

DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATERSHED MANAGEMENT

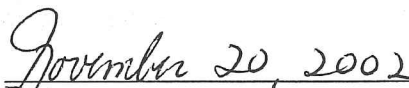

REVISION TO THE NORTHEAST WATER QUALITY MANAGEMENT PLAN

TAKE NOTICE that on **NOV 20 2002**, pursuant to the provisions of the Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules, N.J.A.C. 7:15-3.5, a revision to the Northeast Water Quality Management Plan (WQMP) was adopted by the Department. This revision modifies the Bergen County Utility Authority (BCUA) Wastewater Management Plan (WMP) and the Northeast WQMP to address the following issue. The **Tulip Tree Lane Subdivision**, located in **Alpine Borough**, Lot 4 & 17, Block 22, consisting of 3 single family houses has a flow of 900 gallons per day (gpd). This flow will be added to the Bergen County Utility Authority by way of the Cresskill sewage system. This revision is in accordance with N.J.A.C. 7:15-3.5(b) 4.v. which allows the Department to make revisions for an expansion of less than 100 acres, less than 8,000 gallons per day of additional wastewater flow so long that it does not create a significantly new pattern of sewered development and thus does not create incentives for additional revisions or amendments to open new areas to sewered developments.

This revision represents only one part of the permit process and other issues will need to be addressed prior to final permit issuance. This site must still meet the conditions for a Treatment Works Approval. Additional issues which were not reviewed in conjunction with this revision but which may need to be addressed include environmentally sensitive areas that are subject to regulation under federal or State statutes or rules.

Lawrence J. Bajer, Director
Division of Watershed Management
