B. Use of Estimates in the Preparation of the Financial Statements

The preparation of these financial statements in conformity with the NAIC Annual Statement Instructions and the NAIC SAP include certain amounts that are based on the Company's estimates and judgments. These estimates require the Company to apply complex assumptions and judgments, often because the Company must make estimates about the effects of matters that are inherently uncertain and will change in subsequent periods. The most significant estimates relate to hospital and medical benefits, claims unpaid, aggregate health claim reserves, and risk adjustment estimates. The Company adjusts these estimates each period as more current information becomes available. The impact of any changes in estimates is included in the determination of net income in the period in which the estimate is adjusted.

C. Accounting Policy

Basis of Presentation — The Company prepares its financial statements on the basis of accounting practices prescribed or permitted by the Department. These statutory practices differ from accounting principles generally accepted in the United States of America ("GAAP").

Accounting policy disclosures that are required by the NAIC Annual Statement instructions are as follows:

- (1–2) Bonds and short-term investments are stated at book/adjusted carrying value if they meet NAIC designation of one or two and stated at the lower of book/adjusted carrying value or fair value if they meet an NAIC designation of three or higher. The Company does not have any mandatory convertible securities or Investment Analysis Office of the NAIC ("IAO") identified funds (i.e.: exchange traded funds or bond mutual funds) in its bond portfolio. Amortization of bond premium or accretion of discount is calculated using the constant yield interest method. Bonds and short-term investments are valued and reported using market prices published by the IAO in accordance with the NAIC Valuation of Securities manual prepared by the IAO or an external pricing service;
- (3–4) The Company holds no common or preferred stock;
- (5) The Company holds no mortgage loans on real estate;
- (6) U.S. government and agency securities and corporate debt securities include loan-backed securities (mortgage-backed securities and asset-backed securities), which are valued using the retrospective adjustment methodology. Prepayment assumptions for the determination of the book/adjusted carrying value, commonly referred to as amortized cost, of loan-backed securities are based on a three-month constant prepayment rate history obtained from external data source vendors. The Company's investment policy limits investments in nonagency residential mortgage-backed securities, including home equity and sub-prime mortgages, to 10% of total cash and invested assets. Total combined investments in mortgage-backed securities and asset-backed securities cannot exceed more than 30% of total cash and invested assets;

- (7) The Company holds no investments in subsidiaries, controlled, or affiliated entities;
- (8) The Company has no investment interests with respect to joint ventures, partnerships, or limited liability companies;
- (9) The Company holds no derivatives;
- (10) Premium deficiency reserves (“PDR”) (inclusive of conversion reserves) and the related expenses are recognized when it is probable that expected future health care expenses, claims adjustment expenses (“CAE”), direct administration costs, and an allocation of indirect administration costs under a group of existing contracts will exceed anticipated future premiums and reinsurance recoveries considered over the remaining lives of the contracts, and are recorded as aggregate health policy reserves in the financial statements. Indirect administration costs arise from activities that are not specifically identifiable to a specific group of existing contracts, and therefore, those costs are fully allocated among the various contract groupings. The allocation of indirect administration costs to each contract grouping is made proportionately to the expected margins remaining in the premiums after future health care expenses, CAE and direct administration costs are considered. The data and assumptions underlying such estimates and the resulting reserves are periodically updated, and any adjustments are reflected as an increase in reserves for life, accident, and health contracts in the financial statements in the period in which the change in estimate is identified. The Company does not anticipate investment income as a factor in the PDR calculation (see Note 30);
- (11) CAE are those costs expected to be incurred in connection with the adjustment and recording of accident and health claims. Pursuant to the terms of a management agreement (the “Agreement”) (see Note 10), the Company pays a management fee to its affiliate, United HealthCare Services, Inc. (“UHS”), in exchange for administrative and management services. A detailed review of the administrative expenses of the Company and UHS is performed to determine the allocation between CAE and general administrative expenses (“GAE”) to be reported in the financial statements. It is the responsibility of UHS to pay CAE in the event the Company ceases operations. The Company has recorded an estimate of unpaid CAE associated with incurred but unpaid claims, which is included in unpaid CAE in the financial statements. Management believes the amount of the liability for unpaid CAE as of December 31, 2022 is adequate to cover the Company’s cost for the adjustment and recording of unpaid claims; however, actual expenses may differ from those established estimates. Adjustments to the estimates for unpaid CAE are reflected in operating results in the period in which the change in estimate is identified;
- (12) The Company does not carry any fixed assets in the financial statements;
- (13) Health care and other amounts receivable consist of pharmacy rebates receivable estimated based on the most currently available data from the Company’s claims processing systems and from data provided by the Company’s affiliated pharmaceutical benefit manager, OptumRx, Inc. (“OptumRx”). Health care and other amounts receivable also include receivables for amounts due to the Company for claim and capitation overpayments to providers, hospitals and other health care organizations. Health care and other amounts receivable are considered nonadmitted assets under the NAIC SAP if they do not meet admissibility requirements. Accordingly, the Company has excluded receivables that do not meet the admissibility criteria from the financial statements (see Note 28).

