APPLICATION INSTRUCTIONS

The NJ Division of Fish and Wildlife monitors the commercial quotas for summer flounder, black sea bass, AND scup through the Standard Atlantic Fisheries Information System (SAFIS). This reporting method is in compliance with N.J.A.C. 7:25-18.12 (b), (h), (i), and (k).

Failure to submit these required forms reports could result in your dealership receiving a summons for the offense. This summons will require a mandatory court appearance and has a penalty range of between \$300 and \$3000, N.J.S.A. 23:2B-14, and could ultimately result in revocation of the dealers permits.

Any fish dealer or processor who wishes to purchase or accept scup, black sea bass or summer flounder from any vessel or harvester in New Jersey must apply for and have in his possession a valid New Jersey (species appropriate) Dealer Permit.

1. Sign and date the application. Include a check or money order to the "State of New Jersey" for application fee of \$2.00 for each dealer permit requested.
3. Mail to: Nacote Creek Research Station
P.O. Box 418
Port Republic, NJ 08241
4. Please note that there are mandatory reporting requirements associated with each New Jersey Dealer Permit. You will receive reporting instructions along with your permit.
5. Incomplete applications will be returned.
