NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION

DRINKING WATER STATE REVOLVING FUND

Amendments to the Final FFY2009 Priority System, Intended Use Plan and Project Priority List and the Final Intended Use Plan and Response Document for the AMERICAN RECOVERY AND REINVESTMENT ACT of 2009

July 2009

Jon S. Corzine
Governor

Mark N. Mauriello
Acting Commissioner
Although the information in this document will be funded wholly or in part by the United States Environmental Protection Agency under an assistance agreement to NJDEP’s DWSRF program, it may not necessarily reflect the views of the Agency and no official endorsement should be inferred.
I. Introduction

This Intended use Plan (IUP) accompanies New Jersey’s application for the $43,154,000 capitalization grant for it’s Drinking Water State Revolving Fund (DWSRF) under the American Recovery and Reinvestment Act (ARRA) of 2009. It is considered an amendment to the previously approved IUP for 2009 that was finalized and provided to the United States Environmental Protection Agency (USEPA) in July 2008.

II. DWSRF Program Goals

The Safe Drinking Water Act (SDWA) Amendments of 1996 authorized a DWSRF to assist publicly and privately owned community water systems and nonprofit noncommunity water systems to achieve or maintain compliance with SDWA requirements and to further the public health objectives of the SDWA. The DWSRF is administered as a component of the Environmental Infrastructure Financing Program that also administers the State’s Clean Water State Revolving Loan Fund (CWSRF).

New Jersey is committed to using the capitalization grant for which it is applying to provide assistance to water systems for capital improvement projects which will proceed quickly to construction, creating jobs and furthering the public health protection objectives of the SDWA. New Jersey’s goal is to enter into binding commitments for projects which will proceed to construction or award of construction contracts by February 17, 2010. The State intends to award all assistance available under this capitalization grant in full conformance with the deadlines established under the ARRA and the terms and conditions of the capitalization grant award.

New Jersey recognizes that the goal of the ARRA is to expeditiously fund eligible projects that simultaneously will create jobs, promote economic recovery, and generate long-term benefits from infrastructure investment. In this grant, the State is being called upon to accomplish goals that may not previously have been priorities in the traditional DWSRF program. Some priorities and activities in the State’s traditional program may not be practically attainable within the timeframes associated with the ARRA or within the allotment of funds provided to the State under the ARRA and therefore will be pursued using funds made available through the traditional DWSRF program.

III. Sources and Uses of Funds

New Jersey is applying for a capitalization grant in the amount of $43,154,000. This represents the amount that USEPA Region II informed the State that it is eligible to receive under the State’s allocation from the supplemental appropriation enacted under the ARRA. The ARRA has waived the State match requirement that is normally required to receive capitalization grants. New Jersey also has the option to transfer up to $14,240,820 from the CWSRF capitalization grant under the ARRA to DWSRF. If New Jersey decides to transfer CWSRF funds to the DWSRF, all funds will be transferred consistent with the ARRA guidelines.
New Jersey does not intend to utilize any set asides, instead dedicating the maximum funding to support economic recovery through capital improvement projects. New Jersey will bank the authority to reserve the monies for future capitalization grants. In addition to the ARRA funds, the State will continue to administer the traditional DWSRF program in 2009, once the ARRA funds are committed.

**IV. Criteria and Methods for Distribution of Funds**

The ARRA identifies the following requirements relating to the use of funds:

- Priority shall be given to projects on a State priority list that are ready to proceed to construction within 12 months of the date of enactment of the American Recovery and Reinvestment Act,

- Each State shall use at least 50 percent of the funds to provide additional subsidization in the form of forgiveness of principal, negative interest loans, grants, or any combination thereof,

- Not less than 20 percent of the funds should be available for projects to address green infrastructure; water or energy efficiency improvements or other environmentally innovative activities (to the extent that such projects are available for funding),

- No funds may be used to purchase land or easements,

- Funds may be used to buy, refinance or restructure debt obligations of eligible recipients only where such debt was incurred on or after October, 1 2008,

- Each funding recipient (Governor, mayor, or chief executive) must certify that the project has been reviewed and vetted and deemed an appropriate use of taxpayer dollars,

- American iron, steel and manufactured goods are to be used unless any of three exceptions apply: (1) applying the requirement would be inconsistent with the public interest; (2) iron, steel, and the relevant manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or (3) inclusion of iron, steel, and manufactured goods produced in the United States will increase the cost of the overall project by more than 25 percent, and

- Davis Bacon prevailing wage provisions apply to all contracts which are funded with ARRA monies.

Foremost, due to Federal restrictions, projects are eligible for ARRA funding only if they can be under contract or construction by February 17, 2010.

**A. Loan Terms and Fees**

The Bureau of Safe Drinking Water Technical Assistance will jointly manage the DWSRF program with the Municipal Finance and Construction Element of the New Jersey Department of
Environmental Protection (NJDEP) and the New Jersey Environmental Infrastructure Trust (Trust).