The Company has also deemed the following to be significant accounting policies:

ASSETS

Cash and Invested Assets

- Bonds include securities with a maturity of greater than one year at the time of purchase;
- Cash equivalents include securities that have original maturity dates of three months or less from the date of acquisition. Cash equivalents also consist of the Company’s share of a qualified cash pool sponsored and administered by UHS. The investment pool is recorded at cost or book/adjusted carrying value depending on the composition of the underlying securities. Interest income from the pool accrues daily to participating members based upon ownership percentage. Cash equivalents, excluding money-market funds, are reported at cost or book/adjusted carrying value depending on the nature of the underlying security, which approximates fair value. Money-market funds are reported at fair value or net asset value (“NAV”) as a practical expedient;
- Realized capital gains and losses on sales of investments are calculated based upon specific identification of the investments sold. These gains and losses are reported as net realized capital gains (losses) less capital gains tax (benefit) (“net realized capital gains (losses) less taxes”);

- The Company continually monitors the difference between amortized cost and estimated fair value of its investments. If any of the Company's investments experience a decline in value that the Company has determined is other-than-temporary, or if the Company has determined it will sell a security that is in an impaired status, the Company will record a realized loss in net realized capital gains (losses) less taxes in the financial statements. The new cost basis is not changed for subsequent recoveries in fair value. The prospective adjustment method is utilized for loan-backed securities for periods subsequent to the loss recognition (see Note 5).

Other Assets

Premiums and Considerations — The Company reports uncollected premium balances from its insured members, groups, and CMS as premiums and considerations in the financial statements. Uncollected premium balances that are over 90 days past due, with the exception of amounts due from government insured plans, are considered nonadmitted assets. In addition to those balances, current balances are also considered nonadmitted if the corresponding balance greater than 90 days past due is deemed more than inconsequential. Premiums and considerations also include amounts for commercial risk adjustment receivables as defined in Section 1343 of the Affordable Care Act ("ACA"), and CMS risk adjustment receivables for the Medicare Plans.

Premium adjustments for the commercial ACA Section 1343 risk adjustment and CMS risk adjustment programs are accounted for as premium adjustments subject to redetermination (see Note 24).

LIABILITIES

- **Claims Unpaid and Aggregate Health Claim Reserves** — Claims unpaid and aggregate health claim reserves include claims processed but not yet paid, estimates for claims received but not yet processed, estimates for the costs of health care services enrollees have received but for which claims have not yet been submitted, and payments and liabilities for physician, hospital, and other medical costs disputes.

