

Complete WMP Component Submission Requirements

WMP COMPONENT 1 - WASTEWATER SERVICE AREA

WMP Title Page, Table of Contents, & Summary of Actions
WMP Chapter I – Wastewater Management Planning Area
WMP Chapter II – Summary of Actions
WMP Chapter III – Existing and Future Wastewater Treatment Facilities ¹
Map 1 – WMP Area (PDF Map and GIS Shapefiles required)
Map 2 – Selected Environmentally Sensitive Features Map (PDF Map and GIS Shapefiles required)
Map 3 – Wastewater Service Area Map (PDF Map and GIS Shapefiles required)
Map 5 – This map is not required, however, it could be a supplemental map which can include additional information not depicted on Maps 1 – 3. This could include information such as major interceptors, trunk lines, and pumping stations; public open space & recreation areas, preserved agricultural areas or other conservation easements on private lands; wild and scenic rivers & corridors; non-degradation areas; areas of an endorsed plan identified for growth; Planning Area 1; and others. (PDF Map and GIS Shapefiles required)

WMP COMPONENT 2 – WASTEWATER TREATMENT CAPACITY ANALYSIS – SEWER SERVICE AREA*

WMP Chapter IV – Wastewater Treatment Capacity Analysis - Sewer Service Area
Appendix A – Municipal SSA Build-out Results (PDF and Database Format) Parcel-based data, which is too onerous to present in the Appendix, should be submitted in a database format, with a new tab for each municipal build-out.
Map 4 – Zoning Map(s) (PDF Map(s) and GIS Shapefiles required)
Map 5 – This map is not required, however, it could be a supplemental map which can include additional information not depicted on Maps 1 – 4. This could include information that supports and/or explains the build-out analysis, such as Existing SSA, Developable Area, and Preserved Lands. (PDF Map and GIS Shapefiles required)

*All requirements of WMP Component 1 with full wastewater treatment facility tables should be completed.

WMP COMPONENT 3 – NITRATE DILUTION ANALYSIS – NON-SEWER SERVICE AREA*

WMP Chapter V – Nitrate Dilution Analysis Non-Sewer Service Area
Appendix B – Municipal Non-Sewer Service Area Build-out Results (PDF and Database Format) Parcel-based data, which is too onerous to put into the Appendix, should be submitted in a database format, with a new tab for each municipal build-out.
Map 5 – This map is not required, however, it could be a supplemental map which can include additional information not depicted on Maps 1 – 4. This could include information that supports and/or explains the build-out analysis, such as Developable Area, Preserved Lands, and HUC11 Boundaries. (PDF Map and GIS Shapefiles required)

*All requirements of WMP Components 1 and 2 should be completed.

WMP COMPONENT 4 – STRATEGIES TO ADDRESS CAPACITY DEFICIENCY IN THE SSA & NON-SSA*

WMP Chapter VI – Strategies to Mitigate Potential Capacity Deficiencies

*All requirements of WMP Components 1 - 3 should be completed.

WMP COMPONENT 5 – SEPTIC MAINTENANCE PROGRAM*

WMP Chapter VII – Septic Maintenance Program
--

*All requirements of WMP Component 1 - 4 should be completed.

¹ Wastewater Facility Tables should be completed, however, as the build-out analysis is not required for this component, projected wastewater flows can be left out of the tables.
