

Weakfish

Cynoscion regalis

Description:

- ❖ Dark olive brown to bluish gray above
- ❖ Silvery sides and white belly
- ❖ Many small dark spots on back extending down to lateral line
- ❖ Pelvic and anal fins yellow; other fins may have yellow tint
- ❖ Lower jaw extends beyond upper jaw
- ❖ 2 large canines at front of upper jaw

Size:

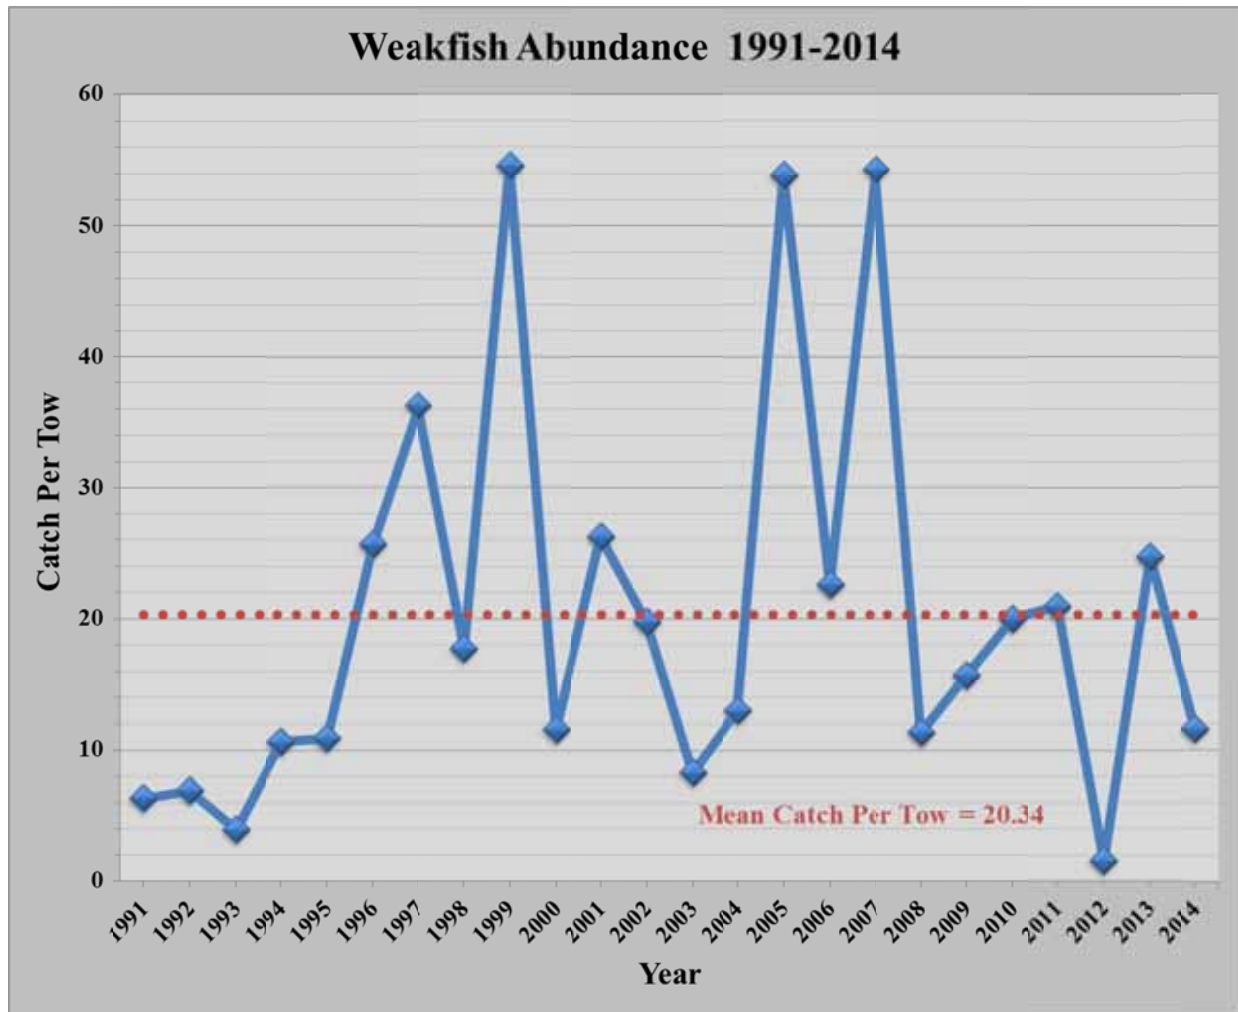

- ❖ Up to 36 inches and 17.5 pounds

Range:

- ❖ Nova Scotia to Florida

Facts:

- ❖ Spawn from May to October in inshore waters
- ❖ Named for its fragile mouth structure which causes a hook to tear out rather easily
- ❖ Important food and game fish
- ❖ May live as long as 17 years, but a 12 year lifespan is more likely
