Note to the Reader:

Since the initial sections of this survey were completed, determinations of eligibility have been modified for certain properties. In order to find the most recent determination of eligibility, consult the "Sites List and Municipal Maps" section of the introductory narrative (Vol. 1). The determinations of eligibility on the survey forms are superceded by those on the list.
SITES LISTS AND MAPS

Below is a list of all sites included in the Monmouth County Historic Sites Inventory. Sites location maps are also provided for each municipality. The sites lists are arranged by municipality and then alphabetically by street address or geographical location. Next to each site is a determination of its eligibility to the National Register of Historic Places.** Eligibility is noted by the following symbols:

Y = Yes
N = No
P = Possible
D = District

Sites which are located within eligible districts but which are also individually eligible are labeled "Y" instead of "D". The "Possible" category is limited to those properties which require additional research on construction date, quality of the interior (interiors generally were not examined), ownership history, and/or degree of alteration in order to determine eligibility.

The survey project followed federal standards for National Register eligibility which are set forth in "How to Apply the National Register Criteria for Evaluation" (National Park Service, Department of the Interior, 1982). National Register eligibility is subject to review and final approval by the Office of New Jersey Heritage and the New Jersey State Review Board of Historic Sites. Eligibility may change due to building alterations made subsequent to this survey. Since the initial field work for this project was completed during 1980-1982, determinations of eligibility on the survey forms are superceded by those on the below updated lists.

**The National Register is the official list of properties significant in American history, architecture, archeology, engineering, and culture. The National Register was established by the Historic Sites Act of 1935 and the National Historic Preservation Act of 1966, as amended. It is maintained and expanded by the National Park Service on behalf of the Secretary of the Interior. Properties listed on the National Register receive a limited form of protection and certain benefits. For information concerning the effects of listing, contact the Office of New Jersey Heritage in Trenton (609-292-2023).

DISTRICT NAME: Ft. Monmouth District
MUNICIPALITY: Oceanport/Eatontown/Tinton Falls
COUNTY: Monmouth
TYPE OF DISTRICT: Military Base
USGS QUAD: Long Branch

DESCRIPTION: (General description of district as a whole and boundaries)

The Fort Monmouth District compasses two major discontinuous areas, located in the boroughs of Oceanport, Eatontown, and Tinton Falls. The original section of Fort Monmouth is in Oceanport, and it expanded into the other municipalities as the fort grew. With the exception of the Sun Eagles Country Clubhouse (now Gibbs Hall 1331-21), all of the surveyed buildings are in the Oceanport section of Fort Monmouth. The boundaries of the district are those of the fort. The landscaping of the base consists of lawn, low shrubs, and scattered mature trees.

The earliest construction at the fort consisted of 129 temporary wooden structures built in 1917 and 1918, during the First World War. Hanger #4, (1338-1-5) a two story wood frame structure of Oceanport Avenue, is the primary building that remains from this period.

The first permanent buildings were the Barker Circle barracks (see Barnes Hall 1338-1-3) and the Hospital building (now Allison Hall 1338-1-1), reinforced concrete and brick buildings completed in 1928. In 1929, as an economy measure, the Signal Corps consolidated the various radio laboratories around the county at Fort Monmouth, making it the hub of Signal Corps activity in the country, and led to further major construction at the fort. This new construction included the Post Theater (now Kaplan Hall 1338-1-5) in 1933, the Headquarters building (Russel Hall 1338-1-4) in 1936, and the Officers and Non-Commissioned Officers housing. These are substantial concrete and brick structures, Georgian Revival in style, with the notable exception of Russel Hall, a Moderne building. Several other utilitarian structures, including a bakery, blacksmith shop, and warehouses were built along the railroad siding during this period.

The communication demands of the Second World War spurred a massive expansion of the fort. A major part of the expansion was the acquisition of the Camp Charles Wood area, located in Eatontown and Tinton Falls. This area was formerly the Sun Eagles Country Club, later the Monmouth Country Club, and included a large Tudor Revival Clubhouse (Gibbs Hall 1311-21) and golf course built in the 1920's. The majority of the extant buildings at the fort date from World War II and later, and are predominantly long, multi-story masonry buildings.

APPROXIMATE NUMBER OF BUILDINGS: More than 2000

PHYSICAL CONDITION OF STRUCTURES: Excellent 70 % Good 30 % Fair 0 % Poor 0 %

REGISTER ELIGIBILITY: ☑ Yes ☐ Possible ☐ No

THREATS TO DISTRICT/LOCAL ATTITUDES: The historical significance of Fort Monmouth has been recognized in the establishment of a museum on the base. The physical plant of the base is well maintained.

