, except for a small amount of makeup water to makeup for water incorporated into the powdered ion exchange resin product, and a small amount of water lost to evaporation. As a result, the facility saves approximately 936,000 gallons per year.</p>

EVOQUA WATER TECHNOLOGIES

Site ID: EVOQUA WATER TECHNOLOGIES
26471 2 MILLTOWN CT,
UNION, NJ 07083

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	6/6/16	
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/21/08	Waste min tactics used to minimize haz waste on site. 1 - Oxalic acid rinse water is reused to make more oxalic acid for the process. 2 - hydrostatic testing is conducted so that only plain water goes down the drain. 3 - Minimize on the purchases of toxic chemicals. 4 - Oxalic Acid is used based on the specs of an order. Not all plates undergo the etching process. Most are sand blasted and goes out as solid waste to a landfill since it is just sand. 5 - Send fluorescent bulbs for recycling. In the last inspection they were sending them out as haz waste material. This significantly reduced some of their haz waste generation on site.

FIABILA USA LINDEN DIV

Site ID: FIABILA USA LINDEN DIV
482706 1601 LOWER RD ,
LINDEN, NJ 07036

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	3/22/17	Fiabila generates roughly 500 gallons per week (26,000 gallons annually) of hazardous spent material (ethyl acetate) and manages it as hazardous secondary material (HSM) under the 2015 DSW exclusion at 40 CFR 261.4(a)(24)(i)-(v), excluding it as a solid or hazardous waste, then transferring the material to a verified reclamation facility for the purpose of reclamation and ultimate reuse of the material.

FULL CIRCLE MANUFACTURING GROUP INC

Site ID: FULL CIRCLE MANUFACTURING GROUP INC
 14441 534 S FRONT ST,
 ELIZABETH, NJ 07202

Stewardship Activities	Date Acknowledged	Comments
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/28/15</p>	<p>There is a switch on the Company's 8.3 MMBTU High Pressure Cleaver Brooks Boiler that when switched to "ON" will change the Boiler from a High Pressure Boiler to a Low Pressure Boiler and thus conserve the amount of natural gas consumed in the Boiler. The switch was installed on the Cleaver Brooks Boiler in 2009. Company may have saved between 2012 to 2014 anywhere from 552,000 to 949,000 ft³ of natural gas in by installing the switch that lowers the pressure of the boiler so that the Boiler consumes less gas.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/28/15</p>	<p>Starting in 2014 - Liquid and Solid Waste used to be combined and be shipped out from the facility. Roughly 400 drums of "waste" was shipped out of the facility prior to 2014. Now the Liquid and Solid Waste is "separated" into a) Liquid Waste b) Solid Waste The Liquid Waste can now be recycled and reused at the facility which has cut down on the "waste" leaving the facility by 50%. Company is hoping that my future training of the employees, they may be able to reduce the waste leaving the facility by another 10 to 15%. By separating out the wastes from each other, the Company has been able to cut down on their disposal waste cost.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/28/15</p>	<p>In 100% of the current buildings (trailers on property - all 8 trailers), there are electrical sensors in all the buildings that will turn off the lights in the building if the area of the building is not being used or senses no motion. (Since Winter of 2012)</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/24/10</p>	<p>There is a switch on the Company's 8.369 MMBTU High Pressure Cleaver Brooks Boiler that when switched to "ON" will change the Boiler from a High Pressure Boiler to a Low Pressure Boiler and thus conserve the amount of natural gas consumed in the Boiler. The switch was installed on the Cleaver Brooks Boiler within the last year. For 2008, the Boiler operated 2600 hours and consumed 7,809,100 ft³ of natural gas. For 2009, the Boiler operated 2600 hours and consumed 7,170,000 ft³ of natural gas. Company may have saved up to 639,000 ft³ of natural gas in 2009 by installing the switch that lowers the pressure of the boiler so that the Boiler consumes less gas.</p>

HOSOKAWA MICRON POWDER SYSTEMS

Site ID: HOSOKAWA MICRON POWDER SYSTEMS
693 10 CHATHAM RD,

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/17/08	Fiber drums containing non-haz material are not being sent to landfills for disposal, instead they are being sent back to the customer for reconditioning. This generator has also changed to using only green tipped bulbs.

INTERNATIONAL PAINT INC

Site ID: INTERNATIONAL PAINT INC
14703 2270 MORRIS AVE,
UNION, NJ 07083

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/14/08	1- The site manufactures solvent based yacht paints used to protect ships and pleasure craft. As a result of this operation flammable solvents become a by-product of this operation. These flammable solvents are the result of cleaning down of tanks and associated equipment. In the past these wash solvents were sent off-site to a solvent disposal facility (Marisol). As a result of this high cost a program was put together to reduce the amount that we disposed of. The program consists of using the wash solvent generated from the previous batch in the next generic product that is compatible with this waste. As a result of this, this wash solvent is substituted for new solvent in the batch. 2- The finished paints that are filled at the plant are required to be filtered prior to packaging. As a result of this the site used large amounts of polyester felt bags. These bags were disposed of as hazardous waste. To try and reduce the quantity generated, the site has gone to closed filtration some of it's? products. Instead of using a throw away bag we use a metal screen which gets cleaned and used over again.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	5/14/08	The site also generates solvent emissions from it's? process. In the past a thermal oxidizer was used to treat our air stream. After several years of testing the site installed a Bio-Treatment system to treat the same air stream. As a result of this we are able to achieve greater than 90% cleaning efficiency of this air steam. Not only do we save a large amount of money by not burning natural gas, but we also eliminate the generation of CO from our thermal oxidizer.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	5/14/08	ISO 90001-2000 & Responsible Care

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>6/23/08</p>	<p>Facility has completely stop using Asbestos.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/23/08</p>	<p>Facility collects the rain water within the facility and resue in the process. In 2007 facility has never drain rain water in the strom water collecting system.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>6/23/08</p>	<p>Facility usee cellulose fibers made from the recycle used papers.</p>

------------------------	-------------------	----------

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>9/27/16</p>	<p>Linden Landfill and the City of Linden allowed some of the landfill property to be preserved so that NJ Audubon could create the 95 Acre Hawk Rise Bird Sanctuaries which opened in May of 2012. The main trail system to enter and leave the bird sanctuary goes through land that is owned by Linden Landfill. Linden Landfill and the city of Linden committed \$1 million for the greenway access project and the establishment of education and interpretive programs for the Hawk Rise Bird Sanctuary.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>9/27/16</p>	<p>Linden Landfill has calculated its Greenhouse Gas Calculations using the EPA EGRET PROGRAM and has supplied their Greenhouse Gas Emissions to EPA for calendar years 2010, 2011, 2012, 2013, 2014 and 2015.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/26/14</p>	<p>Energy Star heating and air conditioning units are still installed and operational at the Linden Landfill's field office.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>8/26/14</p>	<p>Linden Landfill and the City of Linden allowed some of the landfill property to be preserved so that NJ Audubon could create the 95 Acre Hawk Rise Bird Sanctuary which opened in May of 2012. The main trail system to enter and leave the bird sanctuary goes through land that is owned by Linden Landfill. Linden Landfill and the city of Linden committed \$1 million for the greenway access project and the establishment of education and interpretive programs for the Hawk Rise Bird Sanctuary. There are placards along the side of the composite wooden walking trails for the Bird Sanctuary that discuss Green Energy and Recycling and information about the Landfill as well as the many different species of birds and plants that one may encounter along the trails. Linden Landfill maintains sections of the Hawk Rise Bird Sanctuary (areas that border the Landfill).</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>8/26/14</p>	<p>Linden Landfill has calculated out its Greenhouse Gas Calculations using the EPA EGRET PROGRAM and has supplied their Greenhouse Gas Emissions to EPA for calendar years 2010 and 2011 and 2012. Calendar Year 2013 Greenhouse Gas Emissions should be available by October of 2014.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/20/12</p>	<p>Energy Star heating and air conditioning units are installed at the Linden Landfill's field office.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. <p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>11/26/08</p>	<p>Waste ethanol is sent out for reclamation therefore minimizing on haz waste generation on site.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>11/26/08</p>	<p>According to annual rept: Company uses steam for cleaning bottles which uses less water. This is a corp goal. The process equipment have high pressure spray balls installed in them. Waster consumption 3,214,000 M3. Pls contact company for their annual rpt for detailed information.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>11/26/08</p>	<p>Facility has an environmental policy on site. Pls contact company for actual written policy that helps keep a safe/environmentally friendly workplace for their employees.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>11/26/08</p>	<p>WASTE WISE</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>11/26/08</p>	<p>Company only purchases less toxic material.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>11/26/08</p>	<p>Sourcing 3% of its energy from wind power, saving 186 tonnes of greenhouse gases</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>11/26/08</p>	<p>According to their annual report: The greenhouse gas emissions are mainly CO2 from the use of fossil fuels for the generation of steam in factories and for heating the group's bldgs. CO2 is indirectly generated through the electricity use and by the transportation of the products. Of energies used in factories and warehouses, 49% comes from electricity, 45% from gas and only 6% from oil. Gas is used where possible since it is a cleaner fuel than oil. Continually looking out for less polluting transport solns (ie moving transport from road to rail). The Clark, NJ factory in the US has committed itself to sourcing 3% of its energy from wind power, saving 186 tonnes of greenhouse gases as a result.</p>

------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/17/12</p>	<p>Green score and bench substitution on all product ingredients</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/17/12</p>	<p>Water consumption per finished product decreased by 22.6% between 2005 and 2011. http://www.sustainabledevelopment.loreal.com/DD/media/pdf/LOrealRDD2011_GRI_Environment.pdf</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/17/12</p>	<p>All production has been reviewed and evaluated for process efficiency, modification made where necessary by energy teams. Air compression, water use and energy reduction evaluated on all machinery reduction. The process/operation energy reduction on the machinery The building energy management system control lighting and temperature throughout the building during off shifts (weekends). All of our major energy consuming equipment (boiler and compressors) are ramped down to ensure minimum energy use .</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/17/12</p>	<p>http://www.sustainabledevelopment.loreal.com/DD/media/pdf/LOrealRDD2011_GRI_Environment.pdf http://www.sustainabledevelopment.loreal.com/environment/focus-on-packaging.aspx The life cycle analysis pertains to all aspects of the product at L'Oreal from the Raw material ingredient (Research and development/innovation) through the packaging in and packaging out , and even our waste stream is analyzed . For example pallets and drums are sent to a recycler. Also facility utilizes collapsible totes which allows for the reuse of totes.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>9/17/12</p>	<p>Life Cycle Assessments for packaging L'Oreal performs a simplified comparative life cycle analysis so that the company can select a design that will help reduce the weight and volume of its packaging and lessening its impact on the environment. This study takes into account all the stages of the packaging's life cycle and is based on eight impact indicators, including CO2, water, eutrophication and waste." http://www.sustainabledevelopment.loreal.com/environment/focus-on-packaging.aspx</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/17/12</p>	<p>Facility uses fire tower water for machine cooling water. Essentially creating a closed looped system with no discharge to the environment and utilizing the standing fire tower water for cooling water.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/17/12</p>	<p>March 2011</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/17/12</p>	<p>ISO 14001</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>9/17/12</p>	<p>http://www.sustainabledevelopment.loreal.com/DD/media/pdf/LOrealRDD2011_GRI_Environment.pdf</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>9/17/12</p>	<p>Site has uses intranet website for carpooling participation.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>9/17/12</p>	<p>All supplies purchased are to be green by in house Purchasing Department directives. The life cycle analysis pertains to all aspects of the product at L'Oreal from the Raw material ingredient (Research and development/innovation) through the packaging in and packaging out.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>9/17/12</p>	<p>Clean power credits purchased. All energy purchased is from sustainable partners that have as part of their portfolio. One particular partner purchases energy sourced from wind energy farms.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>9/17/12</p>	<p>Absolute reduction in greenhouse gas emissions of 29.8% (tonnes of CO2, direct and indirect) between 2005 and 2011. http://www.sustainabledevelopment.loreal.com/DD/media/pdf/LOrealRDD2011_GRI_Environment.pdf</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>9/17/12</p>	<p>Supplier performance is monitored though contracts with vendors http://www.loreal.com/_en/_ww/html/suppliers/suppliers-performance/suppliers-performance-responsability.aspx</p>

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/7/13</p>	<p>In 2011 facility implemented a new computer-based system to manage its inventory of raw materials, resulting in the reduction of waste as shown in facility's biennial Hazardous Waste Report. The system allows the facility to better monitor exactly how much is being used, be able to put leftover amounts back into inventory for later use, reduce the amount of chemicals purchased, better management of shelf life with a reduction in amount of expired material and to employ chemical sharing among the various groups at the site. The facility further promotes the use of nonhazardous or less hazardous material when possible, ordering/making only the amount needed and no mixing of hazardous and nonhazardous materials. Company also reported that in 2011 55% of new raw materials used were plant-based and 45% of new raw materials used complied with the principles of green chemistry.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/7/13</p>	<p>Facility recently installed low-flow, water-saving fixtures (sinks, showers, etc.) at the site designed to reduce onsite water consumption by 31%.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/7/13</p>	<p>Energy star rated equipment is purchased for laboratories when possible and for office equipment (computers, printers etc.) and a new energy star rated boiler was recently installed at the site increasing energy efficiency and reducing energy use.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/7/13</p>	<p>Furniture (conference tables, chairs, cubicles) from two other L'Oréal sites that closed was reused in the renovation of the facility's hair and skincare laboratory and research offices in September 2011, avoiding nearly 41 tons of waste from being landfilled. Construction and demolition debris from the renovation was also diverted from landfill disposal and was recycled. Additionally, facility regularly recycles pallets and empty drums.</p>

<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>3/7/13</p>	<p>L'Oréal is committed to sustainable innovation which is applied through the entire life cycle of products, from the choice of raw material ingredients used in formulations to the elimination of packaging, including their industrial production, their marketing promotion and their distribution to consumers. The Research and Innovation team is specifically committed to including the principles of sustainable development and safety at all stages of the product life cycle. They are dedicated to selecting raw materials with a limited environmental footprint (55% of new raw materials were plant-based in 2011), finding the perfect balance between the eco-design of formulas and their efficacy, increasing reliance on green chemistry (45 % of new raw materials complied with the principles of green chemistry in 2011), and improving predictive evaluation of ingredients and products without resorting to animal testing. Kiehl's and Garnier Fructis are two products whose formulas were developed at this facility in which product improvements reduced environmental impacts over the product's life cycle. L'Oréal performs a simplified comparative life cycle analysis every time an item of packaging is updated so a design can be selected that will help reduce the weight and volume of the packaging and lessen its impact on the environment. The analysis takes into account all the stages of the packaging's life cycle and is based on eight impact indicators, including CO2, water, eutrophication and waste. L'Oréal has developed a three-day training course, the Sustainable Packaging Seminar, to train staff in materials, life cycle analysis, good environmental communication practices and the end of packaging life cycles. The training enables staff to put figures on the effects of the packaging chosen and includes harmonizing and restructuring eco-design within L'Oréal through the set-up of an environmental approval system, a dedicated intranet site and simplified life cycle analysis software.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/7/13</p>	<p>Facility has various large events/meetings for the company at off-site locations where it arranges for bus transportation for the employees, thus reducing the number of vehicles driven to the events and reducing energy use. Last event was an end of the year business review event for employees on 12/13/12.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>3/7/13</p>	<p>Green building certified (see #11 above - Green Building Certification)</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>3/7/13</p>	<p>For Earth Day 2012, facility employees created and maintained small flower beds at the site and in June 2012 facility held an Employee Volunteer Day where employees helped revitalize gardens and parks in the area.</p>

<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/7/13</p>	<p>Facility has a written, Safety, Health and the Environment (SH&E) Policy that directs they minimize their impact on the environment with a commitment to compliance with government rules and company SH&E standards, the continual improvement of SH&E performance and the establishment of sustainable development as a R& I priority for 2012.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>3/7/13</p>	<p>Company publishes an Annual Report and Annual Sustainability Development Report on its website that identifies environmental issues and improvements. See http://www.lorealusa.com/</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/7/13</p>	<p>Facility offers preferred parking (8 dedicated spaces) at the site for carpooling employees, bike racks, a Work From Home (WFH) Program that allows telecommuting one day per week, flexible work schedules to tailor employee hours around peak commuting times.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>3/7/13</p>	<p>Company has a Sustainable Procurement Policy that has been developed into a worldwide program called L'Oréal Buy & Care Program. Under this program, facility purchases recycled content and environmentally responsible products and provided information during the inspection demonstrating the purchase/use of towels made from 100% recycled fiber, bath tissue from 80% recycled content, office paper with 30% recycled content, green cleaning products, and pens made from recycled bottles.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>3/7/13</p>	<p>Site was awarded LEED® Gold certification established by the U.S. Green Building Council (USGBC) and verified by the Green Building Certification Institute (GBCI) on 4/13/13 for a major renovation of the facility's hair and skincare laboratory and research offices commissioned in September 2011 and the installation of a roof top photovoltaic energy system (solar panels) commissioned in February 2013 in conjunction with a white Thermoplastic Olefin membrane roof. The renovation features new energy efficient windows, light tubes (skylights) that provide natural light in the office areas, a daylight harvesting system that dims overhead lights when natural light will suffice, ceiling and desk occupancy lighting sensors, large interior glass panels that allow for light to pass through the space and a ceiling-mounted chilled beam cooling system that circulates cool water through special fixtures which cool the air. The occupancy sensors and daylight harvesting will reduce the lighting power density by 20%. The renovation also incorporated reused and refurbished furniture (conference tables, chairs, cubicles) throughout from two closed sites, avoiding approximately 41 tons of waste from being landfilled. The photovoltaic roof system with a capability of generating 1,025kW will offset approximately 25% of the building's electricity usage and yield a CO2 emissions reduction of approximately 81%. Other green building items included the installation of new low-flow fixtures (sinks, showers, etc.), which are designed to reduce onsite water consumption by 31%, new energy efficient, motion activated LED lighting in the warehouses and main corridors, and a new computer-based system to manage inventory of raw materials and minimize waste.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>3/7/13</p>	<p>A roof top photovoltaic energy system (solar panels) was installed in February 2013 on the facility's building. The photovoltaic roof system with a capability of generating 1,025kW will offset approximately 25% of the building's electricity usage and yield a CO2 emissions reduction of approximately 81%.</p>

