

DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATERSHED MANAGEMENT

REVISION TO THE UPPER DELAWARE WATER QUALITY
MANAGEMENT PLAN, TOWN OF PHILLIPSBURG (STP) WASTEWATER
MANAGEMENT PLAN (WMP), LOPATCONG TWP.

TAKE NOTICE that on FEB 05 2002, pursuant to the provisions of the Water Quality Planning Act, N.J.S.A.58: 11A-1 et seq, and the Statewide Water Quality Management Planning rules, N.J.A.C. 7:15-3.5, a revision to the Upper Delaware Water Quality Management Plan was adopted by the Department. This revision on behalf of the Town of Phillipsburg Sewerage Treatment Plant (STP) Wastewater Management Plan (WMP), reduces Lopatcong Township's flow allocation from 0.934 million gallons per day (mgd) to 0.832 millions gallons per day (mgd). This reduction would alleviate an existing over allocation of wastewater flow at the Phillipsburg (STP). As a result of this revision all of Lopatcong Township's available capacity will be required to service their existing approved sewer service area.
