

**DRINKING WATER QUALITY INSTITUTE
REQUEST FOR PUBLIC INPUT
FOR
1, 2, 3,-Trichloropropane
July 15, 2016**

The Drinking Water Quality Institute (DWQI) was established (Title 58:12A-20) to make recommendations including the development of maximum contaminant levels (MCLs), development of appropriate testing techniques to measure MCLs, and testing frequencies for implementation by the Drinking Water Quality Program of the New Jersey Department of Environmental Protection. The DWQI has conducted a review of their 2009 MCL recommendation for 1,2,3-Trichloropropane (1,2,3-TCP) to evaluate new information. Click here to view the [2009 MCL recommendation](#).

Consistent with the DWQI [public participation process](#), the DWQI is holding a 30-day (July 15 – August 14, 2016) public comment period during which the public may submit comment on the Subcommittee Reports pertaining to the re-evaluation of the 2009 Maximum Contaminant Level Recommendation for 1,2,3-Trichloropropane. Please indicate which Subcommittee report comments pertain to.

- **Health Effects Subcommittee Report:** [Addendum to Health-based MCL Support Document for 1,2,3-Trichloropropane \(DWQI, 2009\)](#)
- **Testing Subcommittee Report:** [Report on the Development of a Practical Quantitation Limit \(PQL\) 1,2,3-Trichloropropane](#)
- **Treatment Subcommittee Report:** [Supplement to the Treatment Subcommittee MCL Support Document for 1,2,3-Trichloropropane: Evaluation and Assessment of Removal Technology for Specific Organic Contaminants in NJ Drinking Water \(2009\)](#)

Comments will be accepted until 5 pm on August 14, 2016.

ALL COMMENTS SHOULD BE SUBMITTED TO watersupply@dep.nj.gov

**Additional information on the DWQI can be found at:
