

* This is a copy of a follow-up email sent to the original Stakeholder list for the Flood Hazard Area Control Act Rules following the March 11, 2011 Stakeholder Meeting. The email is seeking volunteers to participate in the subcommittees identified below. The request for volunteers is by invitation only.

During the Friday March 11, 2011 Stakeholder meeting it was apparent that several topics require additional discussion. These topics include:

- * Riparian Zones Standards
- * Bridges and Culverts/Transportation Projects
- * Acid Producing Soils
- * Building Standards/Higher Standards/tidal vrs. fluvial
- * Stormwater Management
- * Electronic Submission

For each of the topics referenced above, the Office of Land Use Management is seeking volunteers to participate in at least one, maybe more subcommittee meetings on each topic. The number of meetings will be determined based on the complexity of the topic. In addition to the meetings it is anticipated that information will be exchanged within the subcommittee by email.

Please e-mail Jill Aspinwall (jill.aspinwall@dep.state.nj.us) your interest in participating on a subcommittee as well as the topic you would like to be assigned by Friday March 25, 2011.

Sincerely,

Robert B. Piel, Jr.
Office of Land Use Management
