TRANSCRIPT of the stenographic notes of the
proceedings in the above-entitled matter, as taken by
and before Lorin Thompson, a Shorthand Reporter and
Notary Public of the State of New Jersey, held at the
Camp Jefferson Lodge, 81 Weldon Road, Lake Hopatcong,
New Jersey, on July 27, 2009, commencing at 6:00 p.m.

1 PRESIDENT SCHLEICHER: This meeting is
 2 called to order. It is a public scoping hearing.
 3 Could we have the reading of the meeting
 4 notice?
 5 MR. HELMER: Pursuant to N.J.S.A. 10:4-6 et
 6 seq. and the provisions of N.J.S.A. 7:36-26.8 et seq.,
 7 the Morris County Park Commission notified the public in
 8 legal notices published in the Daily Record and the
 9 Star-Ledger on June 26, 2009, that a public scoping
 10 hearing on the proposed major diversion of parkland at
 11 Mahlon Dickerson Reservation in Jefferson Township,
 12 County of Morris, New Jersey, is being convened at
 13 6:00 p.m. prevailing time on Monday, July 27, 2009, in
 14 the Community Lodge at Camp Jefferson, 81 Weldon Road,
 15 Township of Jefferson, County of Morris, New Jersey.
 16 Notice of the public scoping hearing was
 17 also provided by posting public hearing signs on Mahlon
 18 Dickerson Reservation as pursuant to N.J.A.C. 7:36-25
 19 and 26, and also published on the Park Commission's
 20 website, www.morrisparks.net, reviewed at the Park
 21 Commission Public Workshop on Tuesday, July 14, 2009.
 22 Written notification was also given to the
 23 New Jersey Green Acres Program, Jefferson Township
 24 governing body, Jefferson Township Planning Board,
 25 Jefferson Township Environmental Committee, Jefferson

1 Township Open Space Advisory Committee, Morris County
 2 Board of Chosen Freeholders, Morris County Planning
 3 Board, Morris County Open Space Committee, and New
 4 Jersey Highlands Council.
 5 PRESIDENT SCHLEICHER: Let's have a roll
 6 call, please.
 7 (Roll call taken.)
 8 MR. HELMER: Salute the flag.
 9 (Salute to the Flag.)
 10 PRESIDENT SCHLEICHER: The Executive
 11 Director of the Morris County Park Commission will
 12 discuss the purpose of the hearing.
 13 MR. HELMER: The purpose of the scoping
 14 hearing is for the public to provide or to make comment
 15 on the proposed major diversion of parkland as required
 16 by the New Jersey Department of Environmental Protection
 17 Green Acres Program Rules N.J.A.C. 7:36.
 18 The Park Commission is accepting comments on
 19 alternative sites suggested by the public and
 20 alternative methods of achieving the project's
 21 objectives without a diversion of parkland.
 22 There are a number of hearing procedures I
 23 want to review with the public.
 24 Anyone wishing to speak must sign in on the
 25 hearing of citizens' sheet which becomes part of the

1 meeting minutes. Before speaking, please state your
 2 name and address clearly at the podium. All comments
 3 should be relevant to the proposed major diversion.
 4 Each speaker has 5 minutes to present their comments.
 5 Please try and refrain from repetitive comments from
 6 previous speakers. And if you're part of a group or an
 7 organization, it would be appreciated if a single
 8 representative presented comments on behalf of the
 9 organization. If you're going to submit an exhibit,
 10 please make sure the document has the name, the name of
 11 the person or entity that created the document, and date
 12 submitted. Exhibits and documents will also become part
 13 of the record.

14 Written comments can also be mailed to my
 15 attention to Morris County Park Commission, PO Box 1295,
 16 Morristown, New Jersey or by telefax at (973) 644-2726
 17 or by e-mail to info@MorrisParks.net by Monday
 18 August 10, 2009. Submitted written comments will also
 19 become part of the record.

20 The commission will not be responding to
 21 comments tonight until after public comment period ends
 22 on August 10, 2009. Responses to comments will be made
 23 available and will become part of the record of Morris
 24 Park's Commission, Tuesday, September 29, 2009, Park
 25 Commission meeting.

1 As part of the Green Acres Program rules for
 2 scoping hearings, a few areas will be reviewed prior to
 3 the opening of the public hearing. I'll explain a
 4 couple of items real quick related to the project and
 5 where the project is to happen and then we have
 6 representatives from PSE&G to also review certain
 7 specific needs for this project.

8 I also want to remind you all that this
 9 hearing is about the major diversion on county parkland.
 10 The diversion will not include any structures to be
 11 placed on parkland. Both lots affected will be affected
 12 by aerial diversions, pose new transmission lines that
 13 will be in the air space above the property within the
 14 existing right-of-way.

15 Even though the power lines are in the
 16 existing right-of-way, the original landowners crafted
 17 language in the right-of-way documents to account for
 18 any future changes to the power lines changes.