Through leveraging by the Trust (that is, the sale of revenue bonds, the proceeds of which are loaned to project sponsors), the State is able to provide low interest loans to more projects than if leveraging was not done. It should be noted that the 1981 Water Supply Bond Act authorized financing only to publicly owned systems, and the 1996 SDWA amendments did not change the 1981 Water Supply Bond Act requirements. The State utilizes the 1981 Water Supply Bond Act to provide the 20 percent match to the SRF federal capitalization grant funds, a condition under both the CWSRF and the DWSRF programs. No state match is required for the ARRA capitalization grant. Federal funds can be used to fund both privately owned and publicly owned water systems.

Legislative appropriation and authorization bills are introduced each spring for each funding cycle. The DWSRF program closed in escrow on 163 loans ($762,360,705) over the past eleven funding cycles in 1998 to 2008 with loans being fully executed in November of each year.

Projects selected for receipt of ARRA funds will be awarded as follows. Fifty percent of the total project costs (up to $5 million) will be awarded as principal forgiveness loans; 25 percent of the total project costs (up to $2.5 million) will be awarded as zero interest loans from NJDEP and 25 percent of the balance of the total project cost (up to $2.5 million) will be awarded as a loan at the market rate from the Trust. If the total project(s) cost (including the leveraged Trust portion) for a water system is more than $10 million, then the remainder of the project will be covered by the traditional DWSRF program. In order to further promote the State’s economic recovery and generate long-term benefits from infrastructure investment, Governor Corzine has determined that the loan terms for the traditional DWSRF program for 2009 will be 75 percent zero interest loan and 25 percent market rate from the Trust. Projects that do not receive ARRA monies will be eligible for the traditional DWSRF 2009 financing program, in ranked order.

For example, if a project selected to receive ARRA funds costs $15 million it would be funded as follows: $5 million loan as principal forgivenes (no repayment required) utilizing ARRA funds; $2.5 million loan at zero interest utilizing ARRA funds and $2.5 million loan at market rate from the Trust for $10 million of project costs. The balance of the project costs ($5 million) would be funded as $3.75 million (75 percent) zero interest loan from NJDEP (DWSRF traditional loan) and $1.25 million from the Trust for a total of: $5 million loan with principal forgiveness, $6.25 million loan at zero interest from NJDEP and $3.75 million loan at market rate from the Trust. In these situations, ARRA requirements (e.g. materials, reporting) would be applied to the total project.

Please note that loan terms for supplemental loans will be the same terms as were made for the original executed DWSRF loan.

The Planning and Design Financing Program is a new program providing low interest loans to finance the cost of environmental planning documents and engineering design services for environmental infrastructure projects utilizing loan monies provided by the Trust from Trust
accounts, such as interest earnings. The loans are structured as temporary financing for preliminary project activities with the expectation that the environmental infrastructure projects will secure long-term financing through the Trust.

Upon receipt of an application, the NJDEP provides a determination as to project eligibility. Project loans are made upon a project sponsor's compliance with program loan requirements. Planning and Design loans are for a period not to exceed two years and at interest rates established by the Trust's Board of Directors. The Planning and Design Loan Program provides Trust loans up to $500,000 per project loan. Additional information can be obtained at http://www.njeit.org.

The NJDEP has created a list of drinking water projects that have been placed on the Traditional/ARRA Project List according to criteria described below and are subject to review, approval (including pre-award approval, where appropriate), and certification by the NJDEP. The project sponsor proceeds with advertising and awarding contracts with an option to receive a Trust Interim Loan and with no guarantee of receiving ARRA monies until such time that the Borrower provides a certification that the construction contract has been awarded and they are proceeding with project implementation, subject to the availability of ARRA funds.

In the past, adequate resources were available to cover the NJDEP's costs for administration of the loan project without levying a fee. Given tight fiscal constraints since the SFY2003 Appropriations Act, the NJDEP has been required to collect fees from all borrowers. Since SFY2005, the NJDEP fee has been standardized at two percent and collected from all borrowers. A description of the NJDEP fee and a chronological summary of the fees were included in the Final FFY2009 IUP. There is no DWSRF funding involved in the NJDEP loan origination fee.

**B. Additional Subsidization**

The ARRA requires that 50 percent of assistance provided be in the form of additional subsidies. New Jersey has the authority to offer principal forgiveness in an amount up to 50 percent of the value of a loan made by the State’s DWSRF Program.