<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>3/7/13</p>	<p>According to company's 2012 Sustainability Development Report, there has been a 38.8% reduction in greenhouse gas emissions (direct and indirect metric tons of CO2) since 2005 in accordance with the GHG Protocol. According to company's Annual Report, L'Oréal was the only cosmetics company to be identified as a leader by the Carbon Disclosure Project Leadership Index for its carbon emissions management in 2012. See http://www.lorealusa.com/</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>3/7/13</p>	<p>Company has a Sustainable Procurement Policy that has been developed into a worldwide program called L'Oréal Buy & Care Program, which involves its suppliers in its policy of environmental conservation and the protection of natural resources and biodiversity. It also favors local suppliers, using a single production company in each geographical region, thus promoting the economic development of the regions in which it produces and limiting the impact of raw material and goods transports. Social and safety/health audits are carried out by independent external companies on the suppliers' premises to monitor their adherence to the policy. In 2011, 793 supplier sites were audited. In 2007 L'Oréal joined the Supply Chain Program of the Carbon Disclosure Project (CDP) to encourage its suppliers to measure and manage their emission of CO2. In 2011, 48 suppliers joined the CDP and in 2012, 133 suppliers joined the CDP. Since 2007 L'Oréal has required all its suppliers to commit to forestry certification for its paper and cardboard packaging through the Forest Stewardship Council (FSC) certification. See http://www.loreal.com/profiles/suppliers.aspx</p>

MAHER TERMINALS

Site ID: MAHER TERMINALS
13247 1210 CORBIN ST,
ELIZABETH, NJ 07890

Stewardship Activities	Date Acknowledged	Comments
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/22/13</p>	<p>Energy efficiency measures implemented by Maher as part of its' efforts to reduce energy use include: powering down and turning off lights, computers, monitors, printers and all other electronic appliances when not in use. Setting preferences on personal computers to sleep mode after 10 minutes of inactivity and hibernation mode after 60 minutes (or sooner) of inactivity to reduce energy use.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/22/13</p>	<p>Company conservation measures include printing double-sided when possible, storing documents electronically instead of printing, using reusable bottle and cups instead of single service cups.</p>

MERCK SHARP & DOHME CORP

Site ID: MERCK SHARP & DOHME CORP
14432 2000 2015 GALLOPING HILL RD,
KENILWORTH, NJ 07033

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	6/5/14	Merck is substituting HFA for CFC in inhalers within the manufacturing division. Merck is also switching to aqueous coating formulations and granulations. The company has embarked on a Green Chemistry Initiative in Research Labs.
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	6/5/14	Water reuse in cooling tower
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	6/5/14	Electrical Usage is down 16% over the last 7 years. Merck implemented automated controls of central chilled water plant operations resulting in reduced energy consumption. An energy efficient lighting replacement program has been instituted throughout the site. Co-Gen Inlet Cooling Project has improved Cogen's performance during summer months. This has also reduced site summer electric usage from the grid. Message boards, emergency phones, and stop signs on the Merck campus are solar powered.
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	6/5/14	Merck implemented single stream recycling, food waste recycling, and kitchen grease recycling. Also concrete and asphalt recycling from construction projects.
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	6/5/14	Merck implemented video conferencing/internet meetings to reduce employee travel between sites.

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/5/14</p>	<p>Green building design considerations are required per company's energy management policy. Merck is currently under construction for K-15 expansion (H-Block). Building K-15 LEED H Block Initiative is registered under LEED 2009. The company is attempting to obtain Silver Status.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>6/5/14</p>	<p>Demand Response Program implemented in 2009. Cogeneration facility on site: increased capacity in 2010</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>6/5/14</p>	<p>Merck provides funding and/or donations to neighboring towns for certain environmental & safety projects. Merck Outreach may be found at: http://www.merckresponsibility.com/giving-at-merck/communities-and-employee-engagement/home.html Merck holds an Earth Day celebration on site and vendor fairs to promote Environmental awareness and stewardship.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/5/14</p>	<p>Merck's Corporate EHS Policy may be found at: http://org.merck.com/MRK/gse/corehspol/Pages/default.aspx</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/5/14</p>	<p>Site operates under Global EHS standards which are customized for local requirements. Also in the process of integrating global management systems for each environmental category (i.e., air, water, hazardous waste, etc.)</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>6/5/14</p>	<p>Report may be found at: http://www.merckresponsibility.com/focus-areas/environmental-sustainability/home.html</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>6/5/14</p>	<p>Merck provides employees with transit subsidies, vanpools, telecommuting and rideshare programs, bicycle lockers and onsite showers. Shuttle service is provided between sites.</p>

<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>6/5/14</p>	<p>Merck reports its GHG emissions to the Carbon Disclosure Project. Link to Energy Use and Climate Change: http://www.merckresponsibility.com/focus-areas/environmental-sustainability/energy-use-and-climate-change/home.html</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>6/5/14</p>	<p>Merck conducts third party audits of vendors to assess EHS compliance and/or risks.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/26/12</p>	<p>Merck is substituting HFA for CFC in inhalers within the manufacturing division. Merck is also switching to aqueous coating formulations and granulations. The company has embarked on a Green Chemistry Initiative in Research Labs.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/26/12</p>	<p>Water balance for site has been completed. Merck is currently investigating water conservation projects to meet corporate water conservation goals. Also, Merck is currently recovering air handling condensate in summer months to use as cooling tower make-up; and using well water instead of city water for non-contact cooling water for production and utilities.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/26/12</p>	<p>Electrical Usage is down 16% over the last 7 years. Merck implemented automated controls of central chilled water plant operations resulting in reduced energy consumption. An energy efficient lighting replacement program has been instituted throughout the site. Co-Gen Inlet Cooling Project has improved Cogen's performance during summer months. This has also reduced site summer electric usage from the grid. Message boards, emergency phones, and stop signs on the Merck campus are solar powered.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/26/12</p>	<p>Merck implemented single stream recycling, food waste recycling, and kitchen grease recycling. Also concrete and asphalt recycling from construction projects.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/26/12</p>	<p>Merck implemented video conferencing/internet meetings to reduce employee travel between sites.</p>

<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/26/12</p>	<p>Green building design considerations are required per company's energy management policy. Merck is currently under construction for K-15 expansion (H-Block). Building K-15 LEED H Block Initiative is registered under LEED 2009. The company is attempting to obtain Silver Status.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/26/12</p>	<p>Demand Response Program implemented in 2009. Cogeneration facility on site: increased capacity in 2010</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/26/12</p>	<p>Merck provides funding and/or donations to neighboring towns for certain environmental & safety projects. Merck Outreach may be found at: http://www.merckresponsibility.com/giving-at-merck/communities-and-employee-engagement/home.html Merck holds an Earth Day celebration on site and vendor fairs to promote Environmental awareness and stewardship.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/26/12</p>	<p>Merck's Corporate EHS Policy may be found at: http://org.merck.com/MRK/gse/corehspol/Pages/default.aspx</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/26/12</p>	<p>Site operates under Global EHS standards which are customized for local requirements. Also in the process of integrating global management systems for each environmental category (i.e., air, water, hazardous waste, etc.)</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>9/26/12</p>	<p>Report may be found at: http://www.merckresponsibility.com/focus-areas/environmental-sustainability/home.html</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>9/26/12</p>	<p>Merck provides employees with transit subsidies, vanpools, telecommuting and rideshare programs, bicycle lockers and onsite showers. Shuttle service is provided between sites.</p>

<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>9/26/12</p>	<p>Merck reports its GHG emissions to the Carbon Disclosure Project. Link to Energy Use and Climate Change: http://www.merckresponsibility.com/focus-areas/environmental-sustainability/energy-use-and-climate-change/home.html</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>9/26/12</p>	<p>Merck conducts third party audits of vendors to assess EHS compliance and/or risks.</p>
<p>Climate Leaders.</p>	<p>8/4/10</p>	
<p>ENERGY STAR.</p>	<p>8/4/10</p>	<p>Sustained Excellence Winner for 2010.</p>
<p>WasteWise.</p>	<p>8/4/10</p>	
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/4/10</p>	<p>Yes, substituting HFA for CFC in inhalers within the manufacturing division. Also switching to aqueous coating formulations and granulations.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/4/10</p>	<p>Yes, 2009 water balance of site completed. Currently investigating water conservation projects to meet corporate water conservation goals.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/4/10</p>	<p>Yes, site has executed 10-20 projects each year for the past several years to improve energy efficiency. Since 2005, site has reduced annual power consumption by ~10%. In 2009, Schering implemented the Demand Response Program. Schering reduces energy use during peak demand hours when requested by the energy provider.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/4/10</p>	<p>EPA WasteWise program. Implemented very successful cafeteria waste recycling program.</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/4/10</p>	<p>Yes, implemented video conferencing/internet meetings programs to reduce employee travel between sites.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/4/10</p>	<p>Green building design considerations are required per company's energy management policy. Relighting projects. Site energy team meets once per month.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>8/4/10</p>	<p>Demand Response Program implemented in 2009. Cogeneration facility on site: increased capacity in 2010</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>8/4/10</p>	<p>Yes, provide funding and/or donations to neighboring towns for certain environmental & safety projects (park improvements, etc.) Also periodically host Union County Household Hazardous Waste Disposal and /or Consumer Electronics Recycling Days.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>8/4/10</p>	<p>Yes, link to EHS Mission Statement: http://mmd-se.merck.com/S&E/main/S&E%20Mission%20Statement%20Poster.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>8/4/10</p>	<p>Yes, the site operates under Global EHS standards which are customized for local requirements. Also in the process of integrating global management systems for each environmental category (i.e., air, water, hazardous waste, etc.)</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>8/4/10</p>	<p>Yes, link to 2009 report: http://www.merck.com/responsibility/2009%20S-P%20SHE%20Annual%20Report.pdf</p>

23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	8/4/10	
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	8/4/10	Yes, company provides its employees with transit subsidies, vanpools, telecommuting and rideshare programs, bicycle lockers and onsite showers.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	8/4/10	Yes, Message boards and emergency phones on the Schering campus are solar powered.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	8/4/10	Site calculates GHG emissions annually in accordance with EPA's GHG Reporting Rule. See annual report (link above) and the corporation's Public Policy Position on Climate Change: http://www.merck.com/about/views-and-positions/Climate_Change_Statement.pdf
8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?	8/4/10	Yes, conduct 3rd party audits of vendors to assess EHS compliance and/or risks.
Performance Track.	9/9/08	Schering-Plough is also a participant in the U.S. Environmental Protection Agency's National Environmental Performance Track (NEPT) program. Launched in June 2000, NEPT or ?Performance Track? is a voluntary partnership program that recognizes and rewards private and public facilities that consistently exceed regulatory requirements, work closely with their communities, set three-year goals for improvements in environmental performance, and excel in protecting the environment and public health.
ENERGY STAR.	9/9/08	http://www.energystar.gov/ia/business/networking/presentations/Sep07RetroCommissioning.pdf
WasteWise.	9/9/08	
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	9/9/08	Substituting CFCs with HFA in inhalers within the manufacturing division. Coatings used are being switched to aqueous.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	9/9/08	Potable water usage in 2007 increased slightly in comparison to 2006, but was down by 10 percent compared to 2003, 2004 and 2005. Well water usage in 2007 decreased by 17 percent from 2006 to 2007. Compared to 2003, 2004 and 2005, well water usage was down by 10 to 19 percent. Collectively, total water usage decreased by eight percent from 2006 to 2007 and by 15 percent compared to 2003.

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/9/08</p>	<p>Sales force is piloting hybrid vehicles.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/9/08</p>	<p>Green building design considerations are required per company's energy management policy. Relighting projects. Site energy team meets once a month.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>9/9/08</p>	<p>CFC destruction program: facility voluntarily chose to destroy CFCs instead of selling. Demand response Program being implemented in 2009; cogen plant on site.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/9/08</p>	<p>Provides funding to park improvement projects and hosts Union County Haz Waste Days for public.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/9/08</p>	<p>Corporate SHE (Safety, Health, and Environmental) policy, C-170, which applies to all Schering Plough divisions. Refer to web link: http://www.schering-plough.com/binaries/2006%20Report%20on%20Safety%2C%20Health%20and%20Environment_tcm137-167409.pdf</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/9/08</p>	<p>Refer to web link for 2007 report on safety, health, and environment. http://thomson.mobular.net/thomson/7/2807/3521/ Site operates under Schering's EMS, which is structured around three environmental policy levels with high criteria that need to be met.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>9/9/08</p>	<p>Link to 2007 annual report: http://thomson.mobular.net/thomson/7/2807/3521/</p>

23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	9/9/08	
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	9/9/08	BWC (Best Workplace for Commuters) program. Company provides its employees throughout New Jersey with transit subsidies that exceed the EPA's National Standard of Excellence. The program encourages energy conservation by offering commuter benefits, such as subsidized transit passes and vanpool vouchers, telework and rideshare programs, bike lockers, showers and an emergency ride home.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	9/9/08	Demand response Program being implemented in 2009; Schering-Plough has initiated solar panel projects at several facilities.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	9/9/08	Volunteered to participate in Covenant of Sustainability - New Jersey Greenhouse Gas Initiative on April 17, 2000. Schering-Plough uses the World Resources Institute Greenhouse Gas Protocol to calculate and report their greenhouse gas emissions to the Carbon Disclosure Project.
8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?	9/9/08	Conduct 3rd party audits of vendors and haz. waste vendors that they use to assess SHE (Safety, Health, and Environmental) risks. If vendors do not meet standards, company does not use.

Site ID: **MERCK SHARP & DOHME CORP**
14721 **126 E LINCOLN AVE, & RT 1/9**
RAHWAY, NJ 07065

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/18/14	Facility employs various programs/systems to reduce hazardous material/waste, including: 1. Bar-code system in the chemical storeroom to track and use chemicals more efficiently and with less waste; 2. Green Chemistry program to design new processes that use fewer and safer chemicals; consume less energy, water and other resources; and generate less waste. Facility held its 3rd Annual Green Chemistry Symposiums on May 13, 2013 to support its green chemistry efforts; 3. 5S system to reduce waste and optimize productivity through maintaining an orderly workplace and using visual cues to achieve more consistent operational results. The 5S pillars - Sort, Set in Order, Shine, Standardize, and Sustain - provide a methodology for organizing, cleaning, developing, and sustaining a productive work environment, encouraging workers to improve their working conditions and helps them to learn to reduce waste, unplanned downtime, and in-process inventory.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	3/18/14	Facility has a written corporate Environmental, Health and Safety (EHS) Policy that commits to various environmental standards including compliance with EHS rules; conservation of resources and prevention of pollution; fostering a culture of EHS excellence; continual improvement of EHS performance; and the engagement of stakeholders. See under "Environmental Sustainability" at http://www.merckresponsibility.com/ or direct link at http://www.merckresponsibility.com/wp-content/uploads/2013/07/Corporate-EHS-Policy.pdf?34e001

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/18/14</p>	<p>Facility implements the corporate Environmental, Health and Safety (EHS) Management System that follows the classic "Plan, Do, Check, Act" model and includes EHS governance, internal auditing, training, and performance. See under "Environmental Sustainability" at http://www.merckresponsibility.com/ or direct link at http://www.merckresponsibility.com/environmental-sustainability/ehs-management-compliance/</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>3/18/14</p>	<p>Company publishes an Annual Report on its website that includes Environmental Sustainability, identifying environmental issues and improvements. See http://www.merckresponsibility.com/</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>3/18/14</p>	<p>Facility offers vanpools for its employees, operated through an outside company (VPSI) and advertised on facility's internal website and on email (currently 20 vans with 223 people participating), thus reducing the number of vehicles driven and reducing energy use. Facility tracks the number of cars/trips/miles eliminated per month, amount of fuel saved and the reduction in carbon dioxide/monoxide amounts. Facility also provides a free shuttle service between the train station and site for employees commuting on public transportation, as well as inter-campus shuttles between Merck sites in NJ during the workday. Facility identifies the metric tons of carbon saved. Lastly, facility makes bike racks available at the site.</p>