19 The properties to be affected, two
 20 properties to be affected. The first is Block 320,
 21 Lot 9, Jefferson Township. The lot size is 5.53. It's
 22 located on the southwest boundary of Mahlon Dickerson
 23 Reservation, located between Weldon Road and State
 24 Highway 15, closer to the Weldon Road side. It was
 25 formerly the Ogden Mine branch of the Central Railroad

1 Company and the PSE&G right-of-way was acquired on
 2 July 26th, 1929.

3 The other block -- the other lot, Block 335,
 4 Lot 4 also located in Jefferson Township. The lot size
 5 is 11 acres, southeast boundary of Mahlon Dickerson
 6 Reservation in the area of the former Weldon and Lower
 7 Weldon Mines, formerly owned by Consumers Coal and Ice
 8 Company. PSE&G acquired the right-of-way for that lot
 9 on April 1st, 1930.

10 As a brief bit of history, both lots are
 11 part of land originally bequeathed by the Estate of
 12 Richard Fasath (phonetic) and the Morris County Park
 13 Commission on May 12th, 1983. The estate donated a
 14 total of 673 acres and expanded Mahlon Dickerson
 15 Reservation to its current size which is 3,337 acres in
 16 size.

17 The total acreage by the diversion to be
 18 affected will be determined by the number of additional
 19 lines, the height, length, and diameter of wires. The
 20 project is a major diversion application for a portion
 21 of the overhead electric transmission lines for the
 22 Roseland, the Susquehanna overhead electric transmission
 23 project.

24 PSE&G is proposing the new line to comply
 25 with the directive of PJM interconnection in order to

1 ensure continued compliance with regional electric
 2 transmission reliability.

3 And now I'll introduce PSE&G's
 4 representative, Assistant General Property Counsel David
 5 Richter, who will be reviewing a number of the following
 6 areas, including compelling public need that the project
 7 would fulfill, public benefits that project would
 8 reveal, review past and ongoing efforts to identify
 9 alternatives to the proposed diversion, why alternatives
 10 were rejected, and process to identify compensation
 11 conversion.

12 Mr. Richter.

13 MR. RICHTER: Yes. Good evening and thank
 14 you very much.

15 Again, my name is David Richter. I'm an
 16 attorney with PSEG Services Corporation and I'm
 17 representing the applicant, Public Service Electric &
 18 Gas Company.

19 Quickly, I would just like to give a short
 20 description of the project itself. PSE&G is proposing
 21 to upgrade an existing 230 kV transmission line by
 22 constructing a 230 and 500 kV circuits within the
 23 existing right-of-way.

24 The project has been mandated by what is
 25 called Pennsylvania/Jersey/Maryland Regional

1 Transmission Organization. They're a FERC-approved
2 independent organization who operates the electric grid
3 in 13 states, one of which is New Jersey.

4 They have identified 23 reliability criteria
5 violations which will take place beginning in the year
6 2012, absent putting this line in place. Many of those
7 reliability criteria violations are located in Morris
8 and Sussex County, New Jersey.

9 The project actually runs from Roseland, New
10 Jersey, to Berwick, Pennsylvania. It's approximately
11 150 miles. Forty-four of those miles are located in New
12 Jersey from Roseland to the Delaware River. The project
13 really involves four main activities. One will be
14 upgrading the existing 230 kV transmission structures so
15 we can install a structure that can withhold a 230 and a
16 500 kV circuit, construction of access roads, the
17 construction of two switching stations, and finally
18 we'll move the existing 230 kV transmission line
19 structures.

20 I mentioned previously that there are what's
21 called reliability criteria violations. These
22 violations are on existing transmission lines in, again,
23 the Eastern Pennsylvania and Northern New Jersey area,
24 including Morris County and Sussex County. Without
25 upgrading this line, these violations could cause

1 new lines at this time.

2 PSE&G looked at many alternatives to avoid a
3 major diversion on Morris County Park's property. One
4 of those was a Millville (phonetic) alternative. PSE&G
5 obviously rejected that alternative for several reasons.
6 One, it would not resolve the criteria violations that
7 will occur in 2012. Two, this project has been mandated
8 by a federally approved organization, PJM. Without
9 putting this line into -- this new transmission line
10 into service, we are risking reliability issues to
11 Northwest New Jersey area.

12 A second alternative to the major diversion
13 was to create an entirely new line, keep the existing
14 230 line and route a 500 kV line in a different
15 location. The reason why this was rejected by PSE&G is
16 because this would increase the impacts to the
17 environment.

18 PSE&G looked at different routes when it
19 chose the existing right-of-way and it determined that
20 the existing right-of-way presented the least impact to
21 the environment. By creating a new transmission line
22 would require a complete removal of new trees on a new
23 existing line which PSE&G felt that would be a greater
24 impact to the environment, therefore, rejected that
25 alternative.

1 reliability issues within this area.

2 The line will provide a compelling public
3 benefit by continuing to provide safe, reliable, and
4 effective power to the region. Again, the location of
5 many of those violations which will be resolved by this
6 project are -- as I said, 23 criteria violations, many
7 of whom -- up to 19 are in Morris and Sussex Counties.

8 The new line will be placed -- and this
9 really is an important part -- the new line will be
10 placed within PSE&G's existing right-of-way. So the
11 area that we're proposing to divert has actually already
12 been diverted by the existing transmission lines. We're
13 just looking to change the configuration of the
14 diversion.

15 Currently there's a 230 kV line within the
16 right-of-way. It's in a horizontal construction,
17 meaning there are three lines in a horizontal
18 configuration. We're going to be revising that by
19 building a new structure with two circuits on it, a 230
20 kV in a vertical configuration and a 500 kV in a
21 vertical configuration.

