## 2007 Grade Eight Proficiency Assessment

## Executive Summary

The 2007 New Jersey Grade Eight Proficiency Assessment (GEPA) consisted of three content areas: Language Arts Literacy, Mathematics, and Science. The GEPA is used as a primary indicator for identifying those students who may need instructional intervention in the three content areas. It is designed to give an indication of the progress students are making in mastering the skills they will need to pass the High School Proficiency Assessment (HSPA).

The GEPA Language Arts Literacy, Mathematics, and Science scores are reported as scale scores with a range of 100 to 300 . Please note that 100 and 300 are a theoretical floor and ceiling, which may not actually be observed. The score ranges are as follows:

| Advanced Proficient | $250-300$ |
| :--- | :--- |
| Proficient | $200-249$ |
| Partially Proficient | $100-199$ |

Students who scored Partially Proficient are considered to be below the state minimum level of proficiency. These students may need additional instructional support such as individual or programmatic intervention. It is important that districts consider multiple measures with all students before making final decisions about students’ instructional placement.

The GEPA was administered between March 12 and March 15, 2007. Of the 108,474 students enrolled, 105,865 students received valid scale scores in Language Arts Literacy, 106,980 students received valid scale scores in Mathematics, and 106,913 students received valid scale scores in Science.

For the total group of students, 26.4\% scored Partially Proficient, 62.4\% Proficient, and 11.3\% Advanced Proficient in Language Arts Literacy. In Mathematics, 31.6\% scored Partially Proficient, 45.9\% Proficient, and 22.5\% Advanced Proficient. In Science, 21.1\% scored Partially Proficient, 54.3\% Proficient, and 24.6\% Advanced Proficient. The mean scale score was 214.9 in Language Arts Literacy, 215.5 in Mathematics, and 223.3 in Science.

This executive summary includes four tables summarizing statewide performance by demographic groups. Tables 1-3 present the performance in Language Arts Literacy, Mathematics, and Science, respectively. Table 4 presents the performance for the state, Special Needs districts, and Non-Special Needs districts.

The performance data include only students with valid scale scores. Students whose answer folders were voided are excluded. Students may receive a scale score in one content area, but not in others.

In 2007, results for the General Education group are being reported in the state summary. The General Education group included students with answer folders not coded as special education or limited English proficient. In 2006, the General Education group was not reported in the state summary.

Previously, a major change for the 2006 State Summary was the reporting of the Limited English Proficient (LEP). LEP was reported as LEP (Current and Former) with two subcategories: LEP Current and LEP Former.

Student performance is summarized by total students, education program, and student demographic subgroups: Total, General Education, Special Education (SE), Limited English Proficient (LEP), Gender, Ethnicity, Economic status (disadvantaged vs. not disadvantaged), and Migrant status.

For each demographic group, the number of students participating, the percent of students in each proficiency level, and the mean scale score are reported for each content area. The percentages of students for the three proficiency levels may not total to one hundred due to rounding. The percentage of students in Proficient or Advanced Proficient is calculated by subtracting the percentage of students in Partially Proficient from one hundred.

Demographic information originates from the data collected on the students' answer folders. School district personnel were given an opportunity to review the demographic information they provided on the answer folders and correct any errors prior to reporting.

This executive summary includes information from the state level Performance by Demographic Groups Report from Cycle II reporting. The complete state summary data file with District Factor Groups and longitudinal data is available at http://www.state.nj.us/education/schools/achievement/.

## Reporting Rules for State Summary Data File

The state summary data files contain the same type of information shown on the Statewide Performance by Demographic Groups Report for schools and districts included with the Cycle II reporting. In order to safeguard student confidentiality, certain information is suppressed in the files according to the following reporting rules:

- Data are not reported if the number of students with valid scale scores for a particular group is fewer than 11.
- Data are not reported where demographic groups are mutually exclusive (e.g., gender) and there are one or two students with a valid scale score in one of the groups (e.g., male).
- Data are not reported if it is possible to identify individual student's performance.