COMMENTS: District currently includes the entire fort. The boundaries and specific buildings included would have to be reconsidered in a National Register Nomination.
Fort Monmouth has been the center of military communications development in the United States during the 20th century. Built on the site of the original Monmouth Park, it was established as the Signal Camp at Little Silver in the spring of 1917, to train signal corporals for service in the First World War. It was designated Camp Alfred Vail (after an associate of Samuel F.B. Morse) in the fall of 1917. The camp, as established, had two major functions: to serve as a training ground for the Signal Corps; and also as a radio laboratory for the testing and development of new equipment and techniques. Experiments in ground-to-air communication and aerial photography were an important part of this early work. Four wooden aircraft hangers were built along Oceanport Avenue beginning in December 1917, and the first flights were conducted in May of 1918. A total of 20 aircraft were located at the camp. The experimentation continued until the Armistice on November 11, 1918, when all the aeronautical equipment was returned. Only Hanger #4 (1338-1-6) remains of the original four hangers; aircraft hangers from this period are quite rare. Following the Armistice, the Signal School activities of the four training areas (in California, Nebraska, Texas, and Oceanport, N.J.) were consolidated at Camp Alfred Vail, making use of the many buildings vacated with the end of the war. Hanger #4, as with many of the other buildings, was converted into a classroom.

In 1925 the camp was redesignated Ft. Monmouth and made a permanent facility. The first permanent construction began after this redesignation. The group of barracks at Barker Circle (see Barnes Hall (1338-1-3) and the Hospital (1338-1-1) were planned in 1926 and completed in 1928. The Signal School, some limited radio experimentation, and the maintenance and training of the Carrier Pigeon Corps were the major activities at the Fort during the 1920's. As an economy measure, and to boost the morale of the students at the Signal School, most of the activities and the headquarters of the Signal Corps were brought to Fort Monmouth in 1929. A second wave of permanent construction followed this consolidation which included the Post Theater (now Kaplan Hall 1338-1-5) in 1933, the headquarters at Russell Hall (1338-1-4) in 1936, and the rows of officer's housing. The buildings from this period are more highly designed than the earlier permanent buildings, with strong Georgian Revival motifs in the Theater and residential buildings, and a very formal Modern design in Russell Hall. A wide variety of communication equipment and techniques were developed at Fort Monmouth during the 1930's; the most notable was the development of radar.

Continuation Sheet - Fort Monmouth District - Significance

With the entry into the Second World War, the training activity at Fort Monmouth grew immensely, necessitating the construction of many new buildings and the acquisition of new property. The most notable acquisition was the Monmouth Country Club, formerly the Sun Eagles Country Club, which became Camp Charles Wood. The club was developed in the 1920's by Max Phillips, who purchased 600 acres south of Tinton Avenue, planning a combined country club and residential development. Only two residences were built, but a golf course and a large Tudor Revival clubhouse (1311-22) designed by B. Hustace Simonson were completed and recognized by Golf Illustrated as among the finest in the New York metropolitan area. Ninety-seven structures were built on the site within 90 days of its acquisition by the Army. By the summer of 1943, Fort Monmouth and related facilities had trained 60,000 signal specialists and had graduated over 15,000 officers.

Since the Second World War, activity at the fort has included a wide range of research and development in communications systems; most notable in the area of satellite communications. The combined work of Bell Laboratories and Fort Monmouth make Monmouth County one of the most important centers of the development of communications systems in the 20th century. Other sites related to communications in the county include Deal Test Site in Ocean Twp. (1331- ), Twin Lights in Highlands (1317-3), Evans Signal Lab in Wall Twp. (1352-18), and Bell Laboratories in Holmdel Twp. (1318- ).

- EATONTOWN BLVD.
- ELIZABETH DR.
SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

The house is set back from the road approximately 100' facing southwest on an irregular corner lot. Also on the lot is the current church building built in 1960. Mature trees are scattered about the yard, both in front and behind the house.

SURROUNDING ENVIRONMENT:

- Highway Commercial ☐  
- Other ☐

SIGNIFICANCE:

This is one of several examples of the simple Victorian buildings built in Oceanport during the late 19th century. The house was owned by J. Teed in 1878 and by Louis Stewart in 1889. It was later owned by Sidney Beers, originally of Holmdel, who operated a dairy farm called "Bonnie Dairy", supplying dairy products to Fort Monmouth. Beers was Mayor of Oceanport from 1940 to 1947. The house was also part of a horse farm. The building was acquired by the Calvary Baptist Church in 1958. The church had previously met in North Long Branch.

