Future Wastewater Sewer Service Area Map
Borough Of Washington, Warren County, New Jersey

Amending the Upper Delaware Water Quality Management Plan
Date: October 2013

Legend
- Abandoned Railroad
- Active Railroad
- Waterbody
- Parcels
- Streams

Existing SSA (Connected And Flowing)
Future SSA
Washington Borough Municipal

Data Sources:
- VCEA: F:\Jobfile\10203\GIS\Projects
- NJDOE: F:\Jobfile\10203\GIS\Projects
- Warren County GIS
- Warren County Location Map
- Printed Date: 10/24/2013

General Notes:
1. Portions of NJ S-7.1-1, Revised were not included; basin where it is lower than 5 feet above mean sea level.
2. For areas designated Category III or category II, all discharges originating within the basin shall be treated at their production and shall be managed within the basin.
3. All areas not mapped as sewer service areas default to the general service area with discharge to groundwater of 2,000 gallons per day and/or the Ground Water Quality Standards at N.J.A.C. 7:9-6.
4. All existing, new, or expanded industrial pretreatment facilities requiring Significant Indirect User (SUI) permits and/or Treatment Works System Permits (under N.J.A.C. 7:14A). It also applies to ISSDS which require only local approvals. Compliance with the connection requirement of the septic and connection to the sewer system once it becomes available. See Appendix F of the County Summary.
5. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities) which provide for restrictions on water use in environmentally sensitive areas, and notified by the recipient of the grant or permit application, are not considered to define the legal geographic jurisdiction of such statutes or rules. Interested persons should check with the Department of Environmental Protection for the latest information. Depiction of environmental features is for general information purposes only, and shall not be construed to define the legal geographic jurisdiction of such statutes or rules.
