

The United States Nuclear Regulatory Commission has released the following Regulatory Issue Summary (RIS):

NRC Regulatory Issue Summary 2013-12-Notice of Issuance of Enforcement Guidance Memo-Interim Guidance for Dispositioning Violations involving 10 CFR 35.60 & 10 CFR 35.63 for the Calibration of instrumentation to measure the activity of Rb-82 and the Determination of Rb-82 Patient Dosages.

This information notice may be accessed at the following link:

<http://pbadupws.nrc.gov/docs/ML1315/ML13157A339.html>

The Enforcement Guidance Memo (EGM) provides the criteria that will permit the New Jersey Department of Environmental Protection's Radioactive Materials Program (RMP) to use Enforcement Discretion and not cite violations for failure to comply with the requirements of Rb-82 generator systems listed in 10CFR 35.60 and 10 CFR 35.63.

The RMP is in agreement with the Regulatory Issue Summary (RIS) and will also exercise the Enforcement Discretion if the criteria in the EGM are met by the licensee.

Please review the RIS carefully and contact the Radioactive Materials Program if you have any questions at (609) 984-5462.