**ADDITIONAL ARCHITECTURAL DESCRIPTION**

A. The house is composed of a 3 bay square section and a narrower 2 bay wing on the west side. It has a simple gable roof with overhanging eaves; the roof on the wing has exposed rafter ends. Windows have a variety of arrangements including 6/6, 6/1 and 2/2. Second floor windows are somewhat smaller than the first, except on the wing. All windows have simple surrounds. The doorway is offset somewhat from the symmetry of the windows; it has a simple enframement, replacement door and an aluminum screen door. The door on the north side is similar and is under a shed roof porch. Another porch covers the south and east walls; it is supported by squared classical columns on the east side and by turned Victorian posts on the south side.

B. Has a one story attached shed; may have been a stable.

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES: SEE ATTACHED PLAN

LANDSCAPE FEATURES:

Siting: The house faces south into a paved courtyard (see site plan).

Topography: Flat

Vegetation: A variety of mature trees surround the complex.

Water: Turtle Mill Creek flows a short distance to the south.

SURROUNDING ENVIRONMENT: Urban ☐ Suburban ☑ Scattered Buildings ☐ Graveyard, Open Space ☐ woodland ☐ Residential ☑ Agricultural ☐ Village ☐ Monmouth Park Industrial ☐ Downtown Commercial ☐ Highway Commercial ☐ Other ☐

SIGNIFICANCE:

This complex has an unusual plan with the house facing the outbuildings. The foundations on the outbuildings are concrete so there is a possibility they have been moved. All the buildings in the complex are in excellent condition. J.C. Snedeker was the owner in 1851, Mrs. Snedeker in 1860; M. Bunnell was owner in 1873 and J. Pemberton owned it in 1889.

**DESCRIPTION**

**Construction Date:** c. 1870  
**Source of Date:** Ref. 1, 2

**Architect:**  
**Builder:**

**Style:** Italianate  
**Form/Plan Type:** T-plan with enclosed front porch

**Number of Stories:** 2  
**Foundation:** Not visible

**Exterior Wall Fabric:** Shingle

**Fenestration:** 3 bay symmetrical

**Roof/Chimneys:** Low pitch cross gable; 1 internal, 1 external chimney

**Additional Architectural Description:**

The roof, windows and other elements of the house are highlighted in dark green. The roof has overhanging eaves and elbow braces. Small rectangular windows are in the gable peaks. Paired, round headed windows with single light sash are situated in the central bay. The side bays have rectangular 2/2 sash with segmental arch lintels. The first floor windows are somewhat larger. The doorway has a replacement door with large windows and a transom light. The full front porch is screened in; it is a replacement of a smaller earlier porch.

---

**PHOTO**  
Negative File No. 1-29, 30  
Map (Indicate North)
The house is situated on a slight rise, facing south at the corner of Port-Au-Pecc and Myrtle Avenues. It is on a 93 acre lot which also includes two other residences, a two story barn and a garage, all frame. The house is separated from the other buildings by a row of thick conifers. Shrubbery surrounding the base of the house is well maintained.

SURROUNDING ENVIRONMENT:  Urban ☐  Suburban ☑  Scattered Buildings ☐
Open Space ☑  Woodland ☐  Residential ☑  Agricultural ☐  Village ☐
Industrial ☐  Downtown Commercial ☐  Highway Commercial ☐  Other ☐

Across the street from Monmouth Park

SIGNIFICANCE:

This house was the main house for John Hance's Port-Au-Pecck farm, one of several large farms owned by George Hance in 1878, totaling approximately 850 acres. He was noted for his stock farm and fruit farms, peaches and apples in particular. He operated a distillery as well. John and George Hance were probably brothers. The house is a notable example of the Italianate Style in Oceanport.