22 This existing right-of-way was built
23 approximately eighty years ago, beginning in 1927
24 through 1930, the line was constructed so there is
25 certainly a benefit to constructing the new towers and

1 The third alternative that was looked and
2 rejected was routing the new line outside of the Morris
3 County Park property. The problem with this
4 alternative, if you take a look at the maps of the area
5 where the diversion is requested, the areas surrounding
6 it are also encumbered by Green Acres so by relocating
7 the lines, by shifting the lines slightly off the
8 property of the Morris County Parks we would be
9 impacting preserved areas on other open space and
10 recreational property.

11 By doing this, there would also be an
12 increase to the environmental impact. The current line
13 is existing and there's already an impact. By moving
14 them to a new location, you'd be creating an entirely
15 new impact on an additional property. Therefore, PSE&G
16 felt that this alternative was not the best solution.

17 Finally, the next alternative that PSE&G
18 looked at was alternative solutions to the reliability
19 criteria violations. What else could we do that would
20 give us the same safe, reliable electric service in the
21 year 2012. We looked at distribution resolutions,
22 upgrading the distribution system in the area to see if
23 that would resolve the issues.

24 We also looked at alternative energy sources
25 such as solar and wind. The problem with these

1 alternatives, they were not enough to resolve all the
2 criteria violations. Some violations could be resolved
3 by some distribution upgrades, but that would not
4 resolve all 23.

5 This transmission line will resolve all 23
6 criteria violations. So this was decided to be the best
7 alternative for this project. Those all the
8 alternatives that we looked through.

9 Again, the compelling public need is the
10 reliable electric service to the northern New Jersey
11 area.

12 Thank you very much.

13 PRESIDENT SCHLEICHER: I would like to move
14 now to open the public hearing.

15 COMMISSIONER BARON: So moved.

16 PRESIDENT SCHLEICHER: Do we have a second?

17 COMMISSIONER KELLY: Second.

18 PRESIDENT SCHLEICHER: All in favor?
19 (Commission voted aye in favor of moving to
20 open the public hearing.)

21 PRESIDENT SCHLEICHER: Opposed.

22 (No one opposed the motion.)

23 PRESIDENT SCHLEICHER: We will accept
24 comments now on the alternative site suggested,
25 alternative methods, stating the objectives without

1 fact sheet because they are not there. There are some
2 even in Eastern Pennsylvania and quite a few in southern
3 New Jersey.

4 The power that's being run through the
5 230-kilovolt lines now, very little of it benefits the
6 Northern New Jersey, Northwestern New Jersey region at
7 all. Most of it goes to the northeastern region of New
8 Jersey -- Bergen, Passaic, Essex, and Hudson Counties.
9 Those counties are having a net decrease in electricity
10 use actually.

11 With more economical powers use, more
12 conservation, better appliances that are being built,
13 the power is not needed. They are looking to bring in
14 over seven times the amount of electricity over these,
15 quote, unquote, upgraded lines. The lines aren't being
16 upgraded. This is a brand new construction project.
17 There will be no part of the existing structures, no
18 part of the existing wires remaining if this project
19 goes through as planned.

20 I urge you to use any power you can to not
21 allow this. The lands that you are charged with
22 protecting under Green Acres are the -- basically the
23 property of Morris County residents. You are the
24 representatives who are looking to protect those lands.
25 People who are unaware of this are going to show up in

1 diversion. That is really the scope of what we should
2 be talking about here. And I think we have a list
3 coming.

4 Tom Hill.

5 MR. HILL: Tom Hill, 223 Willows Road,
6 Fredon, New Jersey, and I represent Stop the Lines,
7 grassroots organization opposed to the PSE&G project.

8 Thank you for having public comment,
9 Commissioners. Appreciate that.

10 The acceptance of comments on alternative
11 sites suggested by the public seems a bit silly as an
12 acceptance. We are not experts on where to site lines.
13 We are -- and your scope isn't to find another spot to
14 site the lines should they be needed.

15 My organization feels that the lines are not
16 needed and that is where my comments are coming from
17 today.

18 PSE&G cites PJM, an organization made up
19 mainly of transmission and generation companies and they
20 have very little oversight to them. They are just
21 saying this needs to be done. The 23 violations the
22 gentleman from PSE&G cited, saying 19 of them are in
23 Morris County and Sussex County is an incorrect fact.
24 You should make sure you look at their map siting those
25 on their PSE&G reliability website. It's noted in the

1 the park and go what the heck happened if this line is
2 built as planned.

3 Please do not allow this diversion of land.
4 Mr. Saffin (phonetic) would not have wanted the lands
5 that he donated to the park to be used as such. I'm
6 sure he would be up in arms if he were able to comment
7 on this project.

8 Thank you very much for your time. I
9 appreciate it.

10 PRESIDENT SCHLEICHER: Chris Pierson.

11 MR. PIERSON: My name is Chris Pierson. I
12 live at 140 Espanong Road right here in Jefferson. I'm
13 14 years old and going to be freshman in high school.

