**Purpose**

School district auditors are required to annually prepare, and the school district’s board secretary/business administrator is required to annually submit, a summary of audited revenues and expenditures following the close of the fiscal year and the completion of the annual audit. Using the Data Finalize and Certify screen, the school district auditor and the board secretary/business administrator must review and certify the summary information prepared by the auditor prior to submission by the board secretary/business administrator.

Auditors may access the web-based AudSum via a link on the DOE website at Audit Summary Application. Authorized school district personnel may access AudSum through the NJDOE Homeroom and selecting “AudSum” then selecting “Click to Enter System.” This will take you to the screen shown in Figure 1.

**Submission Dates**

Audit summary data must be submitted via the Department of Education’s web site on or before December 5, 2017.

**Getting Started**

Begin by reviewing this manual and gathering basic fiscal data.

(Figure 1) **User Login**: The image below shows User login page for AudSum
Districts
Log in using your four digit district ID and your user ID and password. The district ID is your District Code. You must contact your district’s Homeroom Administrator to create your User ID and Password.

The Homeroom Administrator must log in and create user accounts for individuals that need access to the Audit Summary Data Collection. You can find detailed information regarding user accounts by clicking on the Homeroom Administrator Manual link on the left column of the NJDOE Homeroom.

The system automatically logs you off if there is no activity for more than one hour. You may wish to create a desktop shortcut or web link for easy access to the login page. The following error messages could appear if the system logs you off or if there is a problem with your login:

- Your user session may be expired because of long idle time, please login again.
- You have logged out.
- There is a problem with your log-in. Please type the preceding zeros in the district ID field (4 digits.)
- An invalid request. Please enter correct log-in data
- The authorization failed: Invalid UserID or Password

Auditors
Setup Steps
1. Obtain a PIN code(s) for client each school district(s)
2. Create a CPA Auditor account on AudSum.
3. Add districts to your account.

Obtaining a PIN

District auditors will need to request and obtain a Department issued personal identification number (PIN) code(s) for each client school district(s) to access the AudSum for that client district. For security and control purposes, a separate PIN will be issued for each client school district to the auditor of record. The audit firm will have access, through its PIN, to enter the data and make any changes to AudSum. The districts will have read only access for purposes of review and advising the auditor of any suggested changes or corrections the district notes.

Due to the large number of school districts, and the time involved to issue PINs to the many audit firms, the Department is asking that, at your firm’s earliest convenience, an Excel listing of the audit firm’s client school districts and charter schools (name-county-district number) be emailed to audsum@doe.state.nj.us as a request for PIN numbers. After the DOE receives the email request, a return email will be sent to you containing a 6 digit PIN for each district and charter school listed.

Creating or Updating an Account

To create a CPA Auditor account, go to the AudSum login screen (figure 1 above) and click on the underlined link which says “If you are a CPA auditor and this is your first time accessing this system, please click here to register”. The screen in figure 2 will appear. Fill out the form as indicated and click on the “Next” button. You will be taken to the page shown in figure 3 below.
Create Auditor Profile: The image below shows the screens that will be required to be filled by the auditors when registering as a user.

Create CPA Auditor User Profile
STEP-I: Basic Login Information

(Figure 2) Link to District:

Create CPA Auditor User Profile
STEP-II: Link to NJ School District(s)

Please select district(s) and enter a PIN# assigned by the DOE, then click on "Link" to verify and assign you for the audit for on district(s):

- The System will verify the PIN# you entered. If the PIN# verification is failure, you will not be able to link the district for the audit.

Linking to a School District or Updating a User Profile
To link a district to your account, select a county and a district from the drop down menus and enter the PIN you received in the return email. (You use this pin only once during the initial linking process. You will not need to use it again unless you wish to add a new CPA Account and want that
account linked to that district). Click on the “Link” button. The screen shown in Figure 4 will appear with the name and district number for the linked district.

(Figure 4) Auditor profile and Linked Districts: The image below shows the snap shop of user’s profile.