MUNICIPALITY: Oceanport
USGS QUAD: Long Branch
OWNER/ADDRESS:

COMMON NAME: Corlies Cottage
BLOCK/LOT: 104/2
COUNTY: Monmouth
UTM REFERENCES:
Zone/Northing/Easting

DESCRIPTION
Construction Date: c. 1835 (Section A)
Source of Date: Ref. 1
Builder:

Architect:
Style: Traditional
Form/Plan Type:

Number of Stories: 2½
Foundation: Concrete over brick

Exterior Wall Fabric: Shingle, clapboard

Fenestration: 3 bay symmetrical plus 1 over 3 bay

Roof/Chimneys: Gable; external end wall chimney

Additional Architectural Description:

This house is the product of several expansions. The original portion of the house is Section A; it is a 1½ story, one room cottage with an existing large cooking fireplace. It has 3 bays across and a Dutch door with strap hinges. It utilized sawn lumber in the long joists. Section B is the 3 bay 2 story west end which was probably built within 20 years of Section A. It has a moderately pitched roof, eaves that are flush with the end wall and a small cornice. Windows have 6/6 sash and simple surrounds. The doorway has a simple 4 light transom and a 6 panel door with a later vertical board outside door. The porch is supported by squared posts. Section C involved the expansion of Section A to the rear and the raising of the roof to provide a full second story and attic. This expansion was carried out in the mid 20th century. Section D is a one story kitchen wing also added in the 20th century.
SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:
The house faces south on a wooded rectangular lot looking out over Oceanport Creek. A one story, frame summer kitchen is adjacent to the house and a one story shed is at the rear.

SURROUNDING ENVIRONMENT: Urban ☐ Suburban ☐ Scattered Buildings ☐
Open Space ☐ Woodland ☑ Residential ☑ Agricultural ☐ Village ☐
Industrial ☐ Downtown Commerical ☐ Highway Commercial ☐ Other ☑

Property is surrounded on two sides by Fort Monmouth.

SIGNIFICANCE:
This house dates from the early expansion of Oceanport as a port town, having expanded with the growth of the Allaire Iron Works which maintained a warehouse in the town. The house includes a late example of the one room, 1½ story cottage that was very common in 18th century Monmouth County. Elisha Corlies Price was a ship's captain, sailing between Oceanport and New York. He purchased 2½ acres from Anthony Van Pelt in 1835 for $195.

Army Base

SIGNIFICANCE:

See Fort Monmouth District Form #1338-1.

This is the smallest and only remaining hanger of the four that were built by the U.S. Army Signal Corps in 1917. The building housed aircraft of the 122nd Aero Squadron until December of 1918. The aircraft conducted experiments in aerial photography and ground to air radio development. This is the earliest building now standing at Fort Monmouth. It has since been used as a classroom for the Signal School and is now used as the printing plant for the post.

### Description
- **Construction Date:** 1747 with later additions
- **Source of Date:** Scratched in window glass
- **Architect:**
- **Style:** Traditional
- **Number of Stories:** 2
- **Foundation:** Fieldstone
- **Exterior Wall Fabric:** Clapboard
- **Fenestration:** 3 over 4 bays
- **Roof/Chimneys:** Gable, shed; internal end chimneys; slate roofing

**Additional Architectural Description:**

The house is composed of 2 major sections, a 2 story main block "A" and a long, 1 story section with a shed roof "B". Section A includes the earliest section of the house. An exposed hearthback is on the south wall which is part of the early section. The original section may be limited to as little as the two bays on the south end and just the first story. The slate roof with its overhang eaves is a later alteration. Windows have 6/6 sash. The doorway has a simple frame, a replacement door and storm door. Full front porch is supported by squared posts. Section B seems to be a very long example of the kitchen ells that are common in many 18th and 19th century houses in Monmouth County. A large picture window is located on the south wall. The walls are brick lined. A porch was formerly on the east side also.

The house faces west on a large rectangular corner lot. It is set very close to Main Street. A frame barn dating from the 19th century is located south of the house. Mature deciduous trees are scattered about the estate.

SURROUNDING ENVIRONMENT: Urban ☐ Suburban ☐ Scattered Buildings ☐
Open Space ☐ Woodland ☐ Residential ☒ Agricultural ☐ Village ☒
Industrial ☐ Downtown Commercial ☐ Highway Commercial ☐ Other ☐

SIGNIFICANCE:

See Oceanport Main Street District form # 1338-2.

This is probably the oldest house now standing in Oceanport. Although it has been altered several times through the years, it retains notable features; the exposed hearth back and the name and date scratched in a first floor window-pane. Smaller scale buildings such as this were the rule in 18th century Monmouth County. The Edwards family owned most of the land in the Oceanport area during the mid 18th century and they may be the original owners. William Morton Longstreet bought the building in 1879 after it was subdivided by George Maps. It was owned by the Price family in the early 20th century and reportedly visited by Diamond Jim Brady, Lillian Russell, Will Rogers and Fred Stone.

