Department of Environmental Protection

# COMMUNITY NOTICE

## For Construction Activity – July 2008

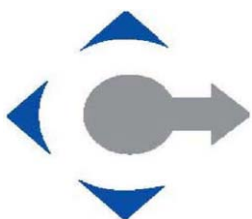

The New Jersey Department of Environmental Protection (NJDEP) will resume on-site remediation activities at the Harrison Avenue Landfill on July 23, 2008. The NJDEP has contracted with E.Q. Northeast from Cambridge, Massachusetts to remove approximately 8,000 tons of the stockpiled hazardous and non-hazardous waste material from the landfill and transport it off site for disposal at a licensed disposal facility. Approximately 20 trucks per day will be entering and leaving the site during August and September. The waste disposal work is expected to last for approximately 45 days. Once the waste material is removed from the site, the NJDEP will place topsoil and revegetate the area.

If you would like additional information regarding the Harrison Avenue Landfill waste removal project, please contact:

Mrs. Gail Lemaldi  
Community Relations Coordinator  
NJDEP, Office of Community Relations
