NJQSAC District Performance Review (Appendix A)

Instruction and Program Indicators

Directions for Indicators 1 through 7: A school district will receive points for each item up to the maximum points listed below, which varies by school district grade configuration (i.e., kindergarten through grade eight (K-8) or any span within K-8; kindergarten through grade 12 (K-12) or any span within K-12 that is not K-8 or grades nine through 12 (9-12); and grades 9-12 or any span within the high school grades). This grade configuration variation accounts for school districts that contain only high schools and, therefore, do not have student growth measures, and school districts that do not have high schools and, thus, lack graduation data.

Indicators 1, [through] 2, 3, 6, and 7 reflect percentages (e.g. percent proficient, percent graduated) and each school district percentage will be multiplied by the maximum possible point value to determine the points earned for the indicator by the school district.

For example, “School District A” has an English language arts (ELA) achievement score of 80 percent, or .80. The achievement score is based on a number of factors identified in the indicators below. The points earned by School District A for the ELA achievement indicator would vary based on School District A’s configuration and would be calculated as follows:

- If School District A is any composition of K-8, the achievement score (.80) would be multiplied by the maximum possible point value of 10, which would earn the school district [eight] **10** points for the ELA achievement indicator (.8 x 10 = 8).
- If School District A is any composition of K-12, the achievement score (.80) would be multiplied by the maximum possible point value of [7.5] **7**, which would earn the school district [six] **5.6** points for the ELA achievement indicator (.8 x [7.5] **7** = [6] **5.6**).
- If School District A is any composition of 9-12, the achievement score (.80) would be multiplied by the maximum possible point value of [15] **10**, which would earn the school district [12] **8** points for the ELA achievement indicator (.8 x [15] **10** = [12] **8**).

Indicators 4 and 5, which are indicators of academic progress, are based on school district’s median student growth percentiles (mSGP). Each school district’s mSGP is converted to a score that ranges from zero to one. School districts can refer to the *[Median Student Growth Percentile Conversion Chart for NJQSAC]* [NJOSAC Academic Progress Score Conversion Chart](#) to find their scores. This approach is similar to the mSGP conversion method used for the AchieveNJ system, although the scale and point allocation differ in the NJQSAC application to account for the mSGP distribution properties at the school district level. The calculation for Indicators 4 and 5 are treated the same as the example above because the scores ranges from zero to one. The mSGP converted score that is a decimal from zero to one[,] is multiplied by the maximum value of the indicator, which will yield the NJQSAC score.

The school district is comprised of any composition of:

K – 8

K – 12

9 – 12
