### Salmon and Trout - Know the Difference

**Salmon**
- Adipose fin is gray to olive – never orange.
- Caudal fin may be slightly forked. Tail not spotted.
- Caudal peduncle is narrow and tapered.
- Dark spots, some may be X - shaped.

**Brown Trout**
- Adipose fin may be fringed or spotted with orange or red.
- Caudal fin rounded or square, not forked. Spots sparse or absent.
- Caudal peduncle is thick and stocky.
- Maxillary usually extends to rear edge of eye or slightly beyond.

**Rainbow Trout**
- Adipose fin usually spotted.
- Caudal fin rounded or square, not forked. Black spots cover tail.
- Pink stripe from head to tail (not always present).
- Many small black spots.
