**STEP 1**

Arrange hay bales over geotextile fabric on level land tightly packed as shown to cover an area approximately 12’ x 12’.

**STEP 2**

Install another layer of hay bales on the outer edge as shown.

**STEP 3**

Install sediment barrier, if required by company representative, around entire hay bale structure as shown.

**STEP 4**

Install another layer of hay bales on the outside of the sediment barrier and secure in place by driving rebar or wooden stake through each of the outer hay bales. (Stakes not shown for clarity purposes)

NOTES:

Where possible structure shall be placed on a level, well vegetated upland site such that water will flow away from structure and any work areas.

Contractor shall properly remove and properly dispose of dewatering structure immediately upon completion of dewatering operations. Under no circumstances shall used dewatering structures be left in place for a period of time greater than 48 hours after dewatering operations are complete.

Structure should be positioned such that water will not flow into any wetlands or waterbodies.
