

Climate Change: Municipal Stormwater Management

- Proposed addition to 7:8-4.2(c)
A municipal stormwater management plan shall, at a minimum:

Describe how the municipal stormwater management plan addresses impacts of climate change and ensure that selected stormwater management measures address rainfall frequencies, rainfall intensities, and capacity limitations of stormwater systems.

Climate Change: Municipal Stormwater Management

- Proposed addition to 7:8-2.2(a)
All municipal stormwater management plans and stormwater control ordinances shall be designed to:

Anticipate and prevent, to the greatest extent practicable, impacts associated with climate change, including more storm events, higher intensity rainfall events, more frequent rainfall and higher annual precipitation.
