27	NJ0004308	Waddington-Richman Inc	SW
28	NJ0100218	Waddington-Richman Inc	GWIND
29	NJG0136221	Four Seasons Campground	T1
Pittsgrove Township			
30	NJ0099678	Harding Woods Inc	GWIND
31	NJ0090221	Arthur Shalick High School	GWIND
32	NJ0157716	Daytop of NJ	GWIND
33	NJG0066214	Picnic Grove Mobile Homes	T1
34	NJG0084883	The Villages I	T1
35	NJG0108405	Holly Tree Acres Trailer Home	T1
36	NJG0129577	Centeron Country Club	T1
37	NJG0133167	Parvin State Park	T1
38	NJG0158496	Rainbow Center	T1
39 (*)	NJ0061841	B&B Poultry Co., Inc.	D-STP
Quinton Township			
40	NJ0054909	Quinton Township Landfill (Closed)	GWIND
Salem City			
41	NJ0024856	Salem City WWTTP	SW
42	NJG0035742	Salem City WTP	SW
Upper Pittsgrove Township			
43	NJ0099198	Burlington Beef	GWIND
44	NJ0169889	WaWa	T1
45	NJ0100625	Upper Pittsgrove TWP Elementary School	GWIND
46	NJG0084603	Country Club Estates	T1
47	NJG0133493	Appel Farm Arts & Music Ctr	T1
48	NJG0132624	Point 40 Diner	T1
49	NJG0170208	Mater Dei Nursing Home	T1
50	NJG0170992	Bancroft Neurohealth - Mullica Hill Campus	T1
Woodstown Borough			
51	NJ0022250	Woodstown Wastewater Treatment Plant	SW

(* Note: This is an SHU Permit that conveys industrial wastewater to the LSA (NJ025364)

OVERVIEW

NOTES:

Locations of future pump stations, major interceptors, and trunk sewers are being provided for general information only and will not serve as the basis for any future consistency determinations or permit reviews unless the pump station, major interceptor or trunk sewer is part of a State or federally funded project.

Pursuant to N.J.A.C. 7:15, Riparian zones are: 300 feet from top of bank (or centerline of a first order stream where no bank is apparent) for waters designated as Category One and all upstream tributaries within the same HUC 14; 150 feet for waters designated Trout Production and all upstream waters; 150 feet for water designated Trout Maintenance and all upstream waters within one linear mile as measured along the length of the regulated water; 150 feet for any segments of water flowing through an area that contains documented habitat for a threatened or endangered species of plant or animal, which is critically dependent on the surface water body for survival, and all upstream waters (including tributaries) within one linear mile as measured along the length of the surface water body; 150 feet for waters that run through acid-producing soils; and, 50 feet for all waters not designated as C1, trout waters, critically water dependent Threatened and/or Endangered Species Habitat, or associated with acid soils.

Surface waters that are designated Category One are listed in the Surface Water Quality Standards at N.J.A.C. 7:9B. The Department's "Surface Water Quality Standards" GIS data layer was utilized to determine these waters. The applicable 300 foot buffer has been applied to these waterways and removed from the proposed sewer service areas on the mapping. Lesser width buffers have not been graphically removed from the sewer service area but are not proposed for sewer service. Jurisdictional determinations by the Department will be utilized to determine the extent of the sewer service area on individual lots.

Development in areas mapped as wetlands, flood prone areas, suitable habitat for endangered and threatened species as identified on the Department's Landscape Maps of Habitat for Endangered, Threatened and Other Priority Wildlife as Rank 3, 4, and 5, Natural Heritage Priority Sites, riparian zones, steep slopes, or designated river areas may be subject to special regulation under Federal or State statutes or rules, and interested persons should check with the Department for the latest information. Any depiction of environmental features shall be for general information purposes only, and shall not be construed to define the legal geographic jurisdiction of such statutes or rules.

The sewer service area identified on this map has been reviewed by the Municipality, County and DEP. This area has been defined based on environmental constraints "Landscape Project Area GIS layers", available from the Department to clarify areas of potential sewer service. The treatment facility for the sewer service area does not guarantee that sufficient wastewater treatment capacity will be available for the complete build out of the area.

All existing, new, or expanded industrial pretreatment facilities requiring Significant Indirect User (SIU) permits and/or Treatment Works Approvals, and which are located within the specified sewer service area, are deemed to be consistent.

Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities) which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this document and compliance is required.

All areas not shown as included within a sewer service area, to be served by individual subsurface sewage disposal system with a design capacities of less than or equal to 2,000 gallons per day (septic area).
