# 2007 New Jersey Alternate Proficiency Assessment 

## Executive Summary

The Alternate Proficiency Assessment (APA) is a portfolio assessment designed to measure progress toward achieving New Jersey's state educational standards for students with severe cognitive disabilities who are unable to participate in the New Jersey Assessment of Skills and Knowledge (NJASK), the Grade Eight Proficiency Assessment (GEPA), or the High School Proficiency Assessment (HSPA). APA students in grades 5-7 were assessed beginning with the 2006-2007 school year.

The 2007 APA was administered in grades 4, 8, and 11 in Language Arts Literacy, Mathematics, and Science; and Language Arts Literacy and Mathematics in grades 3, 5, 6, and 7. Evidence of student performance as demonstrated in the student portfolio was collected from October 23, 2006, through February 23, 2007, during instructional activities for the 2006-2007 school year. Work samples exemplified each student's abilities as they relate to the standards and to the student's individual education program goals and objectives.

As seen in Table 1, overall summary, a total of 7,644 students were evaluated by the 2007 APA. Of these, 7,055 students had valid Language Arts Literacy scores, 6,925 students had valid Mathematics scores, and 2,768 students had valid Science scores. A valid score indicates an earned proficiency level based on entry scores. When entries are deemed unscorable, the proficiency level is reported as void instead. Proficiency levels and voids are assigned by content areas. Therefore, a student may receive a void in one content area but a proficiency level in another content area.

The APA results are reported as proficiency levels. Beginning with the 2002-2003 school year, APA proficiency levels were combined with the other New Jersey state assessment results for state and federal accountability. The APA proficiency levels are parallel with other New Jersey state assessment programs. The APA portfolios are classified into the following proficiency levels for each content area:

- Advanced Proficient - indicates that the portfolio exceeded the level of proficiency in the content area.
- Proficient - means that the portfolio met the state level of proficiency in the content area.
- Partially Proficient - indicates that the portfolio is below the state minimum level of proficiency.

Portfolios were scored using a rubric designed to measure student performance and program components in areas identified as important in the education of students with significant disabilities. Results of the program level and student progress may be reviewed by schools and districts to identify strengths and weaknesses in their educational programs, and to determine whether programmatic changes and/or additional instructional support are required.

APA standard setting was conducted in February 2003 to determine the cut scores for the program-level classifications. These cut scores were applied to all grade levels for both mathematics and language arts literacy. When science was added to the APA in 2005, the same
program-level cut scores were applied. In 2007, the APA test design of the program level document collection related to Social Interaction, Independence, and Generalization was reduced to half of the original requirements. The scoring rubrics were revised to reflect the changes.

The student progress score for each content area is classified into three levels:

- Substantial Progress
- Considerable Progress
- Minimal Progress

The student progress level cut scores are used to determine the degree of progress the student made toward the measurable criteria for the targeted skills assessed. Both the measurable criteria and the targeted skills are selected by the teacher, based on the student's Individualized Education Program (IEP), and listed in the portfolio.

A holistic sorting method was used to determine the cut scores for the three program levels:

- Commendable
- Satisfactory
- Needs Improvement

The student progress level and the program level are combined to derive the three proficiency levels. At the recommendation of the APA Advisory Committee, the performance classification weights the program level more than the student progress level due to the use of state assessment results for school and district accountability.

The table below prescribes how a portfolio is classified Advanced Proficient, Proficient, or Partially Proficient.

| Proficiency Levels | Student Progress Levels |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Substantial | Considerable | Minimal |  |
| Program <br> Levels | Commendable | Advanced <br> Proficient | Advanced <br> Proficient | Proficient |
|  | Satisfactory | Proficient | Proficient | Proficient |
|  | Needs <br> Improvement | Proficient | Partially <br> Proficient | Partially <br> Proficient |

It is important to recognize that the APA system does not report total raw or scale scores. The key components in interpreting portfolio results are the student scores, student progress level, program level, and proficiency level. Proficiency level is not derived based on a total score, but solely by the table presented above. Scale scores are not appropriate for use with the Alternate Proficiency Assessment system so there are no issues of equating involved. There are no sets of test items; therefore, there are no item difficulties, nor is there a need to equate test scores from year to year.

