

North Design Zone 2 Design Zone Workshop February 4, 2019

7:00-9:00pm

124 Grand St. Multi-Service Center
Community Room

Meeting begins promptly at 7pm with a presentation.

The New Jersey Department of Environmental Protection (DEP) invites the communities of Jersey City, Hoboken and Weehawken to a Design Zone Workshop on the Rebuild by Design – Hudson River Project. All are welcome! This workshop will cover the alignment in the North end of the project area from the border of Weehawken, through Harborside Park, to the intersection at 15th Street and Garden Street.

WHAT IS THE PROJECT?

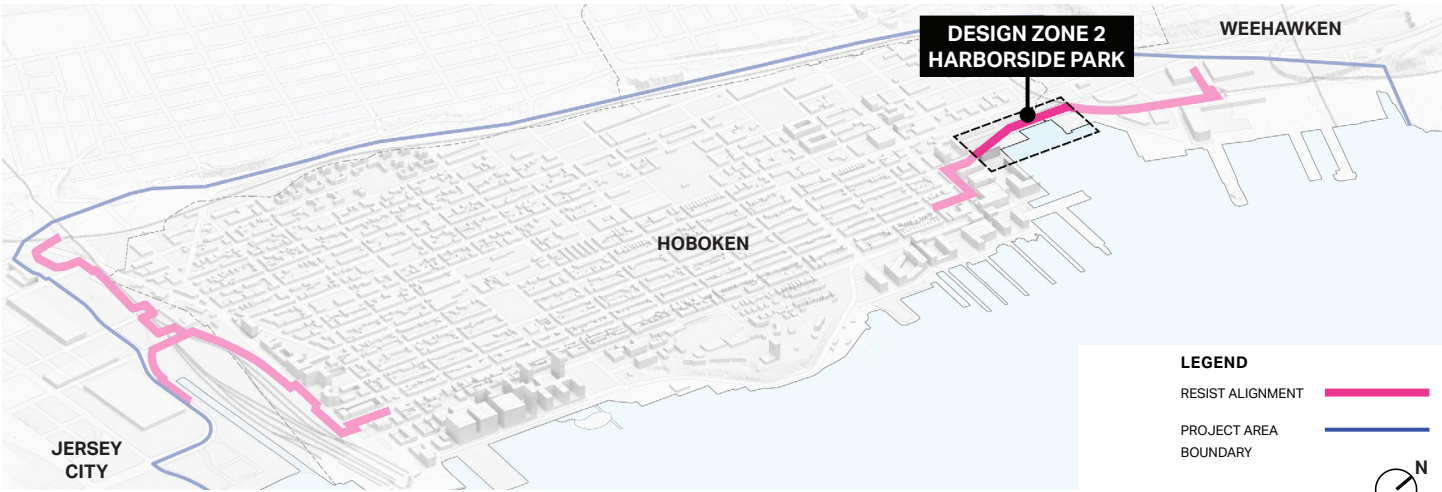

The Rebuild by Design - Hudson River Project is a comprehensive urban floodwater management strategy **to reduce the flood risk from storm surge** and rainfall flood events to flood prone areas within the Project Area, which comprises the entire City of Hoboken, and adjacent areas of Weehawken and Jersey City. The US Department of Housing and Urban Development (HUD) awarded \$230 million to the State of New Jersey for the Project, which includes the design and environmental impact analysis of the overall comprehensive master plan of the entire project (including the Resist and Delay, Store, Discharge components) and funding for the construction of the Resist components (coastal storm surge projects).

WHAT'S HAPPENING NEXT?

During this phase of work, the Resist components (flood control structures to resist storm surge) will be designed, which includes a proposed community park that incorporates flood control structures to resist storm surge. DEP is engaging the public and stakeholders in the Project Area to participate in the design of the Resist components (see map below).

At this meeting you will:

- Be updated on preferences for characteristics and amenities that emerged from community input during the first round of Design Zone Workshops;
- Be updated on the design approach for Harborside Park in Design Zone 2;
- Provide input on the look and feel of design concepts for Harborside Park in Design Zone 2.