MRV REALITY CO

Site ID: MRV REALITY CO
943 1515 W ELIZABETH AVE,
LINDEN, NJ 070360000

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/20/17</p>	<p>5 years ago, Paramount Metal Finishing Co decided to get rid of two Hazardous Materials because the Company decided that they no longer wanted to use these two Hazardous Materials in their production plating lines. The Company removed Copper Cyanide and Sodium Cyanide from their plating lines. 15 gallons a year of Copper Cyanide was used until 2012 in the Plating Lines. 2 Full 55 gallon Drums of Sodium Cyanide were used until 2012 in the Plating Lines. Paramount Metal Finishing Co. also changed over and is still in the process of changing over from mat-type paint arrestor filters to water curtains in their spraybooths. By changing over to water curtains from paint arrestor filters, there is less Hazardous Waste that is going out because the paint arrestor filters were being sent out as Hazardous Waste.....but if the filters are replaced by water curtains, then no Hazardous Waste will be going out from that Spraybooth Operations.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/20/17</p>	<p>There are counter flow water rinses on the following plating lines that help reduce the amount of water going to the city sewer system: Anodize Plating Line Tin Plating Line Zinc Plating Line Nickel Plating Line Counterflow water rinses were added to the plating lines sometime around 2014 and between 2014 to 2016, the amount of water usage at the facility has dropped from 25 Million Gallons/yr. to 19 Million Gallons a year (a savings of 6 million gallons of water).</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/20/17</p>	<p>Paramount Metal Finishing Co. installed a new Air Compressor in 2014 which has a VFD (Variable Frequency Drive) Motor on it. A variable-frequency drive (VFD) Motor is a type of adjustable-speed drive used in electro-mechanical drive systems to control AC motor speed and torque by varying motor input frequency and voltage.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/20/17</p>	<p>Paramount Metal Finishing Co. recycles all wooden pallets at their site (re-uses them).....The used wooden pallets/skids are placed into a 8 foot high by 8 wood wide by 30 ft. long dumpster that is picked up every 1.5 months by a Company called Dublin Scrap Metal located at 489 Frelinghuysen Ave, Newark, NJ 07114. The wood pallets/skids are repaired and then sent back to the Company to be re-used again and again and again - reducing the amount of waste going to landfills. Paramount Metal Finishing Co. also recycles used metal pieces from their production equipment at the site. Used discarded metal pieces are placed into a 8 foot high by 8 wood wide by 30 ft. long dumpster that is picked up every 3 months by Dublin Scrap Metal located at 489 Frelinghuysen Ave, Newark, NJ 07114.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/20/17</p>	<p>Paramount Metal Finishing Co. is currently changing out all their old fluorescent and high pressure sodium lights with LED Lights. Starting in July of 2016, the facility has changed out 1/3 of the lights at their facility to LED Lights. By July of 2018, Paramount Metal Finishing Co. plans to have 2/3rds of the lights changed out at the facility. By July/August of 2020, Paramount Metal Finishing Co. plans to have all the lights at their facility changed over to LED Lighting. Changing over to the LED Lighting is more energy efficient and LED Light Bulbs last longer. There will be also less fluorescent bulbs going out as waste once all the lights are changed over to LED Lights.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>4/20/17</p>	<p>Paramount Metal Finishing Co. is part of PSEG's "ENROC" Program - under this program PSEG conducted a survey at the site to determine how much kW of energy is used at the site for their production equipment. PSEG and Company came up with a minimum kW power usage rate that the Company can still operate at while helping save electrical draw on the grid on high demand days from PSEG. If PSEG needs to try to reduce the electrical draw from the grid on high energy demand days, Paramount Plating will reduce their energy output to meet the lower kW energy output number that PSEG and the Company came up with. To date, however, the Company has not been asked by PSEG to curtail their energy output.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/20/17</p>	<p>The Company has an Environmental Policy maintained at site and is signed by the VP of Operations, Michael Fuechetti</p>

MULBERRY METAL PRODUCTS INC

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	2/27/17	The facility switched to a hexametal phosphate to replace TCE as a unit plate cleaner which eliminated TCE use.
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	2/27/17	The facility converted a previously used stripper coil which evaporates the majority of the water and concentrates the zinc waste fines for disposal thus reducing the hauling and quantity of hazardous material generated.
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	2/27/17	Lower carbon emissions vehicles are used at the facility. The facility now has 4 electric forklifts, 4 natural gas ones and they went from a propane floor sweeper to an electric one, as well.
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	2/27/17	Facility installed a new 80,000 square foot roof using 2 1/2 in ISO boards and white reflective coating. All materials used received energy star ratings.
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	10/16/12	Facility switched to a hexametal phosphate to replace TCE as a unit plate cleaner. Eliminated TCE use.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>10/16/12</p>	<p>Facility converted a previously used stripper coil which evaporates the majority of the water concentrating the zinc waste fines for disposal thus reducing the hauling and quantity of hazardous material generated.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>10/16/12</p>	<p>Lower carbon emissions vehicles used at facility. Facility has 3 electric forklifts and 4 natural gas forklifts.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>10/16/12</p>	<p>Facility installed a new 80,000 square foot roof using 2 1/2 in ISO board and white reflective coating. All materials use received energy star ratings.</p>

NJ KEAN UNIVERSITY

Site ID: NJ KEAN UNIVERSITY
15633 1000 MORRIS AVE,
UNION TWP, NJ 07083

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>1/26/16</p>	<p>Have a campus wide composting unit onsite for all the restaurants and dorms, all food waste is brought to the unit, and combined with wood chips and batch composting occurs. Compost is used on campus and on their organic farm. Since in operation it has composted 1/2 million pounds of food waste.</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>1/26/16</p>	<p>Union NJ transit train station located on campus, reduces car numbers onsite.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>1/26/16</p>	<p>Green roof on top of an overhang roof of the STEM building. Utilized for water reclamation and natural day lighting.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>1/26/16</p>	<p>Trotters Creek Enhancement project is a large scale stream restoration initiative to return the stream to a more natural state.</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>1/26/16</p>	<p>Compost is used to grow organic fruits and vegetables on the east campus. These organic products are then used on campus in the dining halls.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>1/26/16</p>	<p>Tours to schools, community groups, classes and interested parties to view their innovative composting facility. In 2015 alone they had 783 visitors to see the unit.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>1/26/16</p>	<p>Kean has a MOU with the EPA. Kean sends the EPA their environmental report for the year and it gets posted on the EPA website. MOU found at http://www3.epa.gov/region02/greenteam/pdf/Kean-U-MOU.pdf</p>

<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>1/26/16</p>	<p>The Center for Academic Success (CAS) is a LEED certified building since 2008. Their STEM building was built to LEED gold standard but haven't officially received certification.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/26/16</p>	<p>Solar panels at the Harwood Arena and the CAS building. CAS building panels provide energy to power up the radio station.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>1/26/16</p>	<p>Farm to table agreement with Resino's near campus. Kean provides restaurant with fresh herbs and vegetables from the organic farm they have from the compost residuals.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/20/13</p>	<p>The Campus has facility wide food composting program for all restaurants and dorms, all food wastes are brought to large composter in designated building where batch composting with wood chips occur. The finished product is used through out the Campus. No fertilizer is allowed to be used on campus.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/20/13</p>	<p>The Campus is undergoing a large scale stream restoration project. The Trotter Creek Stream Enhancement Project to return the stream and surrounding areas to a more natural state</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/20/13</p>	<p>Solar panels help produce energy at Harwood Arena and the Maxine and Jack Lane Center for Academic Success</p>

PABST ENTERPRISES EQUIPMENT CO INC

Site ID: PABST ENTERPRISES EQUIPMENT CO INC
1192 676 PENNSYLVANIA AVE,
ELIZABETH, NJ 07201

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/26/12	The facility does not dispose of the metal or sheet metal waste materials. Facility saves and stocks all used metal and sheet metal pieces for reuse.

PAPETTI HYGRADE EGG PRODUCTS INC

Site ID: PAPETTI HYGRADE EGG PRODUCTS INC
124766 847 NORTH AVE,
ELIZABETH, NJ 07201

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/4/18	The Company changed out the water spray nozzles on their washing conveyors to more efficient nozzles which use less water (9 gallons/minute vs. 4 gallons/minute) In early 2018, the Company has also started adding "Dry Ex" to the water used in the nozzles for the washing conveyor system which is also helping to reduce the amount of water used from 4 gallons a minute to close to 2 to 3 gallons a minute. Company adds 0.7 ug of this Dry Ex to the water used in the nozzles for the washing conveyor system. In December of 2017, the Company installed an enclosed loop glycol cooling system which now cools down the 4 Pasteurizers at the facility. Prior to the installation of the Glycol System, city water was used to cool down the 4 Pasteurizers. Approximately 1,123,200 million lbs. of city water will no longer be used to cool down the 4 Pasteurizers at the facility. Company also uses water savings fixtures in their restrooms at their facility to conserve water.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/4/18	Company replaced 6, 150 HP Air Compressors with one oil free 425 HP Air Compressor with variable speed controls that saved about 30% of electricity and has lowered the electricity consumption for the facility. In recent years, the company has installed an electric trash compactor.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/4/18</p>	<p>Company continues to reduce the amount of packaging of their finished products. The Company has cut down on the amount of cardboard and fiber cartons used in their packaging as well as reduced the size of their plastic pails. Company also recycles all their cardboard packaging.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/4/18</p>	<p>The Company continues to purchase new tractor trailers that are more gas efficient. The Company is also active in the "route reduction measures". The Company looks at all their truck routes and has determined the quickest and fastest routes for all their customers reducing the amount of travel time and diesel emissions from their vehicles.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/4/18</p>	<p>The Company has replaced all the High Intensity Discharge 400 Lighting Fixtures located in the Warehouse Building (Building # 4) with fluorescent T-8, 32 Watt Lighting Fixtures. The Light fixtures in Building 4 are all on motion sensors. In April 2018, the Company has changed 80% of the fluorescent lighting to date in their Production Buildings with LED Lighting. These buildings will be 100% LED Lighting by June 2018.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>8/26/13</p>	<p>Within the last 2 years, the Company has switched from using Sulfuric Acid to using CO2 to adjust the pH on their Waste Water Treatment System. The Company has reduced their Sulfuric Acid usage by 400,000 lbs. since 2011. The Company has changed out their Refrigeration Systems over the last few years from using Freon R-22 (an ozone depleting Hydro chlorofluorocarbon) to a new Freon 404 A. (Freon 404A is designed to meet the needs of many new and existing refrigeration systems. R-404A is near azeotropic HFC refrigerant blend rated A1 by ASHRAE (lowest levels of toxicity and flammability) having zero ozone depletion potential.)</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>8/26/13</p>	<p>Within the last 2 to 3 years, The Company has changed out all the water spray nozzles on their washing conveyors to more efficient nozzels which use less water (old nozzels used 9 gallons/minute while new nozzels use 4 gallons/minute of water). CIP - (Clean in Place Systems) - The Company replaced their Clean in Place Systems over the last 2 to 3 years to new CIP systems which recirculate the water (in areas of the system), instead of use the water and sending the water to the sewer system. (Since 2011, the Company has been able to save 3.3 Million Gallons of Water from being used at their facility). The Company also has low volume toilets in all the bathrooms (1.6 gallons vs. 3.5 gallons), thus each toilet saves roughly 2,000 gallons of water a year. The Company also has motion sensors on the urinals and sinks in all their bathrooms that help reduce the amount of water used at the facility.</p>

<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/26/13</p>	<p>Company has changed out within the last 2 years all its air compressors at the facility. The new air compressors are ultra high efficient variable speed controlled air compressors - the motors can change speed and adjust to the load being placed on the air compressor. The new air compressors use 30% less electricity to operate than the air compressors that they replaced.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>8/26/13</p>	<p>Over the last couple of years, the Company has reduced the amount of packaging of their finished product. The Company has cut down on the amount of cardboard and fiber cartons used in their packaging as well as reduced the size of their plastic pails.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>8/26/13</p>	<p>The facility has purchased new tractor trailers over the past couple of years. These new tractor trailers (semi;s) are more gas efficient and the facility has been able to reduce the fuel consumption from its fleet of trucks by 6%. The Company has also been very active in "route reduction measures." The Company has looked at all their truck routes and has determined the quickest and fastest routes to their customers thus reducing the amount of travel time spent on the road as well as lower the amount of fuel used in their vehicles.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>8/26/13</p>	<p>Within the last two years, the Company has replaced all the HID (High Intensity Discharge) 400 Watt Lighting Fixtures located in their warehouse building (a section of Building # 4), with more efficient fluorescent T-8 32 Watt Lighting Fixtures. Also, the Light Fixtures in the Warehouse are on motion sensors so if an area of the warehouse is not being used by employees, the motion sensors after a while will shut off the lights in that area of the warehouse.</p>

PAPETTIS HYGRADE EGG PRODUCTS INC

Site ID: PAPETTIS HYGRADE EGG PRODUCTS INC
 13091 1 PAPETTI PLAZA,
 ELIZABETH, NJ 07206

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/19/17	Company installed in 2014 water tanks (two 500 gallon tanks and two 1,000 gallon tanks) at the site to recycle the water used in their "Clean-in-Place" Systems. By Recycling the water back into the system, the Company saves 900,000 gallons a year of water from going out to the sewer system or 75,000 gallons a month.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/19/17	In 2014, Company installed a VFD Drive on their chiller pump in which saved roughly \$5,000 dollars in their electricity bills and 60,000 Kilowatts of electricity a year.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	4/19/17	Company in 2013 with the agreement with their customers increased the size of their packaging which decreased the total material usage and disposed of at the site. So for example....prior to 2013, the Company made 1 gallon buckets of their liquid egg product....but in 2013, the Company talked with their customers and an agreement was made to increase the size of the packaging to 5 gallon buckets....so less than 1 gallon buckets are being produced which lowers the amount of material being used. Same goes with the hard-boil egg packaging.....the packaging went from 5 lb. to 10 lb. size packaging in 2013 which decreased the amount of material used in the 5 lb. size packaging.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	4/19/17	Company's Parent Company, Michael Foods has an Environmental Policy that is signed by the Chief Executive Officer - James E. Dwyer. The Environmental Policy focuses on the following 4 principles: 1) Compliance 2) Communication 3) Resource Management and Conservation 4) Continuous Improvement A Copy of the Environmental Policy can be found under the e-attachment for this Submittal Review
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	4/19/17	Company has an internal EMS System that runs through SharePoint. The EMS System sends out Monthly Reminders. Internal Audits of the EMS System are conducted annually and are called Safety and Risk Management Process Audits
5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.	4/19/17	Company (Michael Foods the Parent Company of Papetti Hygrade Eggs), puts out an Annual Environmental Corporate Sustainability Report each year.

PHELPS DODGE INDUSTRIES FREEPORT MCMORAN COPPER PRODUCTS

Site ID: PHELPS DODGE INDUSTRIES FREEPORT MCMORAN COPPER

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	3/24/09	F006 tin plating was removed from the process, therefore, this hazardous waste code has been eliminated from their process. Stewardship credit is recommended at this time because they have been successful in eliminating hazardous waste from their process.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	3/24/09	Energy conservation measures are as follows: 1 - plant lighting has been replaced from 150 kw 75 kw, reducing energy used to light up the facility 2 - replaced/removed obsolete equipment (i.e. CRO Systems, old valves, piping replaced), which has reduced the energy required to run them. 3 - energy cost has significantly reduced because they converted from 200 HP usage to a 40 HP usage. They also eliminated their old boiler, which reduced their energy usage. More details can be obtained by the facility representatives.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	3/24/09	The facility has an environmental policy that discusses general environmental principles, auditing, oversight & communication policies. It can be found via their website either from Phelps name or their legal name Freeport-McMoran Copper and Gold, Inc., even though they are still using the common name of Phelps.

PRECISION ESCALATOR PRODUCTS INC

 147 N MICHIGAN AVE,
 KENILWORTH, NJ 07033

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	10/12/12	Eliminated isopropyl alcohol from cleaning line which made residue a hazardous waste. Now residue is disposed as non-hazardous waste.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/12/12	Facility is manufacturing and installing a self lubricating chain for escalators which reduces the use of heavy oil based lubricant chain lube in escalators. All metal parts are evaluated and recycled or reused as inventory.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	10/12/12	All lights in the facility were replaced with high efficiency T1 lights through a state grant with JCP&L. Replacement of large inefficient furnaces with Radiant Heaters 39,000 sq-ft. Replacement of Electric Heater with natural gas unit heaters (automatic thermostats) 7-500 sq-ft. Paint on roof with heat reflective roof coating 30,000 sq-ft.

