

New Jersey Student Learning Standards – Social Studies

Introduction

Social Studies

The ever-changing landscape of information and communication technologies have transformed the roles and responsibilities of the next generation of learners. Inquiry-based learning in social studies prepares students to produce and critically consume information in our global society. This document outlines social studies practices, disciplinary concepts, core ideas, and related performance expectations in a manner that promote learning experiences in which students actively explore the past, present, and future of the world through the study of history, economics, civics, and geography.

Mission

Social studies education provides learners with the knowledge, skills, attitudes, and perspectives needed to become active, informed, and contributing members of local, state, national, and global communities.

Vision

An education in social studies fosters a population that:

- Is civic-minded, globally aware, and socially responsible;
- Exemplifies fundamental values of democracy and human rights through active participation in local, state, national, and global communities;
- Makes informed decisions about local, state, national, and global events based on inquiry and analysis;
- Considers multiple perspectives, values diversity, and promotes cultural understanding;
- Recognizes the relationships between people, places, and resources as well as the implications of an interconnected global economy;
- Applies an understanding of critical media literacy skills when utilizing technology to learn, communicate, and collaborate with diverse people around the world; and
- Discerns fact from falsehood and critically analyzes information for validity and relevance.

Intent and Spirit of the Social Studies Standards

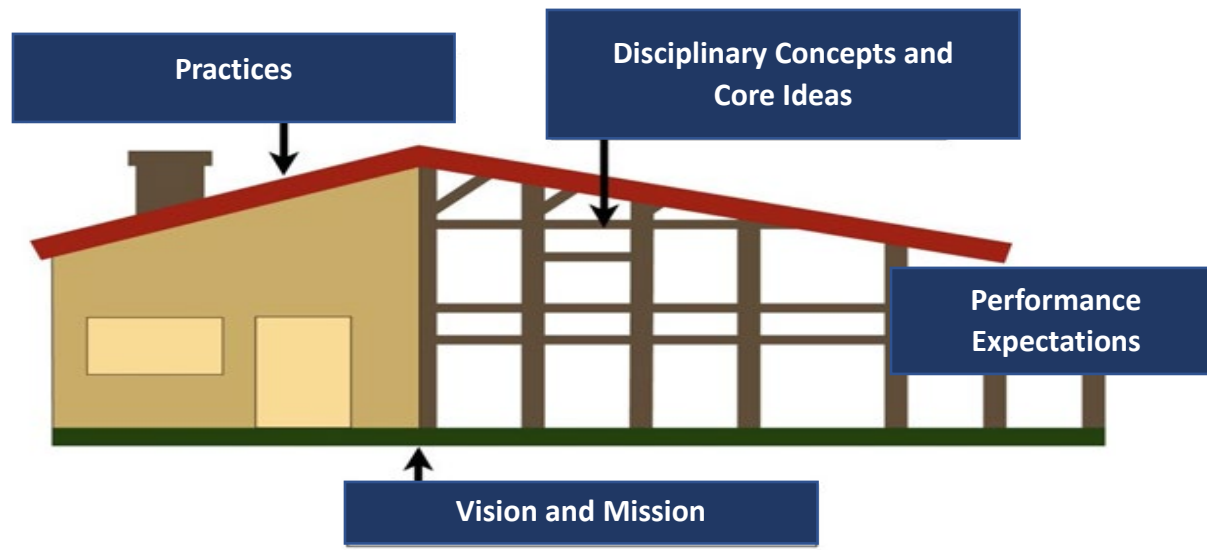

All students receive social studies instruction from Kindergarten through grade 12. Today’s challenges are complex, have global implications, and are connected to people, places, and events of the past. The study of social studies focuses on deep understanding of concepts that enable students to think critically and systematically about local, regional, national, and global issues. Authentic learning experiences that enable students to apply content knowledge, develop social studies skills, and collaborate with students from around the world prepare New Jersey students for college, careers, and civic life. The natural integration of technology in social studies education allows students to overcome geographic borders, apply scientific and mathematical analysis to historical questions and contemporary issues, appreciate cultural diversity, and experience events through the examination of primary sources. The 2020 New Jersey Student Learning Standards – Social Studies (NJSLS-2020) are informed by national and state standards and other documents such as the College, Career, and Civic Life (C3) Framework for Social Studies State Standards, as well as those published by the National Center for History Education, National Council for Social Studies, National Council for Geographic Education, Center for Civic Education, National Council on Economic Education, National Assessment of Educational Progress, and the Partnership for 21st Century Skills. Social studies instruction occurs throughout the K-12 spectrum, building in sophistication of learning about history, economics, geography, and civics at all ages.

