State of New Jersey

DEPARTMENT OF EDUCATION
PO Box 500
TRENTON, NJ 08625-0500

JON S. CORZINE
Governor

LUCILLE E. DAVY
Commissioner

August 10, 2007

Governor Jon S. Corzine
Senate President Richard J. Codey
Assembly Speaker Joseph J. Roberts, Jr.
Members of the Joint Budget Oversight Committee

Ladies and Gentlemen:

The attached report complies with the requirements of the Educational Facilities Construction and Financing Act (EFCFA or Act) for an annual report on the School Facilities Construction Program for FY 2007. The report has been prepared with the cooperation of, and the information supplied by, our colleagues at the Schools Development Authority (SDA), the Economic Development Authority, and the Department of the Treasury.

The content of this annual report confirms that FY 2007 was a year of transition for New Jersey's school construction program, still one of the nation's most ambitious. On August 6, 2007, Gov. Corzine signed A4336, which revises the program created under EFCFA and establishes the New Jersey Schools Development Authority, into law. The new SDA will be in, but not of, the Department of the Treasury, and replace the Schools Construction Corporation. The legislation is intended to meet Governor Corzine's pledge to implement changes in the governance, leadership and administration of the agency charged with overseeing school construction.

This report will be the last annual report of the School Facilities Construction Program generated by the Department of Education. Beginning on December 1, 2007, the SDA will produce this report on a semi-annual basis and the Department will assist by supplying the SDA with the information needed for its reporting responsibilities.

The reform efforts of the past year draw on the experience of the last six years by refocusing the program on priority needs and by providing further planning tools for undertaking school construction in the most densely populated cities in the nation's most densely populated state.

www.nj.gov/education

New Jersey Is An Equal Opportunity Employer • Printed on Recycled and Recyclable Paper

The Department is implementing the educational priorities set forth by the New Jersey Supreme Court in the Abbott cases and by the Legislature in EFCFA as it is amended. The priority project categories will be based on a district's long-range facilities plan approved by the Department and by an Educational Facilities Needs Assessment prepared for each Abbott district. These new planning tools will focus on collecting the information necessary for the Department to establish, in consultation with the Abbott district, an educational priority ranking of all school facilities projects in the Abbott District based upon the determination of critical need in accordance with priority project categories to be developed in the near future. Some of the critical need areas to be evaluated include: health and safety needs, overcrowding, preschool and full-day kindergarten, and appropriate facilities for students with disabilities.

The educational priority ranking of school facilities projects in the Abbott districts will serve as the framework for the SDA, in consultation with the Commissioner, the Abbott districts, and the governing bodies of the municipalities where Abbotts are situated, to establish a statewide strategic plan. The plan, in turn, will be used to sequence Abbott district school facilities projects based upon the projects' educational priority rankings and construction/land acquisition issues that impact the SDA's ability to undertake the projects.

I look forward to continuing our shared efforts to make safe, hospitable and productive schools available for all New Jersey students.

Sincerely yours,

A handwritten signature in black ink that reads "Lucille E. Davy". The signature is written in a cursive, flowing style.

Lucille E. Davy
Commissioner of Education

I. Background

The Educational Facilities Construction and Financing Act (EFCFA or Act), P.L. 2000, c. 72, authorized \$8.6 billion to school districts to initiate the largest, most comprehensive school construction program in the nation. The Act established a new Preschool-12 school facilities construction and financing program through the Department of Education (DOE) and the New Jersey Schools Construction Corporation (SCC) (established pursuant to N.J.S.A. 34:1B-159 and by Executive Order as a subsidiary of the New Jersey Economic Development Authority (EDA)).

Under EFCFA, the Office of School Facilities (OSF) of the DOE is charged with ensuring that proposed facilities are designed to provide for the delivery of a “thorough and efficient” education, as defined by the Core Curriculum Content Standards (CCCS).

The OSF must approve each district’s five-year Long Range Facilities Plan, and the individual projects in that plan. As each district’s plan is implemented, the OSF has approval authority with regard to educational adequacy for schematic and final designs, site acquisitions and temporary facilities (swing spaces) associated with individual projects.