You have successfully registered for your CPA audit profile to our system, and you have linked to the District (ABSECON CITY - 0010) for audit. Now, you can sign in to Audit Summary Online by using your CPA user ID, password and a linked district ID. Login to Audit Summary Online

CPA Auditor User Profile & District Audit Link

If you need to Link more districts, click here

You may now begin to edit the district’s audit summary by clicking on ‘Login to Audit Summary Online’ or you may add additional districts through the ‘click here’ link appearing above the list of linked districts. Note: you may also add districts at a later time by going to the login page (Figure 1) and clicking on the underlined link near the top of the webpage with the header “If you are already a registered CPA auditor, and you need to update your user profile or link more districts for audit, please click here” To update your user profile, you will select the link for CPA PROFILE at the top of the linking screen to modify your user profile information:

(Figure 4a) Update CPA profile screen: The image shows which link CPA can click to change the profile

New Jersey Department of Education

NJDOE AUDIT SUMMARY

CPA Links to School District
Audit Summary Program Overview

Districts
While the bulk of the activity that will take place in this data collection will be performed by the district or charter school auditor, the department recommends that the school board secretary/school business administrator review the process for completion described in this manual. The district board secretary/business administrator will be required to review each data entry screen and submit an electronic certification using the “Data Finalize and Certify” screen/link providing assurances as to the accuracy of the data entered by the auditor. Note that submission will not be possible until the Edit Check selector is run and all fatal edits are passed.

Auditors
To enter the system and edit data, go to the login screen and enter the 4 digit district code (including leading “0’s”) for the linked school district you wish to edit. Do not use the 6 digit pin you originally used to link to the district. You only use that PIN when initially linking a user ID to a district.

The main toolbar on the AudSum software consists of six selections (Figure 5)

- Data Entry (District)
- Data Entry (School Based)
- Data Entry (Reg Day School)
- Questionnaire
- Data Finalize & Certify
- Data Edit Check

See Figure 5 below:
(Figure 5) Toolbar: The image shows the toolbar inside the AudSum.

**Entry Tabs:** The first three selections are data entry tabs; District, School Based, and Regional Day School. By clicking on these tabs, the user can access data entry pages for entry of fiscal detail. The School Based and Regional Day School tabs lead to drop down menus for the selection of individual schools. The School Based tab provides for the entry of “Expenditures” as described on page 10 of this manual. If the district does not submit school based budgets to the department, a list of schools will not be available from the drop down menu. If the district does not operate a regional day school, no regional day schools will be available from the drop down menu. Note that Regional Day Schools have multiple screens for completion, including “Revenues”, “Expenditures”, “Questionnaire”, “Edits”, and “Finalize and Certify”.

**Questionnaire Tab:** For each of the questions on this tab, the auditor must select an appropriate response (yes, no, qualified, unqualified, or not applicable) from the drop down menu. All questions must have a response or a fatal edit will fail.

**Data Finalize & Certify Tab:** Do not attempt to finalize and certify data until edits have been run and all fatal edits have passed. Unless all fatal edits have been cleared, auditors and board secretary/business administrators will not be able to access the certification page. Your AudSum cannot be submitted to the department until certification has occurred.

**Data Edit Check.** The Data Edit Check must be run prior to selecting the Data Finalize & Certify tab. Fatal edits are identified by an “error” notation, while warning edits are identified by a “warning” notation. Data submission cannot be completed until all fatal edits have been cleared.

**Data Entry**

There are three data entry tabs that are utilized for district-wide entry, school based entry and regional day school entry. The school based and regional day school entry tabs lead to drop down menus for the selection of individual schools. The revenue and expenditure data should be entered for all regional day schools as well as the questionnaire and the certify screens. The expenditure data should be entered for each school listed in the school based entry tab.