Revised Standards

Framework for NJ Designed Standards

The design of this version of the NJSLS-SS is intended to:

- promote the development of curricula and learning experiences that reflect the vision and mission of social studies as stated in the beginning of this document;
- foster greater coherence and increasingly complex understanding of social studies knowledge, skills, attitudes, and perspectives across grade bands;
- establish meaningful connections among the major areas of study within social studies;
- prioritize the important ideas and core processes that are central to social studies and have lasting value beyond the classroom; and
- reflect the habits of mind central to social studies that lead to post-secondary success.

In this diagram:

- The *Vision and Mission* serve as the foundation for each content area's standards. They describe the important role of the discipline in the world and reflect the various statutes, regulations, and policy.
- The *Performance Expectations* are the studs and serve as the framework for what students should know and be able to do. They incorporate the knowledge and skills that are most important as students prepare for post-secondary success.
- The *Disciplinary Concepts and Core Ideas* are the joists and play an integral role in the framing by making connections among the performance expectations. Core ideas help to prioritize the important ideas and core processes that are central to a discipline and have lasting value beyond the classroom. They provide clear guidance as to what should be the focus of learning by the end of each grade band level (i.e., end of grades 2, 5, 8, and 12).
- The *Practices* are the roof and represent two key ideas. Positioned as the top of the house, they represent the apex of learning. The goal is for students to internalize the practices (habits of mind) and be able to apply them to new situations outside the school environment. The practices span across all aspects of the standards and are integral part of K-12 students' learning of the disciplines.

The following changes can be found in the 2020 NJSL-SS:

- New grade bands: by the end of grade 2, 5, 8, and 12;
- Specific performance expectations that address the time periods in Standard 6.1 US History: America in the World – *known as Three Worlds Meet (Beginnings to 1620) and Colonization and Settlement (1585-1763)* – now appear in the grade band by the end of grade 5 (see About the [NJSL-SS Eras](#) table below); and
- Additional performance expectations in Standard 6.3 Active Citizenship in the 21st Century (by the end of grade 8) to support current day civics instruction.

Social Studies Practices

The practices are the skills that individuals who work in the field of social sciences use on a regular basis. Because the purpose of social studies is to provide students with the knowledge, skills and attitudes they need to be active, informed, responsible individuals and contributing members of their communities, many of the practices can be applied to daily life. Curriculum writers and educators will want to consider how they can design learning experiences that will enable their students to develop these skills in conjunction with the content knowledge reflected in the core ideas and performance expectations (Citizens, 2008).

Practice	Description
Developing Questions and Planning Inquiry	Developing insightful questions and planning effective inquiry involves identifying the purposes of different questions to understand the human experience, which requires addressing real world issues. Inquiries incorporating questions from various social science disciplines build understanding of the past, present and future; these inquiries investigate the complexity and diversity of individuals, groups, and societies.
Gathering and Evaluating Sources	Finding, evaluating and organizing information and evidence from multiple sources and perspectives are the core of inquiry. Effective practice requires evaluating the credibility of primary and secondary sources, assessing the reliability of information, analyzing the context of information, and corroborating evidence across sources. Discerning opinion from fact and interpreting the significance of information requires thinking critically about ourselves and the world.
Seeking Diverse Perspectives	Making sense of research findings requires thinking about what information is included, whether the information answers the question, and what may be missing, often resulting in the need to complete additional research. Developing an understanding of our own and others' perspectives builds understanding about the complexity of each person and the diversity in the world. Exploring diverse perspectives assists students in empathizing with other individuals and groups of people; quantitative and qualitative information provides insights into specific people, places, and events, as well as national, regional, and global trends.
Developing Claims and Using Evidence	Developing claims requires careful consideration of evidence, logical organization of information, self-awareness about biases, application of analysis skills, and a willingness to revise conclusions based on the strength of evidence. Using evidence responsibly means developing claims based on factual evidence, valid reasoning, and a respect for human rights.
Presenting Arguments and Explanations	Using a variety of formats designed for a purpose and an authentic audience forms the basis for clear communication. Strong arguments contain claims with organized evidence and valid reasoning that respects the diversity of the world and

Practice	Description
	the dignity of each person. Writing findings and engaging in civil discussion with an audience provides a key step in the process of thinking critically about conclusions and continued inquiry.
Engaging in Civil Discourse and Critiquing Conclusions	Assessing and refining conclusions through metacognition, further research, and deliberative discussions with diverse perspectives sharpens the conclusions and improves thinking as a vital part of the process of sensemaking. Responsible citizenship requires respectfully listening to and critiquing claims by analyzing the evidence and reasoning supporting them. Listening to and understanding contrary views can deepen learning and lay the groundwork for seeking consensus.
Taking Informed Action	After thoroughly investigating questions, taking informed action means building consensus about possible actions and planning strategically to implement change. Democracy requires citizens to practice discussion, negotiation, coalition-seeking, and peaceful conflict resolution. When appropriate, taking informed action involves creating and/or implementing action plans designed to solve problems and create positive change.