The SCC managed the predevelopment services, design and construction for all Abbott districts, Level II monitoring districts and districts having a district aid percentage (DAP) of 55% or over in State aid for education. However, these districts themselves may manage projects with final eligible costs of less than \$500,000 pursuant to N.J.S.A. 18A:7G-13(a) (“Section 13A Grants”).

The SCC funded one hundred percent of the eligible costs for approved school facilities projects in the Abbott districts, and funded the State share of such school facilities projects in the over 55% DAP districts and Level II monitoring districts.

The SCC also administered grants for school facilities projects in districts receiving less than 55% State aid for education pursuant to N.J.S.A. 18A:7G-15 (“Section 15 Grants”). These districts manage their own construction unless they elected to have the SCC undertake the construction pursuant to N.J.S.A. 18A:7G-5(b).

It is important to note that the Governor signed legislation on August 6, 2007 replacing the SCC with the newly created New Jersey Schools Development Authority (SDA). Moving forward, the SDA will focus solely on the construction of schools in the Abbott districts while the New Jersey Economic Development Authority retains the responsibility to provide financing for school facilities projects. In addition, the new law contains other reforms, including changes to land acquisition policies and procedures and a new process to sequence projects in the Abbott districts based on educational priorities and needs. Finally, the legislation provides greater authority to the Abbott districts to manage their own projects if they successfully demonstrate the capacity to do so.

II. Requirements of the Annual Report

The Act requires the Commissioner of Education to prepare an annual report on the school facilities construction program, as set forth below:

N.J.S.A. 18A:7G-24 Annual report on school facilities construction program.

The Commissioner, in consultation with the State Treasurer, shall annually submit to the Governor, the Joint Budget Oversight Committee, the President of the Senate and the Speaker of the General Assembly a report on the school facilities construction program established pursuant to the provisions of this act. The report shall be submitted no later than August 1 of each year and shall include, but not be limited to, the following information for the prior fiscal year: the number of school facilities projects approved by the commissioner pursuant to section 5 of this act; the number of projects constructed by the authority and the amount of time that it has taken the authority to complete those projects; the aggregate principal amount of bonds, notes or other obligations issued by the authority for the State share of construction and renovation of school facilities and whether there is a need to adjust the aggregate principal amount of bonds, notes or other obligations authorized for issuance pursuant to subsection a. of section 14 of this act; the number of projects constructed by districts; the number of demonstration projects approved; the number of approved projects which exceeded the facilities efficiency standards, the components of those projects which exceeded the standards, and the amount of construction by individual districts and Statewide estimated to have exceeded the standards; and recommendations for changes in the school facilities construction program established pursuant to this act.

III. Annual Report of the School Facilities Construction Program for Fiscal Year 2007

As required by N.J.S.A. 18A:7G-24, the Commissioner issues the following report for fiscal year 2007:

A. The number of school facilities projects approved by the Commissioner pursuant to section 5 of this Act.

The OSF reviews and approves both educational and non-educational school facilities projects. A non-educational project typically involves the rehabilitation of existing building systems such as the repair or replacement of roofs, windows or HVAC, electrical or plumbing systems. An educational project is one that affects the number, size, configuration, location or use of educational spaces, such as a new school or an addition to an existing school.

For purposes of the project approval process, the main distinction between an educational project and a non-educational project is that OSF must review educational projects for educational adequacy, by making a determination as to whether the project is consistent with the facilities efficiency standards (FES) or the applicable programmatic model in the approved Long Range Facilities Plan.

A school facilities project (SFP) may contain components which are wholly or partially ineligible for State funding pursuant to N.J.S.A. 18A:7G-5g and N.J.A.C. 6A:26-3.3. If the scope of work is not eligible for State funding, the district may either modify its submission so that the school facilities project meets the eligibility requirements, or locally fund any ineligible work. The information contained in this report does not distinguish between fully or partially funded school facilities projects. Another option available for a school district is to choose to 100 percent locally fund a project in the form of an "Other Capital Project" (OCP). In the case of SCC managed districts, this option is limited to projects not eligible for

state funding and local budget or non-district fund availability. These projects have been identified in this report.