**Distribution of ARRA Funds**

The attached Comprehensive 2009 DWSRF Traditional/ARRA Priority List (Project Priority List or PPL) demonstrates that at least 50 percent of the available funding for projects will be provided via principal forgiveness. New Jersey may fund the remainder of the cost of the project up to $10 million through a combination of 25 percent of the project cost as a zero interest loan, and 25 percent as a market rate loan through the Trust. Costs that exceed $10 million will be funded as indicated above (i.e., 75 percent of the balance of costs will be funded at zero percent interest using traditional DWSRF funds, 25 percent of the balance of costs beyond $10 million will be funded at market rate utilizing additional Trust loans). Projects will be funded until all the ARRA funds are disbursed Principal forgiveness or other loan subsidizations are limited to the ARRA funds.
C. Green Infrastructure

The ARRA requires that, to the extent there are sufficient eligible project applications, not less than 20 percent of the funds ($8,630,800) provided for projects be used for water efficiency, energy efficiency, green infrastructure or other environmentally innovative activities. The projects listed in the attached Comprehensive 2009 DWSRF Traditional/ARRA Priority List include 7 possible projects with a total ARRA assistance amount of $22.5 million (out of $43,154,000 requested in this IUP). Once the NJDEP has awarded a total of $8,630,800 for projects that meet the “green infrastructure criteria”, we may proceed with the review and award of projects included on the total Traditional/ARRA project list based on priority rank, then readiness to proceed.

The 7 projects meet one or more of the specific objectives required by this provision which was clarified through Attachment 8 of the USEPA Guidance issued on March 3, 2009. Projects on the PPL meeting one or more objectives are designated as follows: Green Infrastructure = G; Energy Efficiency = E; Water Efficiency = W; Other Environmentally Innovative Activity = O. Note that the projects that meet the USEPA definition of green reserve without a business case study are listed first on the PPL, then the green reserve projects are listed (even though these projects have a higher rank).

As the 20 percent requirement for New Jersey amounts to a required total of $8,630,800, the State has identified sufficient applicants with green infrastructure projects for DWSRF funds to meet this requirement of the ARRA. However, if some of the above projects withdraw from the DWSRF Program this year or are bypassed for ARRA monies, then New Jersey reserves the right to consider additional projects and/or portions of existing projects from the Comprehensive 2009 Traditional/ARRA Project Priority List for consideration as green infrastructure in order to satisfy USEPA’s requirements.

D. Priority for Projects Ready to Proceed to Construction in 12 Months/Preference for Expeditious Activities

New Jersey has an approved priority system for its DWSRF program that ranks projects in accordance with criteria associated with public health, compliance, affordability, approved drinking water plans and state designations. However, the ARRA requires that priority be given to projects that will be ready to proceed to actual construction within 12 months of enactment.

To implement this new priority and solicit information regarding additional projects that may be in a position to utilize additional funds, the NJDEP and the Trust issued a “Call for Projects” on December 18, 2008. The “Call for Projects” encouraged project sponsors to contact the NJDEP before January 30, 2009 so that initial discussions would occur regarding project eligibility, project design, permitting status, and project schedule for project sponsors that may be in a position to enter into loan agreements and begin construction. The response to the “Call for Projects” has been substantial; the NJDEP received over 100 additional applications for State funding for drinking water related projects as a result of this request. The deadline for project
sponsors to submit the following items to the NJDEP in order to be eligible to participate in and utilize funds through the ARRA program was March 16, 2009:

1. A request to be placed and ranked on the DWSRF Project Priority List;
2. Project ranking forms
3. A commitment letter to participate in the FFY 2009 / SFY 2010 Funding Cycle;
4. Complete planning documents, complete design documents, and evidence that all permits and approvals to proceed to construction have been received; and
5. A complete loan application for financial assistance.

New Jersey is reviewing the submitted information, in ranked order, to identify those projects able to proceed to actual construction as soon as possible. Criteria used to evaluate the project readiness include those projects that have submitted the appropriate administrative and engineering reports described above and those that are deemed eligible under the DWSRF program. New Jersey also considered factors such as permit status, construction schedule and potential environmental impact. Projects on the Traditional/ARRA List will be given an opportunity to compete for the ARRA monies in ranked order (see the attached Comprehensive 2009 Traditional/ARRA Priority List in Appendix C).

The NJDEP currently has 430 projects for a total cost of $1.377 billion on the Master List of drinking water projects that were submitted to the NJDEP. Within that list, the NJDEP currently has 155 projects at a total cost of $383 million (including supplemental loans) on the Comprehensive 2009 Traditional/ARRA Priority List. We anticipate that there will be more projects “ready to proceed” than ARRA funds available. Therefore, projects that are ready to proceed in ranked order will be awarded ARRA monies until the funds are exhausted. Projects that are not awarded ARRA funds will be eligible to receive loans under the traditional DWSRF program.

Historically, any eligible project under the DWSRF program that met the program requirements and was ready to proceed was able to receive a DWSRF loan. As the dollar amount of eligible projects is in excess of the limited funds available, it is possible that some projects that are eligible and ready to proceed will not be within the NJDEP fundable range under either the ARRA or traditional DWSRF programs.