14 All my life I've been using Mahlon Dickerson
15 to hike, bike, and camp. In fact, I've been using it
16 since I was younger than one-year-old. When I was at
17 that age, my dad used to carry me around in a baby
18 backpack while he hiked.

19 My parents always voted for Green Acres
20 which increased their taxes. They did that because they
21 thought that the Green Acres program would help preserve
22 that land forever from people who wanted to build on it.
23 They wanted me to have a nice open space to go to
24 forever. My parents did their part to preserve that
25 park and now you will just allow power lines to be built

1 there.

2 I have asthma which is mostly triggered by
3 air pollution. I like to spend time in the park because
4 the air is fresh and clean. The primary source of air
5 pollution is power plants. This power line draws power
6 from the coal-burning regions in Pennsylvania. These
7 power lines will not be moving clean power but power
8 produced by coal. This would be just supporting the
9 coal-burning industry.

10 There's a much better way. I learned in
11 school that there are other cleaner ways to produce
12 power and this power line is not helping with any of
13 that. New Jersey has contracted to build wind turbines
14 off the coast. Wind turbines are the solution, not
15 power lines in parks.

16 This is just a start of a major attack on
17 our park. Allowing them to build a power line in the
18 park just opens up the door to development. Eventually,
19 the park will be overdeveloped and I'll have no place to
20 camp with my future family.

21 I'm the next generation and I'm too young to
22 vote, but I'm the one who has to live with the power
23 lines and your decision. Please vote no to the
24 application. Thank you.

25 PRESIDENT SCHLEICHER: Linda Pierson.

1 misleading in this case.

2 MR. HELMER: I understand.

3 MS. AUGUSTYN: That was my question.

4 Thank you.

5 PRESIDENT SCHLEICHER: Robert Moss.

6 MR. MOSS: My name is Robert Moss. I live
7 in Bloomfield. I just drove up from Bloomfield. I'd
8 like to also, as the first speaker did, Tom Hill,
9 address the issues of scoping. To me scoping has always
10 been determining what issues or what topics would be
11 included in such things as environmental impact
12 statements.

13 Now, I do apologize for not coming earlier.
14 I thought this was at 8:00 and 4:45 I looked at the
15 e-mail. So I had to come up in the traffic.

16 However, I heard the remarks about scoping
17 and about the alternate locations. I'm not clear what
18 the topic was, but I did notice the public service
19 speaker did not limit himself to alternate routes or
20 alternate parcels.

21 So I do want to make some general remarks.
22 We all know what the opposition generally is, I'm not
23 going to dwell on that. I do want to reiterate one
24 remark I made at the BPU hearing that Public Service, as
25 I recall, the Public Service speaker there said they

1 MRS. PIERSON: Oh, no, I'm not speaking.

2 PRESIDENT SCHLEICHER: I'm sorry.

3 Ann Augustyn.

4 MS. AUGUSTYN: Ann Augustyn, 41 Paterasky
5 (phonetic) Road in Oak Ridge.

6 I support the sentiments of this young man.
7 I think he's wonderful to have come up here. I'm not
8 sure where we stand because I have a question where it
9 says next steps on the bottom of the PSE&G.

10 It says: At the conclusion of the public
11 comment period on August 10, the Morris County Park
12 Commission will submit the pre-application package PSE&G
13 has prepared to DEP in support of a major diversion of
14 parkland.

15 Is that the park commission already supports
16 the diversion?

17 MR. HELMER: No. What I'll do is at the end
18 of the public portion under my report, I will give you
19 the extensive list of the next steps to take.

20 MS. AUGUSTYN: That makes it sound as if
21 it's a done deal and we're just making comments.

22 MR. HELMER: No, it's not a done deal. We
23 have to submit a resolution whether we're in favor of or
24 not in favor of. There's about ten items.

25 MS. AUGUSTYN: So the "in support of" is

1 determined in 2007 that there was going to be these
2 violations in 2012 which seemed a little bit late to me.
3 Energy consumption has been increasing since Edison
4 invented the light bulb, not since 2007. So we have a
5 rushed project now.

6 The other general remark I'd like to make --
7 and I think it is relevant -- it's been very difficult
8 through this whole process to get information. I went
9 to a -- I guess it's called an information hearing in I
10 think it's Fredon. Again, I apologize for not having
11 time to get my notes in order. It was last year
12 sometime I believe.

13 We were told the impact is minimal because
14 it's an existing right-of-way and all they're going to
15 do is put bigger towers. Such things as access roads
16 were not addressed. I don't know if to this day any
17 access roads proposed from Mahlon Dickerson. It's true
18 they are temporary, but we don't know what kind of roads
19 these are, what kind of terrain is going to be smoothed
20 off which would not be temporary if they level hills and
21 cut through hills and fill in low spots. I don't know.
22 We don't have the information.

23 I am supposing at the moment that these will
24 perhaps be allowed to fall into this use, but they're
25 not going to put it back the way it was. Or maybe the

1 access roads are just follow the con -- we just don't
2 know. Follow the contour as I was about to say. We
3 just don't know. We just don't have information about
4 this project. The same with switching stations. Now, I
5 know that's not here, but we weren't told about that at
6 the Fredon hearing.