PSEG LINDEN GENERATING STATION

------------------------	-------------------	----------

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>4/18/18</p>	<p>PSEG Linden takes the sewage authority's waste water discharge (the grey water) and beneficially re-uses the water at their site by passing the wastewater through a sand filter and using the water in the PSEG Linden Cooling Towers System. The water is then returned to the POTW for their re-use, and the cycle continues throughout the year. Approximately 1 billion gallons of grey water is used in the cooling towers per year. The Combined Cycle Side has water savings fixtures the bathrooms at the administration building that control the faucets. The Combined Cycling Side has two "vaults" used to collect storm water. The storm water that is collected in these "vaults" is used as non-contact cooling water at the site. PSEG Linden Combined Cycle Side replaced their clothes washer with an Energy Star High Efficiency model to save water usage. PSEG Linden Combined Cycle Side installed a couple of tankless Hot Water Heaters at their site.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/18/18</p>	<p>In 2017, PSEG Linden (Combined Cycle Side) replaced the motors on the grey water system for the cooling towers with VFD Motors (Variable Frequency Drive Motors).</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>4/18/18</p>	<p>PSEG is working to reduce carbon emissions from its fleet through the introduction of hybrid vehicles. Approximately half the PSEG vehicle fleet has been switched to hybrid vehicles.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/18/18</p>	<p>PSEG Linden conducted the following Green Building Implementation Practices at their site: 1) Replaced their refrigerator with an Energy Star rated model 2) Replaced clothes washer with Energy Star High Efficiency model 3) Installed hands-free electric hand dryers 4) PSEG is currently replacing fluorescent and high pressure sodium lamps with LED lamps - By June 2015 PSEG Linden had replaced 65 old fluorescent fixtures and 50 high pressure sodium fixtures with LED Lighting. PSEG Linden continues to replace additional lighting fixtures as needed.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/18/18</p>	<p>Linden PSEG Combined Cycle Plant has hosted the Stockton College Senior Environmental Science Class and Pingry Middle School Students at their facility. The visits included an overview of the station to show how electricity is generated when you flip on the light switch. PSEG Linden informed the students about the use of multiple fuels and how the combined cycle process allows for re-use of heat waste. PSEG Linden also informed the students about the use of Environmental Control Devices at their facility such as an SCR for NOx reduction, recycling of grey water for cooling water, and the consideration of demographics when planning to build a new plant.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/18/18</p>	<p>PSEG as a corporation has an Environmental Policy called "PSEG Environment, Health & Safety Policy" The Environmental Policy focuses on eight main core values: 1) Health & Safety 2) Nuclear Safety 3) Climate Change 4) Compliance 5) Risk Reduction 6) Pollution Prevention and Resource Conservation 7) Open Communication 8) Continuous Improvement</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/18/18</p>	<p>PSEG Linden uses a multi-phase Environmental Management Information System (EMIS). The system is a web based comprehensive system that integrates the management of compliance actions, regulatory reporting , and oversight of the environmental programs.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>4/18/18</p>	<p>PSEG has a corporate wide Annual Environmental Report that their stakeholders and public and view on their website.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>4/18/18</p>	<p>PSEG Linden has been a member of the USEPA Climate Leaders Program for many years. Participating Companies in this program commit to reduce their impact on the global environment by completing a corporate-wide inventory of their greenhouse gas emissions based on a quality management system, setting aggressive reduction goals, and annually reporting their progress to EPA.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>4/18/18</p>	<p>Since 2011, PSEG Linden has offered an optional compressed work week for the summer season. Employees can choose to work four 10-hour days Monday through Thursday instead of five 8 hour days and have Friday off each week. This "flexible" work schedule is only offered between Memorial Day and Labor Day on a yearly basis and if there is an emergency at the facility, the employee will be called in to work at the site even if he/she does have the day off. The Combined Cycle Side offers special parking areas for motorcycles to encourage employees to drive into work on their motorcycles (if they have one) instead of their cars.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>4/18/18</p>	<p>The renovation of the administration building at Linden PSEG's Facility is registered with the United States Green Building Council (USGBC) as a LEED Commercial Interiors (CI) Project. PSEG Linden recieved LEED "Gold Status" for their PSEG Linden Site Administration Building.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/18/18</p>	<p>PSEG Linden as well as PSEG Corporate Office does account for all Greenhouse gases that the Company emits. PSEG Linden uses e-GGRT - a Greenhouse Gas Reporting Tool developed by the EPA to calculate out the Greenhouse Gas Emissions from their site (both Direct and Indirect Greenhouse Gas Emissions). This information is supplied to the Corporate Office and all Greenhouse Gas Emissions are totaled and displayed in the Corporate Annual Environmental Sustainability Report.</p>
<p>Climate Leaders.</p>	<p>9/21/16</p>	<p>PSEG Linden has been a member of the USEPA Climate Leaders Program for many years. Participating Companies in this program commit to reduce their impact on the global environment by completing a corporate-wide inventory of their greenhouse gas emissions based on a quality management system. setting aggressive reduction goals, and annually reporting their progress to EPA.</p>
<p>WasteWise.</p>	<p>9/21/16</p>	<p>PSEG Linden is an active participants and a charter member of the WasteWise Program since 1993. PSEG Linden is also a WasteWise Hall of Fame Company. They were among one of the first companies to become a Hall of Fame Company. All recycling and waste prevention activities from the Linden site are rolled up into a corporate report. This report is submitted to the US EPA annually. PSEG Linden was one of the first utilities in the WasteWise Program and has served as a mentor to promote the WasteWise waste prevention and recycling message to other members of their industry.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/21/16</p>	<p>Peaking Side - The Peaking Side had switched over in 2013 from using Ethylene Glycol - a known Hazardous Waste and a HAP (Hazardous Air Pollutant) - to Propylene Glycol (a non-hazardous substance and non-HAP) in two of their combustion turbines. The Propylene Glycol does not get shipped out as Hazardous Waste and provides better heat transfer for the two Combustion Turbines. PSEG Linden pays more to use Propylene Glycol than Ethylene Glycol.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/21/16</p>	<p>PSEG Linden takes the sewage authority's (Linden/Roselle Sewage Authority), waste water discharge (the grey water) and beneficially re-uses the water at their site by passing the wastewater through a sand filter and using the water in the PSEG Linden Cooling Towers System. By doing this, PSEG Linden avoids the use of city water (except during certain situations when the POTW water quality is too poor to use for PSEG Linden's equipment or when the POTW is servicing its system). The water is then returned to the POTW for their re-use, and the cycle continues throughout the year. A PSEG Linden Representative states that about 1 Billion Gallons of grey water from the Linden/Roselle Sewage Authority is used in the cooling towers at their site instead of using city water. The Combined Cycle Side has motion sensors in the bathrooms at the administration building that control the faucets. The Combined Cycling Side has two "volts" used to collect stormwater. One vault is near the Chemical Building Unloading Area and the other near the Ammonia Unloading Area. The stormwater that is collected in these "volts" is used as non-contact cooling water at the site. Additional Water Use Reduction Practices at PSEG Linden (2014/2015) PSEG Linden Combined Cycle Side replaced their clothes washer with an Energy Star High Efficiency model to save water usage. (in 2015) PSEG Linden Combined Cycle Side installed a couple of tankless Hot Water Heaters at their site - these high-power water heaters instantly heat water as it flows through the device, and do not retain any water internally except for what is in the heat exchanger coil. The heater is normally turned off but is equipped with flow sensors which activate it when water travels through them. A negative feedback loop is used to bring water to the target temperature. The water circulates through a copper heat exchanger and is warmed by gas or electrical heating. Since there is no finite tank of hot water that can be depleted, the heater provides a continuous supply. Tankless water heaters conserve and use less water than conventional water heaters. (In 2014)</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/21/16</p>	<p>Since 2012, PSEG Linden has replaced any motor for equipment at their site that was either damaged by Hurricane Sandy or in need of replacement with VFD Motors (Variable Frequency Drive Motors). Variable Frequency Drive Motors can cut down energy costs by controlling the motor with a variable speed drive (VSD, aka variable frequency drive). Variable speed drives allow you to match the speed of the motor-driven equipment to the process requirement.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/21/16</p>	<p>PSEG Linden recycles large station batteries (350 lb. batteries). PSEG replaces any battery based upon need or a PM for the engines. UPDATE from 2014: In 2014 - Sodium chlorite became an obsolete raw material used at PSEG Linden Combined Cycle Side, but rather than dispose of it, PSEG Linden offered their 5,000 gallon quantity to PSEG Bergen in Ridgedale Park NJ for them to use. The sodium chlorite became obsolete when PSEG Linden upgraded their chlorine dioxide generation system for the cooling tower water quality control system in early 2014. PSEG Linden changed from a prior way of generating the CLO2 with sodium chlorite, hydrochloric acid, and sulfuric acid, to using sulfuric acid and a GE product called Purate. The sodium chlorite that was not used and could have been disposed of by the facility as waste material but was transported to the PSEG Bergen Station for that facility to use. The transfer occurred during the summer of 2014 June/ July.</p>

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/21/16</p>	<p>PSE&G is working to reduce carbon emissions from its fleet through the introduction of hybrid vehicles, by use of aerial electric drive units and by use of renewable biodiesel fuel. In 2007, PSE&G embarked on a part decade-long effort to replace 1,300 passenger vehicles with hybrids and traditional bucket trucks with a combination of hybrid bucket trucks and diesel bucket trucks equipped with electric drives. According to PSEG Linden Personnel 50% of the PSEG Fleet has switched to Hybrid Vehicles. Vehicles that were lost during Hurricane Sandy are being replaced by Hybrid Vehicles.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/21/16</p>	<p>The following green building implementation projects have been conducted at the site (at the Combined Cycle Side) - an credited LEED Silver Status: 1) Site Selection (Alternate Transportation, Bicycle Storage and Changing Rooms, Parking Availability) 2) Energy and Atmosphere (Fundamental Commissioning, Minimum Energy Performance, CFC Reduction in HVAC Equipment, Optimum Energy Performance such as Lighting Power and Lighting Controls, HVAC, and Equipment and Appliances. 3) Material and Resources (Tennant Space, Long Term Commitment, Building Reuse, Construction Waste Management, Resource Reuse, 30% Furniture and Furnishings, Certified Wood). 4) Indoor Environmental Quality (Construction IAQ Management Plan, During Construction the use of Low Emitting Materials for the Adhesive and Sealants, Paints and Coatings, Carpet Systems, Composite Wood and Laminate Adhesives. Controlling of Systems, Temperature and Ventilation - Thermal Comfort (Compliance) and Thermal Comfort (Monitoring). 5) Innovation in Design Process (Innovation in Design, LEED Accredited Professional). in 2015, PSEG Linden also conducted the following Green Building Implementation Practices at their site: 1) Replaced their refrigerator with an Energy Star rated model. (in 2015) 2) Replaced clothes washer with Energy Star High Efficiency model (in 2015) 3) Replaced several fluorescent and high pressure sodium lamps with LED lamps - By June 2015 PSEG Linden had replaced 65 old fluorescent fixtures and 50 high pressure sodium fixtures with LED Lighting. PSEG Linden continues to eplace additional fixtures since as needed. 4) Installed hands-free electric hand dryers (in 2015)</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/21/16</p>	<p>Linden PSEG hosted the Pingry School's (Pingry School from Basking Ridge NJ), Environmental Science Class of Juniors and Seniors to a site visit at their facility in March of 2016. The visit included an overview of the station to show how electricity is generated when you flip on the light switch. PSEG Linden informed the students about the use of multiple fuels and how the combined cycle process allows for re-use of heat waste. PSEG Linden also informed the students about the use of Environmental Control Devices at their facility such as an SCR for NOx reduction, recycling of grey water for cooling water, and the consideration of demographics when planning to build a new plant. The class also got a brief plant tour of the facility.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/21/16</p>	<p>PSEG Linden Generation Station follows a Corporate Environmental Policy which establishes the goals and principles of PSEG in helping to integrate the Company's commitments to safety and environmental stewardship into business planning. is called PSEG's Enterprise Policy 2 1) PSEG's Enterprise Policy 2 - an internal document providing further guidance to the Corporate Policy and ensures the integration of this commitment into PSEG's business planning, engineering design and operations by establishing and maintaining management systems that carry out principles for environmental compliance and pollution prevention and resource conservation. - Under this Policy, each member of the Executive Officer Group of PSEG is responsible for their respective facilities, operations and activities. The policy is maintained by the Vice President of the Environmental Health and Safety Department with the assistance of the General Environmental Counsel to ensure implementation across PSEG. 2) Environmental Health and Safety Program Guide 575 - This internal document describes the core elements of management systems required to implement the Environmental Policy. The core elements include 14 elements which have been based on the International Organization for Standardization's specifications for Environmental Management Systems (ISO 140001). Annual certification by this site and the President of the fleet ensures proper implementation of the program.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/21/16</p>	<p>PSEG Linden has a Multi Phase Environmental Management Information System (EMIS). The system is a web based comprehensive system that integrates the management of compliance actions, regulatory reporting, and oversight of environmental programs.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>9/21/16</p>	<p>PSEG has a corporate wide Sustainability Report that is published annually which focuses on PSEG's strong commitment to social, economic and environmental initiatives as a component of corporate citizenship. This report is available online through a website dedicated to PSEG's responsibility efforts in support of PSEG's desire to minimize impact on material resources.</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>9/21/16</p>	
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>9/21/16</p>	<p>Since 2011, PSEG Linden has offered an optional compressed work week for the summer season. Employees can choose to work four 10-hour days Monday through Thursday instead of five 8 hour days and have Friday off each week. This "flexible" work schedule is only offered between Memorial Day and Labor Day on a yearly basis and if there is an emergency at the facility, the employee will be called in to work at the site even if he does have the day off. According to Personnel at PSEG Linden 85% of employees at the Peaking Plants and Combined Cycle Side Facilities in NJ take advantage of this compressed work week schedule during the summer months. PSEG as a Corporation in NJ has expanded their employee van pool program from 14 to 17 vans. An average of 322 employees commute to work via van pool, which takes an estimated 144 cars off NJ state's congested roads and reduces CO2 emissions by an estimated 114 tons per month. PSEG as a Corporation in NJ has promoted car pooling to employees, subsidized parking for car pool vehicles and offers a pre-tax commutation reimbursement program for all employees.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>9/21/16</p>	<p>The renovation of the administration building at Linden PSEG's Facility is registered with the United States Green Building Council (USGBC) as a LEED Commercial Interiors (CI) Project LEED CI addresses sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality and innovation design. In April of 2011, the Administration Building at PSEG Linden received LEED Certification at "Silver Status". According to PSEG's Corporate Sustainability 2013 Report PSEG Linden received LEED "Gold Status" for their PSEG Linden Site Administration Building.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>9/21/16</p>	<p>PSEG Linden as well as PSEG Corporate Office does account for all Greenhouse gases that the Company emits. PSEG Linden uses e-GGRT - a Greenhouse Gas Reporting Tool developed by the EPA to calculate out the Greenhouse Gas Emissions from their site (both Direct and Indirect Greenhouse Gas Emissions). This information is supplied to the Corporate Office and all Greenhouse Gas Emissions are totaled and displayed in the Corporate Annual Environmental Sustainability Report.</p>
<p>Climate Leaders.</p>	<p>5/29/14</p>	<p>PSEG Linden has been a member of the USEPA Climate Leaders Program for many years. Participating Companies in this program commit to reduce their impact on the global environment by completing a corporate-wide inventory of their greenhouse gas emissions based on a quality management system, setting aggressive reduction goals, and annually reporting their progress to EPA. Climate Leaders program: PSEG is listed on the Partners list at: http://epa.gov/climateleadership/documents/partnerlist.pdf</p>

WasteWise.	5/29/14	PSEG Linden is an active participants and a charter member of the WasteWise Program since 1993. PSEG Linden is also a WasteWise Hall of Fame Company. They were among one of the first companies to become a Hall of Fame Company. All recycling and waste prevention activates from the Linden site are rolled up into a corporate report. This report is submitted to the US EPA annually. PSEG Linden was one of the first utilities in the WasteWise Program and has served as a mentor to promote the WasteWise waste prevention and recycling message to other members of their industry. PSEG Linden also participates in the NJDEP WasteWise Program and was co-chair of the program during the years 2007 and 2009.
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/29/14	Peaking Side - The Peaking Side had switched over in 2013 from using Ethylene Glycol - a known Hazardous Waste and a HAP (Hazardous Air Pollutant) - to Propylene Glycol (a non-hazardous substance and non-HAP) in two of their combustion turbines. The Propylene Glycol does not get shipped out as Hazardous Waste and provides better heat transfer for the two Combustion Turbines. PSEG Linden pays more to use Propylene Glycol than Ethylene Glycol.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/29/14	PSEG Linden takes the sewage authority's (Linden/Roselle Sewage Authority), waste water discharge (the grey water) and beneficially re-uses the water at their site by passing the wastewater through a sand filter and using the water in the PSEG Linden Cooling Towers System. By doing this, PSEG Linden avoids the use of city water (except during certain situations when the POTW water quality is too poor to use for PSEG Linden's equipment or when the POTW is servicing its system). The water is then returned to the POTW for their re-use, and the cycle continues throughout the year. A PSEG Linden Representative states that about 1 Billion Gallons of grey water from the Linden/Roselle Sewage Authority is used in the cooling towers at their site instead of using city water. The Combined Cycle Side has motion sensors in the bathrooms at the administration building that control the faucets. The Combined Cycling Side has two "volts" used to collect stormwater. One vault is near the Chemical Building Unloading Area and the other near the Ammonia Unloading Area. The stormwater that is collected in these "volts" is used as non-contact cooling water at the site.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/29/14	Since 2012, PSEG Linden has replaced any motor for equipment at their site that was either damaged by Hurricane Sandy or in need of replacement with VFD Motors (Variable Frequency Drive Motors). Variable Frequency Drive Motors can cut down energy costs by controlling the motor with a variable speed drive (VSD, aka variable frequency drive). Variable speed drives allow you to match the speed of the motor-driven equipment to the process requirement.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/29/14	PSEG Linden recycles large station batteries (350 lb. batteries). PSEG replaces any battery based upon need or a PM for the engines.

<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/29/14</p>	<p>PSE&G is working to reduce carbon emissions from its fleet through the introduction of hybrid vehicles, use of aerial electric drive units and use of renewable biodiesel fuel. In 2007, PSE&G embarked on a part decade-long effort to replace 1,300 passenger vehicles with hybrids and traditional bucket trucks with a combination of hybrid bucket trucks and diesel bucket trucks equipped with electric drives. According to PSEG Linden Personnel 50% of the PSEG Fleet has switched to Hybrid Vehicles. Vehicles that were lost during Hurricane Sandy are being replaced by Hybrid Vehicles.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>5/29/14</p>	<p>The following green building implementation projects have been conducted at the site (at the Combined Cycle Side) - an credited LEED Silver Status: 1) Site Selection (Alternate Transportation, Bicycle Storage and Changing Rooms, Parking Availability) 2) Energy and Atmosphere (Fundamental Commissioning, Minimum Energy Performance, CFC Reduction in HVAC Equipment, Optimum Energy Performance such as Lighting Power and Lighting Controls, HVAC, and Equipment and Appliances. 3) Material and Resources (Tennant Space, Long Term Commitment, Building Reuse, Construction Waste Management, Resource Reuse, 30% Furniture and Furnishings, Certified Wood). 4) Indoor Environmental Quality (Construction IAQ Management Plan, During Construction the use of Low Emitting Materials for the Adhesive and Sealants, Paints and Coatings, Carpet Systems, Composite Wood and Laminate Adhesives. Controlling of Systems, Temperature and Ventilation - Thermal Comfort (Compliance) and Thermal Comfort (Monitoring). 5) Innovation in Design Process (Innovation in Design, LEED Accredited Professional).</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/29/14</p>	<p>PSEG Linden Generation Station follows a Corporate Environmental Policy which establishes the goals and principles of PSEG in helping to integrate the Company's commitments to safety and environmental stewardship into business planning. The PSEG Environmental Health and Safety Policy can be found under the Company's Website: pseg.com/info/environment/health.jsp and is called PSEG's Enterprise Policy 2 1) PSEG's Enterprise Policy 2 - an internal document providing further guidance to the Corporate Policy and ensures the integration of this commitment into PSEG's business planning, engineering design and operations by establishing and maintaining management systems that carry out principles for environmental compliance and pollution prevention and resource conservation. - Under this Policy, each member of the Executive Officer Group of PSEG is responsible for their respective facilities, operations and activities. The policy is maintained by the Vice President of the Environmental Health and Safety Department with the assistance of the General Environmental Counsel to ensure implementation across PSEG. 2) Environmental Health and Safety Program Guide 575 - This internal document describes the core elements of management systems required to implement the Environmental Policy. The core elements include 14 elements which have been based on the International Organization for Standardization's specifications for Environmental Management Systems (ISO 140001). Annual certification by this site and the President of the fleet ensures proper implementation of the program. (See attachment under Attachment List)</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/29/14</p>	<p>PSEG Linden has a Multi Phase Environmental Management Information System (EMIS). The system is a web based comprehensive system that integrates the management of compliance actions, regulatory reporting, and oversight of environmental programs.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/29/14</p>	<p>PSEG has a corporate wide Sustainability Report that is published annually which focuses on PSEG's strong commitment to social, economic and environmental initiatives as a component of corporate citizenship. This report is available online through a website dedicated to PSEG's responsibility efforts, in support of PSEG's desire to minimize impact on material resources. The annual sustainability report can be found under the following address: www.pseg.com/info/environment/sustainability/2013/sustainability_report/HTML/index.html#1/z</p>