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

The house faces north on a rectangular lot. The house is set back approximately 30' from the road. A low hedge runs along the side walk. Large bushes surround the house.

SURROUNDING ENVIRONMENT: Urban □ Suburban ☑ Scattered Buildings □
Open Space □ woodland □ Residential ☑ Agricultural □ Village □
Industrial □ Downtown Commercial □ Highway Commercial □ Other □

SIGNIFICANCE:

See Oceanport Main Street District Form #1338-2.

Although this house lacks any decorative detailing, its simple form reflects the aesthetic of the Federal Style. It is a good example of the I-house type, more common in the areas of English settlement in Monmouth County. The house was probably built by Joseph Kirby, a Quaker, who kept a hotel in Oceanport for a few years prior to 1846. His daughter Anne lived in the house until her death in 1930.

ORGANIZATION: Monmouth County Parks System/Monmouth County Historical Association

DATE: April 1981
HISTORIC NAME: W.H. Darnell House
LOCATION: 22 Pemberton Avenue
MUNICIPALITY: Oceanport
USGS QUAD: Long Branch
OWNER/ADDRESS: Common Name: 120/6
BLOCK/LOT: Block/Lot
COUNTY: Monmouth
UTM REFERENCES: Zone/Northing/Easting

DESCRIPTION
Construction Date: Between 1873 and 1878
Source of Date: Ref. 1, 3
Builder:
Architect:
Style: Italianate
Form/Plan Type: Square with rear ell
Number of Stories: 2½
Foundation: Brick
Exterior Wall Fabric: Clapboard
Fenestration: 3 bay symmetrical
Roof/Chimneys: Center gable; no visible chimneys

Additional Architectural Description:
The center gable roof is highlighted by overhanging eaves and a wide frieze band. A cupola appears to have formerly stood in the center of the roof. Paired lancet windows are in each end of the gable peaks. Windows have 2/2 sash and peaked drip moldings. The panelled Italianate door is surmounted by a wide, segmental arch transom light. The full front porch is notable for its finely detailed bracketing, posts and balustrade.

COMMON NAME: Half House
BLOCK/LOT: 117/55
COUNTY: Monmouth

UTM REFERENCES: Zone/Northing/Easting

DESCRIPTION

Construction Date: 1823, 1853
Source of Date: Ref. 1

Architect:

Style: 5 bay traditional
Builder:

Number of Stories: 2
Form/Plan Type: Rectangle with projecting bay on west wall and rear lean-to

Foundation: Concrete veneer

Exterior Wall Fabric: Clapboard

Fenestration: 5 bay slightly asymmetrical

Additional Architectural Description:

This house is reportedly built in two sections, though it is difficult to determine from exterior analysis which is the earlier section. The roof is uniform over both sections with simple overhanging eaves. Windows are uniform in both sections with 6/6 sash; the first floor windows are slightly taller. Narrow doorway; full front porch dates from the second half of the 19th century.
SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

The house faces north on a small rectangular lot. It is set back from the road approximately 20'.

SIGNIFICANCE:

See Oceanport Main Street District Form #1338-2.

This house is one of the earliest buildings in the borough of Oceanport, having been built around the time the area began being used as a depot for shipping charcoal hauled from Southern Monmouth County by sloop to New York. The house has the simple design that characterized most construction from that period. The Pemberton family were among the early landowners in the Oceanport area, acquiring the land in the late 18th century. T. Smith owned the house in 1860, 1873 and 1889.

The house faces northeast on an irregular corner lot. The lot is shared with a small store building.

SURROUNDING ENVIRONMENT: Urban ☐ Suburban ☑ Scattered Buildings ☐
Open Space ☐ Woodland ☐ Residential ☑ Agricultural ☐ Village ☐
Industrial ☐ Downtown Commerical ☐ Highway Commercial ☐ Other ☐

SIGNIFICANCE:

See Oceanport Main Street District Form #1338-2.

This is among the largest houses in the Oceanport Village area, reflecting its possible original use as a farmhouse. It was reportedly built in the early 1800's, but the massing, brick foundation and large windows would indicate a construction date closer to 1860. T. Addams owned a house on this lot in 1851; William Matthews was owner in 1860, and R. Gordon owned it in 1873 and 1889. Fred Zito built the store building in 1932 as a grocery.