The estimates for incurred but not yet reported claims are developed using an actuarial process that is consistently applied, centrally controlled, and automated. The actuarial models consider factors such as historical submission and payment data, cost trends, customer and product mix, seasonality, utilization of health care services, contracted service rates, and other relevant factors. The Company estimates such liabilities for physician, hospital, and other medical cost disputes based upon an analysis of potential outcomes, assuming a combination of litigation and settlement strategies. These estimates may change as actuarial methods change or as underlying facts upon which estimates are based change. The Company did not change actuarial methods during 2022 and 2021. Management believes the amount of claims unpaid and aggregate health claim reserves is a best estimate of the Company's liability for unpaid claims and aggregate health claim reserves as of December 31, 2022; however, actual payments may differ from those established estimates.

The Company contracts with hospitals, physicians, and other providers of health care under capitated or discounted fee for service arrangements, including a hospital per diem to provide medical care services to enrollees. Some of these contracts are with related parties (see Note 10). Capitated providers are at risk for the cost of medical care services provided to the Company's enrollees; however, the Company is ultimately responsible for the provision of services to its enrollees should the capitated provider be unable to provide the contracted services.

- **Liability for Amounts Held Under Uninsured Plans** — Liability for amounts held under uninsured plans represents amounts due from the Company to CMS, and groups for the administrative activities it performs for which it has no insurance risk (see Note 18). Liability for amounts held under uninsured plans includes costs incurred that are less than the cost reimbursement under the Medicare Plans for the catastrophic reinsurance and the low-income member cost-sharing and a liability for the amounts subject to recoupment under the ACA coverage gap discount program.
- **Aggregate Write-Ins for Other Liabilities** – Aggregate write-ins for other liabilities consist of an ordinary cash dividend to Oxford declared on November 16, 2021, which was paid on February 3, 2022. Aggregate write-ins for other liabilities also includes unclaimed property where the Company still owes an amount to an individual, but a claim has not been made after a specified period of time.

CAPITAL AND SURPLUS AND MINIMUM STATUTORY REQUIREMENTS

- **Restricted Cash Reserves** — The Company is in compliance with the various states regulatory deposit requirements as of December 31, 2022 and 2021, respectively, for qualification purposes as a domestic and foreign insurer. These restricted cash reserves are stated at book/adjusted carrying value, which approximates fair value. These restricted deposits are included in bonds in the financial statements. Interest earned on these deposits accrues to the Company (see Note 5).

The New Jersey Administrative Code also requires the Company to maintain minimum insolvency and administrative deposits with the State. The Company had bonds, which are stated at book/adjusted carrying value, on deposit with the State and is in compliance with the New Jersey requirements as of December 31, 2022 and 2021, respectively. This reserve is included in bonds in the financial statements. Interest earned on this deposit accrues to the Company (see Note 5).

- **Minimum Capital and Surplus** — Under the laws of the State of New Jersey, the Company's domiciliary state, the Department requires the Company to maintain a minimum capital and surplus equal to the greater of the Department adjusted consumer price index amount of \$2,391,860; 2% of the first \$150 million of annual premium revenue and 1% of annual premium revenue over \$150 million; three months of uncovered health care expenditures; or an amount equal to the sum of 8% of the annual health care expenditures (not including those expenditures paid on a capitated basis or those on a managed hospital plan basis), plus 4% of the annual hospital expenditures paid on a managed hospital payment basis. The minimum capital and surplus requirement was \$53,132,105 and \$59,042,984, for December 31, 2022 and 2021, respectively, which was based on health care and hospital expenditures, as that produced the highest minimum requirement.

Risk-based capital ("RBC") is a regulatory tool for measuring the minimum amount of capital appropriate for a managed care organization to support its overall business operations in consideration of its size and risk profile. The Department requires the Company to maintain minimum capital and surplus equal to the greater of the state statute as outlined above, or the company action level as calculated by the RBC formula, or the level needed to avoid action pursuant to the trend test in the RBC formula.

The Company is also subject to minimum capital and surplus requirements in other states where it is licensed to do business.

The Company is in compliance with the minimum required capital and surplus amounts where it is licensed to do business, as of December 31, 2022 and 2021.