<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>5/29/14</p>	<p>See the two EPA Voluntary Programs below that PSEG Linden is participating in.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/29/14</p>	<p>Since 2011, PSEG Linden has offered an optional compressed work week for the summer season. Employees can choose to work four 10-hour days Monday through Thursday instead of five 8 hour days and have Friday off each week. This "flexible" work schedule is only offered between Memorial Day and Labor Day on a yearly basis and if there is an emergency at the facility, the employee will be called in to work at the site even if he does have the day off. According to Personnel at PSEG Linden 85% of employees at the Peaking Plants and Combined Cycle Side Facilities in NJ take advantage of this compressed work week schedule during the summer months. PSEG as a Corporation in NJ has expanded their employee van pool program from 14 to 17 vans. An average of 322 employees commute to work via van pool, which takes an estimated 144 cars off NJ state's congested roads and reduces CO2 emissions by an estimated 114 tons per month. PSEG as a Corporation in NJ has promoted car pooling to employees, subsidized parking for car pool vehicles and offers a pre-tax commutation reimbursement program for all employees.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>5/29/14</p>	<p>The renovation of the administration building at Linden PSEG's Facility is registered with the United States Green Building Council (USGBC) as a LEED Commercial Interiors (CI) Project LEED CI addresses sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality and innovation design. In April of 2011, the Administration Building at PSEG Linden received LEED Certification at "Silver Status". According to PSEG's Corporate Sustainability 2013 Report PSEG Linden received LEED "Gold Status" for their PSEG Linden Site Administration Building.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>5/29/14</p>	<p>PSEG Linden as well as PSEG Corporate Office does account for all Greenhouse gases that the Company emits. PSEG Linden uses e-GGRT - a Greenhouse Gas Reporting Tool developed by the EPA to calculate out the Greenhouse Gas Emissions from their site (both Direct and Indirect Greenhouse Gas Emissions). This information is supplied to the Corporate Office and all Greenhouse Gas Emissions are totaled and displayed in the Corporate Annual Environmental Sustainability Report www.pseg.com/info/environment/sustainability/index.jsp Greenhouse Gas Emissions for all PSEG sites can be found on a table on Page 30 of the Company's Corporate Annual Sustainability Report. Report lists years 2009 to 2012 currently. Additional Greenhouse Gas Emission Data Information can be found on Page 33 of the report. 2013 Greenhouse Gas Emission Information will be in the 2014 Annual Sustainability Report due out in July of 2014.</p>
<p>Climate Leaders.</p>	<p>5/8/12</p>	<p>PSEG Linden has been a member of the USEPA Climate Leaders Program for many years. Participating companies commit to reduce their impact on the global environment by completing a corporate-wide inventory of their greenhouse gas emissions based on a quality management system, setting aggressive reduction goals, and annually reporting their progress to EPA.</p>
<p>WasteWise.</p>	<p>5/8/12</p>	<p>PSEG Linden is an active participant and charter member of the EPA WasteWise Hall of Fame since 1993. PSEG Linden is also a WasteWise Hall of Fame Company, among the first companies to become a Hall of Fame Company. All recycling and waste prevention activities from the Linden site are rolled up into a corporate report. This report is submitted to the US EPA annually. PSEG was one of the first utilities in the WasteWise program and has served as a mentor to promote the WasteWise waste prevention and recycling message to other members of their industry. PSEG Linden also participates in the NJDEP WasteWise Program and was co-chair of the program during the years 2007 to 2009.</p>

National Partnership for Environmental Priorities.	5/8/12	PSEG Linden is a member of the National Partnership for Environmental Priorities (NPEP) focused on reducing the use of potentially hazardous chemicals from products and processes.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/8/12	PSEG Linden takes the sewage authority's (Linden/Roselle Sewage Authority), waste water discharge and beneficially re-uses that water in the Linden cooling tower system. This avoids the use of city water (except during certain situations when the POTW water quality is too poor for our equipment or the POTW is servicing its system). The water is then returned to the POTW for their re-use, and the cycle continues throughout the year. During the year 2011 PSEG Linden beneficially reused ~1.5 billion gallons of the Linden/Roselle Sewage Authority waste water as cooling water instead of using city water.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/8/12	PSEG Linden has been replacing existing oils with longer life oils and also filtering (some) oils. This process is reducing the amount of waste and new lube oil product purchased by about ?. Since 2010, PSEG has filtered and re-used about 30 tons of oils. PSEG recycles large station batteries (larger than a truck size battery). Replacement of these batteries are not an annual replacement task. PSEG replaces any battery based upon need or a PM for the engines. Earlier this year (2012), PSEG recycled about 10-12 tons of batteries.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	5/8/12	PSEG Linden has received credit for the following Green Building Implementation Projects at their site from LEED. Site Selection Alternate Transportation, Bicycle Storage & Changing Rooms, Parking Availability Energy and Atmosphere Fundamental Commissioning, Minimum Energy Performance CFC Reduction in HVAC Equipment Optimum Energy Performance - Lighting Power and Lighting Controls, HVAC, Equipment and Appliances Material & Resources Tennant Space, Long Term Commitment, Building Reuse Construction Waste Management Resource Reuse, 30% Furniture and Furnishings, Certified Wood Indoor Environmental Quality Construction IAQ Management Plan, During Construction Low Emitting Materials, Adhesive and Sealants, Paints and Coatings, Carpet Systems, Composite Wood and Laminate Adhesives Controlling of Systems, Temperature and Ventilation Thermal Comfort - Compliance Thermal Comfort - Monitoring Innovation in Design Process Innovation in Design LEED Accredited Professional
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	5/8/12	PSEG Linden Generation Station does have an EHS Policy which establishes the goals and principles of PSEG in helping to integrate the Company's commitments to safety and environmental stewardship into business planning. The EHS Policy can be found under the Company's Website: http://www.pseg.com/info/environment/health.jsp PSEG also has two internal POLICIES that they follow as well, they are: 1) PSEG's Enterprise Policy 2 - an internal document providing further guidance to the Corporate Policy and ensures the integration of this commitment into PSEG's business planning, engineering design and operations by establishing and maintaining management systems that carry out principles for environmental compliance and pollution prevention and resource conservation. - Under this Policy, each member of the Executive Officer Group of PSEG is responsible for their respective facilities, operations and activities. The policy is maintained by the Vice President of the Environmental Health and Safety Department with the assistance of the General Environmental Counsel to ensure implementation across PSEG. 2) Environmental Health and Safety Program Guide 575. - This internal document describes the core elements of management systems required to implement the Environmental Policy. The core elements include 14 elements which have been based on the international Organization for Standardization's specifications for Environmental Management Systems (ISO 14001). Annual certification by this site and the President of the fleet ensures proper implementation of the program.

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/8/12</p>	<p>PSEG Linden has a Multi Phase Environmental Management Information System (EMIS). The system is a web based comprehensive system that integrates the management of compliance actions, regulatory reporting, and oversight of environmental programs.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/8/12</p>	<p>PSEG has a corporate-wide Sustainability Report that is published annually which focuses on PSEG's strong commitment to social, economic and environmental initiatives as a component of corporate citizenship. This report is available on-line through a website dedicated to PSEG's responsibility efforts, in support of PSEG's desire to minimize impact on material resources. The Annual Environmental/Sustainability Report can be located under the following website: http://www.pseg.com/info/environment/sustainability/2011/SustainabilityReport_2011/index.html</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>5/8/12</p>	<p>PSEG is involved in 3 EPA Voluntary Programs (see below).</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>5/8/12</p>	<p>Since 2011, PSEG has offered an optional compressed work week for part of the year (Summer Hours). Employees choosing the "summer hours" work longer days Monday through Thursday and then have Friday as an on-call day (Fridays are off unless the employee is called into work for an emergency). This saves on one full day of commute for the employees at PSEG Linden. According to Personnel at PSEG Linden, 50 to 60% of the employees at PSEG Linden are involved in this program during the summer months. 90% of the Environmental/Engineering Department takes advantage of this program during the summer months.</p>
<p>11) GREEN BUILDING CERTIFICATION - Has the site registered or received certification for any new construction or major building renovation project from a recognized green building organization such as LEED or Green Globes? If yes, describe registered or certified green building construction projects at the site. KEYS TO QUALIFYING: - 1) Must be listed as registered site working toward achieving certification or 2) Actual certification document or award recipient - LEED rating from accredited 3rd party - Green Globes - from EC3 Global. 3) If the answer to this question is yes, the facility will automatically receive a "yes" for the next question on green building implementation.</p>	<p>5/8/12</p>	<p>The renovation of the administration component of Linden PSEG's Facility is registered with the United States Green Building Council (USGBC) as a LEED Commercial Interiors (CI) Project. LEED CI addresses sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality and innovation design. In April of 2011, The Administration Building at PSEG Linden received LEED Certification at "Silver Status"</p>
<p>Climate Leaders.</p>	<p>6/22/10</p>	<p>PSEG Linden has been a member of the USEPA Climate Leaders program. Participating companies commit to reduce their impact on the global environment by completing a corporate-wide inventory of their greenhouse gas emissions based on a quality management system, setting aggressive reduction goals, and annually reporting their progress to EPA. http://www.epa.gov/climateleaders/partners/partners/publicserviceenterpriseigroup.htm</p>
<p>WasteWise.</p>	<p>6/22/10</p>	<p>PSE&G Linden is an active Participant and a charter member of the EPA WasteWise Hall of Fame since 1993. PSEG Linden is also a WasteWise Hall of Fame Company, among the first companies accorded that honor in 2003. All recycling and waste prevention activities from the site are rolled up into a corporate report, which is provided to the US EPA annually, PSEG was one of the first utilities in the WasteWise program and has serve to mentor and promote the WasteWise waste prevention and recycling message to other members of their industry. http://www.epa.gov/epawaste/partnerships/wastewise/pubs/utifact.pdf PSE&G Linden also participates in the NJDEP WasteWise Program and was co-chair of the program during the years 2007 to 2009.</p>
<p>National Partnership for Environmental Priorities.</p>	<p>6/22/10</p>	<p>PSEG Linden is a member of the National Partnership for Environmental Priorities (NPEP) focused on reducing the use of potentially hazardous chemicals from products and processes, http://www.epa.gov/osw/partnerships/npep/partners.htm#P</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/22/10</p>	<p>PSEG Linden recently installed forwarding pumps and a gravity sand filter station so that grey water could be forwarded from the sewerage authority and beneficially re-used in the Linden cooling water system. In 2010, Linden pulled approximately 1 billion gallons of water from the sewerage authority into the cooling water system. If the grey water system had not been put in place, Linden PSEG would have needed to pull that 1 billion gallons of water from the City of Linden water supply. Water use reduction documentation associated with the installation of the forwarding pumps and the gravity sand filter station at PSEG Linden are available through Discharge Monitoring Reports maintained at the Linden PSEG Facility. These Discharge Monitoring Reports also include water flow data.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>6/22/10</p>	<p>In 2010, PSEG Linden filtered and re-used approximately 50 tons of lube oil rather than disposing/recycling offsite. Historically, PSEG Linden has routinely managed to reduce disposal of the following products into landfills by re-using these products: cooling tower fill, floor tiles and furniture. A process has been institutionalized at PSEG Linden to ensure recycling of specialty large station batteries. The Company also has a by-product synergy project with unused hydrochloric acid whereby the acid was used as a feedstock in another company's process rather than send the hydrochloric acid offsite for disposal. Documentation associated with the management of the large station batteries and hydrochloric acid synergy project are maintained on file at the facility.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>6/22/10</p>	<p>PSEG's Linden Facility recently renovated their administrative bldg using Green Building Concepts. The renovation of the administration component of Linden PSEG's Facility is registered with the United States Green Building Council (USGBC) as a LEED Commercial Interiors (CI) project. LEED CI addresses sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality and innovation in design. In January of 2011, the project formally submitted information in support of LEED Certification to the USGBC. A decision on the LEED certification submittal from the United States Green Building council is expected by the end of June, 2011. Copies of information related to the LEED submittal and specific information related to facility management commitment to recycling and the waste reduction are maintained on file at the facility.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/22/10</p>	<p>PSEG's Linden Facility does have an EHS policy establishing the goals and principles of PSEG in helping to integrate the Company's commitments to safety and environmental stewardship into business planning. The site is driven by the corporate vision of being a recognized leader for people providing safe, reliable economic and green energy, and is aligned under a comprehensive corporate-wide environmental policy. "Public Service Enterprise Group and its subsidiaries (PSEG) will responsibly conduct its worldwide businesses in a manner that protects the environment, and the health and safety of employees, contractors, customers, and the public." The EHS Policy can be found under the Company's Website: PSE&G Environmental Policy http://www.pseg.com/info/environment/health.jsp PSEG's Enterprise Policy 2 is an internal document providing further guidance to the Corporate Policy and ensures the integration of this commitment into PSEG's business planning, engineering design and operations by establishing and maintaining management systems that carry out principles for environmental compliance and pollution prevention and resource conservation. Under Policy # 2, each member of the Executive Officer Group of PSEG is responsible for implementing this policy for their respective facilities, operations, and activities. The policy is maintained by the Vice President-Environmental Health and Safety with the assistance of the General Environmental Counsel to ensure implementation across PSEG. PSEG also has an Environmental Health and Safety Program Guide 575. This is an internal document that describes the core elements of management systems required to implement the Environmental Policy. The core elements include 14 elements which have been based on the international Organization for Standardization's specifications for Environmental Management Systems (ISO 14001). Annual certification by the site and the President of the fleet ensures proper implementation of the program.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/22/10</p>	<p>PSEG Linden has completed Phase 1 of implementation of the Environmental Management Information System (EMIS). The system is a web based comprehensive system that integrates the management of compliance actions, regulatory reporting, and oversight of environmental programs.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>6/22/10</p>	<p>PSEG has a corporate-wide Sustainability Report that is published annually which focuses on PSEG's strong commitment to social, economic and environmental initiatives as a component of corporate citizenship. This report is available on-line only through a website dedicated to PSEG's responsibility efforts, in support of PSEG's desire to minimize impact on material resources. The annual report can be found under: http://paperus.lpaperus.com/PSEG/SustainabilityReport/</p>
<p>23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.</p>	<p>6/22/10</p>	<p>See below the 3 EPA Programs PSE&G Linden are involved in.</p>

HILLSIDE, NJ 07205

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/9/08	Facility is no longer blending phylates into products on site. Lead usage has been eliminated.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/9/08	Facility installed a recirculating system.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/9/08	Facility is in the process of updating their lighting system.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	4/9/08

Stewardship Activities	Date Acknowledged	Comments
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	6/26/13	<p>Facility developed and implemented a company Intranet web site for its employees that posts all the company's medical benefit and retirement information, as well as the option to receive a paperless paycheck, reducing the amount of paper that is printed and distributed to its employees.</p>
<p>19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	6/26/13	<p>As a result of Safety-Kleen Systems Inc. being acquired by Clean Harbors Inc. on 12/28/12, modifications to waste shipping routes to and from the facility have been made/continue to be made to improve transportation efficiencies and have resulted in a reduction in fuel usage by the facility. More Actual reductions have yet to be calculated as the change is new and still in process.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	6/26/13	<p>Facility has upgraded lighting throughout the facility within the last year or two by installing high efficiency bulbs and motion sensors to turn off lights when a room/area is unoccupied.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	6/26/13	<p>Safety-Kleen Systems Inc., the maker of EcoPower, an engine oil made from recycled and re-refined oil, co-sponsored a leading national conference on business and sustainability, Fortune Brainstorm Green , in Laguna, CA on 4/29/13 through 5/1/13 and shared its best environmental practices and ideas about how to make engine oil a more sustainable environmental solution. The company also shares its technical information and studies that were conducted regarding oil recycling with the industry.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	6/26/13	<p>Facility has a written Environmental, Health and Safety (EHS) Policy Statement that includes six principles, including compliance with the rules, continual improvement of the EMS and waste minimization. The policy is posted at the facility and was last reviewed and recertified by facility in January 2012.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	6/26/13	<p>Facility implements an EMS that is a "10-Key" program (copy maintained at site), which complies with ISO 14001.</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>6/26/13</p>	<p>Facility provides training to contractors prior to them beginning work on the site that requires them to adhere to Process Safety Management (PSM) Standards under OSHA and the six principles of the facility's EHS policy, in an effort to ensure they perform in a safe and environmentally sound manner. Training is documented and maintained on file and audits are done on an annual basis based on the actions of the contractor at the site.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/10/08</p>	<p>Facility has a written Environmental, Health and Safety (EHS) Policy Statement that includes six principles, including compliance with the rules, continual improvement of the EMS and waste minimization. The policy is posted at the facility.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/10/08</p>	<p>Facility implements an EMS that is a "10-Key" program (copy maintained at site), which complies with ISO 14001.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>4/10/08</p>	<p>Safety-Kleen calculated greenhouse gas (GHG) emission values by developing GHG emission estimates for a single "example" facility (because of the general similarity of the process operations among the plants) in each of two business categories, solvent recycling and oil re-refining. Solvent recycling is a major operation at this site. The methodology used to make the calculations were those prescribed under the California Climate Active Registry (CCAR) program and developed by the World Business Council for Sustainable Development (WBCSD) and the World Resources Institute (WRI). A partnership between WBCSD and WRI created the Greenhouse Gas (GHG) Protocol, which is the most widely used accounting tool for GHG emissions, and the Climate Registry is an effort to unify existing US state and regional registries for GHG reporting (of which CCAR was the first state registry) also founded on the GHG Protocol. Results were documented in a report dated Feb 2008 titled "Greenhouse Gas Emission Estimate & Benchmarking Analysis". Solvent recycling by Safety-Kleen was estimated to have a total carbon footprint of 0.811 TCe/Mgal (tonnes of Carbon-equivalent per thousand gallons of production).</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>4/10/08</p>	<p>Facility subscribes to environmentally sound business contracts by having prepared an EMS vendor flyer that is provided and explained to all its vendors and contractors. It includes the six principles of the facility's (EHS) Policy Statement to which the vendors are held. Facility also has a vendor audit program and conducts visits to vendor sites.</p>

SCAPE ABILITIES INC

Site ID: SCAPE ABILITIES INC
39240 2470 PLAINFIELD AVE,
SCOTCH PLAINS, NJ 07076

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/24/13	In addition to a limited number of pesticides used, the applicator also applies organic products to reduce chemical pollution of the environment.