Standards in Action: Climate Change

At the core of social studies education, is the goal to prepare students with the essential knowledge and skills to make their local and global communities a better place to live. The intent is for students to begin developing the requisite skills – information gathering and analysis, inquiry and critical thinking, communication, data analysis, and the appropriate use of technology and media – at the youngest grades for the purpose of actively engaging with complex problems and learning how to take action in appropriate ways to confront persistent dilemmas and address global issues.

As an example, leveraging climate change as an area of focus, provides an opportunity to design authentic learning experiences that are integrative of the disciplines within social studies, addresses an issue that has persisted across time and space, connects the past to the present and future, and leverages the use of disciplinary literacy skills to communicate their ideas and solutions for change. A well-designed social studies program addresses the totality of the human experience over time and space, and provides opportunities for students to engage in inquiry, develop and display data, synthesize findings, and make judgments. The NJSLSS provide a foundation for this type of learning. For example, the impact of human interactions on the environment is central to any course involving geographic concepts. However, new to this set of standards is a more intentional focus on addressing issues related to climate change. The intent is to foster learning experiences which involve students asking their own questions, seeking the perspectives of multiple stakeholders with diverse points of view, using geospatial technologies to gather data; all for the purpose of planning/proposing advocacy projects or analyzing current public policy regarding climate change and determining its effectiveness. Many of the standards that relate to climate change can be found in Standard 6.3, Active Citizenship in the 21st Century. Additionally, the Human Environment Interaction disciplinary concept and its associated performance expectations provide opportunities for students to engage with this topic.

Structure of the NJSLSS

The organization and content of the 2020 NJSLSS reflects N.J.A.C. 6A:8-5.1(a)1.iv., which requires at least 15 credits in social studies, including satisfaction of N.J.S.A. 18A:35-1 and 2; five credits in world history; and the integration of civics, economics, geography, and global studies content in all courses (N.J.A.C 6A:8-5.1 (a) 1). In addition, there are performance expectations which reflect the Amistad and Holocaust mandates in all grade bands. There are three social studies standards:

- 6.1 U.S. History: America in the World: All students will acquire the knowledge and skills to think analytically about how past and present interactions of people, cultures, and the environment shape the American heritage. Such knowledge and skills enable students to make informed decisions that reflect fundamental rights and core democratic values as productive citizens in local, national, and global communities. Standard 6.1 U.S. History: America in the World applies to grades K–12; at the K–2 and 3–5 levels, content is organized by disciplinary concepts. The strands and disciplinary concepts are incorporated in the alphanumeric code.
- 6.2 World History/Global Studies: All students will acquire the knowledge and skills to think analytically and systematically about how past interactions of people, cultures, and the environment affect issues across time and cultures. Such knowledge and skills enable students to make informed decisions as socially and ethically responsible world citizens in the 21st century. Standard 6.2 World History/Global Studies applies only to grades 5–12; at both the 5–8 and 9–12 levels, content organized by era. The strands and disciplinary concepts are incorporated in the alphanumeric code.
- 6.3 Active Citizenship in the 21st Century: All students will acquire the skills needed to be active, informed citizens who value diversity and promote cultural understanding by working collaboratively to address the challenges that are inherent in living in an interconnected world. Standard 6.3 Active Citizenship in the 21st Century applies to grades K–12; at the K–2 and 3–5 levels, content is organized by disciplinary concepts. The strands and disciplinary concepts are incorporated in the alphanumeric code.

The *core ideas* are derived from the disciplinary concepts and students’ understandings increase in sophistication over time as they engage with these ideas in new and varied contexts. The core ideas are what is most essential for students to learn and represent the knowledge and skills that they should be able to apply to new situations outside of the school experience. Curriculum writers and educators can use these core ideas as the basis for formative, summative, and benchmark assessments.

The *performance expectations* describe what students should know and be able to do. It is expected that curriculum writers and educators will bundle these performance expectations together in meaningful ways as a basis for classroom instruction and to guide the creation of formative, summative, and benchmark assessments.