STATEMENTS OF OPERATIONS

Net Premium Income and Change in Reserve for Rate Credits — Revenues consist of net premium income that is recognized in the period in which enrollees are entitled to receive health care services.

Comprehensive commercial health plans with medical loss ratio ("MLR") on fully insured products, as calculated under the definitions in the ACA and implementing regulations, that fall below certain targets are required to rebate ratable portions of premiums annually. The Company classifies changes to the estimated rebates and retrospective premium adjustments as change in reserve for rate credits in the financial statements (see Note 24). In addition, pursuant to Section 1343 of the ACA, the Company records premium adjustments for changes to the commercial risk adjustment balances which are reflected in change in reserve for rate credits and net premium income, respectively, in the financial statements (see Note 24).

Medicare Plans with MLRs on fully insured products, as calculated under the definitions in the ACA and implementing regulations, that fall below certain targets are required to rebate ratable portions of premiums annually. In addition, the Company records premium adjustments for changes to the CMS Medicare Plans risk corridor program. Changes to these estimates are reflected in change in reserve for rate credits in the financial statements (see Note 24). Net premium income also includes premium under the Medicare Plans which includes CMS premiums, including amounts pursuant to the CMS risk adjustment program (see Note 24), and member premiums, and the CMS low-income premium subsidy for the Company's insurance risk coverage.

- **Total Hospital and Medical Expenses** — Total hospital and medical expenses include claims paid, claims processed but not yet paid, estimates for claims received but not yet processed, estimates for the costs of health care services enrollees have received but for which claims have not yet been submitted, and payments and liabilities for physician, hospital, and other medical costs disputes.

Total hospital and medical expenses also include amounts incurred for incentive pool, withhold adjustments, and bonus amounts that are based on the underlying contractual provisions with the respective providers. In addition, adjustments to claims unpaid estimates and aggregate health claim reserves are reflected in the period once the change in estimate is identified and included in total hospital and medical expenses in the financial statements.

- **General Administrative Expenses** — General expenses that have been paid as of the reporting date in addition to general expenses that have been incurred but are not due until a subsequent period are reported as general administrative expenses. Pursuant to the terms of the Agreement (see Note 10), the Company pays a management fee to UHS exchange for administrative and management services. Costs for items not included within the scope of the Agreement are directly expensed as incurred. State income taxes are also a component of GAE. A detailed review of the administrative expenses of the Company and UHS is performed to determine the allocation between CAE and GAE to be reported in the financial statements.
- **Federal Income Taxes Incurred** — The provision for federal income taxes incurred is calculated based on applying the statutory federal income tax rate of 21% to net income before federal income taxes and net realized capital gains (losses) subject to certain adjustments (see Note 9).

OTHER

- **Vulnerability Due to Certain Concentrations** — The Company is subject to substantial federal and state government regulation, including licensing and other requirements relating to the offering of the Company's existing products in new markets and offerings of new products, both of which may restrict the Company's ability to expand its business.

The Company has no commercial customers that individually exceed 10% of total direct premiums written and premiums and considerations, including receivables for contracts subject to redetermination, for the years ended December 31, 2022 and 2021.

Direct premiums written and uncollected premiums, including receivables for contracts subject to redetermination, from members and CMS related to the Medicare Plans as a percentage of total direct premiums written and premiums and considerations, including receivables for contracts subject to redetermination, are 99% and 99% as of December 31, 2022 and 99% and 99% as of December 31, 2021, respectively.

Recently Issued Accounting Standards — The Company reviewed all recently issued guidance in 2022 and 2021 that has been adopted for 2022 or subsequent years' implementation and has determined that none of the items would have a significant impact to the financial statements.

D. Going Concern

The Company has the ability and will continue to operate for a period of time sufficient to carry out its commitments, obligations and business objectives.

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

No changes in accounting principles or corrections of errors have been recorded during the years ended December 31, 2022 and 2021.