SYNRAY CORP

Site ID: SYNRAY CORP
14712 209 N MICHIGAN AVE,
KENILWORTH, NJ 070330000

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	8/31/16	Synray Corp has reduced the amount of hazardous waste materials requiring disposal at their site by reformulating the hazardous waste resin by-product to a useful inexpensive finished product resin. 24,000 lbs. of hazardous waste resin was not disposed of as a hazardous waste material in 2015.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	8/31/16	1) Synray Corporation's resin operations sells reformulated resin by-product (24,000 lbs/yr in 2015) to a Company in Texas that is able to use the reformulated resin by-product to coat fishing nets at their facility. 2) Synray Corporation's resin operations sells reformulated resin by-product (none in 2015, but previously in 2012 and 2014 roughly 90,000 lbs./yr.), to a Company in Kentucky that is able to use the reformulated resin by-product as paint to paint barns. 3) Synray Corporation's Seagrave Coating operations sends damaged wood pallets to a refurbishing company (S&B Pallet) located in Plainfield NJ thus allowing conservation and reuse of damaged wood pallets rather than disposal of pallets in a landfill. 500 Wood Pallets were sent to the Refurbishing Company to be refurbished in 2015.

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>8/31/16</p>	<p>Synray Corp Employees were involved with a NJ State Run Lean Management Program for Calendar Years 2013 and 2014. This Program basically streamlines Company practices making activities at the facility and achieves a safe, orderly, efficient, and pleasant workplace. Company Management informed me that by streamlining certain activities at the facility it has lowered the Energy Consumption at the facility. Company officials stated that certain jobs were done at the facility that were very time consuming, (for example the unloading of chemicals drums delivered to the facility. The prior process took hours to do because each drum was considered a "hot drum" and when the product starts to cool, the drum could change shape and start to collapse. The Company developed through the Lean Program, a technique where they use a valve that is placed in the drum to cause the product to cool but not cause the drum to start collapse. It is placed in the bung hole of the drum and this process allows the employees to handle these drums 4 times faster then they did in the past. Company is looking to do another such like program for Calendar Year 2017.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/14/12</p>	<p>Synray Corp has reduced the amount of hazardous waste materials requiring disposal at their site by reformulating the hazardous waste resin by-product to a useful inexpensive resin. 90,000 lbs/yr of hazardous waste resin is no longer disposed of as a hazardous waste material.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/14/12</p>	<p>1) Synray Corporation's resin operations sells reformulated resin by-product (approx. 90,000 lbs/yr) to paint manufacturing companies that are able to use the reformulated resin by-product. 2) Synray Corporation's Seagrave Coating operations sends damaged wood pallets to a refurbishing company thus allowing conservation and reuse of damaged wood pallets rather than disposal in a landfill.</p>

TECHNAIR PACKAGING LABORATORIES

Site ID: TECHNAIR PACKAGING LABORATORIES
827 414 E INMAN AVE,
 RAHWAY, NJ 07065

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>9/25/14</p>	<p>Vegetable based inks are used to eliminate the release of volatile organic compounds</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/25/14</p>	<p>Facility uses low-flow toilets and motion sensor faucets. Water use is minimized by the use of closed loop cooling systems.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>9/25/14</p>	<p>Electrical consumption has been reduced through the use of highly efficient variable drive motors. Natural gas consumption has been reduced through the use of computer controlled air dampers and the processing gases are reused for heating buildings. Propane powered equipment replaced with batteries.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/25/14</p>	<p>Facility sends spent and used product to a company called New Life Chemical in South Carolina as opposed to putting it in the landfill or other disposal. This company reuses the product to their benefit. Pallets recycled at CTM, Triangle, and Petro Pallet. Unused or unsold soap is recycled and shipped out to Clean the World. Visit www.cleanttheworld.org for more info. Facility engages in a process known as "pigging" which involves blowing down production lines to washout excess product into holding tanks once the batch production is completed. Tank washwater is reintroduced and reused into product lines. BOD/COD pollutants are reduced when the process water is discharge into the sanitary sewer. Plastic containers molds are designed with thinner wall thicknesses that reduce the amount of material required in the molding process. Plastic bottles and recyclable packaging materials are reused.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/25/14</p>	<p>Facility has converted to CFLs equipped with motion sensors where applicable.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>9/25/14</p>	<p>A copy of the policy was provided.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>9/25/14</p>	<p>Comprehensive compliance system which assists in keeping track of work done. This system recently added stormwater related work/submittals</p>

<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>9/25/14</p>	<p>Suppliers of plastic bags feature bags that require 25% less plastic than conventional bags, while utilizing 14% natural mineral additive.</p>

Stewardship Activities	Date Acknowledged	Comments
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>1/30/12</p>	<p>Glimcher installed solar panels on the roof of the Jersey Gardens Mall. The solar panels supply 50% of the mall's energy needs.</p>

TRINITAS HOSPITAL

Site ID: TRINITAS HOSPITAL
 14702 225 WILLIAMSON ST,
 ELIZABETH, NJ 07202

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/16/08</p>	<p>The hospital has discontinued use of mercury thermometers. All regular thermometers containing mercury have been converted over to electrical ones.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/16/08</p>	<p>All lights were replaced to energy efficient fixtures/ bulb throughout the hospital, therefore minimizing on energy use.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/16/08</p>	<p>The hospital has implemented a community Sharps program. This program allows the community to come in and drop off their used needles in sharp containers. The only requirement is that the needles must be in a puncture proof containers and labeled "Do Not Recycle." The hospital then takes responsibility to get rid of the sharp containers and needles under their medical waste program.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/16/08</p>	
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>4/16/08</p>	<p>For emission control into the environment, the hospital has a shuttle service to the main location of the hospital. This reduces traffic congestion and reduce emissions going into the air.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>4/16/08</p>	<p>All cleaning products used on site have been converted to Green Environmentally safe products with no toxic chemicals. All of the products are completely consumed and nothing is disposed off site, thereby minimizing on the amount of chemicals generated on site. Only latex paint is used and completely consumed, nothing with oil based material.</p>

UNION, NJ 07083

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	2/7/12	The township installed solar panels at the public works yard which run 40% of their energy usage. They will eventually make enough energy to sell back to the utilities.

VEOLIA MORSES MILL

Site ID: VEOLIA MORSES MILL
962 1400 PARK AVE,
LINDEN, NJ 07036

Stewardship Activities	Date Acknowledged	Comments
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	9/10/14	Provides education information to local residents in Elizabeth regarding taking sources from the local waterways. Provides internships for local college students to do further studies on the impacts on the environmental waterway flora. http://futurecityinc.org/home
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/23/14	In 2005, the facility upgraded the demineralization system (used to produce high quality water for steam production) with the addition of a reverse osmosis (RO) system. This resulted in significant reduction in hazardous materials used to generate the resins in the primary cation and anion units. The project reduced the amount of hazardous materials stored onsite for water treatment (sulfuric acid, sodium hydroxide) by over 60%. The reduction in chemical usage eliminated about 300 trucks delivering chemicals to the facility per year. Additionally, the project resulted in a reduction in the concentration of total dissolved solids (TDS) of about 80%.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/23/14	Installed high temperature sump pumps that reduce the use of quenching water. Reduction in water use by approximately 44%.

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/23/14</p>	<p>The site has identified a beneficial use for its spent cation and anion resin from the water treatment process. Instead of disposing of this material by landfill, the spent resin is provided to a third party to be used in a drilling process. The last change out of the cation and anion resins generated approximately 3880 cubic feet of resin which was reused rather than disposed in a landfill.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/23/14</p>	<p>The Linden Cogen facility provides training and career development to students in the community through its Advanced Careers in Energy (ACES) program. The program provides participants with hands on training in power plant operations including pollution control systems, waste management and water treatment. Four ACE students graduated in 2013/2014. Five candidates to start the program in September for 2014/2015.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/23/14</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/23/14</p>	<p>see checklist entry dated 6/18/2008</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>10/24/12</p>	<p>In 2005, the facility upgraded the demineralization system (used to produce high quality water for steam production) with the addition of a reverse osmosis (RO) system. This resulted in significant reduction in hazardous materials used to generate the resins in the primary cation and anion units. The project reduced the amount of hazardous materials stored onsite for water treatment (sulfuric acid, sodium hydroxide) by over 60%. The reduction in chemical usage eliminated about 300 trucks delivering chemicals to the facility per year. Additionally, the project resulted in a reduction in the concentration of total dissolved solids (TDS) of about 80%.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>10/24/12</p>	<p>The facility has installed an auto-flush system on the Unit 6 combustion turbine to minimize cooling water use. During April 2009 the Linden 6 plant blow-down sump pumps were upgraded as part of a potable water reduction project. The pumps were replaced with higher temperature rated equipment in order to eliminate unnecessary cooling water. The water reduction amounted to an average of 10,000 gallons per day.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>10/24/12</p>	<p>The site has identified a beneficial use for its spent cation and anion resin from the water treatment process. Instead of disposing of this material by landfill, the spent resin is provided to a third party to be used in a drilling process. The last change out of the cation and anion resins generated approximately 3880 cubic feet of resin which was reused rather than disposed in a landfill.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>10/24/12</p>	<p>The Linden Cogen facility provides training and career development to students in the community through its Advanced Careers in Energy (ACES) program. The program provides participants with hands on training in power plant operations including pollution control systems, waste management and water treatment.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>10/24/12</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>10/24/12</p>	<p>see checklist entry dated 6/18/2008</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>6/12/08</p>	
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>6/12/08</p>	<p>The system employed is the "ConocoPhillips System" similar to ISO 14000, where corporate audits are done. There are no outside audits.</p>

VEOLIA MORSES MILL SAR

Site ID: VEOLIA MORSES MILL SAR
182545 1400 PARK AVE,
LINDEN, NJ 07036

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/7/16	The site's refractory brick has been reclassified as non-hazardous so this is no longer a hazardous waste. Additionally the site no longer handles nitrobenzene.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/7/16	The facility repaired an underground water leak.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/7/16	The facility audited their instrumentation for air and reduced its usage. Additionally they are using dirty acid gas as a fuel in place of some natural gas.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	7/7/16	The facility employs a Lotox scrubber which uses ozone in lieu of ammonia and also has a caustic scrubber which has allowed them to minimize emissions; the site has the lowest emissions of any sulfuric acid plant in their system.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	7/7/16	They are a member of the community advisory Panel and have provided sulfuric acid seminars.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	7/7/16	The site is certified under ISO 14001 and is maintained throughout the year in accordance with this standard. Activities are reported to Chemours Corporate.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	7/7/16	The site is certified under ISO 14001 and is maintained throughout the year in accordance with this standard. Activities are reported to Chemours Corporate.

<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>7/7/16</p>	<p>They are a member of the community advisory Panel and have provided sulfuric acid seminars.</p>

 14559 191 RT 31,
 WASHINGTON BORO, NJ 07882

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/8/17	The company has a 0 landfill program which sends all items that cannot be recycled from their facility to a company called Green Innovations. Green Innovations sends the non-recyclables off for processing to create a flake material called engineered fuel. This engineered fuel is sold to various entities who burns the material in place of coal. All residuals from the engineered fuel are also absorbed into the kiln, so there is no ashes going into the landfill. To date, 79,342 kilograms of general trash have been diverted from landfills.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	5/8/17	The companies environmental policy can be found on their webpage. https://www.albea-group.com
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	5/8/17	Albea Americas Inc environmental management system is ISO 14001, 18001 and 9001 certified.
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	4/16/14	http://www.albea-group.com/en/our-commitments/corporate-social-responsibility/operations.html
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	4/16/14	Albea Americas Inc environmental management system is ISO 14001 certified.

------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>4/20/10</p>	<p>Company continues to improve yields through a variety of methods. Mallinckrodt has reduced the amount of hazardous chemicals required to produce their products by making the chemical reactions more efficient. Company has also made a significant capital investment onsite (\$24 MM) for a Miscellaneous Organic NESHAP (MON) project that was installed in 2009 to reduce hazardous air pollutants (HAP) in their solvents operations and pilot plant operations. Two (2) units were installed - a cryogenic unit, and a thermal oxidation unit. These units include the recovery of volatiles from the two (2) onsite hazardous waste aboveground storage tanks onsite, and replacing them back into storage, eliminating an emission source.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>4/20/10</p>	<p>Mallinckrodt continues to sell their non-hazardous waste sludge as a component being used in cement manufacturing. In addition, co-product methanol/acetone/isopropanol is used as a supplemental biomass feed at their onsite WWTP; rinse ammonia is used as a supplemental biomass feed at their on-site WWTP; and off-specification material is sold as lower grade product - including methylene chloride, THF, and most acids.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstrable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>4/20/10</p>	<p>Mallinckrodt, in 2009, participated in the USEPA "Green Lights" program, in which the entire facility was retrofitted with more energy efficient, and environmental friendly fluorescent lighting equipment.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>4/20/10</p>	<p>Company continues to provide training and assistance for Emergency responders in the area. They train other local responders in procedures and also in the hazards found at the Mallinckrodt facility. Mallinckrodt also responds to local emergencies which are not directly on their site.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>4/20/10</p>	<p>Company has Environmental, Health & Safety (EHS) Policy in place. Last updated October 2009. See Attachment List for copy of their EHS Policy. Link provides access to website that contains company EHS policy: http://www.mallbaker.com/Americas/about/default.asp</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>4/20/10</p>	<p>Company has EHS policy in place, which incorporates ISO 14001 system. Mallinckrodt received a Certificate of Registration (Certificate No. QSR-EMS-005) from Quality Systems Registrars, Inc. (located in Sterling, Virginia) on January 21, 2010 indicating that Mallinckrodt is ISO 14001:2004 certified under the following scope: Manufacturing, purification, and packaging of acids, solvents, organic & inorganic salts, management of emissions and waste generated from the operations. A copy of the Certificate of Registration can be found in the Attachment List associated with this stewardship review.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>3/4/08</p>	<p>They have improved yields through a variety of methods. They have reduced the amount of hazardous chemicals required to produce their products by making the chemical reactions more efficient.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/4/08</p>	<p>Mallinckrodt Baker sells their waste sludge to be used as a component in cement. In addition, co-product methanol/acetone/isopropyl alcohol is used as a supplemental biomass feed at their on-site WWTP; rinse ammonia is used as supplemental biomass feed at their on-site WWTP; and off-spec material is sold as lower grade product. This includes methylene chloride, THF, and most acids.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/4/08</p>	<p>They provide training and assistance for Emergency Responders in the area. That is they train other local responders in procedures and also in the hazards of their own site. They also respond to local emergencies which are not on their site. As an example, last year a local chemical manufacturer had a release and the Mallinckrodt ER team responded and transported one of that manufacturer's employees to a local hospital.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/4/08</p>	<p>They employ their ISO 14001 plan.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/4/08</p>	<p>They use the ISO 14001 system and are certified for ISO 14001.</p>

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>3/3/08</p>	<p>Decreased once through-water by recycling</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>3/3/08</p>	<p>Installed boiler control upgrades, controls on agitators, and energy efficient motors</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>3/3/08</p>	<p>Minimized by the sale of by-products</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>3/3/08</p>	<p>BASF has a Community Advisory Panel. In addition, BASF won the 2007 Gold Award from Synthetic Organic Chemical Manufacturers Association in recognition of Environmental Health Safety & Security and outreach accomplishments. See http://www.socma.com/assets/File/socma1/PDFfiles/chemstewards/SOC_PI07-AWDpstr4-2.pdf</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>3/3/08</p>	<p>American Chemistry Council's Responsible Care program</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>3/3/08</p>	<p>American Chemistry Council's Responsible Care program</p>

Site ID: BASF CORP
66205 JAMES ST,
BELVIDERE TOWN, NJ 07823

Stewardship Activities	Date Acknowledged	Comments
------------------------	-------------------	----------

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>5/18/12</p>	<p>During 2011, BASF performed the final cleaning of the equipment and piping in preparation for demolition. For the final organic solvent rinse of the equipment and piping, the facility chose to use Acetone because it is a non-VOC hydrocarbon. Other alternatives (e.g. xylene, toluene, etc.) were VOC hydrocarbons.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>5/18/12</p>	<p>BASF used natural gas to create steam to heat the building and to operate the thermal oxidizer for VOC emission reduction. To reduce natural gas use during 2011, the facility significantly restricted the heating periods and achieved a reduction from 36.9 to 21.8 MMSCF. The facility also coordinated its cleaning operations so that the thermal oxidizer operation was significantly restricted and natural gas use was reduced from 7.4 to 0.3 MMSCF.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/18/12</p>	<p>BASF is part of a Community Advisory Panel. The panel meets to discuss environmental concerns at BASF. The most recent meetings occurred on December 2011 and March 2012.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/18/12</p>	<p>BASF is covered by a corporate environmental policy.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/18/12</p>	<p>ISO 140001 certified</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/18/12</p>	<p>http://www.basf.com/group/corporate/en/sustainability/environment/goals</p>
<p>Performance Track.</p>	<p>2/28/08</p>	<p>2007-2009 Renewal Member: The facility proposes to reduce water by 15%, reduce waste to landfill by 10% and eliminate chlorine gas for disinfection (replaced with sodium hypochlorite) by 12/09.</p>
<p>Green Chemistry.</p>	<p>2/28/08</p>	<p>2005 Green Chemistry Challenge Award - UV coatings.</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/28/08</p>	<p>The facility has reformulated several products that no longer contain volatile organic compounds (acetone, PCBTF and methyl acetate). These products are now water based. NOTE: The facility has also reduced the generation of off spec. PVC by 90% between 2006 and 2008.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/28/08</p>	<p>40 percent reduction since 2003. The facility is planning on reducing water usage by an additional 15% from the amount used in 2006. Water reduction has come from condensate return as well as leak repairs to the fire suppression system.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/28/08</p>	<p>Pallets and drums are returned to suppliers for reuse. PVC sold for reuse. NOTE: The facility reports that it has reduced waste to landfill by 8% in 2007 from 2006.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/28/08</p>	<p>The facility is part of a Community Advisory Panel and will consider environmental concerns that the community believes may be an issue at BASF. The facility has also made an offer to the Belvidere High School to assist with the school "chemical cleanout campaign". BASF has offered to assist in providing guidance with the proper storage and disposal of chemicals used in education. NOTE: Belvidere High School has not followed up on this offer at this time. BASF also provides an annual \$1500 scholarship to Belvidere High School and provides \$1500 to the chemistry department.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/28/08</p>	<p>Most recent dated November 2007. Environmental Health Safety and Security Statement provided to all staff and visitors.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/28/08</p>	<p>ISO14001 certified.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>2/28/08</p>	<p>The facility prepares a report as required by Performance Track. Report is available on-line at www.basf.com/corporate/ehs/factsheets.htm</p>

23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s). KEYS TO QUALIFYING: - 1) Site should be able to clearly identify any formal EPA program and describe their participation.	2/28/08	Performance Track
17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.	2/28/08	The facility switches to four 10 hour days for third shift in winter to reduce commutes.
6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.	2/28/08	Calculated taking into consideration all greenhouse gasses at the facility. Prepared for all BASF facilities.