Coding of Performance Expectations

To promote a unified vision of the NJSLS-SS, an abbreviated form of the disciplinary concepts is included in the alphanumeric code. The disciplinary concepts were abbreviated as follows:

Civics, Government and Human Rights (Civics)

- Civic and Political Institutions (PI)
- Participation and Deliberation (PD)
- Democratic Principles (DP)
- Processes, Rules and Laws (PR)
- Human and Civil Rights (HR)
- Civic Mindedness (CM)

Geography, People and the Environment (Geo)

- Spatial Views of the World (SV)
- Human Population Patterns (PP)
- Human Environment Interaction (HE)
- Global Interconnections (GI)

Economics, Innovation and Technology (Econ)

- Economic Ways of Thinking (ET)
- Exchanges and Markets (EM)
- National Economy (NE)
- Global Economy (GE)

History, Culture and Perspectives (History)

- Continuity and Change (CC)
- Understanding Perspectives (UP)
- Historical Sourcing and Evidence (SE)
- Claims and Argumentation (CA)

For Standards 6.1, grades K–2 and 3–5, and 6.3, all grades, the performance expectation code should be interpreted as follows (e.g., 6.1.2.CivicsCP.1):

6.1	2	CivicsCP	1
Standard number	By the end of grade	Strand / Disciplinary Concept	Performance Expectation

For standards 6.1 and 6.2, grades 6-12, the inclusion of the era impacts the coding of each performance expectation as follows ((e.g., 6.1.2.CivicsCP.3.1):

6.1	8	CivicsCP	3	a
Standard number	By the end of grade	Strand / Disciplinary Concept	Era	Performance Expectation

The Role of Essential Questions

Key essential questions recur throughout the study of history. They provoke inquiry and lead to deeper understanding of the big ideas that enable students to better comprehend how the past connects to the present. Curriculum writers and educators are encouraged to use essential questions (or develop their own) to inform the creation of their social studies curriculum and learning experiences.

A. Civics, Government, and Human Rights

- How do citizens, civic ideals, and government institutions interact to balance the needs of individuals and the common good?
- How have economic, political, and cultural decisions promoted or prevented the growth of personal freedom, individual responsibility, equality, and respect for human dignity?

B. Geography, People, and the Environment

- How do physical geography, human geography, and the human environment interact to influence or determine the development of cultures, societies, and nations?

C. Economics, Innovation, and Technology

- How can individuals, groups, and societies apply economic reasoning to make difficult choices about scarce resources? What are the possible consequences of these decisions for individuals, groups, and societies?
- How have scientific and technological developments over the course of history changed the way people live and economies and governments function?

D. History, Culture, and Perspectives

- How do our interpretations of past events inform our understanding of cause and effect, and continuity and change, and how do they influence our beliefs and decisions about current public policy issues?
- How can the study of multiple perspectives, beliefs systems, and cultures provide a context for understanding and challenging public actions and decisions in a diverse and interdependent world?

New Jersey Administrative Code Summary and Statutes

Curriculum Development: Integration of 21st Century Skills and Themes and Interdisciplinary Connections

District boards of education shall be responsible for the review and continuous improvement of curriculum and instruction based upon changes in knowledge, technology, assessment results, and modifications to the NJSLS, according to N.J.A.C. 6A:8-2.

1. District boards of education shall include interdisciplinary connections throughout the K–12 curriculum.
2. District boards of education shall integrate into the curriculum 21st century themes and skills ([N.J.A.C. 6A:8-3.1\(c\)](#)).

Twenty-first century themes and skills integrated into all content standards areas (N.J.A.C. 6A:8-1.1(a)3).

“Twenty-first century themes and skills” means themes such as global awareness; financial, economic, business, and entrepreneurial literacy; civic literacy; health literacy; learning and innovation skills, including creativity and innovation, critical thinking and problem solving, and communication and collaboration; information, media, and technology skills; and life and career skills, including flexibility and adaptability, initiative and self-direction, social and cross-cultural skills, productivity and accountability, and leadership and responsibility.

[N.J.A.C.6A:8-5.1 \(a\) 1. iv.](#) At least 15 credits in social studies, including satisfaction of N.J.S.A. 18A:35-1 and 2; five credits in world history; and the integration of civics, economics, geography and global content in all course offerings;

[N.J.A.C.6 A:8-5.1 \(a\) 1. v.](#) At least 2.5 credits in financial, economic, business, and entrepreneurial literacy, effective with 2010-2011 grade nine class

[NJSA 18A:6-3](#) Requires secondary course of study in the United States Constitution

[NJSA 18A:35-1,NJSA 18A:35-2](#) Requires 2 years of US History in high schools including history of New Jersey and of African-Americans

[NJSA 18A:35-3](#) Requires course of study in civics, geography and history of New Jersey

[NJSA 18A:35-4.1](#) Requires course of study in principles of humanity

[NJSA 18A:35-2.1](#) Requires the State Department of Education to develop curriculum guidelines for the teaching of civics pursuant to NJSA 18A:35-1 and NJSA 18A:35-2.

