

GEOLOGICAL SURVEY OF NEW JERSEY

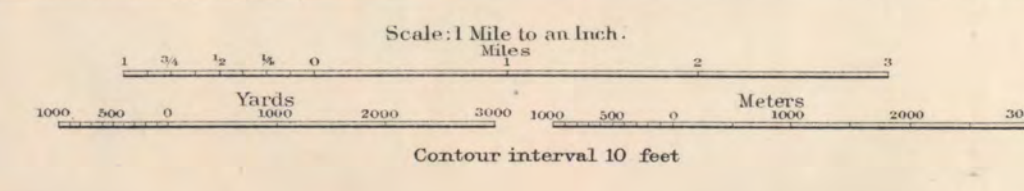

HENRY B. RUMMEL, State Geologist C. C. VERMEULE, Topographer

ORIGINAL SURVEY, 1885
PRINCIPAL FEATURES REVISED, 1904
EDITION OF 1912.

ATLAS SHEET No. 28

NOTE.—The contour lines are level lines drawn on the earth's surface. All points through which they pass are at the same level and their height above mean sea level is shown by the figures on the lines. Figures not on any line show the actual elevation of the surface at a point indicated by a small cross. Figures on blue ground indicate the depth of water at mean low tide.
