THE BLOOM

DESIGN ZONE 2 - COVE PARK

The Bloom concept is highlighted by an elegant central landscape feature evocative of a blossom. This central feature responds to four programmatic quadrants that are reflective of the immediate adjacent community context. The Bloom is achieved through a series of beautifully planted slopes and terraces, and a woven network of circulation routes to the top of the landscape feature where a distinctive blossom shade canopy and elevated outlook await.

**Final deployable gate sizes and exact locations are still under technical review and development. Final gate size and location is subject to slight changes as technical project development progresses.**
THE MEADOW
DESIGN ZONE 2 - COVE PARK

The Meadow concept is anchored by a beautiful central planting feature that provides interest throughout the year, including natural elements that change with the seasons. Park edges are more urban in nature, allowing for a higher level of programming with seating, shade and plaza spaces. Park edges emulate the surrounding context of Hoboken and the Manhattan skyline, while The Meadow at the park’s center offers a welcome reprieve from city life.

Accessible path with adjacent seating.

Entry plaza with shade canopy, seating and feature wall.

Play area buffered from street.

Waterfront views!

Picnics and BBQ’s.

The Ridge concept’s main feature is comprised of an accessible ramp, elevated walkway, outlook and iconic “cloud” canopy that create a unique experience and circulation route within the park. Park programming reflects the fluid geometry of The Ridge, and provides an array of opportunities for park use including waterfront lawns, a lowland walk, Palisades feature wall, terraced gardens, ridge-top seating and planting.