The New Jersey Alternate Proficiency Assessment was developed for two purposes:

- To measure the progress of a small percentage of students with severe cognitive disabilities who cannot participate in the regular statewide assessments even with accommodations and/or modifications.
- To ensure that the educational results for all students are included in the statewide accountability system at the individual, school, district, and state levels.

Accountability through assessment provides equity in program and educational opportunities for all students. Alternate assessment ensures an inclusive statewide assessment system and student accountability linked to the common core of learning within the content standards in New Jersey.

This executive summary includes four tables derived from the statewide summary for the 2007 APA. Tables provide the number of participating APA students with valid scores and the percent of students at each APA proficiency level. The percentages may not total to one hundred due to rounding. The percentage of students in Proficient or Advanced Proficient is calculated by subtracting the percentage of students in Partially Proficient from one hundred.

Tables 2 through 4 present statewide performance by demographic groups. Results are presented for the total student group and the following demographic variables: gender, migrant status, ethnicity, economic status, and limited English proficient status. Students are counted in the Total Students category only once, plus in as many other categories that apply. Some students might not be included in a gender group because of incomplete or missing information. Students with only one ethnic code are reported in the appropriate ethnic group. Examiners were asked to code all categories applicable to indicate a student's ethnicity. Students with multiple ethnic codes or no ethnic code are counted in the category called "Other."

The demographic information originates from the data collected on the APA scan sheets submitted for the students by school districts. Demographic information was reviewed by the school district personnel prior to reporting, allowing them an opportunity to correct any errors.

Beginning in 2006, a major change was that Limited English Proficient (LEP) was reported as LEP (Current plus Former) with two subcategories: LEP Current and LEP Former. Since 2005, students coded as multiple ethnicity and those whose ethnicity was unspecified are counted as "Other."

The 2007 APA state summary reports for performance appear at http://www.state.nj.us/education/schools/achievement/

A small number of Grade 12 students participated in the high school level APA because they are either (1) students new to the state for whom IEP teams determine the APA is the appropriate assessment, or (2) students who were juniors last year and should have participated in the APA last year but did not. Results of these students were extracted in order to report results of the Grade 11 students properly.

## Highlights from the 2007 APA Performance Results

During 2007, the APA has been in transition. In order to meet the requirements of NCLB and the federal peer review process the APA is being revised, including changes to content that may be assessed and the dimensions on which that content is scored. These changes will be fully implemented in the 2008-2009 school year. In the interim, changes are being introduced gradually to the APA to provide administrators, teachers, and students' time to absorb and implement the changes in a meaningful way. As a result longitudinal analyses and comparisons across or including the transition years are not recommended, nor are they likely to be interpretable.

Statewide results for 2007 by demographic groups are presented in Table 2 for Language Arts Literacy, Table 3 for Mathematics, and Table 4 for Science. Results are summarized below:

Table 2 presents the number of students with valid scores and the percentage of students in each proficiency level for the tested grade levels reported for the state. The percentage of APA students scored at or above Proficient on their Language Arts Literacy portfolios in the tested grade levels was:

- Grade 3 - 89.6\%
- Grade 4 - 87.8\%
- Grade 5 - 88.6\%
- Grade 6 - 90.0\%
- Grade 7 - 86.6\%
- Grade 8 - 85.7\%
- Grade 11 - 87.3\%

Table 3 shows similar information for the 2007 APA Mathematics content area. The percentage of APA students scored at or above Proficient on their Mathematics portfolios in the tested grade levels was:

- Grade 3 - 86.9\%
- Grade 4 - 84.6\%
- Grade 5 - 87.0\%
- Grade 6 - 87.8\%
- Grade 7 - $86.1 \%$
- Grade 8 - 83.4\%
- Grade 11 - 81.7\%

Table 4 shows similar information for the 2007 APA Science content area. The percentage of APA students scored at or above Proficient on their Science portfolios in the tested grade levels was:

- Grade 4 - 73.0\%
- Grade 8 - 77.0\%
- Grade 11 - 77.5\%

Generally, there were about twice as many male students taking the APA as female students. The percentage of male students generally decreased ranging from $67.9 \%$ at Grade 3, $67.1 \%$ at Grade 4, and $66.7 \%$ at Grade 7 to approximately $65 \%$ for Grades 5,6 , and 8 with the lowest percentage of $63.5 \%$ at Grade 11. Overall, $65.8 \%$ were male students and $34.2 \%$ were female students.

