SUMMARY

This report is the second of three planned Reports of the Comprehensive Accountability Office (CAO) concerning the final phase of the transition of the Newark Public Schools (NPS) from being a state supervised school district to full local control. This report is an Interim Report covering the period of February 1 through July 31, 2019. It follows the “1st Annual Report that covered February 1, 2018 through January 30, 2019.”¹ It reports on the district’s progress in meeting metrics described in an “Accountability Scorecard” that is part of the Transition Plan to local control. The CAO finds that the NPS is achieving “fully implemented” scores on the required metrics. The CAO also finds that many metrics have shown they are sustainable by the district into the future. A final report is planned for early 2020.

For a history of the program, the role of the Comprehensive Accountability Office, and explanation of the Scorecard and its Evaluation, readers will find a Background section in Appendix to this report

CAO REVIEW AND OBSERVATIONS

The Plan requires the CAO report to “score” the District’s efforts toward maintaining “substantial and sustained” progress toward meeting the expectations of the Plan. In its agreement with the Department, the work of the CAO does not include any interpretation or analysis of the data (i.e., could something have been done differently, or evaluating the quality of a presentation). It further reflects that the CAO “must remain neutral and not engage in interpretation, other than its role to ensure, to the extent reasonably possible, the reliability of the data.”

While the Plan’s expectation of the CAO to not interpret data is conceptually well-intended, in practice, the obligation to evaluate the status of each metric requires some level of limited judgment. Judgment, however, is inherent when it comes to meeting the intent and requirements of the project. The CAO has taken care to remain neutral in making these assessments. Upon review of the online documentation, interested parties may have different interpretations, as reasonable people may view content, data and observations from different perspectives.

In conducting its task, the CAO relied on the assigned Highly Skilled Professional (HSP) to gather and provide documentation for evaluation, as well as observations on district activities. Some judgment was exercised to request supplemental data as determined necessary to make observations. All other communications were through telephone or email inquiries and responses. For this report, the CAO’s evaluation is based on the CAO’s review of NPS documentation provided by the HSP and supplemental information requested by the CAO, all intended to reflect the Mechanism for Measurement for each metric.

EVALUATING AND SCORING EACH METRIC

The specific observations of the CAO are reflected on the following tables. There is a separate table for each metric. Each metric is shown by category and Plan element, along with the associated Mechanism for Measurement. In some cases, the table combines two related metrics in the same section (but separately scored) as they are closely linked. Documentation supporting the observations are available on the [CAO website, http://go.rutgers.edu/46g4vdyr](http://go.rutgers.edu/46g4vdyr)

Each metric includes an “Evaluation Comment” and “Finding” on the metric; this is the CAO’s observation on the information and the conclusion reached. This is reflected in the 1-4 numeric score assigned to the metric.

ACKNOWLEDGEMENTS

The CAO expresses its appreciation and thanks to the Highly Specialized Professional, Ms. Anzella Nelms, for her support, preparation, diligence, and thorough efforts to advise the CAO and provide organized and timely information as requested.

NPS Transition Metric Analysis

APPENDIX A

Background of State Supervision of Newark Public Schools

After more than two decades under full supervision by the State Department of Education, Newark Public Schools (NPS) continued its migration to full local control in February of 2018. The return of full local control, however, is predicated upon the district successfully meeting requirements of a Transition Plan (Plan) approved by the State Board of Education.

The Plan documents the process, actions, and commitments required by the District (its Administration and the now elected Board of Education, together) and the New Jersey Department of Education that allowed the State to withdraw from partial intervention in the areas of Governance and Instruction & Program. Successful and sustainable implementation will return authority and oversight over the District in its entirety to the local Board of Education. The State previously withdrew from areas of Operations, Fiscal Management, and Personnel.

The Plan “is predicated on optimism that progress will continue in the future.” However, it also acknowledges that care and attention are required to prevent the District from regressing on efforts to improve and a return to the circumstances that led to State intervention. The Plan, therefore, provides “assistance, transparency, and accountability during the transition period and is designed to support sustainable improvements that will continue to benefit the children of Newark for many years to come.” The plan created an “Accountability Scorecard” to measure the district’s success in implementing these improvements.

The Plan notes that over the last few years the District has seen significant success in achieving its goals and demonstrating that progress is sustainable. As the end of the long process, the Plan requires the Department to continue its monitoring to ensure the plan is successfully implemented and is sustainable. The Plan is scheduled to expire on January 31, 2020, but the State Board of Education must find that NPS has satisfied all components of the Plan before the transition to local control is complete.

To support the transition effort, the state has appointed a “Highly Skilled Professional” (HSP) to assist in the implementation of the plan. In addition, the State has placed Auditors in the district to support budgetary and accounting integrity.

A final element of support is the creation of the “Comprehensive Accountability Office.” Taken together, these elements, working in concert with the District and its combination of newly elected and remaining former advisory members of the Board of Education and the board-appointed Superintendent are expected to lead the way to continued success for the students of Newark.