3. BUSINESS COMBINATIONS AND GOODWILL

A–E. The Company was not party to a business combination during the years ended December 31, 2022 and 2021, and does not carry goodwill in its financial statements.

4. DISCONTINUED OPERATIONS

A. Discontinued Operation Disposed of or Classified as Held for Sale

(1–4) The Company did not have any discontinued operations disposed of or classified as held for sale during 2022 and 2021.

B. Change in Plan of Sale of Discontinued Operation — Not applicable.

C. Nature of any Significant Continuing Involvement with Discontinued Operations after Disposal — Not applicable.

D. Equity Interest Retained in the Discontinued Operation after Disposal — Not applicable.

5. INVESTMENTS

For purposes of calculating gross realized gains and losses on sales of investments, the amortized cost of each investment sold is used. There were no gross realized gains and losses on sales of long-term investments for 2022. The gross realized gains and losses on sales of long-term investments were \$360 and \$0, respectively, for 2021. There were no gross realized gains and losses on sales of short-term investments for 2022 or 2021. The net realized gain is included in net realized capital gains (losses) less taxes in the financial statements. Total proceeds on the sale of long-term investments were \$0 and \$801,488 and for short-term investments were \$0 in 2022 and 2021.

As of December 31, 2022 and 2021, the book/adjusted carrying value, fair value, and gross unrecognized unrealized gains and losses of the Company's investments, excluding cash and cash equivalents of \$34,117,953 and \$69,374,317 respectively, are disclosed in the table below:

The unrecognized unrealized losses on investments in U.S. government and agency securities, state and agency municipal securities, city and county municipal securities, and corporate debt securities at December 31, 2022 and 2021, were mainly caused by interest rate fluctuations and not by unfavorable changes in the credit ratings associated with these securities. The Company evaluates impairment at each reporting period for each of the securities whereby the fair value of the investment is less than its book/adjusted carrying value. The contractual cash flows of the U.S. government and agency securities are guaranteed either by the U.S. government or an agency of the U.S. government. It is expected that the securities would not be settled at a price less than the cost of the investment, and the Company does not intend to sell the investment until the unrealized loss is fully recovered. The Company assessed the credit quality of the state and agency municipal securities, city and county municipal securities and corporate debt securities, noting whether a significant deterioration since purchase or other factors that may indicate an other-than temporary impairment ("OTTI"), such as the length of time and extent to which fair value has been less than cost, the financial condition, and near term prospects of the issuer as well as specific events or circumstances that may influence the operations of the issuer and the Company's intent to sell the investment. Additionally, the Company evaluated its intent and ability to retain loan-backed securities for a period of time sufficient to recover the amortized cost. As a result of these reviews, no OTTIs were recorded by the Company as of December 31, 2022 and 2021.

A-C. The Company has no mortgage loans, real estate loans, restructured debt, or reverse mortgages. The Company also has no real estate property occupied by the Company, real estate property held for the production of income, or real estate property held for sale.

D. Loan-Backed Securities

- (1) U.S. government and agency securities and corporate debt securities include loan-backed securities (mortgage-backed securities and asset-backed securities), which are valued using the retrospective adjustment methodology. Prepayment assumptions for the determination of the book/adjusted carrying value, commonly referred to as amortized cost, of loan-backed securities are based on a three-month constant prepayment rate history obtained from external data source vendors.
- (2) The Company did not recognize any OTTIs on loan-backed securities as of December 31, 2022.
- (3) The Company did not have any loan-backed securities with OTTIs to report by CUSIP as of December 31, 2022 or 2021.

