REVISION TO THE UPPER RARITAN WATER QUALITY MANAGEMENT PLAN

TAKE NOTICE that on **MAR 02 1998**, pursuant to the provisions of the Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules, N.J.A.C. 7:15-3.5, a revision to the Upper Raritan Water Quality Management Plan was adopted by the Department. This revision corrects information regarding the Days Inn/Ledgewood Properties Water Pollution Control Plant (WPCP) found in the Roxbury Township Wastewater Management Plan (WMP). The WMP presently states in the Facility Table that the WPCP discharges to a tributary of the Drakes Brook classified as FW2-Trout Maintenance (Category One). The facility actually discharges to the Ledgewood Brook, a tributary of the Drakes Brook, classified as FW2-Trout Production (Category One) in the Surface Water Quality Standards (SWQS) [NJAC 7:9B]. It is believed the error occurred due to the SWQS having a listing under Drakes Brook for the Ledgewood location. Ledgewood Brook is the headwaters of the Drakes Brook and is listed separately as its own entry.

The longitude and latitude location of the discharge are also being corrected. The WMP presently identifies a longitude of W 75 40' 21" and latitude of N 40 52' 54". The correct outfall location is longitude W 74 40' 07" and latitude N 40 53' 27".