Potential 2009 applicants reaffirmed their commitment for possible ARRA or Traditional financing by mid-June 2009. Those projects listed above a “fundable” line were determined to be more likely to be eligible for ARRA or Traditional funds. Please refer to the Drinking Water “Living List” of projects that is updated weekly at http://www.nj.gov/dep/arra/docs/arra_dw_2009.pdf. It is possible that this line will fluctuate as project sponsors elect to bypass themselves or project sponsors are notified that their projects will, for various reasons, be bypassed. These project sponsors may continue to pursue funding through the traditional DWSRF program, as the fluctuation of the fundable line may increase or decrease the number of projects that are reachable. However, there is no guarantee of funds. The NJDEP will continue to pursue additional sources of monies as a source of funding for DWSRF construction projects.
E. Avoidance of Reallotment/Relationship to Traditional Program

New Jersey, recipients, sub-recipients, and subcontractors may be required to collect and report information on projects funded (partially or in total) by ARRA monies in the DWSRF Benefits Reporting System or other reporting systems, as required under the ARRA guidelines.

New Jersey understands that the USEPA may deobligate grant funds from States that fail to meet requirements on use of funds. New Jersey intends to avoid deobligation by regularly reviewing data reported by the applicant to ensure project progress in accordance with USEPA’s strict requirements. If issues are identified, New Jersey will work with the USEPA to resolve any issues, ensure timely project progress and avoid loss of federal funds. New Jersey will also include conditions in its binding commitments to ensure that assistance recipients make timely progress with respect to entering into contracts and/or construction. If a recipient fails to maintain progress with these conditions, the NJDEP will make every effort to provide funding from other DWSRF sources, but will not risk loss of ARRA funds to the State. ARRA funds will be redistributed to projects that can meet the necessary commitments.

If New Jersey is eligible for additional funds made available from other States that fail to meet deadlines, New Jersey will provide USEPA with a list of projects from its priority list that are ready to proceed to construction, and will also provide a certification through an amendment to this IUP that all funds received for these projects will be under contract for construction within 120 days of reallocation.

F. Environmental Outputs and Outcomes

In accordance with the requirements of EPA Order 5700.7, the following are the output/outcome measures for ARRA funds:

1. Output: There will be 3 projects financed to meet the green/energy infrastructure requirement.

   Outcome: The funding of these projects will not only stimulate the economy and promote jobs growth for new and sustainable jobs, it will also promote the environmental and green goals of New Jersey.

2. Output: There will be five projects financed to upgrade water treatment plants, replace and/or rehabilitate water mains and appurtenances in the State.

   Outcome: The funding of these projects will stimulate the economy, promote jobs growth for new and sustainable jobs, and result in higher quality drinking water in New Jersey.

G. Public Review and Comment

Federal DWSRF rules require that States’ DWSRF programs include public participation activities. The NJDEP distributes this proposed IUP to all community and nonprofit
noncommunity water systems, county and local health authorities, selected environmental

groups, selected engineering consultants, water associations, and assorted State agencies.

Information about this program and essential contact information is available on the NJDEP
Division of Water Supply webpage, http://www.nj.gov/dep/watersupply, which can be accessed
from the State of New Jersey home page, http://www.nj.gov. This IUP is also available by
accessing ENDEX, the New Jersey Digital Environmental Library maintained by Rutgers, the
State University of New Jersey. Public Access to ENDEX is available directly via
http://njedl.rutgers.edu/NJdlib. The catalogue of loans and grants is available on the State of

A public hearing was held on Monday, May 18, 2009 at 10:00 AM in the Public Hearing Room
at the New Jersey Department of Environmental Protection, 401 East State Street, 1st Floor,
Trenton, New Jersey. Several oral comments were presented at the hearing and several written
comments were submitted by June 1, 2009, the end of the comment period. Please see the
attached Public Hearing Summary and Response to Comments in Appendix B.
### APPENDIX A
#### FFY2009/SFY 2010 Drinking Water Financing Program Schedule
(Using FFY 2009 and Other Available Federal Monies)

<table>

APPENDIX B

1) Call for Projects dated December 18, 2008

2) Public Hearing Summary and Response Document

3) Cover Letter dated May 5, 2009 for the Notice of Public Hearing

4) Notice of Public Hearing/Comment Period dated May 5, 2009
In anticipation of the approval of the federal economic recovery package that has been introduced by Congress, the Department of Environmental Protection (Department) and the New Jersey Environmental Infrastructure Trust are seeking projects that will be in a position to take advantage of these funds.

The economic recovery package (introduced as H.R. 7110) is intended to accelerate the construction of environmental infrastructure projects, create jobs and stimulate economic activity. Under the current bill, New Jersey could receive an additional $262 million to finance clean water projects and an additional $22 million for water supply projects. The economic recovery package is not expected to be enacted before the new administration takes office in January 2009. In anticipation of its enactment and given the proposed provisions that projects must be in a position to proceed within 120 days of the award of the funds to the State, USEPA has encouraged states to reach out to and communicate with potential fund recipients as soon as possible. At this point, the federal legislation would channel the economic recovery funds through the existing Clean Water or Drinking Water State Revolving Fund (SRF) Programs. However, until the legislation is approved, details regarding the mechanisms to award the funds and the timeframes that must be adhered to in order to qualify for the monies has yet to be determined. While details may change, it is important to identify projects that will be ready to commence within the short time frames that will be established.

