Marine Fisheries

Modification of Commercial Black Sea Bass and Summer Flounder Trip Limits

N.J.A.C. 7:25-18.12

Take notice that, pursuant to N.J.A.C. 7:25-18.12(r), the Commissioner of the Department of Environmental Protection, with the approval of the New Jersey Marine Fisheries Council (Council) at its November 7, 2019, meeting, has modified the trip limits for the black sea bass and summer flounder commercial fisheries. These actions have been taken to comply with the Atlantic States Marine Fisheries Commission (ASMFC) management plan for Black Sea Bass and Summer Flounder and for the optimal utilization of available quotas and the prevention of excessive harvesting and quota exceedances.

In October 2019, the National Marine Fisheries Service (NMFS) implemented the 2020 and 2021 commercial black sea bass specifications as recommended by the Mid-Atlantic Fishery Management Council (MAFMC) and the ASMFC Summer Flounder, Scup and Black Sea Bass Board (see 84 Fed. Reg. 54041). New Jersey's preliminary quota for the 2020 and 2021 commercial fishing seasons is 704,000 pounds, which is continued from the 2019 commercial fishing year. Pending the results of the final 2019 season for black sea bass, the 2020

commercial quota may be adjusted slightly to account for any over- or under-utilization of the 2019 quota.

At its October 23, 2019, meeting, the Council's Commercial Black Sea Bass Advisory Committee developed its preferred trip limits for the 2020 commercial fishing year based upon the preliminary quota. The trip limits are established at levels intended to result in the harvest of the portion of the quota assigned to that season taking into account factors that include whether the limits utilized in the previous year resulted in the full utilization of the quota assigned to the corresponding season in the prior year. The seasons, percentage of the annual quota apportioned to each season, trip limits, and landing days approved by the Council based upon the Committee's recommendation are as follows: Season 1 (January-February) 21.96 percent: 500 pounds two times per week, or 1,000 pounds one time per week. Season 2 (March-April) 20.9 percent: 1,000 pounds two times per week or 2,000 pounds one time per week. Season 3 (May-June) 16.53 percent: 500 pounds four times per week, or 500 pounds two times per week in addition to 1,000 pounds one time per week, or 1,000 pounds two times per week, or 2,000 pounds one time per week. Season 4 (July-August) 9.1 percent: 500 pounds four times per week, or 500 pounds two times per week in addition to 1,000 pounds one time per week, or 1,000 pounds two times per week, or 2,000 pounds one time per week. Season 5 (September-October) 13.53 percent: 500 pounds four times per week, or 500 pounds two times per week in addition to 1,000 pounds one time per week, or 1,000 pounds two times per week,

THIS IS A COURTESY COPY OF THIS NOTICE. THE OFFICIAL VERSION WILL BE PUBLISHED IN THE JANUARY 21, 2020 NEW JERSEY REGISTER. SHOULD THERE BE ANY DISCREPANCIES BETWEEN THIS TEXT AND THE OFFICIAL VERSION OF THE NOTICE, THE OFFICIAL VERSION WILL GOVERN.

or 2,000 pounds one time per week. Season 6 (November- December) 17.97 percent: 500 pounds four times per week, or 1,000 pounds two times per week, or 2,000 pounds one time per week.

In the same action described above, the NMFS implemented the 2020 and 2021 commercial summer flounder specifications as recommended by the MAFMC and ASMFC Summer Flounder, Scup and Black Sea Bass Board. The preliminary quota for New Jersey is 1,928,391 pounds, which is continued from the 2019 commercial fishing year. Pending the results of the final 2019 season for summer flounder, the 2020 commercial quota may be adjusted slightly to account for any over- or under-utilization of the 2019 quota.

At its October 23, 2019, meeting, the Council's Commercial Summer Flounder Advisory Committee developed its preferred trip limits for the 2020 commercial fishing year based upon the preliminary quota. The trip limits are established at levels intended to result in the harvest of the portion of the quota assigned to that season taking into account factors that include whether the limits utilized in the previous year resulted in the full utilization of the quota assigned to the corresponding season in the prior year. The seasons, percentage of the annual quota apportioned to each season, trip limits, and landing days approved by the Council based upon the Committee's recommendation are as follows: Season 1 (January-February) 28 percent: 750 pounds two times per week, or 1,500 pounds one time per week. Season 2 (March-April) 11.0 percent: 500 pounds two times per week or 1,000 pounds one time per week. Season 3 (May-June) 10.5 percent: 250 pounds seven times per week, or 500 pounds

four times per week. Season 4 (July-August) 10.5 percent: 250 pounds seven times per week, or 500 pounds four times per week. Season 5 (September-October) 29 percent: 250 pounds seven times per week, or 1,000 pounds two times per week, or 2,000 pounds one time per week. Season 6 (November- December) 11 percent: 1,000 pounds two times per week, or 2,000 pounds one time per week.

These changes will be reflected in the Division of Fish and Wildlife rules at N.J.A.C. 7:25-18.12(h) and (i). As required in N.J.A.C. 18.12(r), changes to N.J.A.C. 7:25-18.12(h) and (i) are being published in the New Jersey Register. In accordance with N.J.A.C. 7:25-18.12(h)8i, notice of these changes has additionally been mailed to all New Jersey Black Sea Bass Permit holders.

Full text of the changed rule follows (additions indicated in boldface **thus**, deletions indicated in brackets [thus]):

SUBCHAPTER 18. SIZE, SEASON, AND POSSESSION LIMITS

7:25-18.12 Commercial trip limits and quotas

(a) – (g) (No change.)

(h) The following provisions are applicable to the commercial harvest of black sea bass:

iv. – x. (No change.)

9. – 13. (No change.)

(i). The following provisions are applicable to the commercial harvest of summer flounder:

1. (No change.)

2. The annual summer flounder harvest quota for New Jersey shall be determined by the Mid-Atlantic Fishery Management Council as implemented by the National Marine Fisheries Service.

All landings of summer flounder in New Jersey shall be applied to the New Jersey annual summer flounder quota unless New Jersey enters into an agreement with another state(s) to transfer or combine summer flounder commercial quotas, as provided for pursuant to (i)3 below and such agreement indicated otherwise.

i. (No change.)

ii. The balance of the New Jersey annual quota for the summer flounder fishery remaining after the by-catch allowance specified in (i)2i above shall be divided into seasons, percentage of the annual quota apportioned to each season, daily trip limits, and the number of allowable landing