- (4) The following table illustrates the fair value, gross unrecognized unrealized losses, and length of time that the loan-backed securities have been in a continuous unrecognized unrealized loss position as of December 31, 2022 and 2021:

	2022
The aggregate amount of unrealized losses:	
1. Less than 12 months	\$ 673,168
2. 12 months or longer	925,332
The aggregate related fair value of securities with unrealized losses:	
1. Less than 12 months	24,002,306
2. 12 months or longer	14,452,400
	2021
The aggregate amount of unrealized losses:	
1. Less than 12 months	\$ 129,536
2. 12 months or longer	-
The aggregate related fair value of securities with unrealized losses:	
1. Less than 12 months	28,783,599
2. 12 months or longer	-

- (5) The Company believes that it will continue to collect timely the principal and interest due on its loan-backed securities that have an amortized cost in excess of fair value. The unrealized losses were primarily caused by interest rate changes and not by unfavorable changes in the credit quality associated with these securities that impacted the assessment on collectability of principal and interest. At each reporting period, the Company evaluates available-for-sale debt securities for any credit-related impairment when the fair value of the investment is less than its amortized cost. The Company evaluated the expected cash flows and the underlying credit quality and credit ratings of the issuers, noting no significant credit deterioration since purchase. As of December 31, 2022, the unrealized loss on any security that the Company classified as intent to sell was not material to the Company's investment portfolio. Any other securities in an unrealized loss position as of December 31, 2022, the Company considers to be temporary.

These include routine, regular and special investigations, audits and reviews by CMS, state insurance and health and welfare departments and other governmental authorities. The Company cannot reasonably estimate the range of loss, if any, that may result from any material government investigations, audits and reviews in which it is currently involved given the inherent difficulty in predicting regulatory action, fines and penalties, if any, and the various remedies and levels of judicial review available to the Company in the event of an adverse finding.

On February 14, 2017, the Department of Justice ("DOJ") announced its decision to pursue certain claims within a lawsuit initially asserted against the Company and filed under seal by a whistleblower in 2011. The whistleblower's complaint, which was unsealed on February 15, 2017, alleges that the Company made improper risk adjustment submissions and violated the False Claims Act. On February 12, 2018, the court granted in part and denied in part the Company's motion to dismiss. In May 2018, the DOJ moved to dismiss the Company's counterclaims, which were filed in March 2018, and moved for partial summary judgment. In March 2019, the court denied the government's motion for partial summary judgment and dismissed the Company's counterclaims without prejudice. The Company cannot reasonably estimate the outcome that may result from this matter given its procedural status.

Because of the nature of its businesses, the Company is frequently made party to a variety of legal actions and regulatory inquiries, including class actions and suits brought by members, care providers, consumer advocacy organizations, customers and regulators, relating to the Company's businesses, including management and administration of health benefit plans and other services.

The Company records liabilities for its estimates of probable costs resulting from these matters where appropriate. Estimates of costs resulting from legal and regulatory matters involving the Company are inherently difficult to predict, particularly where the matters involve: indeterminate claims for monetary damages or may involve fines, penalties or punitive damages; present novel legal theories or represent a shift in regulatory policy; involve a large number of claimants or regulatory bodies; are in the early stages of the proceedings; or could result in a change in business practices. Accordingly, the Company is often unable to estimate the losses or ranges of losses for those matters where there is a reasonable possibility, or it is probable that a loss may be incurred. Although the outcomes of any such legal actions cannot be predicted, in the opinion of management, the resolution of any currently pending or threatened actions will not have a material adverse effect on the financial statements of the Company.

The Company routinely evaluates the collectability of all receivable amounts included in the financial statements. Impairment reserves are established for those amounts where collectability is uncertain. Based on the Company's past experience, exposure related to uncollectible balances and the potential of loss for those balances not currently reserved for is not material to the Company's statutory basis financial condition.

There are no assets that the Company considers to be impaired at December 31, 2022 and 2021.

15. LEASES

20. FAIR VALUE MEASUREMENTS

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

Level 1 — Quoted (unadjusted) prices for identical assets in active markets.

Level 2 — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets;
- Quoted prices for identical or similar assets in nonactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.);
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.);
- Inputs that are derived principally from or corroborated by other observable market data.