A wide variety of wastewater treatment, stormwater management, water supply and nonpoint source pollution projects will be eligible. At this point in time we do not know if the recovery package will allow for grants or will be limited to loans. Traditionally loans have been made at half-market rate (except for smart growth projects which have been financed at one quarter-market rate). The Department and the Trust are considering various financing options including blending the two loans so projects able to begin construction sooner can get a lower interest rate. The following blending of the Department and Trust loans is being considered:
For projects that are certified on or before:

<table>
<thead>
<tr>
<th>Department Share</th>
<th>Trust Share</th>
<th>Approximate Interest Rate</th>

<td>90%</td>
<td>10%</td>
</tr>
<tr>
<td>September 1, 2009</td>
<td>80%</td>
<td>20%</td>
</tr>
</tbody>
</table>

Projects would be required to advertise and award a construction contract representing at least 30 percent of the project scope within 90 days of project certification and issue a notice to proceed within 120 days of project certification to qualify for the enhanced incentive financing rates identified above. Open space land acquisition and conservation projects are not eligible to participate in the Economic Recovery Program for 2009, but continue to be eligible under the traditional funding policies of the New Jersey Environmental Infrastructure Financing Program. Projects that have already committed to the 2009 traditional program to the Department in October 2008 will automatically be considered for inclusion in the 2009 Economic Recovery Program.

As an added incentive to encourage project sponsors to seek financing through the Economic Recovery Program in 2009, the Program is also considering a proposal to provide planning and/or design loans. These loans would be offered by the Trust to help defray the cost of engineering services that are needed to get an infrastructure project designed and permitted so that it is in a position to meet the 2009 deadlines.

The first step for any project to qualify for funding is to have the project placed and ranked on the appropriate clean water or drinking water priority lists. Sponsors can either do this electronically at [http://www.njeit.org](http://www.njeit.org) or by contacting the appropriate clean water or drinking water contact below. To receive funds projects must have planning and design complete and must obtain the needed approvals and permits. In addition information regarding economic benefits, including job creation, will be needed.

Project sponsors are encouraged to contact Stanley V. Cach, Jr., Assistant Director, at 609-292-8961 as soon as possible, but no later than January 30, 2009, so that a pre-application meeting can be arranged to discuss program requirements, project scope and the project schedule’s compatibility with the aggressive timeframes of the economic recovery plan.

**For Clean Water, Drinking Water and Financing**

Dennis Hart, Executive Director, NJ Environmental Infrastructure Trust 609-219-8600
Gautam Patel, Chief, Bureau of Financing and Construction Permits 609-984-6840
Eugene Chebra, Chief, Bureau of Administration and Management 609-633-1208

**For Drinking Water and DW Priority List**
Phil Royer, Section Chief 609-292-5550
Josephine Craver, Supervisor 609-292-5550

**For Clean Water/Priority List**
Scott Shymon, Supervisor 609-292-3859
The Safe Drinking Water Act and its amendments require the United States Environmental Protection Agency (USEPA) and the states to provide for and encourage public participation in the development and implementation of the federally supported Drinking Water State Revolving Fund (DWSRF) Program.

This response document addresses the comments received during the public participation process for the FFY2010 Proposed Priority System, Intended Use Plan and Project Priority List issued in May 2009 and the Proposed Amendments to the FFY2009 IUP issued in May 2009.

On May 5, 2009, the NJDEP issued a notice regarding the public hearing on the IUPs. The notice and proposal documents were posted prominently on the NJDEP’s website and the notice was sent to the standard mailing list. The notice stated that a hearing to receive public input on the proposal would be held on May 18, 2009 and that the public comment period would close on June 1, 2009 (see attached).

On May 18, 2009 at 10:00 a.m., the NJDEP held a public hearing at the NJDEP’s Public Hearing Room located at 401 East State Street in Trenton, New Jersey. The public hearing was co-chaired by Stanley V. Cach, Jr. and Joseph Miri, who presented information relevant to the Clean Water and Drinking Water Priority System, Intended Use Plan and Project Priority List proposals. Several individuals attended the hearing and provided testimony and several individuals submitted written comments before the close of the comment period on the Proposed Amendments to the FFY2009 IUP. No oral comments were presented nor written comments received on the Proposed FFY2010 IUP.

Transcripts of the hearings are available from the transcription services (Guy J. Renzi & Associates of Trenton, NJ) to any interested person or organization upon request. In addition, copies of the transcripts may be reviewed at the NJDEP's offices in Trenton.

All testimony presented at the public hearing and all written comments submitted in accordance with the deadlines have been considered in the preparation of the Final Amendments to the FFY2009 IUP only, since no comments pertained to the FFY2010 IUP. A summary of the comments and responses to the Proposed Amendments to the FFY2009 DWSRF IUP follows.
SUMMARY OF PUBLIC ISSUES AND RESPONSES

COMMENT
The Borough of Sea Girt requested a supplemental loan (Project No. 1344001/002/003-1) in the amount of $7,300,400. The commenter questioned why the supplemental loan can not receive the Traditional 75% zero percent and 25% market rate in lieu of the original 50/50 breakdown as the lower rate will save tax payers interest expenses. Also the Borough requested to terminate the original loan to qualify the entire supplemental loan for the ARRA funding and/or the enhanced 75/25 Traditional program.