By July, 2005, the SCC had committed the remaining moneys allocated for funding to the Abbot districts to 59 projects identified in a Capital Plan approved by its Board. Any Abbott project not already in construction or identified in the 2005 Capital Plan was suspended until additional funding became available. Not long after the SCC Board adopted the July 2005 Capital Plan it became apparent that due to the lack of accurate project cost data, project delays and higher inflation a structural deficit existed that would not permit full funding through construction completion of the 59 projects previously approved in the 2005 Capital Plan.

In April, 2007, the SCC Board adopted a Capital Deferral Plan and Project Sequencing Strategy (Deferral Plan) to provide for the efficient allocation of the available funds. The three primary goals of the Deferral Plan were: 1) to fund through construction completion, based upon application of the DOE's prioritization criteria as well as logistical considerations, the maximum number of projects previously identified in the July 2005 Capital Plan, 2) phase fund the remaining 2005 Capital Plan projects through design, land acquisition, relocation, remediation and demolition, and 3) to retain an adequate reserve for emergent projects and unforeseen events. The Deferral Plan identified 27 school facilities projects, which could not be completed through construction without additional funding.

The lack of available funding created an inability for DOE to approve any new Abbot project unless the project was an emergent health and safety project. This is reflected in the limited project approvals for FY 2007.

The DOE has issued the following school facilities and other capital project approvals for fiscal year 2007:

| Approval Totals: July 1, 2006 to June 30, 2007 | | | |
|---|--------------|------------|------------|
| | Total | SFP | OCP |
| All Project Approval Totals | 485 | 181 | 304 |
| Abbott Districts | 20 | 19 | 1 |
| 55% DAP and Over and Level II Districts | 3 | 2 | 1 |
| Under-55% DAP Districts | 462 | 160 | 302 |

A district that is required to have the SCC manage its projects may request that the SCC conduct predevelopment activities, which could include feasibility studies, site development, demolition, design work, the acquisition of and design work for temporary facilities, the review of demonstration projects for preliminary approval, and the acquisition and remediation of land. In FY 2007, six predevelopment approvals were issued, limited to emergent health and safety projects in the Abbott districts or in 55% DAP and over districts, due to a lack of funding to advance new school facilities projects other than emergent health and safety projects.

The number of school facilities actually built in any year will vary from the number approved. School facilities projects in a non-Abbott district must secure local funding for the project prior to construction, usually through a voter approved referendum. If local funding is not secured, the school district may redesign or cancel the school facilities project. If the

project is redesigned, a new project number and project approval are issued. The project design, bidding and construction process for SCC-managed facilities will frequently result in construction concluding in a later fiscal year than the one in which approval is given.

B. The number of projects constructed by the SCC and the amount of time that it has taken the SCC to complete those projects.

The following is a summary of the number of school facilities projects completed by SCC for fiscal year 2007:

| | |
|--|-----------|
| Totals: July 1, 2006 to June 30, 2007* | |
| All School Facilities Projects Constructed by SCC | 21 |
| Abbott Districts | 20 |
| 55% DAP and Over and Level II Districts | 0 |
| Under-55% DAP Districts | 1 |

*The data in this section of the report have been provided to the DOE by the SCC.

The time for completing these projects, as measured from the date of execution of the design contract to the date SCC received the temporary certificate of occupancy, ranged from 29 to 61 months depending largely upon the type and size of the project.

C. The aggregate principal amount of bonds, notes or other obligations issued by the authority for the State share of construction and renovation of school facilities and whether there is a need to adjust the aggregate principal amount of bonds, notes or other obligations authorized for issuance pursuant to subsection a. of section 14 of this Act.

EFCFA provides for a total of \$8.6 billion of State-Contract bonds to be issued by the EDA to fund all of the school facilities projects. Of the \$8.6 billion, \$6 billion is allocated for the Abbott districts, \$100 million is for county vocational schools and \$2.5 billion is for the projects in under-55% DAP districts, 55% DAP-and-over districts, and Level II monitoring districts. The \$2.5 billion is further allocated for grants to the under-55% DAP districts who undertake their projects and to pay for the State share of projects in the 55% DAP and over districts which, by law, must be undertaken by the SCC.

