OFFICE OF ENVIRONMENTAL PLANNING

REVISION TO THE LOWER DELAWARE WATER QUALITY  
MANAGEMENT PLAN

TAKE NOTICE that on **JUN 09 1998**, pursuant to the provisions of the Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules, N.J.A.C. 7:15-3.5, a revision to the Lower Delaware Water Quality Management Plan (WQMP) was adopted by the Department. This revision corrects the March 31, 1998 revision regarding the South Jersey Hospital - Elmer in Elmer Borough and Upper Pittsgrove Township, Salem County. The earlier revision identified a 0.012 million gallons per day (mgd) on-site wastewater discharge to ground water from the South Jersey Hospital - Elmer. The correct wastewater flow from this facility, as identified in the June 8, 1983 New Jersey Pollutant Discharge Elimination System permit NJ0099571, is a monthly average flow of up to 0.024 mgd. No other information from the original revision was modified.