7 As far as this hearing, I see these two
8 aerials here. I'm not quite clear. I know Mahlon
9 Dickerson fairly well. I used to be the chair of the
10 Highlands Trail Committee. The Highlands Trail goes
11 from Mahlon Dickerson. After that, I was a New Jersey
12 supervisor and I still work with current Highlands Trail
13 Brenda Holzinger and her assistant Glen. And I worked
14 with Al Kent and the other fellow -- what's his name --
15 in some of the sections of the Highlands Trails that do
16 not follow existing woods roads in the park. I have
17 camped here. I enjoy this place. It's a great public
18 facility, great public asset.

19 But my main thing is we just don't know
20 what's going to happen. I don't know what Public
21 Service is proposing in exchange for these parcels and
22 since it's an existing power line I'm not clear why
23 these parcels are being impacted.

24 But I would like to remind the Commission
25 and Public Service that under the New Jersey case law

1 Bond Acts have the same force -- Bond Acts approved by
2 the voters have the same force as New Jersey
3 Constitution. So you can't have legislative solutions
4 to removing land from Green Acres. There has to be a
5 very substantial equivalent in replacing the land.

6 Current law is a little bit loose. If we
7 start losing valuable parcels, we will find ourselves in
8 court challenges to the diversion of Green Acres land if
9 the diversions don't come up with substantially
10 equivalent land. And we know in 2009 as it is now,
11 there's not a lot of substantially equivalent land.

12 Again, it's not clear here. It looks like
13 some holes are being taken out of Mahlon Dickerson. How
14 they're going to be replaced, I don't know. The whole
15 project is, quite frankly, a mystery, not just to me,
16 but also people like Stop the Lines who are working on
17 it day and night. And they are having to make demands
18 for information that should be just offered to the
19 public.

20 So I hope the Commission takes this into
21 account and I actually hope the commission recommends
22 that the project be held in abeyance at minimum until
23 more information is forthcoming. Thank you.

24 PRESIDENT SCHLEICHER: Bill Crivelli.

25 MR. CRIVELLI: I'm from Boonton Township,

1 but I did have about a dozen summers at Cozy Lake with
2 the kids. It was wonderful. We don't get here often
3 enough.

4 The lad was right, just say no. You don't
5 have to fall into the trap of following their rationale.
6 If you think this is the wrong thing to do, just say no.

7 And there are an awful lot of reasons to
8 recognize that it's the wrong thing to do. For one
9 thing, Public Service Electric & Gas admitted that their
10 lines do damage. How did they admit it? They admitted
11 it to the Highlands. They said to mitigate against the
12 damage that we're going to do, we're going to give you
13 \$18 million. Now nobody puts \$18 million on the table
14 for nothing. So they know they're going to do damage
15 and they're going to do damage to you. What price will
16 you exact from them? Nothing today obviously. Perhaps
17 that ought to be looked at.

18 Tripling the lines is not updating anything.
19 I would love to update my salary by tripling it.
20 Wouldn't you? So, please, let's use the right words.
21 And a 1930 right-of-way didn't have the scientific
22 knowledge to put 730,000 watts in the air. We didn't
23 know about it so you're relying on that. Fortunately,
24 they acknowledge they are going to need rights-of-way.
25 Don't give it to them.

1 And the other thing, why didn't they say
2 what we all read in the newspapers: That there was
3 another proposal, Route 80. Route 80 goes straight from
4 where they are to Roseland, 80 and 280. Why didn't they
5 use that? Didn't mention that in his opening statement.

6 Not fair, not right, David.

7 And what about the final alternative, under
8 the ground for goodness' sake. When was the last time
9 we went into the city. They don't have any towers in
10 New York City or Philadelphia or for that matter any
11 other major city. Why should we suffer a century old
12 technology and just leave that on the backs of our
13 children and grandchildren. We don't have to, just say
14 no. That's what we ask you to do.

15 And finally on a personal note -- one other
16 thing -- two more points. It is coal fed. We're
17 getting the gas. It's coming here. It's going to hurt
18 that kid. It's going to hurt a lot of kids. Why should
19 we do that? Just say no.

20 And this business about where is it going,
21 there's a lot of innuendo, a lot of discussion in the
22 newspapers about the fact that this electricity is going
23 to be sold to New York. How about a pledge: We will
24 not sell 1 kilowatt of this electricity to New York for
25 twenty years. Okay. Like to hear that.

1 And since we're putting up \$18 million for
2 mitigation, how about \$200 million for the mitigation
3 for the potential for cancer risks. You know, I went to
4 one of these things one night and there were people from
5 East Hanover, you've got to hear the horror stories. I
6 don't care about the fact that science cannot prove that
7 it does damage to kids and other people. The fact is
8 that where there is a concentration of these forces,
9 there's a concentration of cancer cases.

10 Now that's enough for me to say no. I hope
11 it's enough for you to say no. That's all you have to
12 do. Thank you so much.

13 PRESIDENT SCHLEICHER: Marion Harris.

14 MS. HARRIS: I'm Marion, M-a-r-i-o-n,
15 Harris, 14 Rowe (phonetic) Street, Morristown, and I'm
16 the chairman of the Morris County Trust for Historic
17 Preservation.

