

Continuing Planning Process

Appendix Sections E-G

Sewer Service Buildout

- Information provided Sufficient?
- Clear how to determine if Potential Deficiency

Strategies for Sewer Service Area Potential Deficiencies

- Water Conservation Strategies
- Infiltration and Inflow Reduction
- Maximization of Existing Conveyance and Treatment Infrastructure
- Sewer Treatment Expansion/Increased Flow Capacity
- Zoning Changes/Land-use Policies
- Beneficial Re-Use

Nitrate Dilution Analysis

- Information provided Sufficient?
- Clear how to determine if Potential Deficiency

Strategies for Nitrate-Dilution Carrying-Capacity Potential Deficiencies

- Areas Appropriate for Sewer Service Areas
- Advanced Levels of Treatment
- Open Space Acquisition
- Zoning Changes/Land-use Policies

Septic Management Plan

- Inventory
- Currently Being Accomplished
- Promoting Increased Proper Maintenance

Environmentally Sensitive areas

- Steep Slopes Ordinance
- Riparian Buffer Ordinance
- Habitat Impact Assessment

Other WQMP/WMP Tools

- Ideas on what could be added here?