At the bottom of each data entry screen (figure 6) are four buttons:

1. Export Excel
2. Export PDF
3. Refresh This Page
4. Save Data

Be sure to press the “Save Data” button before you move to another screen, or data entry will be lost. (Note: Districts will not have a “Save Data” option since they cannot edit the data.) Refresh
Data loads the last saved version of the data that you are working on. Refresh Data also may be used to import into your session any changes that the department makes to line items.

**Data Upload**

There are three data entry screens that can be completed through a data file upload process. Once the first data entry tab is selected, the links to upload the revenue and expenditure data are presented (see figure 6). Revenue and Expenditure data can be uploaded if properly formatted as two column Comma Delimited (.csv) files. An excel file can easily be converted to a csv file through the ‘SAVE AS’ file function. The first column of the revenue and expenditure files must contain the line item. The second column of the revenue and expenditures files must contain the amount rounded to the nearest dollar. The file can not contain any headers, subtotal or total lines.

(Figure 6) Upload Links for the Revenue and Expenditure files: The image shows the links to upload revenue and expenditures.

The third file that can be uploaded to the AudSum pertains only to former Abbott districts that are required to enter the school appropriations data. By selecting the School Based tab, a link for uploading the school based expenditure file is available (figure 6a). This upload file must also be a Comma Delimited file, but must have three columns. The first column is the numeric Codist sequence of nine digits representing the county, district and school code. The second column must contain the line item and the third must contain the amount rounded to the nearest dollar. This file must also contain no headers, subtotal or total lines.

(Figure 6a) Upload Link for School Appropriations File - The image shows the links to upload School Appropriation file.

Once you have selected the upload function of any of the three files, you will be prompted to select the file for upload. Use the browse function (figure 7) to locate the .csv file you intend to upload from your computer.
**Figure 7** File Browsing – The image shows an option to locate a file to upload

If any lines are invalid, the upload file will need to be revised before the user may reattempt to successfully upload the file. Invalid lines include subtotals, incorrect line item references, subtotal lines and grand total lines. These lines will be identified during the validation process. (as in figure 8 below)

**Figure 8** File Validation Errors – The image shows how the errors, if any, will look during the upload process

Preloaded data in the AudSum consists of beginning balances and state aid amounts in the revenue section, as well as TPAF on behalf lines in the expenditure section. The preloaded beginning balances in the revenue section are invalid lines for upload. Those lines are locked and considered invalid for upload. The amounts come directly from the ending balances on the prior year AudSum. The other preloaded amounts will appear in the right column of the validation screen (see Figure 9 below). Make sure you compare any preloaded amounts to the amounts on your data file to determine if the amount on the upload file is accurate. Any amounts on the upload file will overwrite any preloaded amounts. You can change the amount on the upload file to reflect the preloaded amount (if accurate), or you may upload the file and correct the amounts later on in the appropriate section of the AudSum through data entry.
(Figure 9) Validation Screen Comparison – The image shows the comparison that can be made to ensure accurate data uploading.

Once the file validation is successful, you will be prompted to save the data to the AudSum data base (figure 10). A user is now able to view the uploaded input on the data entry screen. Modifications may still be made to the data entry screen after upload is complete.

(Figure 10) Validation Successful – The image shows successful upload message, which will allow the date to be saved.

Note on Export Excel and Export PDF Files:

If you wish to print or save a copy of AudSum data using either the “Export Excel” or Export pdf” buttons, you will be prompted to open or save the file. Choose save and rename the file. If you do not rename the exported file, it will be saved with the default names of either grid.xls for Excel files or 2016~2017_.pdf for PDF files. Renaming files prior to saving will help you avoid overwriting saved files.

(Figure 11) Export - Refresh – Save – The image shows the options for exporting a file.

Data Entry (District, School Based and Regional Day Schools).

