

**CVP/SRAG - SRP MEETING  
SEPTEMBER 16, 2015  
ACTION ITEM RESPONSES**

1. **Issue:** An attendee requested that the Department send a listserv whenever a technical guidance is updated, regardless of the magnitude of the revision.

**Response:** The Department will send listservs whenever technical guidances are updated.

2. **Issue:** An attendee stated that separate remedial action permits should be issued for vapor intrusion mitigation systems, rather than including such in ground water remedial action permits.

**Response:** The Department does not foresee developing a third type of remedial action permit at this time.

3. **Issue:** An attendee requested that the Classification Exception Area guidance be updated, and that stakeholders be involved in the process.

**Response:** The Department has already initiated revisions to this document. The Department considers this to be an Administrative guidance, not a technical guidance, and therefore stakeholder input is not being solicited.