Level 3 — Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds, cash equivalents, and short-term investments, (collectively “investment holdings”) are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (“pricing service”), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates, and prepayment speeds. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source, prices reported by its custodian, its investment consultant, and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company’s internal price verification procedures and review of fair value methodology documentation provided by independent pricing services have not historically resulted in an adjustment in the prices obtained from the pricing service.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest-level input that is significant to the fair value measurement in its entirety. The Company’s assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

E. **Risk-Sharing Provisions of the Affordable Care Act**

- (1) The Company has accident and health insurance premiums in 2022 and 2021 subject to the risk-sharing provisions of the ACA.

The ACA imposed fees and premium stabilization provisions on health insurance issuers offering comprehensive commercial health insurance. The three premium stabilization programs are commonly referred to as the 3Rs — risk adjustment, reinsurance, and risk corridors.

Risk Adjustment — The risk adjustment program is a permanent program designed to mitigate the potential impact of adverse selection that generally applies to non-grandfathered individual and small group plans inside and outside of exchanges. The program helps to stabilize market premiums by transferring funds from plans with relatively low-risk enrollees to plans with relatively high-risk enrollees. The data used by CMS to determine the risk adjustment transfer amount is subject to audits along with the true-up to the final CMS report, which may result in a material change to arrive at the final risk adjustment amount from the initial risk adjustment estimate recorded. Premium adjustments pursuant to the risk adjustment program are accounted for as premium subject to redetermination and user fees are accounted for as assessments.

Reinsurance and Risk Corridors — The transitional reinsurance program and risk corridors program were temporary programs which expired at the end of 2016. The details of the years impacted and the amounts received are included in Note 24E 4 and Note 24E 5 below.

The liability for claims unpaid, accrued medical incentive pool and bonus amounts, and aggregate health claim reserves, net of health care and other amounts receivable as of December 31, 2021 was \$2,988,604. As of December 31, 2022, \$1,127,645 has been paid for incurred claims attributable to insured events of prior years. Reserves remaining for prior years, net of health care and other amounts receivable are now \$(1,329,022), as a result of re-estimation of unpaid claims. Therefore, there has been \$3,189,981 favorable prior year development since December 31, 2021 to December 31, 2022. The primary drivers consist of favorable development as a result of a change in the provision for adverse deviations in experience of \$3,596,009, favorable development of \$1,051,366 in withholds, favorable development of \$788,828 in pharmacy rebates, and favorable development of \$763,110 in provider settlements, offset by unfavorable development of \$2,153,549 in retroactivity in inpatient, outpatient, physician and pharmacy claims, and unfavorable development of \$1,052,614 in Medicare Part D expenses. At December 31, 2021, the Company recorded \$1,783,751 of favorable development. The primary drivers consist of favorable development as a result of a change in the provision for adverse deviations in experience of \$3,927,066 and favorable development in provider settlements of \$1,781,293, offset by unfavorable development of \$3,161,650 in retroactivity for inpatient, outpatient, physician, and pharmacy claims and unfavorable development of \$831,574 in Medicare Part D expenses. Original estimates are increased or decreased, as additional information becomes known regarding individual claims, which could have an impact to the accruals for MLR rebates and retrospectively rated contracts. As a result of the prior year effects, on a regular basis, the Company adjusts revenue and the corresponding liability and/or receivable related to retrospectively rated policies and the impact of the change is included as a component of change in reserve for rate credits in the financial statements.

The Company incurred CAE of \$42,724,931 and \$39,707,276 in 2022 and 2021, respectively. These costs are included in the management service fees paid by the Company to UHS as a part of the Agreement (see Note 10). The following table discloses paid CAE, incurred CAE, and the balance in unpaid CAE reserve for 2022 and 2021:

	2022	2021
Total claims adjustment expenses	\$ 42,724,931	\$ 39,707,276
Less: current year unpaid claims adjustment expenses	(1,132,105)	(863,802)
Add: prior year unpaid claims adjustment expenses	<u>863,802</u>	<u>849,892</u>
Total claims adjustment expenses paid	<u>\$ 42,456,628</u>	<u>\$ 39,693,366</u>