RESPONSE
The FYY2009/ARRA Priority System documents proposed in May 2009 indicated that only those new projects that submitted a complete loan application on or before March 16, 2009 would be added to the Drinking Water Project Priority List and would be eligible for financing in the FFY2009/ARRA Financing Program. The supplemental loan is not a new loan and therefore only qualifies for the original funding distribution. Since the supplemental loan is not considered a new loan, it will not be part of the ARRA or the Traditional program.

COMMENT
T&M Associates noted the Borough of Matawan (Project No. 1329001-001/002/003/004) qualifies to receive additional priority points for being a Transit Village. The commenter questioned why their projects are listed separately in the IUP, although all work will be done under one contract, while other applicants had multiple projects lumped together. The commenter and the Borough of Matawan expressed concern that the water treatment plant project (Project No. 1329001-001) ranked 179 out of 428 applicants is not being considered for the ARRA funding and expressed that their project should be ranked higher. A number of projects lower-ranked projects that did not require permits and are not labor intensive (to stimulate the economy) are currently on the ARRA list. NJDEP agrees with the commenter on the additional priority points, and they were assigned these points according to the Priority System. According to the IUP, projects are ranked separately in accordance with each element in the IUP's Table 1 - Compliance and Public Health Criteria. While projects are separately listed, they can be awarded under a single loan. In the Final SFY09 IUP, NJDEP has eliminated the ARRA list and all projects are competing for the ARRA funding based on ranked order and readiness to proceed (commencement of construction or award of contracts by February 17, 2010) except for the seven proposed projects listed under the 20% green reserve in Appendix C. All projects on the priority list are considered to be eligible for ARRA funding. Projects ranked higher may be bypassed for ARRA funding if not ready to proceed and the ARRA funding will be re-allocated to other projects in priority order. Projects that are not awarded ARRA funds will be eligible to receive the Traditional DWSRF program. The Department has determined that the assignment of the water treatment plant project rank is appropriate and that no additional points be awarded to the project.

COMMENT
Remington & Vernick Engineers requested that two projects of Egg Harbor City (Project No. 0107001-001/002), ranked 39 and 70, respectively, be ranked higher. The commenter requested
these projects be funded through the ARRA program instead of the Traditional program. The City is ranked 74th as the most distressed city in New Jersey and 38th by the Pineland Commission. The commenter submitted a letter to the NJDEP which outlined the timelines for each proposed project and further stated in the public hearing that projects will be ready to bid in November, 2009. Therefore, the proposed projects would deserve to be included in the ARRA program.

RESPONSE
The NJDEP eliminated the ARRA-only list and all projects are competing for the ARRA funding based on priority ranked order and readiness to proceed (commencement of construction or award of contracts by February 17, 2010). Projects ranked higher may be bypassed for ARRA funding if the project is not ready to proceed and the ARRA funding will be re-allocated to other projects in priority order. Projects that are not awarded ARRA funds will be eligible to receive the Traditional DWSRF program. The NJDEP determined that the assignment of the project rank is appropriate and that no additional points be awarded to the project. Please note that 80 points have been credited to Egg Harbor in the category of Affordability under the Priority System.

COMMENT
Clinton Town sent the rate study report to the NJDEP for the water storage project (Project No. 1005001-002) and requested that 25 priority points be assigned.

RESPONSE
The rate study report is approved by the NJDEP and the additional 25 points were assigned.

COMMENT
The Borough of National Park expressed concern that their water treatment project (Project No. 0812001-001), ranked 131 out of 430 applicants, is not being considered for the ARRA funding. A number of projects that have a lower ranking but do not require permits are on the ARRA list. The commenter requested the NJDEP review the ranking of the project.

RESPONSE
The NJDEP has eliminated the ARRA list and all projects are competing for the ARRA funding based on ranked order and readiness to proceed (commencement of construction or award of contracts by February 17, 2010). Projects ranked higher may be bypassed for ARRA funding if the project is not ready to proceed and the ARRA funding will be re-allocated to other projects in priority order. Projects that are not awarded ARRA funds will be eligible to receive the Traditional DWSRF program. The NJDEP has determined that the assignment of the project rank is appropriate and that no additional points be awarded to the project.

