**We are recycling today. For fresh clean air tomorrow.**

### **INTACT LAMP RECYCLING**

Fluorescent lamps are great for cutting down on energy costs and for saving your facility money. But because every fluorescent lamp contains mercury, a toxic substance, they must be recycled in order to prevent leakage that occurs through improper disposal. If your facility has a large amount of lamps, utilizing bulk pickups can help keep your workplace safe and the environment clean.

#### **With National Bulb Recycling Lamp Pickups you can:**

- Have either large or small amounts of lamps picked up at your facility at your convenience
- Save money over other recycling solutions designed for hazardous waste.
- Recycle almost any type of lamp
- Certify your progress for regulatory or management review with Recycling Certificates

Interested? Request a Quote or Schedule a Pickup. Contact us with any questions you may have. @ Ph. # 201-661-8301 or E-Mail us at [info@nationalbulbrecycling.com](mailto:info@nationalbulbrecycling.com) web site: [www.nationalbulbrecycling.com](http://www.nationalbulbrecycling.com)

### **FAQ's**

**Why recycle fluorescent lamps?** Replacing normal incandescent lamps with fluorescents can save facilities money by cutting down on energy costs. However, every fluorescent lamp contains the toxin mercury, which can cause major environmental and health problems if it is released from lamps through improper disposal methods, such as throwing bulbs in the trash. Lamp recycling that removes the mercury is essential for any facility that wants to help keep its workplace safe and the environment healthy.

**What types of lamps can be recycled? Types of lamps recycled include but are not limited to:**

- Straight Fluorescent (all lengths and diameters)
- Compacts Fluorescent (both with and without ballast)
- Circular
- U-bend
- UV Lamps (all sizes)
- Flood Lamps
- Incandescent
- Halogen
- HID (High Pressure Sodium, Metal Halide, Bi-Metal, High Intensity, Bi-Metal)
- Shatter shield or Coated Lamps (all sizes)

**How should I package my lamps for pickup?**

When the specially marked National Bulb Recycling Containment Boxes are full – give us a call. A National Bulb Recycling representative will come, take away the full container, sweep clean your designated area and replace an empty specially marked containment box in its place.

**Note: National Bulb Recycling has been sanctioned by the State of New Jersey as “Approved Fluorescent Bulb and Battery Handlers”**