The EDA issued the following School Facilities Construction Bonds during FY 2007.

| Fiscal Year | Issue Date | Series | Bond Denomination | Principal Amount of Bonds Issued |
|--------------------|-------------------|---------------|--------------------------|---|
| 2007 | 11/2/06 | R | 5,000 | 500,000,000 |
| 2007 | 11/2/06 | S | 5,000 | 100,000,000 |
| | | | | 600,000,000 |

By the end of FY 2007, the EDA had issued \$6,120,929,000 of the \$8,600,000,000 originally authorized by EFCFA. Additional series of bonds will be issued at such time as additional cash flow is required for already committed projects.

No refunding bonds were issued by the EDA in the 2007 Fiscal Year.

The aggregate principal amount of bonds, notes or other obligations authorized for issuance needs to be adjusted pursuant to subsection a. of section 14 of the Act for the School Construction Program to move forward. Additional funding is required to complete the 27 phase funded projects in the current Deferral Plan and to advance any new projects seeking DOE approval. The data in this section of the report have been provided to the DOE by the SCC.

D. The number of projects constructed by districts.

A total of 396 school facilities projects were constructed by school districts in FY 2007. Of these, 348 were constructed by under-55% DAP and vocational school districts. These numbers are based on the districts’ close-out filings of their section 15 grant with the SCC during FY 2007.

School facilities projects under \$500,000 that are undertaken by 55% DAP-and-over districts and Abbott districts are funded by Section 13A grants. In FY 2007, Section 13A close-out reports were received for 8 projects from non-Abbott 55% DAP-and-over districts and for 40 projects from Abbott districts.

| Total Close-Outs for Section 15 and Section 13A Grants for FY2007* | | | |
|---|-------------------------------|---------------------------|----------------------------|
| District Type | # of Grants Closed-Out | Districts Impacted | Facilities Impacted |
| Section 15 Grant Close-Out Sub-Total | 348 | 131 | 293 |
| Vocational Districts | 11 | 5 | 6 |
| Under-55% DAP Districts | 337 | 126 | 287 |
| Section 13 A Grant Close-out Sub-Total | 48 | 16 | 44 |
| 55% DAP-and-Over Districts | 8 | 4 | 6 |
| Abbott Districts | 40 | 12 | 38 |

*The data in this section of the report have been provided to the DOE by the SCC.

The projects identified in this section typically received a school facilities project approval from the OSF in a prior fiscal year. Due to the time required to design and construct a school facilities project, the numbers in this section do not correspond to the project approvals in Section III-A.

The data in this section of the report have been provided to the DOE by the SCC.

E. The number of demonstration projects approved.

N.J.S.A. 18A:7G-6 permits the State Treasurer to designate up to six school facilities projects as demonstration projects in the first three years following EFCFA’s enactment. As of June 30, 2004, all six demonstration projects had been designated. The projects are located in the following districts:

- A. Camden
- B. East Orange
- C. New Brunswick

- D. Trenton
- E. Union City
- F. Vineland

F. The number of approved projects which exceeded the facilities efficiency standards, the components of those projects which exceeded the standards and the amount of construction by individual districts and Statewide estimated to have exceeded the standards.

The numbers of school facilities projects approved during FY 2007 that exceed the facilities efficiency standards are as follows:

| Approval Totals: July 1, 2006 to June 30, 2007 | | | | |
|---|---|---|---|---|
| | Total School Facilities Projects Approved* | Required Educational Adequacy / FES Review | Projects Requiring Educational Adequacy/FES Review and Exceeding the FES | Percentage of Projects Requiring Educational Adequacy/FES Review and Exceeding the FES |
| All Districts | 485 | 159 | 19 | 11.94% |
| Abbott Districts | 20 | 2 | 0 | 0.00% |
| 55% DAP-and-Over and Level II Districts | 3 | 1 | 0 | 0.00% |
| Under-55% DAP Districts | 462 | 156 | 19 | 12.18% |

*Non-educational projects were not used in calculating the percentage of school facilities projects that exceed the FES, although they are included in the total of school facilities projects approved.

As part of the approval process for all school facilities projects requiring educational adequacy review, whether Abbott or non-Abbott districts, OSF reviews the project for compliance with the FES. Where a project exceeds the FES, OSF must determine whether the excess spaces are eligible for State funding pursuant to N.J.S.A. 18A:7G-5g and N.J.A.C. 6A:26-3.3. If the excess spaces are not eligible for State funding, the district may either modify its submission so that the school facilities project meets the FES, or locally fund any ineligible spaces.