BESTS FRUIT FARM

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/20/13	Pesticide usage is reduced by monitoring Rutgers Cooperative Extension's Weekly Newsletter, practicing Integrated Pesticide Management (IPM), and by the purchase of a new sprayer which delivers a higher percentage of spray to target site (foliage).
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/20/13	Reduces water usage by drip irrigation.

BLAIR ACADEMY

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	2/29/08	Facility has switched to non hazardous environmentally friendly cleaning product.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	2/29/08	School has installed waterless urinals.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	2/29/08	Modified security vehicle to run on bio-diesel or used vegetable oil.

CAMP TAYLOR CAMPGROUND

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/23/08	artificial fertilizers have been completely replaced with on-site composting
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	4/23/08	a low-impact nature trail has been constructed w/ educational/ explanatory stations
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	4/23/08	regularly scheduled ecological education workshops and nature programs are offered to Warren County residents

14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/20/11	Old: See Report dated 2/8/08

<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>7/20/11</p>	<p>See report dated 2/8/08</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>7/20/11</p>	<p>see report dated 2/8/08</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>7/20/11</p>	<p>Covanta installed motion sensors in place of light switches in the bathrooms, locker rooms and the warehouse and other storage room to ensure lights are turned out when the rooms are not occupied.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>7/20/11</p>	<p>Old: See report dated 2/19/10. New: Covanta helped a local Daisy Scout Troop plant a butterfly garden on their property.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>7/20/11</p>	<p>Old: See reports dated 2/28/08 and 2/19/10. New: Covanta provides presentations at the Warren County Recycling Seminar.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>7/20/11</p>	<p>For details see entry dated 2/28/2008.</p>

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>7/20/11</p>	<p>Old: For details see entry dated 2/8/2008 New: Covanta spent \$500,000 dollars to have a new environmental management information system developed. It knows all regulatory and permit deadlines and actions and emails responsible parties to remind them in advance.</p>
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	<p>7/20/11</p>	<p>Covanta purchases only "Green Cleaning Chemicals" through a company called State Chemical. All cleaning chemicals are certified through Green Earth.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>7/20/11</p>	<p>Covanta has signed up for the California Carbon Registry to calculate and track their carbon footprint.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/19/10</p>	<p>For details see entry dated 2/8/2008.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/19/10</p>	<p>For details see entry dated 2/8/2008.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/19/10</p>	<p>For details see entry dated 2/8/2008.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>2/19/10</p>	<p>1) Covanta worked with the Audubon Society of New Jersey to place several Bat and Bird boxes in areas around their facility in October of 2009. 2) Covanta signed an agreement with the US Fish and Wildlife in 2009 dedicating 3 acres of their site to natural habitat for the next ten years. Covanta also paid a landscaper to come in and remove non indigenous species from that area. 3) Covanta, with the help of local cub scout troops, planted 1300 indigenous species in the area dedicated to natural habitat for Earth Day 2010. US Fish and Wildlife and the Audubon Society were present at the planting.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/19/10</p>	<p>Covanta has multiple community outreach programs. 1) Covanta paid to put advertisements in the local newspapers educating the public on proper disposal of thermostats and batteries. They also provided funding to local municipalities to collect and properly dispose of thermostats. 2) Covanta provided funding to seven local schools to continue their phone book recycling programs, where the community can drop off phone books at the school so they can be recycled. 3) Covanta allows local schools to tour the facility on earth day and teaches the children about greenhouse gasses.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/19/10</p>	<p>For details see entry dated 2/8/2008.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/19/10</p>	<p>For details see entry dated 2/8/2008.</p>
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/8/08</p>	<p>Change made from solvent based parts washer to aqueous non-haz.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/8/08</p>	<p>Facility just completed beneficial re-use project. The cooling water that was previously discharged is now being used for water in the facilities scrubbers which is offsetting well water pulled from the aquifer by about 25,000 to 30,000 gallons per day.</p>

<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/8/08</p>	<p>Waste water is now reused The ash generated is now beneficially used for daily cover material for a cap to protect refuse from blowing around and minimize fugitive emissions and odor. The ash compacts to a concrete like consistency and offsets the use of soil for this application.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/8/08</p>	<p>Local schools are given tours and presentations on benefits of converting waste to energy.</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/8/08</p>	<p>http://www.covantaholding.com/site/solutions/environmental.html</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/8/08</p>	<p>Environmental Management System Provides structured approach to environmental management (Plan - Do - Check - Act) Integrates environmental activities with the overall business plan Assigns environmental responsibility & accountability throughout the entire organization</p>

CRAMER PLATING & ANODIZING INC

Site ID: CRAMER PLATING & ANODIZING INC
571 4 HOYT LN, & MOUNTAIN LAKE RD
BUTTZVILLE, NJ 07829

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>6/4/08</p>	<p>Cramer Plating recycles rinse water through a DI, reverse osmosis and evaporation recovery process. The recycled water is put back into the process and reduces their use of fresh water.</p>

DSM NUTRITIONAL PRODUCTS INC

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/29/14	The site uses aqueous detergents instead of solvent degreasing solutions in maintenance degreasers and continues to generate small quantity generator amounts instead of large quantity generator amounts.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/29/14	Shower heads continue to be low flow appliances in the locker rooms.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/29/14	The site routinely track its Energy Performance in an Index and has set reduction goals of 2%per year for the next 10 years Prior goals have been met.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	5/29/14	The solid waste sludge generated from the wastewater treatment operations has been re-characterized and is now being recovered for beneficial reuse at a licensed compost facility in Burlington County. This affects about 3,000 tons/year of material.
13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.	5/29/14	The company completes Life Cycle Assessments for specific products. They can be found at: http://www.dsm.com/en_US/cworld/public/sustainability/pages/life_cycle_assessments.jsp

<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>5/29/14</p>	<p>While the waste biomass research that was being conducted and resulted in stewardship recognition in the past is no longer being conducted here, the NJDEP recognizes that the research has borne fruit and the technology is being used by partners of this facility. Therefore stewardship recognition will be granted for this category presently. This same research activity will not be recognized in the future however, because it is not ongoing after the five year deadline as per NJDEP C&E procedures.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/29/14</p>	<p>The site partners with local organizations and provides outreach through the DSM CAP. http://dsmcap.com/</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>5/29/14</p>	<p>All senior site managers endorse a site wide Statement of Commitment. This document includes the Environmental Principles that the site maintains which includes continual improvement.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>5/29/14</p>	<p>The sites' Environmental Management System has recently met the recertification requirements of ISO 14001:2004 and certification requirements of Responsible Care RCMS:2008.</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>5/29/14</p>	<p>The site shares ongoing and annual environmental data at its bimonthly Community Advisory Panel (CAP) meetings and submits environmental data to be included in corporate DSM's annual People, Planet, Profit Report (Triple P report). See Planet section for environmental information - pgs 56 to 63 at: http://www.dsm.com/en_US/cworld/public/investors/pages/annual_report_2010.jsp</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/29/14</p>	<p>The Solar Panel field is online since last stewardship recognition.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>5/29/14</p>	<p>The site accounts for all greenhouse gases in its Triple P report and Responsible Care Metrics reporting to the American Chemistry Council. Calculations are based on either actual test results, government or industry emission factors.</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>5/29/14</p>	<p>The site pre-approves all vendors and maintains an audit schedule. Environmental and sustainability assessments are captured in the questionnaires and during site audits. These practices follow DSM corporate policy: http://www.dsm.com/en_US/cworld/public/sustainability/pages/sustainable_value_chains.jsp</p>

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	<p>2/8/11</p>	<p>The site has moved from solvent degreasing solutions to aqueous detergents in all maintenance degreasers and is now only classified as a Small Quantity Generator.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>2/8/11</p>	<p>The site installed new shower heads in all building locker rooms to low flow appliances</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	<p>2/8/11</p>	<p>The site routinely tracks its Energy Performance in an Index and has set reduction goals of 2% per year for the next 10 years. Prior goals have been met.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>2/8/11</p>	<p>The solid waste sludge generated from the wastewater treatment operations has been re-characterized and is now being recovered for beneficial reuse at a licensed compost facility in Burlington County. This affects about 3,000 tons/year of material.</p>
<p>13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.</p>	<p>2/8/11</p>	<p>The company completes Life Cycle Assessments for specific products. They can be found at: http://www.dsm.com/en_US/cworld/public/sustainability/pages/life_cycle_assessments.jsp</p>
<p>22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.</p>	<p>2/8/11</p>	<p>The site houses a research center being operated under a DOE grant. DSM's White Biotech group is developing new enzymes to increase the efficiency of converting waste biomass into ethanol (biofuel) This effort will hopefully decrease the amount of ethanol that would otherwise be obtained from food sources.</p>

<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>2/8/11</p>	<p>The site partners with local organizations and provides outreach through the DSM CAP. http://dsmcap.com/</p>
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	<p>2/8/11</p>	<p>All senior site managers endorse a site wide Statement of Commitment. This document includes the Environmental Principles that the site maintains which includes continual improvement.</p>
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>2/8/11</p>	<p>The site's Environmental Management System has recently met the recertification requirements of ISO 14001:2004 and certification requirements of Responsible Care RCMS:2008</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>2/8/11</p>	<p>The site shares ongoing and annual environmental data at its bimonthly Community Advisory Panel (CAP) meetings and submits environmental data to be included in corporate DSM's annual People, Planet, Profit Report (Triple P report). See Planet section for environmental information - pgs 56 to 63 at: http://www.dsm.com/en_US/cworld/public/investors/pages/annual_report_2010.jsp</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>2/8/11</p>	<p>DSM has entered into a project to build a 4 MgW Solar Panel field on underutilized property to provide renewable energy to the site. Project will be completed by summer of 2011.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>2/8/11</p>	<p>The site accounts for all greenhouse gases in its Triple P report and Responsible Care Metrics reporting to the American Chemistry Council. Calculations are based on either actual test results, government or industry emission factors. Triple P report is available at: http://www.dsm.com/en_US/cworld/public/investors/pages/annual_report_2010.jsp</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>2/8/11</p>	<p>The site pre-approves all vendors and maintains an audit schedule. Environmental and sustainability assessments are captured in the questionnaires and during site audits. These practices follow DSM corporate policy: http://www.dsm.com/en_US/cworld/public/sustainability/pages/sustainable_value_chains.jsp</p>

GREENWICH TWP BD OF ED STEWARVILLE ELEMENTARY SCHOOL

Site ID: GREENWICH TWP BD OF ED STEWARVILLE ELEMENTARY

 642 S MAIN ST,
 GREENWICH TWP, NJ 08886

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/29/09	Within the last year the facility has changed all chemicals and cleaners maintained and utilized on site to "Green" chemicals. Changeover was ATRA and Green Seal Certified.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/29/09	Low flow toilets have been installed within the last three years.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	4/29/09	School utilizes geothermal technology for heating and cooling.
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	5/30/08	Low flow toilets have been installed within the last three years.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/30/08	School utilizes geothermal technology for heating and cooling.

GREG DONALDSON FARMS

Site ID: GREG DONALDSON FARMS
 128739 178 AIRPORT RD,
 MANSFIELD TWP, NJ 07840

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	5/22/13	<p>1. Reduced Use of Pesticides - As part of Integrated Pest Management (IPM), uses Rutgers-based scouts to evaluate severity of pest infestations in crops to identify when infestations reach economic levels before making decision to spray the crop with a pesticide. Policy has reduced volume of pesticides applied to farm. 2. Reduced Use of Fertilizer - Conducts soil tests and performs tissue analyses of strawberries, tomatoes, peppers, raspberries, and apples to determine timing, quantity, and composition of fertilizer applications. Has improved crop production and quality with more efficient and reduced use of fertilizers.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	5/22/13	<p>1. Reduced water consumption for crop production with drip irrigation. 2. Further reduced water consumption for irrigation by daily monitoring of soil probes that measure soil moisture levels.</p>
<p>18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.</p>	5/22/13	<p>Installed new refrigerant gasses, new compressors, and "fast start" system on refrigeration units this past spring: and continues to upgrade with maintenance replacements to reduce electrical energy consumption.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	5/22/13	<p>Collects and composts fallen leaves and grass clippings improving soil structure and tilth for greater water-holding capacity and fertilizer retention in crop root zone.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	5/22/13	<p>Converted standard incandescent lights to LED's and compact fluorescent lighting systems to reduce electrical energy consumption.</p>

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>5/22/13</p>	<p>Slowed surface water run-off and controlled soil erosion by installing buffer zones in fields and lining waterways with stone.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>5/22/13</p>	<p>1. Farm sponsors/hosts week-long Summer Farm Camp (day) for youth of area teaching principles, including "hands-on" exposure, of agriculture, stewards of the land principles, Integrated Pest Management, plant/crop growth and development, pollination and bees. 2. Has made presentations on Integrated Pest Management to groups: Rotary Club, Retirement Village, Health Fair Booth, Centenary College.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>5/22/13</p>	<p>Has installed solar panels on building containing refrigeration units to offset electrical consumption.</p>

GULBRANDSEN TECHNOLOGIES INC @ HORSESHOE BUILDING

Site ID: GULBRANDSEN TECHNOLOGIES INC @ HORSESHOE BUILDING
546 1 RIVERSIDE WAY,
PHILLIPSBURG, NJ 08865

Stewardship Activities	Date Acknowledged	Comments
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>9/29/10</p>	<p>The facility has installed a 211 Killowatt solar system on the roof of the facility that provides between 25-40% of the facility's electrical needs.</p>

HAPPINESS IS CAMPING

Site ID: HAPPINESS IS CAMPING
 38846 62 SUNSET LAKE RD,
 HARDWICK, NJ 078250000

Stewardship Activities	Date Acknowledged	Comments
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	7/21/09	Facility purchases only low-flow water fixtures.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/21/09	Facility purchases only Energy Star rated appliances.

HOPE TWP BD OF ED ELEMENTARY SCHOOL

 39565 320 HOPE JOHNSONBURG RD,
 HOPE, NJ 07844

Stewardship Activities	Date Acknowledged	Comments
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	7/9/13	This school has up-graded their florescent light fixtures from T 12's to T 8's using a grant from Clean Energy Program.

LIBERTY SOD FARMS INC

Site ID: LIBERTY SOD FARMS INC
 53518 52 SHADES OF DEATH RD,
 GREAT MEADOWS, NJ 07838

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	7/25/17	The farmer reduces hazardous material use by cutting grass and weeds mechanically. The farmer also recycles the pesticide empty containers.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	7/25/17	The business has fluorescent lighting to save energy.

LINDE GAS NORTH AMERICA CORP @ ALPHA IND PK

Site ID: 408 LINDE GAS NORTH AMERICA CORP @ ALPHA IND PK
 80 INDUSTRIAL DR,
 ALPHA, NJ 08865

Stewardship Activities	Date Acknowledged	Comments
WaterSense.	4/26/16	
15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.	4/26/16	Linde E&PP Alpha NJ Plants: Replaced urinals in men's rest room with waterless urinals.
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	4/26/16	Linde E&PP Alpha NJ Plants: * (Phase 1) Installed LED Lighting in the Gas Production facility. Area consists of approximately 28,000 sq ft. * (Phase 2) Installed LED Lighting in Site Conference Rooms w/ Dimmer Switches * Posted Reminder notes above light switches as a reminder to turn off lights when rooms are not in use.

MANSFIELD TWP BD OF ED ELEMENTARY SCHOOL

Site ID: MANSFIELD TWP BD OF ED ELEMENTARY SCHOOL

 PORT MURRAY, NJ 07865

Stewardship Activities	Date Acknowledged	Comments
12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).	9/23/15	The facility has completed LED lighting upgrade in the hallways/ cafeteria.
22) INNOVATIVE PROGRAM - Has the site adopted/ developed any innovative programs not captured in other checklist questions that improve/reduce the site's environmental impact and promotes environmental excellence within its organization? If yes, describe initiative. KEYS TO QUALIFYING: - 1) Any voluntary activity or program that results in a benefit to the environment but does not easily qualify for recognition under the previous categories.	9/23/15	The school has voluntarily posted NJDEP Anti-Idling signs to remind visitors of the idling rules.

MARS WRIGLEY CONFECTIONERY US

Site ID: MARS WRIGLEY CONFECTIONERY US
 14492 700 HIGH ST,
 HACKETTSTOWN, NJ 07840

Stewardship Activities	Date Acknowledged	Comments
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	10/6/09	M&M Mars continues to be a "Zero Landfill Site". Approx. 90% of the solid waste generated is sent for recycling and 10% is sent for incineration.