18 Let me give you the bottom line of our
19 position first. We don't believe that the taxpayers
20 have put their money in the Green Acres program for the
21 land to be used for the benefit of any profit making
22 project, even if that's incidental to a particular
23 beneficial use. We think that that's not an appropriate
24 thing to do with Green Acres land. But also because I
25 know that your resolution is going to the Statehouse

1 Commission and it is finally their decision, I want to
2 emphasize to you and I hope you will emphasize to them
3 that the decision about this particular area that you're
4 concerned with cannot be made without considering the
5 context of the entire project that's going through here
6 and the effect that it's going to have on the entire
7 area. I wish we could say the entire area of the
8 project is of the state but apparently our jurisdiction
9 extends only to the state borders so that's all right.

10 And having said that about the larger
11 question of the way this project will have an impact on
12 our area of New Jersey, I would like to zero in on the
13 acres that you are actually looking at and tell you that
14 when in the Highlands Coalition when we were getting
15 ready to prepare our comments in detail about the effect
16 on the cultural resources that are within this project,
17 one of the resources at risk jumped out at us right away
18 was the Weldon Mine. The reason it jumped out was that
19 there was going to be building of some or other,
20 unspecified sort, very close to that mine, if not on top
21 of it.

22 But it's not just the Weldon Mine, it's all
23 through this area of New Jersey there are unfound
24 resources. This is true all over the country, but
25 particularly in Northwest New Jersey where there has

1 been so much mining and so few records have been kept
2 that we don't know now where the mine shafts are, where
3 the land is going to subside next, it's going to be all
4 over in the area of this project. And we're not at all
5 happy with the width of the scope that they have given
6 themselves to look and find historic resources so we
7 have no idea whether and they have no idea whether they
8 are going to find more mine shafts to sink into. That
9 is only one kind of resource that may might impact.

10 We don't know where those things are and we
11 have raised this issue but, no, they don't have to
12 consider that when they're doing a federal review
13 because the federal review considers only things that
14 are already listed on the register. Well, federal
15 register resources probably comprise, certainly to be
16 generous, less than 10 percent of the existing
17 resources.

18 So what else have we got out here that has
19 not been found with this project. And the report that
20 the project turned which has not had very wide
21 circulation was prepared by a consultant is not at all
22 thorough. This is only one of the things that we
23 present, but it applies specifically to one of these
24 lots that you are talking about. You don't know what
25 else is on the site that might be destroyed. I think

1 that's enough for now.

2 PRESIDENT SCHLEICHER: Thank you.
3 Marie Springer.

4 MS. SPRINGER: I'm Marie Springer, 161 Owen
5 Station Road, Sussex, New Jersey. I am Vice Chair of
6 the Northwest Group of Sierra Club.

7 PSE&G has proposed to widen the right-of-way
8 to upgrade their power lines. In order to do this they
9 will have to do a diversion in Mahlon Dickerson
10 Reservation. Sierra Club opposes diversion because this
11 power line will cause irreparable harm to the
12 reservation.

13 Under the diversion rules, you can get land
14 of greater or equal value. You cannot mitigate for this
15 taking because what you are destroying cannot be
16 replaced. In addition, the secondary effects on runoff
17 and view shed will not be ameliorated by purchasing land
18 elsewhere. The land was bought in public trust. Mahlon
19 Dickerson is one of the largest reservations in New
20 Jersey.

21 It is a fantastic recreational resource
22 providing cabins and lean-to's to the public. Allowing
23 for power lines to permit the creation of new access
24 roads in drilling and blasting, the intrusion of power
25 lines will undermine the feeling of being in a wild

1 place and diminish the recreational value.
 2 PRESIDENT SCHLEICHER: Lance Mills.
 3 MR. MILLS: It's already been covered what I
 4 would say. I wanted to find out more information, what
 5 was going on. That's why I came.
 6 PRESIDENT SCHLEICHER: Thank you very much,
 7 Mr. Mills.
 8 The next speaker is Elliot Ruga.
 9 MR. RUGA: I'm with the New Jersey Highlands
 10 Coalition, 508 Main Street in Boonton.
 11 Thank you for having us here for this
 12 meeting.
 13 The New Jersey Highlands Coalition has been
 14 a force in the preservation of the water and other
 15 natural and historical resources of New Jersey Highlands
 16 region since 1988. We are deeply concerned by the
 17 lasting and ruinous impacts this project will have on
 18 the Highlands overall, on Morris County, and on Mahlon
 19 Dickerson Reservation in particular.
 20 How about those 180-foot power lines coming
 21 up as you drive up Route 15.
 22 In the public notice for this meeting as
 23 posted on the Park Commission's website, it states,
 24 quote, in constructing the proposed project PSE&G is
 25 strengthening it's regional power supply and ensuring

1 problems by importing more electricity are likely to
 2 increase greenhouse gas emissions and other air
 3 pollution challenges. Many of the out-of-state plans
 4 lack advanced technology to control air pollution and
 5 the prevailing winds carry that pollution here to the
 6 detriment of our air quality and public health.
 7 The prospect of increased greenhouse gas
 8 emissions is only one reason to avoid increasing our
 9 lines on imports of out-of-state dirty electricity. The
 10 master plan continues. . . Just as importantly, hopes
 11 that these imports will bring us greater reliability and
 12 lower prices are likely to be dashed.
 13 It is irresponsibility to stake our energy
 14 future on increased imports of out-of-state coal based
 15 electricity.
 16 The BPU being part of the New Jersey Energy
 17 Plan's Task Force is well aware of the plans, findings,
 18 and goals. There should be no expectation by anyone
 19 that the BPU will give a green light to this project.
 20 Last week representatives of the Morris
 21 County Heritage Commission and the Morris County Tourism
 22 Board, agencies of the Morris County Board of Chosen
 23 Freeholders were participants in the committee that
 24 announced the 2009, ten most endangered historic sights
 25 in Morris County.

