### **NOTICE** **WASTE FLOW SUSPENSION IN ESSEX and MONMOUTH** **COUNTIES** **NOVEMBER 5, 2012**

The counties of Essex and Monmouth have solid waste management plans that designate specific disposal facilities for transporters taking solid waste generated within their counties to, which is referred to as "waste flow control." Please be advised that the counties of Essex and Monmouth have suspended their waste flow control for solid waste types designated for their disposal facilities that are inoperable due to Hurricane Sandy. This suspension will continue until such time that each disposal facility is able to resume operations. It is the responsibility of each solid waste hauler to monitor for when such operations resume and waste flow control is re-established.

**Essex County** anticipates that their designated facilities will resume operations on **Thursday November 8, 2012 @ 12:01 a.m.**

**Monmouth County** anticipates that waste flow will be suspended through **Monday, December 3, 2012.**

**Union County has resumed its operations effective immediately.**

For solid waste disposal waste facilities accepting solid waste from counties with suspended waste flow control, this notice is to advise you that your facility can accept this waste in accordance with your facility's permit requirements and the tip rate must be in accordance with your facility's tariff. This notice should not be construed to relieve solid waste disposal facilities from continuously monitoring when waste flow control is re-established in Essex or Union counties.

Questions should be directed to NJDEP's Bureau of Recycling & Planning; tel:  
(609) 984-3438.