## Language Arts Literacy:

For all grades, the percentage of female students scoring at or above Proficient was very close to the percentage of male students scoring at or above Proficient. The greatest difference was at Grade 11 with $89.9 \%$ of the female students receiving scores at or above Proficient and $86.0 \%$ of the male students received scores at or above Proficient.

## Mathematics:

At Grades 3 and 4, the percentage of female students scoring at or above Proficient was very close to the percentage of male students. Grade 6 showed the greatest difference with $90.3 \%$ of the females receiving scores at or above Proficient while 86.5\% of the males scored at or above Proficient. At Grade 5, $88.4 \%$ of the females received scores at or above Proficient and $86.3 \%$ of the males scored at or above Proficient. At Grade 7, $87.4 \%$ of the females received scores at or above Proficient and $85.3 \%$ of the males scored at or above Proficient. At Grade 8, $85.0 \%$ of the females attained scores at or above Proficient while $82.6 \%$ of the males scored at or above Proficient. At Grade 11, $83.2 \%$ of the females attained scores at or above Proficient while $81.1 \%$ of the males students scored at or above Proficient.

## Science:

For Grade 4, 72.8\% of the female students and $73.1 \%$ of the male students scored at or above Proficient. Approximately $78.5 \%$ of the Grade 8 female students and $76.4 \%$ of the Grade 8 male students attained scores at or above Proficient; and $80.0 \%$ of the Grade 11 female students and $76.0 \%$ of the Grade 11 male students attained scores at or above Proficient.

Migrant Status Only Non-Migrant data appear on this report. Since three or fewer migrant students took the APA in each grade and content area, data are suppressed for student confidentiality.

Ethnicity The range of the number of APA students with valid scores by ethnicity groups varied as follows:
White 557 students in Grade 8 Mathematics to
437 students in Grade 4 Science
Black 258 students in Grade 3 Language Arts Literacy to 214 students in Grade 4 Science
Asian 64 students in Grade 3 Language Arts Literacy to
40 students in Grade 11 Science
Hispanic 219 students in Grade 5 Language Arts Literacy to

141 students in Grade 11 Science
Other
18 students in Grade 7 Mathematics to 10 or fewer students for Science in all grades and several other grades and content areas.

Since 10 or fewer students in the Native Hawaiian or Pacific Islander and American Indian or Alaskan Native ethnic groups took the APA, data for these groups were not reported.

## Language Arts Literacy:

For Grade 3, the percentage of students scoring at or above Proficient level ranged from $91.7 \%$ of Other students to $86.6 \%$ of the Hispanic student group. (The percentages for the ethnic groups not stated fell between the percentages of the noted ethnic groups - in Grade 3, $90.9 \%$ of the White students, $89.5 \%$ of the Black students, and $89.1 \%$ of the Asian students.) For Grade 4, the percentages ranged from $88.9 \%$ of the Asian and Hispanic students to $84.1 \%$ of the Black student group. The Grade 5 percentages ranged from $89.1 \%$ for White and Black students to $85.5 \%$ of the Asian student group. The Grade 6 percentages ranged from $92.7 \%$ of White students to $83.0 \%$ of Asian students. The Grade 7 percentages ranged from $88.3 \%$ of White students to $73.3 \%$ of Other students. The Grade 8 percentages ranged from $88.6 \%$ of Hispanic students to $76.5 \%$ of Asians. The Grade 11 percentages ranged from $89.7 \%$ of White students to $72.7 \%$ of Other students.