1 continued power to consumers during partial system
 2 failures, unquote.
 3 There is an implication here that the need
 4 for this project has been established by independent and
 5 credible sources. It has not. The sole authority for
 6 determining the need for this project rests with the New
 7 Jersey Board of Public Utilities. Just last month the
 8 BPU series of three well-attended public hearings
 9 concluded.
 10 At this time expert legal, scientific, and
 11 engineering testimony challenging the need for this
 12 project is being heard by BPU at it's formal hearings.
 13 It is not anticipated that that BPU will make an
 14 official determination any time soon. Until then, the
 15 consideration for PSE&G's application to intrude upon
 16 Morris County public parkland which you hold in trust
 17 for us is premature.
 18 The New Jersey Energy Master Plan states,
 19 and I quote, PJM has included in its transmission
 20 expansion plans several projects that will enable more
 21 imports of electricity from areas to the west and south.
 22 These long transmission lines are costly to build, more
 23 vulnerable to disruption than shorter lines linking
 24 local generation to local demand.
 25 Attempts to solve New Jersey's reliability

1 First on the list is the proposed
 2 500-kilovolt power line due to the significant impacts
 3 the proposed projects will have on the scenic character
 4 of rural Morris County. If there were promises of
 5 mitigation funding made to the county on behalf of
 6 PSE&G, I'm only speculating as PSE&G has offered an
 7 environmentally questionable financial mitigation first
 8 payment recently to another government agency, there is
 9 still absolutely no reason to consider the merits of
 10 this project any further until its need has been
 11 established. If necessary, we can meet again. This
 12 issue, this question can be tabled, but it is likely we
 13 may not need to meet again.
 14 Thank you.
 15 PRESIDENT SCHLEICHER: John Pierson.
 16 MR. PIERSON: I don't have any comments to
 17 add. Thank you.
 18 PRESIDENT SCHLEICHER: Pat Barn.
 19 MS. BARN: That would be me, but I was here
 20 to listen. I just wanted to ask you if there is a plan
 21 that's laid out where residents can go and see exactly
 22 the route that you're taking.
 23 Do any of you have copies of that?
 24 MR. HELMER: You can let PSE&G respond.
 25 MR. RICHTER: I'm sorry. I missed that.

1 What was the question?
 2 MR. HELMER: Any location for the rule.
 3 MS. BARN: The exact location and exactly
 4 what you are doing and what residents you are affecting.
 5 MR. RICHTER: All the plans for this project
 6 are on our website. It's www.PSE&G.com, look for the
 7 Susquehanna-Roseland project. And you'll have the
 8 entire maps are on there. Our proposed testimony that
 9 we presented to the Board of Public Utilities is on
 10 there. Our Highlands application is also on there.
 11 MS. BARN: And everyone will know if it
 12 affects their home or the home next to them.
 13 MR. RICHTER: The maps are pre-detailed. It
 14 goes through lot and block numbers on each property. It
 15 might be hard to read. If you can print them out
 16 somewhere, it might be a little easier.
 17 MS. BARN: Is it difficult to read?
 18 MR. RICHTER: But if there's something
 19 specific that you're looking for, if you can leave your
 20 name and number with one of these ladies here, we'll be
 21 happy to get that information to you.
 22 MS. BARN: Thank you.
 23 PRESIDENT SCHLEICHER: Wilma Frey.
 24 MS. FREY: Hello. My name is Wilma Frey and
 25 I'm senior policy manager for New Jersey Conservation

1 Foundation.
 2 Good evening and we thank you for the
 3 opportunity to comment on this issue.
 4 The Morris County Parks Commission is the
 5 guardian of the public trust. It's the guardian of
 6 these lands that were donated or purchased to be
 7 protected in perpetuity from future residential,
 8 commercial, or industrial development.
 9 The Parks Commission is entrusted by the
 10 public with this awesome responsibility to guard the
 11 natural, the cultural, biological, recreational,
 12 historic, and scenic resources of its parks to the best
 13 of its ability. The county's protected public land are
 14 also regulated by the NJDEP Highlands rules where they
 15 are identified as both important scenic and recreational
 16 resources. The Highlands Regional Master Plan as well
 17 includes Morris County Parks on its list of regional
 18 Highlands scenic resources.
 19 Before the county makes any determination
 20 about allowing a diversion of these critical and
 21 important public lands that are held in trust for the
 22 public, there needs to be an analysis of the need for
 23 this project and an analysis of the impacts of this
 24 project on the parks.
 25 The county should only allow consideration