The major reasons that the spaces in a school facilities project exceeding the FES may be ineligible for State funding include:

- 1 The spaces are of a type that is specifically identified as ineligible for State funding. These include, but are not limited to, swimming pools, greenhouses, athletic stadiums, garages, any building used for non-instructional or non-educational purposes and any facility, building, or structure used solely for administrative purposes.
- 2 The spaces are greater in size or number than the FES would support, such as a larger gymnasium, auditorium, or library/media center, or the project contains additional specialized spaces that cannot be justified as being necessary to support the Core

Curriculum Content Standards, such as additional art, music, and science labs, yet these spaces are not justified by the school enrollment or scheduling requirements.

The OSF may approve spaces for State funding that are in excess of the FES when the district demonstrates that the additional or inconsistent space that exceeds the FES is eligible for State support for one of the following reasons:

- 1 The district has demonstrated a particularized need in that school facility related to required programs that cannot be addressed within the FES and all other proposed spaces are consistent with those standards;
- 2 Such spaces are necessary to comply with Federal or State laws for students with disabilities who are to be educated, to the greatest extent possible, in the same building or classes with their non-disabled peers and the requirements of N.J.A.C. 6A:26-3.3(e)(2) are met;
- 3 Such spaces are necessary to house the district's central administration, and the requirements of N.J.A.C. 6A:26-3.3(e)(3) are met; or
- 4 For SCC-managed projects, such spaces represent excess grossing factor which was approved based on a determination by the SCC that it was necessary for code compliance, constructability, site conditions, etc.

A broad review of the FES is currently being undertaken by the DOE.

G. Recommendations for changes in the school facilities construction program established pursuant to this Act.

On August 6, 2007, Governor Corzine signed A4336 into law, which establishes the New Jersey Schools Development Authority and revises the school construction program established under the "Educational Facilities Construction and Financing Act." Additional information about this bill can be found on the New Jersey Legislative web site at <http://www.njleg.state.nj.us>. A comprehensive review of additional funding needs for the school facilities construction program along with any recommended additional changes are being undertaken.

IV. Appendix

A. Section III – A

- 1 Abbott School Facilities Projects Approved
- 2 Under-55% DAP School Facilities Projects Approved
- 3 55% DAP-and-over School Facilities Projects Approved

Refunding Bonds (No Bond Proceeds to SCC):

| <u>Year</u> | <u>Issue Date</u> | <u>Series</u> | <u>Bond Denomination</u> | <u>Principal Amount of Refunding Bonds</u> |
|--------------|-------------------|---------------|--------------------------|--|
| 2005 | 01/27/05 | K | \$5,000 | \$ 700,000,000.00 |
| 2005 | 05/23/05 | N | \$5,000 | \$ 677,465,000.00 |
| Total | | | | \$ 1,377,465,000.00 |

Notes:

- Pursuant to the provisions of the Educational Facilities Construction and Financing Act (C.18A:7G-14a), the aggregate principal amount of bonds, notes or other obligations the EDA may issue to finance school facilities projects, and the costs related thereto, shall not exceed \$8.6 billion. This limitation excludes indebtedness incurred for refunding purposes. Therefore, any proceeds received to pay bond issuance costs shall not count against the amount of funding authorized pursuant to the Act.
- Bonds may be sold or issued in any multiple of the bond denomination.

*** Approval Codes for Spaces Approved above the FES.**

1. School facilities needs related to required programs cannot be addressed within the facilities efficiency standards and all other proposed spaces are consistent with those standards;
2. Such spaces are necessary to comply with Federal or State laws concerning educating students with disabilities to the greatest extent possible in the same building or classes with their non-disabled peers and the requirements of N.J.A.C. 6A:26-3.3(e)(2) are met; or
3. Such spaces are necessary to house the district's central administration, and the requirements of N.J.A.C. 6A:26-3.3(e)(3) are met; or
4. Such spaces represent excess grossing factor which was approved based on a determination by the SCC that it was necessary for code compliance, constructability, site conditions, etc.