Amistad Law: [N.J.S.A. 18A 52:16A-88](#)

Every board of education shall incorporate the information regarding the history and contributions of African Americans to our country in an appropriate place in the curriculum of elementary and secondary school students. This law was updated via [N.J.S.A. 18A:35-4.43](#) to include: Every board of education shall include, in the curriculum of all elementary and secondary school students, instruction that infuses into all courses on the United States, the centuries of accomplishments by African Americans in the building and development of America including, but not limited to, the areas of industry, military, government, and the professions; local communities; math, science, medicine, and space; architecture and the arts; social institutions and culture; and other aspects of life in America.

Holocaust Law: [N.J.S.A. 18A:35-28](#)

Every board of education shall include instruction on the Holocaust and genocides in an appropriate place in the curriculum of all elementary and secondary school pupils. The instruction shall further emphasize the personal responsibility that each citizen bears to fight racism and hatred whenever and wherever it happens.

LGBT and Disabilities Law: [N.J.S.A. 18A:35-4.35](#)

A board of education shall include instruction on the political, economic, and social contributions of persons with disabilities and lesbian, gay, bisexual, and transgender people, in an appropriate place in the curriculum of middle school and high school students as part of the district's implementation of the New Jersey Student Learning Standards ([N.J.S.A.18A:35-4.36](#)) A board of education shall have policies and procedures in place pertaining to the selection of instructional materials to implement the requirements of N.J.S.A. 18A:35-4.35.

Laura Wooten Law: [N.J.S.A. 18A:35-41](#)

Each board of education shall provide a course of study in civics, which shall be taken by all students in an appropriate middle school grade. The course shall address: the values and principles underlying the American system of constitutional democracy; the function and limitations of government; and the role of a citizen in a democratic society. The board shall ensure that the course of study includes a minimum of two quarters of instruction, or the equivalent.

Diversity and Inclusion Law: [N.J.S.A. 18A:35-4.36a](#)

Each school district shall incorporate instruction on diversity and inclusion in an appropriate place in the curriculum of students in grades kindergarten through 12 as part of the district's implementation of the New Jersey Student Learning Standards.

Disciplinary Concepts

Civics, Government, and Human Rights

Disciplinary Concept	Description	Core Ideas
Civic and Political Institutions	The study of civic and political institutions includes concepts of the law, politics, and government that are essential to understanding the important institutions of society and the principles these institutions are intended to reflect.	<ul style="list-style-type: none"> • Civic and political institutions address social and political problems at the local, state, tribal, national, and/or international level. • Constitutions, laws, treaties, and international agreements seek to maintain order at the national, regional, and international levels of governance. <p>Constitutions establish a system of government that has powers, responsibilities, and limits that can change over time.</p>
Participation and Deliberation	Participation requires learning about public issues and determining how and when to take action to address them. Deliberation requires civic dispositions, such as honesty, mutual respect, cooperation, and attentiveness to multiple perspectives that individuals should use when they interact with each other on public matters. Deliberation includes learning processes that enable citizens to engage in constructive, informed, and decisive dialogue about important public issues. Both participation and deliberation require an understanding of the diverse arguments regarding the underlying principles as well as founding documents and their meanings.	<ul style="list-style-type: none"> • Civic participation and deliberation are essential characteristics of individuals who support democracy and its principles. • Civic deliberation requires civic dispositions, attentiveness to multiple perspectives, and understanding diverse perspectives.
Democratic Principles	Understanding democratic principles, such as equality, freedom, liberty and respect for individual rights, and how they apply to both official institutions and informal interactions among citizens is a fundamental concept of being a citizen in a democratic republic.	<ul style="list-style-type: none"> • Democratic principles concerning universal human rights, concepts of equality, and the commitment to human freedom are commonly expressed in fundamental documents, values, laws, and practices. • Social and political systems throughout time have promoted and denied civic virtues and democratic principles. • Personal interests and perspectives impact the application of civic virtues, democratic principles, constitutional rights, and universal human rights.