These links each provide access to screens for entering audited data from different sections of the school district or charter school audit report.
- Revenues [School districts, charter schools, regional day schools]
- Expenditures [School districts, charter schools, school based, and regional day schools]
- Enterprise Funds [School districts, charter schools]
- Debt Service [School districts]
- Financial Assistance [School districts]
- Supplemental Choices Tuition [School districts that receive tuition paid students, including Vocational and former Abbott districts]
- School Facilities [School districts]

(Figure 12) Data Entry Tabs – The image shows various data entry tabs inside AudSum

Revenues, Expenditures, Enterprise Funds and Debt Service
The data entry screens for Revenues, Expenditures, Enterprise Funds and Debt Service operate in a similar manner and are each described below.

Preloaded Information – Most of the state aid revenue data will be preloaded based on the state aid files at the DOE. You will not be able to edit most of the state aid figures. These items are fixed to match the final State Aid Notice. The exceptions are Other State Aids (line 500), where the auditor will record aid figures received outside of the main State Aid Notice (such as Non-public Transportation Aid) and TPAF Social Security.

(Figure 13) Entry Screen for Revenues – The image shows entry screen for revenues inside AudSum
Figure 13 shows part of the revenues data entry screen. The fields in the entry form are as follows:

- **Line#** - As compared with past versions of AudSum, new line numbers have been assigned to many of the lines. The intent of adopting new line numbers with greater distance between each value is to allow for the creation of new line items in a meaningful sequence if the need should arise. The new line numbers are in this column.

- **Title** – The narrative description of the line item.

- **Sub Title** - The narrative description of the chart of accounts section in which the line item is contained.

- **Account#** - Account number

- **Sum To Line** – the calculated summary line or lines that directly include this “Amount” in its calculation.

- **Amount** – The amount data entry field.

**Financial Assistance**

All school districts are required to prepare applicable Schedules of Financial Assistance (federal, state, and local) which include all active (i.e. - not closed) financial assistance programs in which a school district is participating, regardless of the fund in which the program is classified for accounting purposes. This requirement does not apply to charter schools. (Figures 14-17 show the fields for the Financial Assistance data screens. Refer to Single Audit in section II of the 2016-17 Audit Program for additional guidance concerning the content of these schedules. Here is a Single Audit section of the 2016-17 audit program.

Nonpublic financial assistance award amounts and cash remitted/received are preloaded in AudSum. Audit firms must data enter the amount of budgetary expenditures for each award. The department will use the amount entered by the auditor and verified by the board secretary/school business administrator as “Due to Grantor” to establish the amount that will be refunded to the department in the form of a deduction from the subsequent year’s state aid. Please contact nonpublicaid@doe.state.nj.us for questions regarding nonpublic programs and awards.

**State Nonpublic Financial Assistance - Prior Years** – The image below shows where the amount needs to be entered for each program.

(Figure 15) Schedule of Expenditures of State Financial Assistance – The image below shows where the amount needs to be entered for each program

(Figure 16) Schedule of Expenditures of Federal Awards – The image shows where the amount needs to be entered for each program

Supplemental Choices Tuition – Optional Screen

The Supplemental Data for Tuition Cost per Pupil Must be completed by regular school districts which receive tuition revenue. Completion of the Supplemental Data by regular districts who do not receive tuition revenue is optional. A Supplemental Data for Tuition screen is also available to vocational school districts. The vocational school districts are encouraged to complete this screen for an accurate distribution of costs for tuition purposes. Special Services, ESC’s, and Regional Day Schools do not fill out this form. It will be the auditors' responsibility to obtain allocation information from the school board secretary/business administrator.

