

New Jersey Department of Environmental Protection

SCHOOL RADON TESTING PROGRAM

Radon Awareness Program for Schools

Schools may request a grant from the New Jersey Department of Environmental Protection, Radon Section, for up to \$2,000 to be used toward school testing costs. A limited number of grants are available.

A school has two testing options: send a school staff member for training to receive an exemption so they can conduct the radon testing or contract with a certified radon measurement business and they will conduct the testing. Either way the school must contract with a certified radon measurement business to buy the test devices or to have the business conduct the testing.

Grants of up to \$2,000 will be awarded on a first come, first served basis and will be awarded to a school (not a district).

To apply for the grant, a school must do the following:

1. Submit an [application](#) to the Radon Section. The Radon Section will notify the school whether they are awarded a grant within one week of receipt of the application.
2. Obtain radon test devices (for an exempt individual to use when conducting radon testing) from a New Jersey certified radon measurement business OR hire a New Jersey certified radon measurement business to conduct radon testing. The range of reference numbers that correspond to all test devices must be written on the invoice or contract for testing. This information is used by the Radon Section for tracking purposes.
3. Use radon test devices and testing services for school testing only.
4. Submit a [reimbursement form](#) to the Radon Section along with the test device invoice or testing service contract and invoice.

For further information, contact the Radon Section at (609) 984-5425 or within New Jersey at (800) 648-0394.