COMMENT
The Borough of Red Bank expressed concern that the water treatment project (Project No. 1340001-001), ranked 40 out of 430 applicants, is not being considered for the ARRA funding. As a result of recent Department of Labor Legislation, seven (7) pressure vessels at two water treatment plants need to be replaced in order for the Borough to operate the water system. Thirty (30) lower-ranking projects that did not require permits and are not as labor intensive (to stimulate the economy) are on the ARRA list. Also the ranking method is inconsistent with the
ARRA prioritization for CWSRF projects which is based on the project priority, regardless of permit requirements. The commenter stated that ARRA projects are to be certified several months earlier than the Traditional projects. The delay of certification will severely impact the proposed construction required to maintain system operation during summer months. The commenter claimed it is in financial distress due to inordinately large number of tax-free institutions compared with neighboring communities. If this project does not receive a principal forgiveness loan, residents will be further burdened by rate increases.

RESPONSE
The NJDEP has eliminated the ARRA-only list and all projects are competing for the ARRA funding based on ranked order and readiness to proceed (commencement of construction or award of contracts by February 17, 2010). Projects ranked higher may be bypassed for ARRA funding if not ready to proceed and the ARRA funding will be re-allocated to other projects in priority order. Projects that are not awarded ARRA funds will be eligible to receive the Traditional DWSRF program. As long as the project falls above the fundable line and the project is ready to proceed, the construction will not be delayed since NJEIT offers zero percent interim financing program. While the NJDEP would ideally like to provide the best available financing package to all project sponsors, there simply is not enough money allocated to New Jersey to fund all proposed projects in New Jersey under the ARRA. The NJDEP has set up a process to best ensure that all funds available are utilized in compliance with the ARRA requirements, however; all projects cannot get the ARRA financing package. To encourage lower-ranked projects to continue to pursue their projects in FFY2009, Governor Corzine directed the NJDEP to modify the traditional financing structure for the 2009 Program to provide additional incentives for project sponsors to pursue investments in those environmental infrastructure projects that can be implemented and are ready to begin construction. As a result of this directive, the traditional financing structure allows all projects (except supplemental projects) that are certified in SFY2010 to qualify for an interest-free loan from the NJDEP for up to 75% of the allowable project costs and a market rate loan from the New Jersey Environmental Infrastructure Trust (Trust) for the remaining allowable costs. This incentive will certainly help alleviate taxpayers’ burdens.

COMMENT
The Willingboro Municipal Utilities Authority requested additional ranking points be assigned for the two projects (Project No. 0338001-001/002) based on the list of the New Jersey Office of Smart Growth "Designated Centers and Endorsed Plans."

RESPONSE
Twenty (20) points were previously assigned to each project as part of an Endorsed Plan, in accordance with the Priority System; therefore no additional points can be awarded.

COMMENT
The Willingboro Municipal Utilities Authority requested the solar electric generating system project (Project No. 0338001-001) be considered for higher ranking due to following reasons:
- Generate approximately 250-kilowatts of electricity per year,
- No negative environmental impact,
- No public hearing required,
d. Project was approved by its Board of Commissioners,
e. Design is complete, received all permits and ready to bid, and

RESPONSE
The NJDEP has determined that the assignment of the project rank is appropriate and that no additional points will be awarded to the project.

COMMENT
The Willingboro Municipal Utilities Authority requested that the Twin Hills water main replacement project (Project No. 0338001-002) be considered for higher ranking due to following reasons:

a. No negative environmental impact,
b. No public hearing required and can proceed to bid more quickly, and
c. Design is complete, received all permits and ready to bid.

RESPONSE
The NJDEP has determined that the assignment of the project rank is appropriate and that no additional points will be awarded to the project.
May 5, 2009

SUBJECT: Drinking Water State Revolving Fund Program

“Proposed FFY2010 Priority System, Intended Use Plan, Project Priority List”

Dear Interested Parties,

Please see the attached Notice of a Public Hearing regarding the Drinking Water State Revolving Fund Program, scheduled for May 18, 2009 at 10:00 AM at the New Jersey Department of Environmental Protection, Trenton, NJ.

The Priority System, Intended Use Plan, Project Priority List (IUP) addresses the federal stimulus program under the American Recovery and Reinvestment Act of 2009 and the traditional program under the Drinking Water State Revolving Fund.

The Safe Drinking Water Act (SDWA) Amendments of 1996 authorized a Drinking Water State Revolving Fund (DWSRF) to assist publicly and privately owned community water systems and nonprofit noncommunity water systems to achieve or maintain compliance with SDWA requirements and to further the public health objectives of the SDWA. The DWSRF is administered as a component of the Environmental Infrastructure Financing Program that also administers the State’s Clean Water State Revolving Loan Fund (CWSRF).

The IUP also contains the FFY2009 and the FFY2010 schedules. Project sponsors must meet these schedules with all applicable deadlines in order to be considered for financing in November 2009 or 2010.
Should you have any questions regarding the IUP or the DWSRF program, please contact Philip Royer or Josephine Craver at the Bureau of Safe Drinking Water Technical Assistance at (609) 292-5550 or fax (609) 292-1654.

If you would like a copy of the IUP, you may contact the DWSRF program or obtain a copy from our website, http://www.state.nj.us/dep/watersupply/loanprog.htm.