Regular Districts:

In accordance with N.J.A.C. 6A:23A-17.1(e)2, the district can elect to determine on either an actual basis or an equitable basis of allocation the distribution of expenditures for (i.) Vocational Programs - Local Instruction (Lines 13160, 55240, 75040) (Accounts 11-3XX-100-XXX, 12-3XX-100-730); (ii.) Rental of
land and buildings (Line 49080) (Account 11-000-262-441); (iii.) Interest on lease purchase agreements with terms less than five years (Line 47140) (Account 11-000-290-832); (iv.) Student body activity expenditures of the general fund (Lines 17100, 17600, 25100, 56240, 75080) (Accounts 11-4XX-100-XXX, 12-4XX-100-730); (v.) Facilities Acquisition and Construction (Line 76260 plus 70240 less 76140) (Account 12-000-400-XXX); (vi.) Building use charges, if applicable (see Figure 17 for calculation instructions); (vii) Other Support Services, Student Special (Lines 42200 + 61740 + 75580 less 42120) (Accounts 11-000-219-XXX, 12-000-219-730 less line 42120 Residential Costs); (viii.) Related Services (Lines 40580, 60240, 75560) (Accounts 11-000-216-XXX & 12-000-21X-730); and (ix.) Benefits for Special Programs (Line 54240) (Account 11-2XX-100-XXX).

**Edit Check**
The data entered in the district wide and school based budget (if applicable) screens will total and carry into the Supplemental Tuition Choices screen in the column titled, “Total Expenditures”. Auditors may not enter allocations which, when combined, exceed the total expenditures for each line. An edit check will ensure that the “Calculated Total” for each line is less than the amount of district wide plus school based expenditures in the “Total Expenditures” column.

**(Figure 17) Building Use Charge Calculation**

<table>
<thead>
<tr>
<th>STEP</th>
<th>Calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1</strong></td>
<td>Calculate total debt service paid during the fiscal year (combine interest and principal).</td>
</tr>
<tr>

</tr>
</tbody>
</table>
The Building Use Charge should be included on an actual or equitable basis of allocation of your choice to the affected categories. Eligible interest on multiple bond issues may be calculated and allocated individually to affected categories by bond issue purpose.

Whichever method is utilized, the auditor should review the work papers for reasonableness, and supplemental data worksheet line 21 totals must agree with the appropriate line items in the audit summary worksheet.

**Vocational Districts:**
Beginning with the 2009 – 10 AudSum, a screen was added for vocational school districts to complete the supplemental data for tuition purposes. Vocational school districts may distribute certain operating costs between regular and special vocational programs using an allocation method that more accurately reflects the distribution of these costs than the proration by enrollments or by direct costs for all special programs.

*(Figure 18) Supplemental Choice for Regular Districts* – The image shows the screen shot for vocation school districts to add date for tuition purposes.
(Figure 19) Supplemental Choice for Regular Districts (Cont.) – The image below shows the screen shot for vocation school districts to add data for tuition purposes.

(Figure 20) Supplemental Choice for Vocational Districts – The image below shows the screen shot for vocation school districts to add data for tuition purposes.

School Facilities

A list of school facilities was preloaded based on the district’s long range facilities plan. Auditors may add, change, or delete school facilities as needed. Maintenance expenditures for other (non-school) facilities do not need to be reported separately. If reported, they should be reported under “Other Facilities.” Do not add in separately identified other facilities.

The data for entry is drawn from the Statistical Section Exhibits J-18 and J-19 of the District’s 2016-2017 Comprehensive Annual Financial Report (CAFR)
(Figure 21) **School Facilities Required Maintenance** – The image shows the screen where School Facilities required maintenance data can be entered.

The questionnaire (Figure 22) provides a summary of the existence of any qualifications or issues found in the audit process. Click in the “Available entries in entry field” column next to the question for a drop down menu with allowable answers.

Recapitulation of (Excess) Deficiency of Revenues (Over) Under Expenditures Report

A link is available for the generation of the Recapitulation of (Excess) Deficiency of Revenues (Over) Under Expenditures Report. The Recap is generated based upon the numbers keyed in the data entry screens. The purpose of this report is to show the calculation of the actual (excess) deficiency of revenues (over) under expenditures that will be downloaded to the 2018-2019 budget statement program for the 2016-2017 actual column. No entry will be shown in the 2016-2017 column of the revenues section for budgeted fund balance. Under GAAP reporting, the (excess) deficiency is the actual change in fund balance as a result of actual revenues and expenditures for the year. Either a net surplus or net deficit is generated for the year. As a reminder, the intent of the Tuition Reserve lines is to break out the two years of tuition rate adjustments that are adjusted in the second school year, so that adjustments can be reserved in advance:

