Accessibility Quick Start Guide

The Disability Information Hub has been built from the beginning with accessibility at the forefront, meeting WCAG and Section 508 accessibility requirements.

This is an overview of the accessibility features on the Disability Information Hub and accessibility tips and tools.

KEYBOARD AND FOCUS

Native keyboard accessibility has been maintained throughout the website, and can be fully accessed via the keyboard

We use high contrast colors

Learn more ✓

Learn more ✗

HEADING AND LISTS

To increase ease of navigability throughout the website, headings follow a consistent logic and have been implemented using the reccomended WebAIM structure.

We use distinctive colors

VIDEOS

All videos have captions. ASL interpretation and audio descriptions are in development and will be implemented soon.
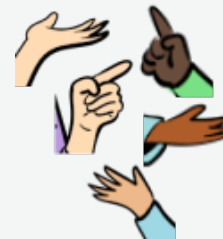

All videos have captions

CC

COLOR, DESIGN, AND CONTRAST

- Any intentional use of color, images, and graphics to convey meaning on the website contain alt text tags, which provides a description of that image.
- High contrast colors have been used throughout the website
- The site does not use any flashing or dynamic (changing/rotating) content.

ASL interpretation coming soon!
