

DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATERSHED MANAGEMENT

REVISION TO THE NORTHEAST WATER QUALITY MANAGEMENT PLAN

TAKE NOTICE that on December 1, 2005 pursuant to the provisions of the Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules, N.J.A.C. 7:15-3.5, a revision to the Northeast Water Quality Management Plan (WQMP) was adopted by the Department. The revision modifies the West Milford Wastewater Management Plan (WMP) to address the following issue. Advoserv of New Jersey, located in West Milford Township, Lot 5.01 of Block 2202, is a group adult care facility that is permitted under New Jersey Pollutant Discharge Elimination System (NJPDES) permit number NJG0140473. The permitted development consists of four buildings. Building one is a six-bedroom house. Building 2 consists of one two-bedroom apartment and one four-bedroom apartment. Building 3 is comprised of two one-bedroom apartments and a garage that is not connected to the septic system and building 4 is considered the main building with fourteen people inhabiting it. The approximate flow for this facility is 5,100 gallons per day (gpd) to multiple conventional septic systems. This revision is being adopted in accordance with N.J.A.C.7:15-3.5(b)1(i), which allows the Department to make revisions for corrections of development existing at the time of the most recently adopted areawide WQMP or amendment affecting the site. This revision will correct the exclusion of Advoserv of New Jersey in the West Milford WMP.