- The revenue 'current year' (line 50) beginning balance represents the 2015-2016 tuition year. This tuition adjustment would be budgeted for payment in the 2017-2018 school year (second school year).
- The revenue ‘prior year’ (line 51) beginning balance represents the 2014-15 tuition year. This tuition adjustment would be budgeted for payment in the 2016-2017 school year (second school year).
- The expense 'current year' (line 90050) represents the 2016-2017 tuition year. This tuition adjustment would be budgeted for payment in the 2018-2019 school year (second school year). The amount on this line will be the beginning balance on revenue line 50 in the subsequent 2017-2018 AudSum.
- The ‘prior year’ (line 90051) represented the 2015-2016 tuition year. This tuition adjustment would be budgeted for payment in the 2017-2018 school year (second school year). The amount on this line will be the beginning balance on revenue line 51 in the subsequent 2017-2018 AudSum.
Indirect Cost Rate Data Entry

School districts, charter schools and renaissance school projects must enter information regarding total square footage and administrative square footage used by the LEA. The first section of the “Data Finalize & Certify” tab asks for the total square footage of all buildings. Please enter the total amount of square footage for all buildings in the district. The second line asks for the square footage of space used exclusively by district administrative staff. Please enter the total amount of office or meeting space used exclusively by district administrative staff. For the Indirect Cost Rate calculations performed by the department, the resultant administrative use ratio will be used when fixed costs are allocated between direct and indirect costs.

Once the data certified by the LEA’s independent auditor is reviewed for completeness and accuracy, the school district certification, inclusive of the square footage data, may then be completed. The certification is available under the “Data Finalize & Certify” tab.

Because the square footage entry may be subject to verification by the USDOE, the chief school administrator and the school business administrator must thoroughly review the statement of assurance prior to submission.

Detailed instructions and additional information about the calculation and use of Indirect Cost Rate(s) can be found at: DOE website for Indirect Cost Rate.

Data Finalize & Certify

The Data Certification is an e-signature process to identify the Audit Summary data status as "Certified" or "Not Certified".

- **Certified** - The data is finalized and locked in non-editable mode.
- **Not Certified** - The data is unfinalized and unlocked for entry and edit by the CPA user.

There are two kinds of User Certifications in the Audit Summary Online System:

**CPA/Auditor Certification**

In the CPA Certification screen (Figure 23) the data are finalized and certified by the CPA/auditor user.

Once the CPA/auditor user completes the data entry on the audited district, the CPA/auditor user must certify the data as finalized via the certification e-signature. Once certified, the entered data are locked to read-only (non-editable) status.

If the CPA/auditor user needs to modify the data certified and locked, the CPA/auditor user must change the status back to "Not Certified". As soon as the CPA changes the status to "Not Certified", the status of the District Certification is also set to "Not Certified".

Only the CPA/auditor certification controls the data status (locked or unlocked).
(Figure 23) **CPA Certification** – The image shows the screen shot where auditor can certify the AudSum data.

- **CPA (Auditor) Certification**
  - Once the data is finalized and certified by the CPA, the data is locked as read-only. If a correction to the finalized audit data is necessary, the CPA must first change the status on the "Data Finalize and Certify" screen to "Not-Certified".