<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	<p>10/6/09</p>	<p>M&M Mars, in conjunction with Rutgers University, has done a stream restoration project. The project was repairing the riparian buffer on a stream located at the rear their property.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>10/6/09</p>	<p>M&M Mars has conducted classroom presentations at local elementary schools and university. M&M Mars has conducted Environmental Studies presentation at St. Mary's Middle School in Hackettstown. Centenary College has used M&M Mars for its emission monitoring courses.</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>10/6/09</p>	<p>M&M Mars has instituted a car pool program. Employees car pooling get preferential parking spots.</p>
<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/6/09</p>	<p>M&M Mars has installed & is operating a large solar panel farm supplying electricity to the site.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>5/15/08</p>	<p>Mars' HKP Green program thoroughly addresses the plant's waste stream with the result that this is a "Zero Landfill Site".</p>

MCWANE DUCTILE NJ

Site ID: MCWANE DUCTILE NJ
 14558 183 SITGREAVES ST,
 PHILLIPSBURG, NJ 08865

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	4/18/08	Facility went from oil based paint to water based and has reduced VOC usage by 90%.
19) TRANSPORTATION ENERGY USE REDUCTION - Excluding employee trip reduction, has the site substantially improved its energy efficiency by implementing changes in the transportation utilized? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	4/18/08	The facility has recently instituted the recycling of off spec. pipe on-site as opposed to sending the pipe off-site for cutting. This process has reduced the number of trucks moving pipe by approximately 150 trucks per month.
10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.	4/18/08	ASCIPC Advisory panel. Conducted the first Wednesday of every month.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	4/18/08	Corporate Wide Environmental Management System.

NJDEP JENNY JUMP STATE FOREST COMPOST

Site ID: NJDEP JENNY JUMP STATE FOREST COMPOST
 39075 300 330 STATE PARK RD,
 FRELINGHUYSEN TWP, NJ 07844

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	3/6/08	The Division of Parks and Forestry, as part of the NJDEP, maintains an extensive set of environmental and natural resource policies as memorialized in the Priorities and Action Plan.

PARKS EDGE BUSINESS CENTER

Site ID: PARKS EDGE BUSINESS CENTER
 75099 999 WILLOW GROVE ST,
 HACKETTSTOWN TOWN, NJ 07840

Stewardship Activities	Date Acknowledged	Comments
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	6/11/15	The site was able to demonstrate that an Environmental Policy that governs their work efforts towards awareness and minimizing on waste to support good environmental practices are in place.
4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.	6/11/15	Hi Tronics has an environmental mgmt. system that defines, implements and monitors environmental objectives.

PIAZZA FARMS & GREENHOUSES

Site ID: PIAZZA FARMS & GREENHOUSES
 177865 71 RT 57,
 LOPATCONG, NJ 08865

<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	6/5/13	<p>Piazza Farms utilizes Integrated Pest Management (IPM) techniques, which includes recommendations of IPM scouts and Rutgers Cooperative Extension Weekly Pest Reports, to reduce its use of pesticides at the site.</p>
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	6/5/13	<p>1. Has employed drip irrigation, reducing water consumption, for past 12 years for crop production in the Farm's fields and greenhouses. 2. Irrigates at night to further conserve irrigation water. 3. Irrigation mains are located underground keeping irrigation water cooler and reducing evaporation further.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	6/5/13	<p>1. Plastic bags in which fertilizer is delivered are collected together with other plastic materials (greenhouse trays and pots) and transported to Lancaster (PA) for recycling. 2. Produces greenhouse tomatoes in bags of potting soil mix for 2 or 3 years after which spent soil is discarded into fields and incorporated in surface soils of fields improving tilth of field soils. 3. Purchases some pesticides in refillable containers which reduces the amount of containers requiring disposal.</p>
<p>21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.</p>	6/5/13	<p>Piazza Farm has made significant improvements to the stream corridor on their property to reduce infiltration of soil sediments, and the inflow of pesticide and fertilizer runoff to the waterway by implementing the following actions: 1) Practicing minimum tillage to reduce soil loss through erosion; and 2) Construction of grassed waterways to better control surface water run-off and soil erosion after consultation with Soil Conservation Services.</p>

PRINCETON UNIVERSITY SUMMER CAMP

Site ID: PRINCETON UNIVERSITY SUMMER CAMP
22059 158 MILLBROOK RD,
HARDWICK, NJ 07825

Stewardship Activities	Date Acknowledged	Comments
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	3/25/08	Solar panels have been installed on the lodge roof. The facility also generates on site hydroelectric power via a Nuutilus Francis Turbine system.

QUVA PHARMA INC

Site ID: QUVA PHARMA INC
94351 519 RT 173,
GREENWICH TWP, NJ 08886

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	11/27/12	The Glycol based Chiller system has been replaced with a water based system. Ozone depleting substances have been removed from Air Conditioning units.
13) LIFE CYCLE ASSESSMENTS - Has the site conducted a Life Cycle Assessment of any products or services, and based on findings implemented actions to reduce the environmental impacts? If yes, describe. KEYS TO QUALIFYING: - 1) An environmental assessment using specific standards - EPA LCA101 - ISO 14040. 2) Must be able to elaborate on the product, environmental assessment findings and outcome - what changes took place? - what decisions were made? 3) LCA is not a product quality assurance evaluation nor an economic evaluation.	11/27/12	BMS conducts Life Cycle Assessment in order to minimize env. impacts of their packaging. http://www.bms.com/sustainability/environmental_performance/Pages/product_stewardship.aspx#plc
3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.	11/27/12	http://www.bms.com/sustainability/governance_and_management/Pages/environment_health_and_safety_policy.aspx

<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	<p>11/27/12</p>	<p>http://www.bms.com/sustainability/governance_and_management/Pages/management_systems.aspx</p>
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	<p>11/27/12</p>	<p>http://www.bms.com/sustainability/goals_key_indicators/Pages/goals_and_key_indicators.aspx</p>
<p>17) EMPLOYEE TRIP REDUCTION - Has the site implemented a successful employee trip reduction program? If yes, describe program and results or participation. KEYS TO QUALIFYING: - 1) Site should be able to show - policy or program summary/rules - records of participation or trip reduction.</p>	<p>11/27/12</p>	<p>BMS has an active work from home policy and a swing space policy which allows employees to work at a location closer to their home.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>11/27/12</p>	<p>http://www.bms.com/sustainability/environmental_performance/Pages/greenhouse_gas_emissions.aspx http://www.bms.com/sustainability/goals_key_indicators/Pages/goals_and_key_indicators.aspx</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>11/27/12</p>	<p>BMS conducts audits at third party sites to ensure vendors are meeting BMS env. standards.</p>
<p>9) MENTORING TO OTHER BUSINESSES - Does the site offer mentoring of an environmental nature to other businesses? If yes, describe mentoring program and any available contact information the site can provide. KEYS TO QUALIFYING: - 1) Must be environmentally based. 2) Be able to describe - who you are mentoring or willing to mentor - how others can contact you to participate either directly or through association membership. 3) Must not be profiting - not a paid consultant - not sales/marketing.</p>	<p>11/27/12</p>	<p>BMS shares env./safety best practices with its vendors.</p>

SCC CONCRETE INC

Site ID: SCC CONCRETE INC
 538 1051 RIVER RD, AKA N MAIN ST
 PHILLIPSBURG, NJ 08865

Stewardship Activities	Date Acknowledged	Comments
<p>15) WATER USE REDUCTION - Has the site employed a program to substantially reduce or reuse water? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to back up reductions with data or demonstrations - water bill or other monitoring - obvious process change observed - goal tracked in EMS and found in annual report. 2) Production adjusted reduction (not from slow business cycle). 3) No credit for drought restriction steps.</p>	<p>9/24/18</p>	<p>Company installed a "Reclaimer Unit" that re-uses the water when Truck Mixers are cleaned out. Company recovers approximately 1,000 gallons of water a week.</p>
<p>16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.</p>	<p>9/24/18</p>	<p>The residual stone and sand that is reclaimed through the "reclaimer unit" is re-used in the cement product made at the site. Any waste cement that can not be used by the Company or for Companies' that SCC sells concrete to is poured into molds to make highway dividers, resulting in no wasted concrete at the facility.</p>
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	<p>9/24/18</p>	<p>Company switched their office and outdoor lighting to LED bulbs. Company also changed out their fuel oil boiler in their office building to a natural gas fired boiler.</p>
<p>10) OUTREACH PROGRAM - Does the site have an outreach program that offers assistance to community leaders, local schools, neighborhood groups, etc. to address, educate and collaborate on environmental issues within the community? If yes, explain program. KEYS TO QUALIFYING: - 1) Must be environmentally educational or beneficial. 2) Must have occurred within past 1 year. 3) Not sales/marketing.</p>	<p>9/24/18</p>	<p>The President of the Company is on the Environmental Board for the Community of Harmony Township, NJ. The Board collaborates on Environmental issues in the community.</p>

STONEFIELD ORCHARDS

Site ID: STONEYFIELD ORCHARDS
378935 5 ORCHARD ST ,
BELVIDERE, NJ 07823

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/22/13	Practices Integrated Pest Management (IMP) following Rutgers Cooperative Extension Service recommendations to reduce the volume of pesticides applied.

TREE LICIOUS ORCHARDS

Site ID: TREE LICIOUS ORCHARDS
 128230 135 KARRVILLE RD,
 MANSFIELD TWP, NJ 07865

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/4/13	1. The farm has reduced its use of fertilizer after conducting soil tests for available plant nutrients.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/4/13	Reduces energy requirements by replacing larger compressors with smaller compressors to provide incremental cooling as needed in the fruit storage facility.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/4/13	Eliminated need for disposal or recycling of packaging materials by purchasing liquid fertilizer in reusable bulk tanks.

 WHITE TWP, NJ 07863

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	5/22/13	The facility has replaced their methane gas collection scrubber unit. The old unit required the use of caustic pot ash and other chemical additions. The replacement unit does not require any chemical additions.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	5/22/13	The new scrubber system is much more efficient than the old system. The new system will reduce the total electricity usage for the site by 25%.
20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.	5/22/13	The facility has added a ground mounted solar array that is just under 1 megawatt.

WOOLF FARMS

Site ID: WOOLF FARMS
343685 2360 RT 57,
WASHINGTON, NJ 07882

Stewardship Activities	Date Acknowledged	Comments
14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).	6/4/13	1. Has Certified Agronomist perform tissue and soil analyses to help generate a fertilizer prescription that reduces fertilizer (N-P-K) usage to that required for optimal crop production. 2. Has access to and uses poultry manure on production fields further reducing dependency on chemical or "non-organic" fertilizers. 3. Applies fertilizers in split-applications commensurate with seasonal crop requirements. 4. Purchases fertilizers containing encapsulated (slow-release) nitrogen (N) reducing percolation of this element into ground waters. 5. Practices Integrated Pest Management (IPM)--Pesticides applications are triggered by economic thresholds as determined by pest scouts, thereby reducing pesticide usage to an "as needed" schedule. 6. Employs GPS coordinates to target areas of production fields with economic pest pressures/infestations giving greater precision and economies of pesticide applications.
18) PROCESS/OPERATIONS ENERGY USE REDUCTION - Has the site substantially improved its energy efficiency by implementing changes in production/manufacturing operations? If yes, describe what was done, date initiated and impact on energy use. KEYS TO QUALIFYING: - 1) Changes should be observable or documented. 2) These should be changes with potential to noticeably reduce a site's carbon footprint. 3) Reduction within last 5 years.	6/4/13	1. Practices minimum and no-till cropping reducing fuel consumption. 2. Flash dries newly harvested grain reducing fuel consumption.
16) MATERIAL CONSERVATION - Has the site taken actions to reduce total material usage or disposal? If yes, describe. KEYS TO QUALIFYING: - 1) Site should be able to document type and quantity of materials exchanged/reused/recycled. 2) Exchanges or one-time events must have occurred within one year. 3) Process, product or formulation changes from anytime in the past must exceed current common practice for recognition. 4) Recycling must exceed mandatory requirements - beyond county plan - beyond municipal ordinance. 5) Durable goods and capital investment "life cycles" will not be considered. 6) Combustion of waste or recycling into a fuel will not be recognized.	6/4/13	Purchases pesticides and fertilizer in bulk, thus eliminating the need for disposal and/or recycling of small non-refillable containers.
21) ENVIRONMENTAL ENHANCEMENT PROJECTS - Has the site undertaken an Environmental Enhancement Project that has resulted in the reclamation or improvement of land at the site or within the community? If yes, identify the project and the resulting improvement to the environment. KEYS TO QUALIFYING: - 1) Site should be able to demonstrate project is current/maintained. 2) Project must be completed or underway. 3) Enhancements or mitigation required by permit or settlement action do not qualify.	6/4/13	1. Maintains grass water ways to control soil erosion and surface runoff. 2. Soil erosion is further controlled in sloping production areas by contour farming and construction of terraces.

YUSEN LOGISTICS AMERICAS

Site ID: YUSEN LOGISTICS AMERICAS
37588 555 WASHINGTON AVE, AKA RT 57
MANSFIELD TWP, NJ 07882

Stewardship Activities	Date Acknowledged	Comments
<p>14) HAZARDOUS MATERIALS REDUCTION - Has the site implemented a change in operations and/or product formulation resulting in reduction or elimination of hazardous materials used/disposed of at the site? If yes, describe. KEYS TO QUALIFYING: - 1) Applies to hazardous materials. 2) Site should be able to back up reductions with data or demonstrations - manifests - observable process change - goal tracked in EMS and found in annual report. 3) Production adjusted reduction (not from slow business cycle). 4) Reduced risk with same volume or amount can qualify (swap high hazard for low hazard).</p>	10/17/13	Bleach based floor cleaner replaced with water based floor cleaner. A Non-Toxic pest control program is in operation at the site.
<p>12) GREEN BUILDING IMPLEMENTATION - Has the site undertaken any projects supportive of green design concepts or does the site incorporate green building design criteria for new construction/renovation projects? If yes, describe projects or provide written policy. KEYS TO QUALIFYING: - 1) Following green building principles. 2) No certification required. 3) Can be small and narrowly focused provided that - obvious or demonstratable environmental benefit - took thought, effort or cost beyond standard practice. 4) Applies to facilities, buildings and grounds not manufacturing, operations, processes or transportation (see question numbers 18 & 19). 5) Automatic if certified (#11 Green Building Certification).</p>	10/17/13	100% of the facility has been retrofitted with energy efficient lighting with sensors.
<p>3) ENVIRONMENTAL POLICY - Is the site operated under a comprehensive written environmental policy, signed by the current senior officer of the organization addressing more than just compliance? KEYS TO QUALIFYING: - 1) Written document - inspector must see it! 2) Defined and executed by management - ideally signed, but ok if obviously endorsed/promoted. 3) Employees aware of policy - posted or obviously shared at site. 4) Commitment to environmental performance beyond just regulatory/legal compliance.</p>	10/17/13	Env. Policy Posted and presented to all site visitors. http://www.nyk.com/english/csr/envi/manage/
<p>4) ENVIRONMENTAL MANAGEMENT SYSTEM - Is the site operated utilizing an Environmental Management System (EMS)? If yes, describe system employed, list any certifications. KEYS TO QUALIFYING: - 1) Must have an Environmental Policy (Yes to Question #3). 2) Site should have a Comprehensive EMS document or plan - more than just compliance, 3) Performance Evaluation - written report - at least annually.</p>	10/17/13	Facility operates under a global EMS and a site specific EMS and is ISO 14001 Certified
<p>5) ANNUAL ENVIRONMENTAL REPORT - Does the site publish an Annual Environmental Report? KEYS TO QUALIFYING: - 1) Measures improvements or elements beyond just compliance. 2) Public document that must be available online - online report must be within one year. 3) Very small organizations may qualify with less formal reporting.</p>	10/17/13	http://www.nyk.com/english/csr/envi/
<p>7) ENVIRONMENTAL PURCHASING POLICY- Has the site implemented an "Environmental Purchasing Policy" resulting in the purchase of products and office supplies that are recognized as environmentally responsible? If yes, describe. KEYS TO QUALIFYING: - 1) Site must provide one of the following - a written policy - documentation of preferred products purchased and presence of substantial environmentally preferred products on-site. 2) In all cases environmental aspect should be obvious or easily explained by site rep.</p>	10/17/13	Env. Purchasing is a component of the Env. Policy. An example is the company may not purchase paper with less than a 30% recycled content.

<p>20) RENEWABLE ENERGY USE - Does the site use renewable energy sources? If yes, identify the direct source (solar, wind, bio, etc.) or name the CleanPower supplier and characterize the amount. KEYS TO QUALIFYING: - 1) Any installations should be functional. 2) CleanPower purchases should be clearly shown in energy bills. 3) No time limit on renewable installations.</p>	<p>10/17/13</p>	<p>A 3 acre ground mounted solar array has been installed at the site.</p>
<p>6) CARBON FOOTPRINT ANALYSIS - Has the site accounted for all greenhouse gases? If yes, describe method used. KEYS TO QUALIFYING: - 1) Site should have documentation/report of all greenhouse gases, including off-site contributions. 2) Must explain methodology/standard used - Greenhouse Gas Protocol; or others - must note method in comments. 3) Disclosure to public voluntary, but encouraged.</p>	<p>10/17/13</p>	<p>This Env. Load Data collection system allows Yusen to convert various environmental load data such as electricity, gas, water, and paper waste into our total energy usage or total CO2 emissions-these figures are used for reporting to the government and to set reduction goals. http://www.jp.yusen-logistics.com/ir/library/ar2012/download_pdf/pdf/governance/Yusen%20Logistics_AR2012_9.pdf</p>
<p>8) VENDOR/SUPPLY CHAIN REQUIREMENTS - Does the site require that businesses in their supply chain subscribe to environmentally sound business practices? If yes, explain method i.e. contract with vendors. KEYS TO QUALIFYING: - 1) Written policy agreement with vendors. 2) Specify environmental criteria for vendors. 3) Establish a vendor auditing system - how do they know what suppliers are doing?</p>	<p>10/17/13</p>	<p>Company has a Memorandum of Understanding with vendors requiring them to sign Yusen's Env. Policy and agree to conduct business at Yusen in accordance with the Policy.</p>