Processes and Rules	Processes and rules are how groups of people make decisions, govern themselves, and address public problems. This includes problems at all scales, from a classroom to local, state, and national public policy to the agreements among nations. Additionally, this includes studying how various rules, processes, laws, and policies work, which requires an understanding of political systems and defining and addressing public problems.	<ul style="list-style-type: none"> • Historical, contemporary, and emerging processes, rules, laws, and policies are modified as societies change in an effort to promote the common good and strive to protect human rights.
Human and Civil Rights	Human rights are universal, inalienable, and interdependent claims that derive from the inherent worth of every individual. They are the birthright of every human being regardless of race, sex, nationality, ethnicity, language, religion, or any other status. Human rights include the right to life and liberty, freedom from slavery and torture, freedom of opinion and expression, the right to work and education, and many more. These universal rights are not granted by states or governments but are inherent to every person.	<ul style="list-style-type: none"> • Human and civil rights support the worth and dignity of the individual. • Human rights serve as a foundation for democratic beliefs and practices. • Governments around the world support universal human rights to varying degrees.
Civic Mindedness	Civic mindedness is grounded in democratic principles and promotes civic virtues. Responsible citizens are informed and thoughtful, participate in their communities, act politically, and embrace civic dispositions. Important civic dispositions for a democratic society include civility, open-mindedness, compromise, and toleration of diversity. In a democratic society, individuals show concern for others' rights and welfare, fairness, trust in humanity and political systems, and a sense of public duty. The belief that one's own actions – alone or in combination with others – can make a difference is closely related to democratic principles and participation.	<ul style="list-style-type: none"> • An understanding of the role of an individual as a member of a state, the rights and responsibilities of citizens, how civic values are determined and practiced, and examples of how civic identity and values in one place are different in other places, is essential.

Geography, People and the Environment

Disciplinary Concept	Description	Core Ideas
Spatial Views of the World	Spatial views of the world focus on the creation of maps and use of geospatial technologies. Creating maps and other geographical representations is an essential and enduring part of seeking new geographic knowledge that is personally and socially useful and that can be applied in making decisions and solving problems. Once maps or other representations are created, it prompts new questions concerning the locations, spaces, and patterns portrayed.	<ul style="list-style-type: none"> • Geographic data can be used to analyze spatial patterns. • Maps, satellite images, photographs, and other representations can be used to explain relationships between the locations of places and regions, and changes in their environmental characteristics.
Human Population Patterns	Human population, patterns and movement focus on the size, composition, distribution, and movement of human populations and how they are fundamental and active features on Earth's surface. This includes understanding that the expansion and redistribution of the human population affects patterns of settlement, environmental changes, and resource use.	<ul style="list-style-type: none"> • Demographic shifts and migration patterns both influence and are impacted by social, economic, and political systems.

	Patterns and movements of population also relate to physical phenomena including climate variability, landforms, and locations of various natural hazards and their effects on population size, composition, and distribution.	<ul style="list-style-type: none"> • Environmental and cultural characteristics of a place or region influence spatial patterns.
Human Environment Interaction	Human-environment interactions are essential aspects of human life in all societies and they occur at local-to-global scales. Human-environment interactions happen both in specific places and across broad regions. Culture influences the locations and the types of interactions that occur. Earth's human systems and physical systems are in constant interaction and have reciprocal influences flowing among them. These interactions result in a variety of spatial patterns that require careful observation, investigation, analysis, and explanation.	<ul style="list-style-type: none"> • Human settlement activities impact the environmental and cultural characteristics of specific places and regions. • Political and economic decisions throughout time have influenced cultural and environmental characteristics. • Long-term climate variability has influenced human migration and settlement patterns, resource use, and land uses at local-to-global scales.
Global Interconnections	Global interconnections occur in both human and physical systems. Earth is a set of interconnected ecosystems of which humans are an influential part. Many natural phenomena have no perceptible boundaries. For example, the oceans are one dynamic system. The atmosphere covers the entire planet. Land and water forms shift over geological eons. Many life forms diffuse from place to place and bring environmental changes with them. Humans have spread across the planet, along with their cultural practices, artifacts, languages, diseases, and other attributes. All of these interconnections create complex spatial patterns at multiple scales that continue to change over time.	<ul style="list-style-type: none"> • Global interconnections create complex spatial patterns at multiple scales that continue to change over time.

