Kevin Kratina

Assistant Director of Enforcement & Information Support Element

Kevin.Kratina@dep.nj.gov

CECs and Timeframes

- ▶ Guidance to be issued shortly.
- ▶ Since the phase status and timeframes vary based on site-specific factors, a range of options will be available to either request extensions, merge new incidents into existing case activities, or create new case activities with a separate set of timeframes.
- ▶ If a new case activity is created with a new set of timeframes, it can't be merged back.
- ▶ If an RAO-E is required (i.e., ISRA Case), an RAO-E can't be issued until both/all case activities are ready for RAOs.
- ▶ The Department encourages LSRPs to issue RAO-As for the original case activity in order to meet original timeframes and reduce annual remediation fees (if applicable).
- ▶ Cases with 1,4 Dioxane - see “Site Remediation & Waste Management Program Implementation Of November 25, 2015 Interim Ground Water Quality Standards (ver. March 8, 2016)” (<https://www.nj.gov/dep/srp/guidance/srra/>).