1 of this project if there has been a clear need
 2 determined and that is the responsibility of the Board
 3 of Public Utilities which will be looking at this issue
 4 in general, taking into account the state's energy
 5 needs, the trends in energy use, and most importantly
 6 perhaps the State's Energy Master Plan and how this
 7 project fits in with those things.
 8 The BPU is not going to make a decision on
 9 this until at least December. So this commission really
 10 has no need to deal with this project at this time. The
 11 proposed 500 kV line is a massive industrial project.
 12 Its construction would clearly damage Mahlon Dickerson
 13 reservation with long-lasting, if not permanent,
 14 impacts.
 15 The construction access routes for heavy
 16 machinery are proposed for current foot trails in the
 17 reservation and I have -- I'm not positive whether the
 18 current proposal -- there's an amended proposal. We
 19 have not been able to obtain the maps directly that show
 20 the access construction, access routes. I think they
 21 are the same as on the original application.
 22 These are my photographs from Headley
 23 Overlook and along the Winona Trail which was and I
 24 think still is proposed as a construction access route.
 25 So the doubled height towers would be more

1 visible -- it would be many more visible from Headley
 2 Overlook than currently and from other locations in the
 3 reservation, as well as many other preserved lands.
 4 So we ask you to not do anything, do not
 5 take any action this evening that would approve use of
 6 Morris County parkland in the proposed project. There
 7 has not been a determination of need at this point and
 8 it would be unnecessary for the commission to make that
 9 at this time.
 10 Thank you very much.
 11 PRESIDENT SCHLEICHER: Is there anyone else
 12 that would like to speak?
 13 All right. Seeing none, as David mentioned
 14 earlier, we -- the public hearing process continues
 15 until August the 10th. You can write your comments.
 16 You can send them in. If other people have things that
 17 they would like to let us know, questions, comments,
 18 make sure that you get them to us. We will be making a
 19 decision as a board, not as individuals so we are really
 20 not voting tonight.
 21 I turn it over.
 22 I would like to move now to close the public
 23 hearing. No one that wishes to --
 24 COMMISSIONER SETTE: So moved.
 25 COMMISSIONER BARON: Second.

1 PRESIDENT SCHLEICHER: All in favor.
2 (All commissioners voted in favor to adjourn
3 public hearing.)

4 PRESIDENT SCHLEICHER: Any opposed?
5 So moved.

6 I would like to at this point thank all of
7 you for your comments. They were quite on target. I've
8 been to a lot of public hearings and I am clearly
9 impressed.

10 We will certainly think about what you've
11 said to us. I'd also like to thank the Mayor and
12 administration in Jefferson Township and the recreation
13 community that provided this wonderful facility.

14 So our public meeting will start in about a
15 half hour. The next steps, as we promised, will be
16 described.

17 MR. HELMER: Just so the public is aware of
18 the process that will take place, you can also find this
19 on New Jersey Green Acres website, Chapter 26 Rules and
20 Regulations.

21 The Park Commission will be supplying a
22 transcript of this scoping hearing for the New Jersey
23 Green Acres Program. The written comments of the
24 proposed major diversion will be received during the
25 public comment period, as Commissioner Schleicher

1 that authorization. And at that point in time a public
2 hearing on the final application will be scheduled in
3 Jefferson Township to receive oral and written comments
4 on the application.

5 Hearings are to be scheduled 90 days prior
6 to the Statehouse Commission hearing and 75 days prior
7 to -- I'm sorry. The hearing is to be scheduled 90 days
8 prior to the Statehouse Commission hearing. At that
9 time the NJDEP commissioner will approve or disapprove
10 the final application and then a Statehouse Commission
11 hearing to be scheduled if that application is approved.

12 So there will at least if the progress
13 progresses be another point in time for the public to
14 comment on this project. That meeting will also be held
15 in Jefferson Township. I cannot promise if it will be
16 at this site or another location. I plan on after the
17 September 29th commission meeting, once the comments by
18 the Park Commission and scoping hearing and written
19 comments are approved, those responses will also be
20 available on our website or you can contact the park
21 commission for that information.

22 All of that information throughout this
23 whole process will be given to New Jersey Green Acres
24 Program. You can also reach out to them directly if
25 you'd like any information pertaining to this diversion

1 mentioned, Monday, August 10th, 2009, at that deadline.

2 A summary of the public comments made at
3 this scoping hearing and comments provided in writing
4 during public comment period and the Park Commission's
5 response to the public comments will be provided in New
6 Jersey Green Acres Program, Bureau of Legal Services and
7 Stewardship.

8 The Park Commission's Tuesday, September
9 29th, 2009, public meeting -- it won't be held here, it
10 will be held in the Park Commission's offices in Morris
11 Township -- a resolution whether or not to support the
12 submission of a Statehouse Commission pre-application to
13 NJ Green Acres Program for major diversion be voted on
14 and sent to the New Jersey Green Acres Program along
15 with the pre-application for major diversion.

16 Responses to the scoping hearing and public
17 comment period will also be made available and become
18 part of the record.

19 New Jersey Green Acres Program will review
20 the pre-application. It usually takes 15 days and it
21 has to be handed in before the second Thursday of the
22 month. If the pre-application is deemed sufficient by
23 New Jersey Green Acres Program, the program will
24 authorize the Park Commission to submit a final
25 application which has to be submitted within 180 days of

1 process.

2 PRESIDENT SCHLEICHER: Thank you. And we
3 will adjourn.

4 (Proceedings concluded at 6:52 p.m.)