HISTORIC DISTRICT SURVEY FORM
HISTORIC SITES INVENTORY NO. 1338-2

DISTRICT NAME: Oceanport Main St. District
MUNICIPALITY: Oceanport
COUNTY: Monmouth
TYPE OF DISTRICT: Residential
USGS QUAD: Long Branch

DESCRIPTION: (General description of district as a whole and boundaries)

The Oceanport Main Street District is a residential district of approximately 77 structures located along Main Street, on the cross streets Arcana Ave., Center St., and Wolfhill Ave., and along sections of the parallel street Pemberton Ave. The district is primarily made up of 2 story frame residences, set close to the road, on small rectangular lots.

Most of the historic buildings in the district date between the 1820's and the 1880's. The dates bracket the prosperous years for Oceanport in the 19th century. Only one of the surveyed buildings in the district dates from before this period: 20 Main St. (1338-2-5), a small mid-18th century house with later additions. Stylistic expression of most of the buildings is limited. The earlier buildings utilize a 2/3 or full Georgian plan with little or no decorative detailing. Later buildings make use of Picturesque elements such as centred gables, bracketed eaves, and variously shaped windows. Well-preserved houses in the district include the Kirby House, 38 Main St. (1338-2-8) c. 1833, the John Taylor Phillips House, 7 Main St. (1338-2-3) c. 1850, and the W.H. Darnell House, 22 Pemberton Ave. (1338-2-13), c. 1873-1878. A large number of the buildings in the district have been altered and added to through the years. Ten of the buildings in the district could be considered intrusions: these are either ranch-type houses, or earlier buildings which have been substantially altered.

A notable feature of the district is the variety of mature trees and shrubs which add to the visual character of the district. The east end of the district is bordered on two sides by branches of Oceanport Creek, and the Old Wharf Park, a municipal park, also abuts the east end of the district. The district boundaries are delineated on the district map. The north, east, and south boundaries are well defined, respectively, by Fort Monmouth (1338-1), the creek and park, and recently constructed ranch houses. The western boundary is less well defined.

APPROXIMATE NUMBER OF BUILDINGS: 77

PHYSICAL CONDITION OF STRUCTURES: Excellent 30 % Good 60 % Fair 10 % Poor 0 %

REGISTER ELIGIBILITY: ☑ Yes ☐ Possible ☐ No

THREATS TO DISTRICT/LOCAL ATTITUDES: The large number of cars associated with neighboring Ft. Monmouth, and Monmouth Park creates regular traffic problems along Main St. and Oceanport Ave.

COMMENTS: The district lacks any buildings which could be considered exceptional.
The Oceanport Main Street District is the surviving residential area of a wharf and commercial center that is no longer extant. Located at the head of navigation of the Shrewsbury River, the area was used prior to 1820 as a storage depot for the charcoal that was burned in southern Monmouth County and shipped to New York. First known as Eatontown Dock, the port began to have regular shipping service with the sloop "Sowbug", and by 1833 Henry Wolcott and John Corlies had opened the first store and lumber yard. The Eatontown Steamboat Company was established in 1844 and built docks, wharves, and the steamboat "Edwin Lewis". Soon afterward, James S. Allaire built a large stone warehouse, 50 feet square and four stories tall for the storage and sale of the ironware from his Howell Iron Works. The port continued to expand until the construction of the Raritan and Delaware Bay Railroad and depot in 1861, a short distance west of the village area. Activity at the port was further curtailed by the construction in 1877 of the New York and Long Branch Railroad bridge across Oceanport Creek, east of the wharf area, cutting off access to the Shrewsbury River except through the drawbridge. The resulting decline in commerce was replaced to a certain extent by the Monmouth Park Race Track which was established in 1878. It attracted big spenders from a large distance around until its demise in the 1890's when horse racing was outlawed in New Jersey. The former wharf area is now a municipal park.

What remains from Oceanport's 19th century heyday is the residential area of stylistically simple, yet comfortable homes of Oceanport's merchant class. Vernacular examples of buildings built between the 1820's and the 1880's predominate. The earliest house in the district, 20 Main Street (1338-2-5), is a rare survivor among houses from the 18th century in the shore area. The district includes well preserved examples of buildings from several different stylistic periods during the 19th century, though a large number of the buildings have been expanded and altered, often to their detriment. In spite of the alterations, and the recent infill ranch style residential construction, the district presents a cohesive unit of residences and mature vegetation, and expresses some of the character of Oceanport's 19th century prosperity.