Economics, Innovation and Technology

Disciplinary Concept	Description	Core Ideas
Economic Ways of Thinking	Economic decision-making involves setting goals and identifying the resources available to achieve those goals. Economic decision-making includes weighing the additional benefit of an action against the additional cost. Investigating the incentives that motivate people is an essential part of analyzing economic decision-making.	<ul style="list-style-type: none"> • Resources impact what is produced and employment opportunities. • Societies make decisions about how to produce and distribute goods and services and these decisions are influenced by the control of the means of production. • Economic ways of thinking are influenced by economists, economic theories, and economic laws (e.g., Smith, Malthus, Ricardo, Marx, Schumpeter, Keynes, Friedman).
Exchange and Markets	Exchange is when people voluntarily exchange goods and services and expect to gain as a result of the trade. Markets exist to facilitate the exchange of goods and services. Comparison of benefits and costs helps	<ul style="list-style-type: none"> • Since most choices involve a little more of one thing and a little less of something else, economic decision-making includes weighing

	identify the circumstances under which government action in markets is in the best interest of society and when it is not.	<p>the additional benefit of the action against the additional cost.</p> <ul style="list-style-type: none"> • The specialization of labor leads to greater efficiency in the means of production and the circular flow of goods and services between markets through a medium of exchange. • Governments affect both public and private markets through regulation, taxation, budget allocations, subsidies, tariffs, price regulation, and policies that increase or reduce production possibilities.
National Economy	The national economy includes studying how the changes in the amounts and qualities of human capital, physical capital, and natural resources influence current and future economic conditions and standards of living. All markets working together influence economic growth and fluctuations in well-being. (Monetary and fiscal policies are often designed and used in attempts to moderate fluctuations and encourage growth under a wide variety of circumstances.)	<ul style="list-style-type: none"> • Multiple economic indicators are used to measure the health of an economy. • Governments and financial institutions influence monetary and fiscal policies. • Advancements in technology and investments in capital goods and human capital increase economic growth and standards of living.
Global Economy	The global economy is the system of trade and industry across the world that has emerged due to globalization. Economic globalization occurs with cross-border movement of goods, services, technology, information, and human, physical, and financial capital. Understanding why people specialize and trade, and how that leads to increased economic interdependence, are fundamental steps in understanding how the world economy functions. While trade provides significant benefits, it is not without costs. Comparing those benefits and costs is essential in evaluating policies to influence trade among individuals and businesses in different countries.	<ul style="list-style-type: none"> • Global economic activities involve decisions based on national interests, the exchange of different units of exchange, decisions of public and private institutions, and the ability to distribute goods and services safely. • Economic globalization affects economic growth, labor markets, human rights guarantees, the environment, resource allocation, income distribution, and culture.

History, Culture, and Perspectives

Disciplinary Concept	Description	Core Ideas
Continuity and Change	Change and continuity over time require assessing similarities and differences between historical periods and between the past and present. It also involves understanding how a change in one area of life relates to a change in other areas, bringing together political, economic, intellectual, social, cultural and other factors. Understanding the interrelation of patterns of change requires evaluating the context within which events unfolded in	<ul style="list-style-type: none"> • Chronological sequencing serves as a tool for analyzing past and present events. • Historical events and developments were shaped by the unique circumstances of time and place as well as broader historical contexts.

	order not to view events in isolation, and to be able to assess the significance of specific individuals, groups, and developments.	<ul style="list-style-type: none"> • There are multiple and complex causes and effects of historical events. • Understanding the interrelated patterns of change by examining multiple events allows for a clearer understanding of the significance of individuals and groups.
Understanding Perspectives	Understanding perspectives requires recognizing the multiplicity of points of view in the past, which makes it important to seek out a range of sources on any historical question. One must recognize that perspectives change over time, so that historical understanding requires developing a sense of empathy with people in the past whose perspectives might be very different from those of today. Analyzing perspectives requires understanding how historical contexts shape people’s perspectives.	<ul style="list-style-type: none"> • To better understand the historical perspective, one must consider historical context. • Complex interacting factors influence people’s perspective.
Historical Sourcing and Evidence	Historical sourcing and evidence are based on a review of materials and sources from the past. Examining sources often leads to further questions as well as answers in a spiraling process of inquiry. Determining the values and limitations of sources is a process that involves taking into account features of the source itself, such as its creator, date, purpose, and content in order to assess the validity and reliability of the source.	<ul style="list-style-type: none"> • Historical sources and evidence provide an understanding of different points of view about historical events.
Claims and Argumentation	Claims are statements, potentially arguable, about what is valid/true and about what should be done or believed. Claims can address issues of change over time, the relevance of sources, the perspectives of those involved and many other topics. Claims must be based on evidence. Argumentation is a social process of two or more people(s) making arguments, responding to one another and modifying or defending their positions accordingly. Arguments are claims backed by reasons that are supported by evidence from multiple relevant historical sources and interpretations into a reasoned argument about the past.	<ul style="list-style-type: none"> • Evidence from multiple relevant historical sources and interpretations can be used to develop a reasoned argument about the past.

6.1 U.S. History: America in the World by the End of Grade 12

Era 1. Colonization and Settlement (1585–1763)

North American Colonial societies adapted European governmental, economic, and cultural institutions and ideologies to meet their needs in the New World.

