

2022 SEDGE ISLAND FIELD AND RESEARCH EXPERIENCE

JULY 11, 12 AND 13
9:00 a.m. – 3:00 p.m.

New Jersey Fish and Wildlife is offering a 3-day program open to **students going into grades 10 through 12 in September 2022**. This program is ideal for high school students interested in pursuing a college education in marine science or environmental studies.

During this program students will learn about various research methods through hands-on data collection, hear from a local college professor about research they are conducting, and spend time learning how to keep a scientific journal. Research skills learned at this three-day program will be used by students throughout high school science and capstone courses, as well as within college level research and labs.

Cost \$100.00

*Registration is limited to 12 high school participants
on a first-come-first-serve basis.*

Students must be able to attend each session in order to participate.

**For more information or questions contact Karen Byrne at
609-947-1201 or karen.byrne@dep.nj.gov**

For Students
Entering
Grades 10 – 12
in the fall of
2022