  - **Not Certified**
  - **Certified**

  - **Your e-Signature**:
    - Name: CPA Firm
    - Title: 
    - Phone Number: 609-555-5555
    - Email Address: cpa@cpa.com
    - CPA Company Name: CAPS CPAS

  - **I certify that the submitted Audsum data (Questionnaire, Revenues, Expenditures, Fund Balance, Enterprise fund, Statements of Financial Assistance, Supplemental Data for Tuition Purposes, Debt service, and School Facilities) compiled as of June 30, 2017 has been edited for completeness and accuracy and understand that this data will be used in the preparation of the next Budget Program.**

  - CPA Certification Submit
  - Reset

**District Certification**

Once the CPA/auditor has certified the audit summary, the school district or charter school board secretary/business administrator must also certify through the district certification screen (Figure 24). The data is reviewed by the school district user. The district verifies and certifies the audit to NJDOE. The district certification does not control the data status (locked or unlocked).
(Figure 24) **District Certification** – The image below shows the screen shot where district can certify the AudSum data.

**School District Certification:**

Once you review the AudSum for completeness and accuracy, please certify your data.

If errors are found in the AudSum data, please inform the CPA auditor. The CPA will need to change the status of your AudSum to Not Certified before making corrections.

Statement of Assurance: By submitting the AudSum data and building square footage information, we acknowledge having reviewed that information which will be utilized by the New Jersey Department of Education (DOE) to calculate the district’s 2018-19 Indirect Cost Rate(s), and we hereby certify the following: (1) The information contained herein has been prepared in accordance with the instructions issued by NJ DOE and conforms to the criteria in Title 2 of CCR part 200- Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards and is correct to the best of our knowledge and belief. (2) No costs other than those incurred by this agency have been included in the indirect cost rate application. (3) The same costs have been treated as indirect costs have not been and will not be claimed as direct costs. Similar types of costs have been accorded consistent treatment. (4) All expenditures detailed on the application form have been made, and records supporting them have been maintained and are available for audit.

* Email Address: distri@k123.us

**District:** 9006 - HAMilton Township Regional Day School

**Name of School Business Administrator/Board Secretary:**

* Name: ba ba
* Title: ______________________
* Phone Number: 809-555-5555
* Email Address: ba@k123.us

**District:** 9006 - HAMilton Township Regional Day School

**You must check this box to complete the certification**

District Certification Submit  Reset
Note: if any fatal errors are detected in the data, the certification screen will not appear. Instead, the auditor will receive the following notice of data verification error(s):

**THERE ARE DATA VERIFICATION ERROR(S), YOU WILL NOT BE ALLOWED TO CERTIFY THE AUDIT.**

Please see details.

By clicking on the “Please see details” link, the auditor will be taken to the “Data Edit Check” screen.

If there are no errors, but there are warnings, a notice of existing warnings will appear in the certification screen. You should check the warnings. If they do not require any modifications, you may continue to certify the data.

**Data Edit Check**

This screen (Figure 25) lists any logical data errors requiring correction.

(Figure 25) Data Edit Check – The image shows the screen of edit check and data verification report

---

Fatal Errors and Warnings

There are two variations that may occur during the certification process involving Fatal Errors and Warnings.

Fatal Errors are errors, such as the revenues and expenditures being out of balance, which must be corrected before the audit can be certified and submitted.

Warnings occur when an issue which may or may not need to be corrected is detected. There may be no need for any change, but the issue might have been overlooked. For example: No financial data in the Enterprise Fund* (neither revenue nor expend. data was supplied in the Enterprise Fund).

Once you have made corrections and saved the data, you will need to return to the certification process.
Note: there may be a brief (less than one minute) time lag following when you save your data and when the errors and warnings are cleared. If errors you have corrected reappear when you attempt the certification process, wait a minute and retry.

Once the AudSum has been certified, the Data Status is indicated as Certified on the main menu. The CPA user is able to check the Data Status of all linked AudSums by opening the Link District page (See figure 26).

(Figure 26) Data Edit status of all linked districts – The image shows the screen that CPA can use to check the status for his/her school district.

A CPA can link multiple districts for audit.
Please select district(s) and enter a PIN# assigned by the DOE, then click “Link” to verify and assign you for the audit for on district(s):

The System will verify the PIN# you entered. If the PIN# verification is failure, you will not be able to link the district for the audit.
