

Current Monitoring Coordination (DRBC's Perspective)

- MAC is currently an un-official advisory committee;
- 1 or 2 MAC meetings per year;
- Meets DRBC's needs;
 - Exchange of information on monitoring;
 - Identification of opportunities for collaboration, efficiency, data sharing, cross-organization relationships;
 - State & Federal Counterparts, PDE
- Responsive to Commissioners' direction to not over-tax state staff;
- Other discussions in WQAC, TAC, NJWMC, STAC, RDT, etc.
- One-on-one coordination (i.e. natural gas baseline)

Others Needs (not well met)

- In other forums, discussion of *lack* of monitoring coordination;
 - Federal Coordination Summit (2010);
 - Accelerating Action: The Delaware River Watershed Forum (2013);
 - University / Academic Collaborators

Questions to Seed Discussion

- Who are the underserved constituencies?
- Do we know specific unmet needs?
- Where do their needs & our needs overlap?
- What would better monitoring coordination look like?
- Next steps / specific actions?

Possible Ideas

- Survey;
- Joint STAC – MAC mini summit;
- Other – from MAC discussion;
- Updated MAC info sheet.