Core Idea	Performance Expectations
Civic and political institutions address social and political problems at the local, state, tribal, national, and/or international level.	<ul style="list-style-type: none"> 6.1.12.CivicsPI.1.a: Explain how British North American colonies adapted the British governance structure to fit their ideas of individual rights, economic growth, and participatory government.
Civic participation and deliberation are essential characteristics of individuals who support democracy and its principles.	<ul style="list-style-type: none"> 6.1.12.CivicsPD.1.a: Use multiple sources to analyze the factors that led to an increase in the political rights and participation in government.
Global interconnections create complex spatial patterns at multiple scales that continue to change over time.	<ul style="list-style-type: none"> 6.1.12.GeoGI.1.a: Explain how geographic variations impacted economic development in the New World, and its role in promoting trade with global markets (e.g., climate, soil conditions, other natural resources).
Economic globalization affects economic growth, labor markets, human rights guarantees, the environment, resource allocation, income distribution, and culture.	<ul style="list-style-type: none"> 6.1.12.EconGE.1.a: Explain how economic ideas and the practices of mercantilism and capitalism conflicted during this time period.
Historical events and developments were shaped by the unique circumstances of time and place as well as broader historical contexts.	<ul style="list-style-type: none"> 6.1.12.HistoryCC.1.a: Assess the impact of the interactions and conflicts between native groups and North American settlers.

Era 2. Revolution and the New Nation (1754–1820s)

The war for independence was the result of growing ideological, political, geographic, economic, and religious tensions resulting from Britain’s centralization policies and practices. The United States Constitution and Bill of Rights were designed to provide a framework for the American system of government, while also protecting individual rights. Debates about individual rights, states’ rights, and federal power shaped the development of the political institutions and practices of the new Republic.

Core Idea	Performance Expectations
Constitutions, laws, treaties, and international agreements seek to maintain order at the national, regional, and international levels of governance.	<ul style="list-style-type: none"> 6.1.12.CivicsPI.2.a: Prepare and articulate a point of view about the importance of individual rights, separation of powers, and governmental structure in New Jersey’s 1776 constitution and the United States Constitution. 6.1.12.CivicsPI.2.b: Examine the emergence of early political parties and their views on centralized government and foreign affairs and compare these positions with those of today’s political parties.
Civic deliberation requires civic dispositions, attentiveness to multiple perspectives, and understanding diverse perspectives.	<ul style="list-style-type: none"> 6.1.12.CivicsPD.2.a: Compare and contrast the arguments of Federalists and Anti-Federalists during the ratification debates and assess their continuing relevance.
Historical, contemporary, and emerging processes, rules, laws, and policies are modified as societies change in an effort to promote the common good and strive to protect human rights.	<ul style="list-style-type: none"> 6.1.12.CivicsPR.2.a: Use primary sources to explain how judicial review made the Supreme Court an influential branch of government and construct an argument regarding the continuing impact of the Supreme Court today.

6.2 World History: Global Studies by the End of Grade 12

Era 1. The Emergence of the First Global Age: Global Interactions and Colonialism

The methods of and motivations for exploration and conquest resulted in increased global interactions, differing patterns of trade, colonization, and conflict among nations. Colonization was inspired by the desire to have access to resources and markets, often at the expense of the indigenous culture, population, and environment.

Core Idea	Performance Expectations
Geographic data can be used to analyze spatial patterns.	<ul style="list-style-type: none"> 6.2.12.GeoSV.1.a: Use geographic representations to assess changes in political boundaries and the impact of European political and military control in Africa, Asia, and the Americas by the mid-18th century.
Human settlement activities impact the environmental and cultural characteristics of specific places and regions.	<ul style="list-style-type: none"> 6.2.12.GeoHE.1.a: Determine the role of natural resources, climate, and topography in European exploration, colonization, and settlement patterns.

Era 4. Half-Century of Crisis and Achievement: The Era of the Great Wars

Nationalism, imperialism, industrialization, and militarism contributed to an increase in economic and military competition among European nations, the Ottoman Empire, and Japan, and led to World War I. The failure of the Treaty of Versailles, the impact of the global depression, and the expansionist policies and actions of Axis nations are viewed as major factors that resulted in World War II. World Wars I and II were "total wars" in which nations mobilized entire populations and economies and employed new military tactics that resulted in unprecedented death and destruction, as well as drastic changes in political boundaries. World Wars I and II challenged economic and political power structures and gave rise to a new balance of power in the world. Economic, technological, and military power and bureaucracies have been used by nations to deliberately and systematically destroy ethnic/racial, political, and cultural groups.
