WATERSHED MANAGEMENT

REVISION TO THE MONMOUTH COUNTY WATER QUALITY MANAGEMENT PLAN

SEP 04 2002  
TAKE NOTICE that on SEP 04 2002, pursuant to the provisions of the Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules, N.J.A.C. 7:15-3.5, a revision to the Monmouth County Water Quality Management Plan (WQMP) was adopted by the Department. This revision updates the WQMP and the Bayshore Regional Sewerage Authority Wastewater Management Plan to identify the wastewater discharge flow from the existing Aberdeen Water Treatment Plant, pursuant to permit NJ0034142, as being an average of 0.179 million gallons per day. The facility's wastewater, composed of filter backwash and sedimentation basin drainage, is discharged via an overflow pipe (DSN001A) to Wilkson Creek. This revision has been reviewed in accordance with Executive Order No. 109 (2000) and N.J.A.C. 7:15-5.18. Due to the scope of this revision, it is not subject to the alternatives analyses under that Executive Order and rule provision.

  
Debra Hammond, Acting Director  
Watershed Management Program  
Department of Environmental  
Protection