Very truly yours,

Sandra Krietzman, Chief
Bureau of Safe Drinking Water
Technical Assistance

NOTICE OF PUBLIC HEARING/COMMENT PERIOD

REGARDING
PROPOSED AMENDMENTS TO THE FFY2009 FINAL DRINKING WATER PRIORITY SYSTEM, INTENDED USE PLAN AND PROJECT PRIORITY LIST AND THE
PROPOSED INTENDED USE PLAN FOR THE AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009 AND THE
PROPOSED FFY2010 DRINKING WATER PRIORITY SYSTEM, INTENDED USE PLAN AND PROJECT PRIORITY LIST

DRINKING WATER FINANCING PROGRAM STATE REVOLVING FUND (DWSRF)

The Department of Environmental Protection (Department) has completed the development of 1) Proposed Amendments to the FFY2009 Final Drinking Water Priority System, Intended Use Plan and Project Priority List (IUP) documents to establish funding policies and the program schedule to administer the Environmental Infrastructure Financing Program in conjunction with the new requirements and additional monies made available to the State’s Drinking Water SRF Program through the American Recovery and Reinvestment Act of 2009 (ARRA) and 2) Proposed FFY2010 DWSRF IUP.

On December 18, 2008, the Department and the New Jersey Environmental Infrastructure Trust (Trust) issued a “Call for Projects” to begin to solicit interest from project sponsors that would be in a position to enter into loan agreements and begin construction in a timely manner. As a result, the DWSRF program has identified over $300 million in eligible projects that could be ready to proceed to construction within the timeframes established by the ARRA. While the number of requests for funding was overwhelming, the amount of federal monies allocated to the State’s DWSRF ($43,154,000) are simply insufficient to provide financing to all projects.

Projects that qualify for ARRA funding are eligible to receive a principal forgiveness loan for 50% of the allowable project costs, an interest-free loan for 25% of the allowable project costs and a market-rate loan from the Trust, subject to certain limits as further defined in the proposal.

The federal ARRA funding is intended to accelerate the construction of environmental infrastructure projects, create jobs and stimulate economic activity. In order to supplement the goals of the ARRA at the State level, Governor Corzine directed the Department to modify the traditional financing structure for the 2009 Program to provide additional incentives for project sponsors to pursue investments in environmental infrastructure projects that can be implemented and are ready to begin construction. As a
result of this directive, the traditional financing structure has been modified to allow all projects (except supplemental loans) that are certified in SFY2010 to qualify for an interest-free loan from the Department for up to 75% of the allowable project costs and a market rate loan from the New Jersey Environmental Infrastructure Trust (Trust) for the remaining allowable costs. Under this modified structure, the Program will be providing loans to project sponsors at the lowest interest rate in its 11 year history.

Projects participating in the FFY2009/SFY2010 Financing Program qualify for funding from the ARRA Program or the traditional Financing Program based upon project complexity, readiness-to-proceed to construction, and project rank. Additional details regarding the changes to the FFY2009 Priority System/Intended Use Plan and the method that will be used to prioritize projects for ARRA funding is included in the proposal document.

In addition, the proposal includes information on a new Planning and Design Financing Program to help project sponsors pay for the planning and design activities to qualify for the 2009 Financing Program. Additional details regarding the Planning and Design Financing Program are identified in the proposal and on the Trust website at [http://www.njeit.org/forms.htm](http://www.njeit.org/forms.htm).

A complete copy of the proposal document and project list are available on the Department’s website at [http://www.nj.gov/dep/watersupply](http://www.nj.gov/dep/watersupply). Copies can also be mailed to those individuals that prefer to receive a hard copy by contacting Josephine Craver, Supervisor, Bureau of Safe Drinking Water Technical Assistance at (609) 292-5550.

A public hearing regarding the Clean Water and DWSRF IUPs will be held in the Public Hearing Room on the First Floor of the DEP Building located at 401 East State Street, Trenton, New Jersey, on May 18, 2009. The hearing will commence at 10:00 a.m., and conclude at 1:00 p.m., or the end of testimony, whichever is earlier.

Presentations may be made orally or in writing; if written testimony is prepared, the oral presentation should be limited to a summary of the text. The period for submitting written comments on this proposal will close on June 1, 2009 (all comments must be postmarked by that date). All comments submitted in accordance with the deadline will be considered in the preparation of the Amendments to the Final FFY2009 IUP documents including the 2009 ARRA Program and in preparation of the Final FFY2010 IUP documents.

Written comments on the Drinking Water proposal should be submitted by June 1, 2009 to:

NJ Department of Environmental Protection
Sandra Krietzman, Bureau Chief
Bureau of Safe Drinking Water Technical Assistance
P.O. Box 426
Trenton, NJ, 08625-0426

If you have any questions regarding the Drinking Water proposals, please contact one of the following:

Philip Royer, Section Chief 609-292-5550
Josephine Craver, Supervising Environmental Engineer 609-292-5550

Thank you for your anticipated input on this proposal document.
APPENDIX C

1) Project Priority Master List

2) Comprehensive 2009 Traditional/ARRA Priority List