## Mathematics:

For Grade 3, the percentage of students scored at or above Proficient level ranged from $100 \%$ of the Other student group to $81.4 \%$ of the Hispanic student group. The percentage of students scored at or above Proficient level for Grade 4 ranged from $86.5 \%$ of the White student group to $82.3 \%$ of Black students. For Grade 5, the percentage ranged from $90.4 \%$ of the Asian student group to 83.9\% of the Hispanic student group. For Grade 6, the percentage ranged from $90.6 \%$ of the White student group to $71.4 \%$ of Other students. For Grade 7, the percentage ranged from $88.6 \%$ of the White student group to $72.2 \%$ of Other students. For Grade 8, the percentage ranged from $85.8 \%$ of the White student group to $68.6 \%$ of Asian student group. For Grade 11, the percentage ranged from $84.2 \%$ of the Hispanic student group to $74.4 \%$ of Asian student group.

## Science:

For Grade 4, the percentage ranged from 73.9\% of White students to $70.3 \%$ of the Hispanic student group. The percentage of students scored at or above Proficient level for Grade 8 ranged from 78.7\% of the White students to 70.6\% of the Asian student group. For Grade 11, the percentage ranged from $83.7 \%$ of Hispanic students to $73.1 \%$ of the Black student group.

Economic Status The number of economically disadvantaged students taking the APA was approximately one-half of the number of non-economically disadvantaged students. The greatest percentage (36.0\%) of economically disadvantaged
students took the APA Grade 5 and the smallest percentage (30.2\%) of economically disadvantaged students took the APA Grade 11.

## Language Arts Literacy:

The non-economically disadvantaged students generally did better than the economically disadvantaged group. The greatest difference was at Grade 6 with $92.6 \%$ of the non-economically disadvantaged students scoring at or above Proficient and $84.8 \%$ of the economically disadvantaged students scoring at or above Proficient. However, for Grade 11, $87.6 \%$ of the economically disadvantaged students scored at or above Proficient while $87.2 \%$ of the noneconomically disadvantaged students scored at or above Proficient.

## Mathematics:

The percentage of non-economically disadvantaged students scoring at or above Proficient was generally greater than the percentage of economically disadvantaged students scoring at or above Proficient. For Grade 6, $90.5 \%$ of the non-economically disadvantaged students scored at or above Proficient while $82.2 \%$ of the economically disadvantaged students scored at or above Proficient. For Grade 8, $83.8 \%$ of the economically disadvantaged students scored at or above Proficient while $83.2 \%$ of the non-economically disadvantaged students scored at or above Proficient. For Grade 11, 82.2\% of the economically disadvantaged students scored at or above Proficient while $81.6 \%$ of the non-economically disadvantaged students scored at or above Proficient.

## Science:

The non-economically disadvantaged students generally did better than the economically disadvantaged group in Grades 4 and 8 . The greater difference was at Grade 8 with $77.8 \%$ of the non-economically disadvantaged students scoring at or above Proficient and $75.4 \%$ of the economically disadvantaged students scoring at or above Proficient. However, for Grade 11, 77.6\% of the economically disadvantaged students scored at or above Proficient while 77.5\% of the non-economically disadvantaged students scored at or above Proficient.

LEP Status With the exception of Grades 4 and 5, only Not Current Limited English Proficient data appear on this report. Because 10 or fewer limited English students tested with the APA at Grades $3,6,7,8$, and 11, their data is suppressed. For Grade 4, 41.7\% of the 12 Current LEP students testing in Language Arts Literacy and $36.4 \%$ of the 11 Current LEP students testing in Mathematics attained at or above Proficient. For Grade 5, 50.0\% of the 12 Current LEP students testing in Language Arts Literacy and 72.7\% of the 11 Current LEP students testing in Mathematics attained at or above Proficient. Also for Grade 5, $58.8 \%$ of the 17 LEP (Current and Former) students testing in Language Arts Literacy and $81.2 \%$ of the 16 LEP (Current and Former) students testing in Mathematics attained at or above Proficient.

## Reporting Rules for State Summary Data File

In order to safeguard student confidentiality, certain information is suppressed from the reports according to the following reporting rules:

- Data are not reported if the number of students with valid scale scores for a particular group is fewer than 11.
- Data are not reported where demographic groups are mutually exclusive (e.g., gender) and there are one or two students with a valid scale score in one of the groups (e.g., male).
- Data are not reported if it is otherwise possible to identify individual student performance.