Role of The Comprehensive Accountability Office

The Plan called for the State to partner with “an independent entity to form a Comprehensive Accountability Office (CAO) with the capacity to collect, analyze, and publish data regarding the ongoing operations and performance of school districts and boards recently exited from State intervention and returned to local control.” The NPS is the first district the CAO is tasked to support.

After a series of meetings with Department staff and consultants (which extended over the change in state administrations from 2017 into 2018), the Commissioner of Education, who oversees the work of the CAO,

engaged the Bloustein Local Government Research Center, a unit of the Rutgers University Bloustein School of Planning and Public Policy to serve as the CAO under a contract with the Department. Bloustein Local is composed of individuals with deep experience in New Jersey state and local government activities, along with an understanding of public school administration that enables them to perform this task. The Commissioner has expressed full confidence in the capacity of Bloustein Local to fulfill the unique position of the CAO .

The CAO is charged with gathering and analyzing data from the District and State (supported by the HSP) to monitor progress and compliance with the metrics established in the Plan’s Accountability Scorecard “to determine if the expectations for sustained progress and continual improvement continue to be met.”

Specifically, the CAO is be responsible to:

1. Compile relevant data and information to establish the annual status of the District compared to the Scorecard metrics and providing information necessary to assess annual progress on the Plan.
2. Publish and present the data to the Department and to the public in a credible, digestible, and actionable way, such as through the development of an easy to understand dashboard of District performance that will be publicly available.

The CAO is to present observations and findings based on evidence, but not to express value interpretations concerning Scorecard compliance. Under the Plan, the CAO report findings (along with other inputs), if warranted, allows the Department to establish interventions to address concerns or deficiencies.

This report is the first of two required annual reports required under the Plan. As the initial effort, the website to present data is will not be available until several months after the publication of this report, but, is intended to be available by June 30th at the latest. That date coincides with a required semi-annual update by the CAO. However, this report contains web links to the evidence relied upon by the CAO for its observations. Those material at those links will be transferred to the website when it is completed.

The Scorecard and its Evaluation

The Accountability Scorecard is the core of the CAO’s role. This table represents the expectations contained in the Transition Report on which the CAO conducts its efforts. Specifically, it is “to track and measure the District’s progress toward implementing this transition plan, and a timetable for activities relating to and leading to the withdrawal of State intervention, which identifies and sequences the benchmarks laid out throughout this Plan in the appropriate sections.”

The Scorecard tracks the Plan through five sections:

- Part 1 – Fundamental Considerations
- Part 2 – Governance
- Part 3 – Instruction and Program
- Part 4 – Fiscal Management
- Part 5 - Personnel

The Scorecard covers most, but not all the requirements in the Plan. It includes specific metrics and mechanisms for measurement that are aligned with the Plan. The work of the CAO is built on top of it. The Plan requires the CAO to assess compliance with the metrics through its measurement standards. The CAO's assessment is to be accompanied by documentation that supports its observations.

The Plan notes that it is not only the Scorecard, but that the Plan itself should be "seen as a complimentary process to the QSAC ." The District is still expected to complete the annual Statement of Assurance required by the QSAC and prepare for QSAC monitoring as required. The District filed for "equivalency" of Instruction and Program Indicators during the 2016-2017 school year and approval was given by the Department for a three-year period. That approval will expire in 2020 and the District will need to determine by November 15, 2019 whether it wants the Department to evaluate it under the Instruction and Program Indicators that became effective on July 1, 2018 or whether it wants to submit a new equivalency request.

The Plan calls for each metric to be evaluated on the following scale:

- 1 - **Not Implemented:** There is no significant evidence that the standard is implemented.
- 2 - **Partially Implemented:** A partially implemented standard is being met in only a limited way.
- 3 - **Substantially Meeting:** Most elements of the metric are being met and are sustainable.
- 4 - **Fully Implemented:** All elements of the standard are substantially implemented, are sustainable, and have a process for ongoing evaluation.

Given the timing of this report and the expected phase-in of various plan elements, the CAO has added to the list a Not Applicable (NA) category, indicating that the metric cannot be measured at this time, but is expected to be measurable for subsequent reports.

The Scorecard with the evaluation results as of this time is provided as Table 1. During the review the CAO observed that the Mechanism for Measurement for Metrics 8 and 9 is "Report by State" was inconsistent with the Metric. Compliance with both metrics requires the submission of documents to the Department (State). These metrics do not require a report by the state; they require action by the district. Upon consultation with the Department and the district, it was concluded the only valid meaning of the measurement is the filing of documents with the Department. Based on the foregoing, the CAO's observations are based on this adjustment and the report reflects the change from by to to for Metrics 8 and 9.

New Jersey is served by more than 1,500 distinct local government agencies: municipalities, school districts, utilities, counties, and more. Yet, even with this wealth of opportunity, precious little substantive research has been done within the local government environment to inform some of our state's most pressing policy issues.

The **Bloustein Local Government Research Center**, or **Bloustein Local** <http://blousteinlocal.rutgers.edu/> serves as a focal point and engages in a range of services, including:

- Encouraging and conducting applied and academic research on local government fiscal and administrative issues, emphasizing application and support to New Jersey local government.
